MACROM

M–TVT300D

DIGITAL TERRESTRIAL TELEVISION

USER MANUAL

MACROM

Feature:

- Use Dibcom dib 7070m high performance mobile chip.
- Two T-NIM structure performs good diversity reception with signal gain around 3-6dB
- Speed over 230km/h min (at 8k,64QAM,CR2/3,GI1/8,474MHz)
- High doppler effect correction
- Provide antenna power supply function for pair use with mobile active antenna
- Over 1000 channels TV & radio Programmable
- Channel list editing
- Favorite channel list editing
- PIG (Picture in Graphic) support
- Electronic program guide (EPG) or on screen channel information
- software upgrade
- OSD teletext (DVB ETS 300 706) and subtitle function support (EU model)
- VBI teletext support (EU model)
- Fast scan for high speed driving and cross different area

Technical Specification

Tuner:

RF Input	UHF: 470 MHz ~ 862MHz VHF: 174 MHz ~ 230 MHz
Input Impedance	75Ω
Signal Level	-78dBm ~ -20dBm
Connector Type	F Terminal
Channel Band Width	6M/7M/8M

Demodulation

Standard	DVB-T EN300 744
Constellation	QPSK, 16QAM, 64QAM
Guard Interval	1/32,1/16,1/8,1/4
FEC	1/2,2/3,3/4,5/6,7/8
COFDM Carrier Mode	2K And 8k Non Hierarchical/Hierarchical

Video Decoder

Standard	MPEG-2 MP@HL
Transport Stream	ISO/IEC 13818-1 MPEG-2
Video Aspect Ratio	4:3 /16:9
Video System	PAL/NTSC
Video Output	1 ± 0.3Vpp
Video Resolution	720*576@25fps or 720*480@30fps

Audio Decoder

Standard	ISO/IEC 11172-3
Audio Decoder	MPEG-1 audio Layer II
Audio Channel	R/L/ST
Audio Output	1Vpp 47Kohm Adjustable With E Volume

General:

MPEG ⅡChip	SUNPLUS SPHE1002AT With 32bit RISC ARC CPU 121.5 MHz
Flash Memory	8Mega bit
SDRAM	64 Mega bit
Operating Temperature	-10℃~+50℃
Storage Temperature:	-40℃~+65℃
Power Supply	DC 12V＜320 mA
Power Consumption	Running: 3.8W Max , Standby :2W Max

Remote Control Unit(RCU)
- POWER:
  Switch the receiver between stand-by & on modes
- Mute ⊠ :
  Mute the audio output
- Numeric Keys(0~9):
  For direct entry of channel number or input of alphanumeric characters
- MENU:
  Access the main menu
- CANCEL:
  To return to previous status or exit
- CH+/− (▲/▼):
  Change channels sequentially up or down in viewing mode and move to the next higher or lower item in the menu
- CH LIST:
  A list will enter the channel in viewing mode
- VOL+/−(◄/►):
  Alter the Audio output level up or down in viewing mode or move to the left or right item in the menu
- OK:
  Select an item or confirm a choice.
- EPG (Electronic Program Guide):
  Call up the EPG function
- INFO:
  Display information on viewed channel
- Fast scan:
  Searching all channel quickly

1. BASIC FUNCTIONS

1.1 Enter into system and power on-off

Enter into DVB system

It will enter DVB mode as soon as system power on.

It will continue to play the last est program before previous power off if the database having and TV. or RADIO program.

Power on

When it is "standby" mode, press "power" to power on.

Power off

When it is running, press " power" will enter into "standby" mode.

1.2 Volume adjustment and Mute

Press "VOL +/-" to adjust volume when system is in normal playing mode: and it will show volume bar on the image.

Press "MUTE" to enter into the mode when normally playing and repress "MUTE" to back the normal state.

1.3 Station switch

Press "CH+/-" to switch to the previous or next program.

