Watching

my Home Screen

Information

"my Home