Press "OK" to switch to the speediness program list, press "VOL +/-" to select different program class; press "CH+/-" to select program

Press "OK" to affirm program Selection, press "EXIT" to hide menu

1. Press number keys to input program number.

2. If there are some favorite programs that been set up, just press "FAV" to enter into the favorite program list:

Press "CH+/-" to select favorite program, Press "OK" affirm the selection, press "EXIT" to hide menu.

1.4 Display information of programs

Press key "INFO" to show the information of current programs when it is in normal playing state. Press again to show more detail information.

1.5 Program return

Press key "RECALL" under state of full-screen to return to the previous program played.

1.6 Audio language switch and L/R channel switch

1. Press "AUDIO" key to switch the language of current programs and switch among "stereo"→"Left"→"right"(stereo→left channel→ right channel)

2. Press "VOL +/-" to switch among "stereo" "left" "right"(stereo→left channel→right channel),press "CH+/-" to switch the language of sound.

3.Press "OK"key confirm the selection and return to full-screen play mode, press
"EXIT"   to return to full -screen play mode but not save the setting.

1.7 Electronic programs guide(EPG)

1.You can press key"EPG"on the remote controller to enter into the EPG page the
   bottom Line shows hint information for keys, corresponding to the colors on the
   remote controller: RED, GREEN, YELLOW, BLUE;
(8).Press"VOL+/-"to switch between Tab 4 and Tab 5 ;
2. Press"GREEN"key to enter into Weekly Mode to display the programs and program
   information in different time ranges of the currently program list within one week, as
   shown in Figure 3.7:

Figure 3.7 Weekly Mode

(1).Press PGUP&PGDW key to switch between Sunday—Saturday in Tab 3;
(2).Press CH+/- key to move upward and downward to switch between the different
     programs in Tab 5;
(3).Press VOL+/- key to choose to view the program information in different time
     ranges in Tab 6.
3. When the cursor stops on Tab 5 in Figure 3.6 Tab 6 in Figure 3.7, press the yellow
   key to choose the detailed information corresponding to the current program, as
   shown in Figure 3.8:

Figure 3.8 Extended Mode

4. When the cursor stops in Tab 5 of Figure 3.6 and Tab 3.7, press the blue key to enter Wake up Timer menu to book programs, as shown in Figure 3.9:

Figure 3.9 Wake up timer

5. Press"EXIT"to exit from EPG.

1.8 Teletext

1.If you want to teletext, please press"TTX"on the remote controller to enter into the teletext page. As shown in the figure below:

Figure 3.10 Teletext page

2.Input three digits to go to corresponding page you want;
3.Press"CH+" to go to the previous page, while press"CH-"to go to the next page;
4.Press"VOL-"to back for 100 pages, while press"VOL+"to advance for 100 pages.
5.Press"TTX"or"EXIT"to exit from teletext.

1.9 Subtitle

1.Subtitle is defaulted to be off; to see the capitation information, press the SUB-
  TITLE key on the remote controller to enter the Subtitle menu of the current programs.
2.Press VOL+/- key to choose whether to open Subtitle, press CH+/- key move
  upward and downward to choose language.

2.DIGITAL TV

In the main menu of the system, under Digital TV, there are such as options as auto
TV search or broad cast programs, program management, system set up, software
update and software version information view etc.

In Main Menu, press CH+/- key to choose Digital TV option and then Press OK key
once to enter Digital TV menu.

2.1 INSTALLATION

There are three kinds of Installation mode as follow:
1. Area Search: searching programs by scan area;
2. Manual Search
3. Auto Search

You can enter into parameter"installation page"via input password digital (default
password is"0000")

2.1.1 Area Search

Area search is a kind of intelligent and convenient mode of programs searching,
which covers programs of all frequency points of target countries and regions.

At present, this system covers many targets countries and regions including:
Germany/ England/ Italy/ France/ Spain/ Holland/ Taiwan/China Norway/ Swedish /
Finland;

The default country(region) of system is Germany(you can select target countries you
want under system setting   scan Area).

1. You can move the cursor to"area search"via press"CH+/-" key under"installation
   menu" ,then press"enter"to enter into area searching page.
2. After entering into area search page, system will scan all programs one under
   frequency points of current countries or regions selected automatically.
3.During scanning, press"EXIT" key to stop and exit scanning.
4. If any program is detected and scanning process is finished,system will
   exit the scanning page and to play them in window automatically.

2.1.2 Manual Search

If you understand much about digital TV and know the frequency of the program
or if you want to scan the program at any frequency required, you can select manual
scanning, which can save your much time.

1. You can move the cursor to "area search" via press "CH+/-" key under "installation menu", then press "enter" to enter into area searching page.
2. Prior manual scanning, you need to configure relevant parameters including:
(1). Freq(KHz): the default frequency is 474000KHz, you can input relevant digital to modify it.;
(2). Band Width: the default value of bandwidth is 8 MHz. while you can set it to 6 MHz, 7 MHz, 8 Mhz.;
3. Press "OK" key after configuration of start manual scan.
4. If any program is detected and the scanning process is finished, system will exit the scanning page and save the program, at the same time return to the "installation menu" and to play them automatically. As shown in the figure below:

2.1.3 Auto Search

You can search the programs of any channel.
1. You can move the cursor to "area search" to enter into area searching page, As shown in figure below:

Figure 4.7 auto search menu

2. Prior to auto scanning, you need to configure relevant parameters including:
(1). Start Freq(KHz): the default frequency is 474000KHz, you can input relevant digital to modify it.;
(2). End Freq(KHz): the default frequency is 474000KHz. While you can input relevant digital to modify it;
(3). Band Width: the default value of bandwidth is 8 MHz. while you can set it to 6 MHz, 7 MHz, 8MHz .;
3. Press "OK" key after configuration of parameters to start manual scan.
4. If any program is detected and the scanning process is finished, system will exit the scanning page and save the program, at the same time return to the "installation menu" and to play them automatically. As shown in the figure below.

2.2 CHANNEL MANAGER

System offer an efficient function of channel management such as channel deleting, marking, moving, locking, sorting and grouping.

There are two independent pages for channel management, TV and RADIO.
You can enter the page via "digital TV channel manager" as shown in the figure below:

Figure 2.8 Channel Manager menu

2.2. 1 Channel Organizer

Channel organizer page includes favorite channel deleting,moving, locking and rename.

Figure 2.9 Channel Organizer page

1. It will pop up and dialogue box prompting that"Channel not available" when there are no channels in database to enter into,and it will not enter into channel organizer page.
2. Channel organizer menu includes: Favorite Channel, Delete Channel, Move Channel ,Lock Channel. 3. All set up and operation are the same as in TV channel.

2.3 CONFIGURATION

Configuration provides individualized system setup function,you can configure the system according to your own hobby and demand. You can enter Configuration menu via the menu (MENU→Digital TV→Configuration) .

2.3.1 OSD

Via OSD option setup, you can set the user interface display mode according to your own demand. Via the menu(MENU→ DigitaTV→ Configuration→ OSD), You can enter OSD menu, as shown in Figure 2.20:

All options are listed on the left of the OSD menu, when the cursor moves on the option in OSD menu, the values corresponding to this option on the right or the menu, press CH+/- key to move upward and downward to choose the options in OSD menu, press CH+/- key to move upward and downward to choose the options in OSD menu.
There are following options in OSD menu:

Figure 2.20 Setting page

(1). OSD option sets system menu mode ;currently.

(2). Time on OSD Option sets whether to display system time in full-screen play channel, Move the cursor to Time on OSD option, press VOL+/- key to choose between on and off, the default is off.

(3). Trans option sets menu transparency, press VOL+/- key to adjust between 0%-60%.

(4). Trans option sets menu transparency, press VOL+/- key to adjust between 0%-60%.

1.OSD Timeout option sets some information hint dialogue box and displays time length, move the cursor to OSD Timeout option, press VOL+/- key to choose circularly between Bottom and Top;

2.OSD Language option: The system has the user interface supporting a couple of languages, you can set language via OSD language option:

(1).Move the cursor onto OSD Language option, Press RIGHT key to enter OSD Language List as shown in Figure 2.21:

(2).Press VOL+/- key choose language;

(3).Press OK key to confirm system interface language selection,then the setting is effective, and then the interface language turns into the currently chosen language, the cursor can move onto OSD Language, option on the left;

3. 1st Audio Language option: Press VOL+ key to enter the currently supported Audio Language list, in the Audio Language list, press CH+/- key to choose language , press OK key to confirm;

4. 2nd Audio Language option: Press VOL+ key to enter the currently supported Audio Language list, in the Audio Language list, in the Audio Language list, press CH+/- key to choose language, press OK key to confirm;

5.Press OK key to confirm the editing action in OSD menu, the system will hint with "Update succeeds"and then return to the previous menu.

2.3.2 TV

TV set up provides convenient TV input mode, you can via menu (MENU→Digital TV→Configuration→TV),enter TV set .

All options are listed on the left of the menu, when the cursor moves to the option on the left of the TV menu, the values corresponding to this option can be display on the right of the menu.

2.3.2.1 Display Mode

TV mode can change the mode of the on put video, you can adjust TV mode according to the actual situation of you receiving equipment.

(1).Move the cursor to Display Mode option, press VOL+/- key to choose circularly among the options, and the TV mode set can be effective immediately;

(2).TV Mode can be set as Auto, PAL, NTSC;

(3).Default TV Mode: AUTO;

(4).Press OK key to save the setting, the system will hint with "Update succeeds"

2.3.2.2 Aspect Ratio

Video output mode can change the mode of video out put, you can adjust TV mode according to actual situation of you receiving equipment.

(1).Move the cursor to Aspect Ratio option, press VOL+/- key to move circularly and choose options;

.

(2).Aspect Ratio can be set as 16:9, 4:3 Pan Scan, 4:3 Letter Box;

(3).Default Aspect Ratio 4:3 PS;

(4).Press OK key to save the setting, the system will hint with .

2.3.2.3 Video Output

Video output mode can change the mode of video output, you can adjust TV mode according to the actual situation of you receiving equipment.

1. Move the cursor to Video Output option, press VOL+/- key to move circularly and choose options and the setting can be effective.

2. Video Output mode can be set as CVBS, RGB;

3. Default: RGB;

4. Press OK key to save set, the system will hint with "Update succeeds".

2.3.2.4 Brightness

If the brightness is not proper during watching, you can adjust the current brightness to be a proper one.

1.Move the cursor to Brightness option, press VOL+ key to move the cursor into the Properties list on the right, as shown in Figure 2.23:

Figure 2.23

2.Press CH+/- key to move upward and downward the cursor to choose, press ENTER key to confirm; in this moment, move the cursor onto the options on the left, and then values will become the ones you want.

3.Brightness can be set as: 0%~100%;

4. Default: 80%;

5. Press OK key to save the setting, the system will hint with "Update succeeds".

2.3.2.5 Contrast

You can set system constant via contrast option.

1.Move the cursor to contract option, press VOL+ key to move the cursor into the Properties list on the right.

2.Press CH+/- key to move upward and downward the cursor to choose, press OK key to confirm, in this moment, move the cursor onto the options on the left, and then values will become the ones you want.

3.Contrast can be set as: 0%~100%;

4.Default:80%;

5.Press OK key to save the setting, the system will hint with "Update succeeds".

2.3.2.6 HUE

Adjust the system hue.

1.Move the cursor to HUE option Press VOL+ key to move the cursor into the Properties list on the right.

2.3.2.7 Saturation

Adjust the system Saturation.

1.Move the cursor to Saturation option, Press VOL+ key to move the cursor into the Properties list on the right.

2.Press CH+/- key to move upward the cursor to choose and press ENTER key to confirm, in this moment, move the cursor onto the options on the left, and then values will become the ones you want.

3.Saturation can be set as: 0-12; "Update succeeds";

4.Default:0;

5.Press OK key to save set, the system will hint with "Update succeeds".

2.3.3 System Set up

System set up menu can provide convenient system set up, you can via menu (MENU→ Configuration   System Set up) enter System Set up menu, as shown in Figure 2.27

Figure 2.27 System Set up menu

In System Set up menu,

(1).Press CH+/- key to move upward and downward the cursor to choose option;

(2).When the cursor stays on the option: Press VOL+/- key to:
choose circularly among the values in this option or press VOL+ key to move the cursor into the right list, press CH+/- key to move upward and downward the cursor to the choose, press OK key to confirm;

(3).To edit the option in the System Set up menu, press OK key to save the information and return previous menu;

(4). Press EXIT key to return the previous menu.

2.3.3.1 EQ setup

To set output sound effect default: standard

2.3.3.2 Surround

To set stage effect default: OFF

2.3.3.3 Active Antenna

Select on to turn on the 5V supply to active antenna, if ANT circuit short, the ANT power supply will turn off automatically select OFF for Non-Active antenna.

2.3.3.4 JPEG Effect

You Can turn on the JPEG effect to improve picture Quality of JPEG

2.3.3.5 LCN

If you turn on the LCN (logic channel NO.) function and the DVB-T program included LCN information, then the channel NO. will display the LCN channel NO. only after auto channel scan.
LCN channel list usually defined by program vender or broadcaster.

2.3.3.6 Area

TO set scanning area and choose, choose area to download preset channel Germany/England/Italy/France/Spain/Holand/Taiwan/China/Norway/Swead/ Finland supported, depending on different version.

2.3.4 Time

Via menu(MENU→ Digital TV→ Configuration time)

You can set Timer Mode in Time page: Timer Mode: set time mode, Date: set date, Time: set time, GMT Off set: set GMT Off set, Summer Time: set summer time. In time menu, there is one time mode, Auto setting:revise via setting GMT Offset, Summer Time options.

1. The system defaults the setting as Automatic, press CH+/-key to move upward and downward the cursor to move only between Timer Mode, GMT offset and Summer Time.
(1). Move the cursor to GMT offset option, press VOL+ key to move the cursor into the properties list on the right.
(2). Press VOL+/- key to move upward and downward the cursor to choose, you can see corresponding change in time option, Press OK key to confirm;
(3). Move the cursor to Summer Time option and then press VOL+/- key to set Summer Time;
2. After time is set, press OK key to save the setting, the system will hint with "Update succeeds".

2.3.5 Wake up Timer

If you want to set channel playing at curtain time or giving hint information . You can set via Wake up Timer→menu.

In Wake up Timer menu, you can set Timer No: set Wake up event number, the system can support at most 8 events, Timer Mode: set time mode, Wake up Message: set wake up message, Wake up Channel: set wake up channel name, Wake up Date: set wake up date, On Time: set wake up time, Duration: set duration.

1. Hunit with some related message at certain time:

(1). Set Wake up Time Event Number: Move the cursor upward and downward to Timer No. option, Press VOL+ key to move the cursor onto the right list, Press CH+/- key to choose event number, Press OK key to confirm;

(2). Set Wake up mode: set as off, move the choose to Timer Mode option ,Press VOL+/- key to move circularly and choose among options, time mode option include off, Once, Daily, Weekly, Yearly.

(3). Set Wake up mode: move the cursor to Wake up Mode option, this option has 4 option as: Off, Message, Channel, On, press VOL+/-key to choose Message.

(4). Move the cursor to Wake up Message option, Press VOL+/- key to choose Wake up message information, the system will support Birthday, Anniversary, General;

(5). Set date: move the cursor to Wake up Date option, press VOL+/- key to enter date setting menu as shown in Figure 2.30;

(6). Set time: move the cursor to On Time option, Press 0-9 number key on the remote controller to revise time;

(7). Press OK key the system will hint with "Update succeeds" , Press EXIT key to return previous menu.

2. Press Channel

(1). Set Wake up Time Event Number: Move the cursor onto Timer No. Option, press VOL+ key to move the cursor onto the list on the right, press CH+/- key to choose event number, press OK key to confirm;

(2). Set Wake up time mode: Default is Off, move the cursor to Timer Mode options include Once, Daily, Weekly, Yearly as Shown in Figure 2.33.

(3). Set Wake up mode: This option has 4 options as OFF, Message, Channel, On, Press VOL+/- keys to choose as Channel. If there is no channel in the database, this option cannot choose Channel;

(4). Move the cursor up word and downward to Wake up Channel option ,Press VOL+ key to move the cursor onto the list on the right, Press CH+/- key to choose Preset Channel, Press enter key to confirm;

(5). Set Date: move the cursor to Wake up Date option, Press VOL+/- key to enter date set menu as shown in Figure 2.30;

(6). Set Time: move the cursor to On Time option, Press 0-9 number key on the remote controller to revise time.

(7). Set Continuous Time: Move the cursor to Duration, Press 0-9 number key on the remote controller to revise time;

(8). Press OK key, the system will hint with "Update succeeds" , Press EXIT key to return the previous menu.

2.3.6 Parental Lock

You can revise system Password, you can via menu(MENU→Digita TV→Configuration→Parental Lock) to enter Parental Lock menu.

1. Press the 0-9 number key on remote controller to input Old Password, the system defaults Password as "0000".
2. If the password is input correctly, the cursor can move onto Input New Password option, press 0-9 number key on the remote controller to input new 4-digit Password;
3. The cursor move Confirm New Password option, press 0-9number key press on the remote controller to input new 4-digit Password; if it is confirmed the new password is different from the new Password input, the system will hint to input successfully, the system will hint the success and save the setting, and the new password will come into effect.

2.4 Software Upgrade

You can automatically update the software of the equipment. The software of version can support more areas and more function or solve more problems. Via menu(MENU→Digital TV→Software Upgrade) enter Software Upgrade menu.

2.4.1 Download update BIN file from USB

1. Copy the bin file into USB.
2. Plug the USB into
3. Follow up the dialog information and select the root of bin file.
   Then press OK for update.
4. If power off is during the update process, the unit can not recovery and need send back for repair.

2.5 FACTORY DEFAULT

Press OK to dear all programs from a memory before process, you need enter password (Dlefault password is "0000").

2.6 VERSION

Via menu (MENU Digital TV Version),enter the page.

You can be provided with system software information, including H/W Version, S/W Version, Tuner Type, Date, Time, Press "EXIT" key to return previous menu.

3.USB MEDIA PLAY

The unit integrates powerful function to support USB and you can connect Ex-equipmentsvia the USB. At present, system can support usual USB media players and upgrade to system software.

This product supports the play of Mp3, JPEG and MPEG-4(AVI). It can support only the files displaying in the list and the file format this product plays.

1. Copy media document to USB;
2. Plug in USB device;
3. Enter device in main menu.

3.1 USB Movie

1.In main menu as shown in Figure 4.1, press UP/DOWN to choose USB Movie option, Press ENTER key to confirm, enter USB main directory as shown in Figure 3.1:

Figure 3.1

2.Press ENTER key to enter next directory, every directory displays only movie file and folder mane, as shown in Figure 3.2:

Figure 3.2

(1).Press RETURN key to return previous directory;
(2).Press UP/DOWN key to choose movie file name;
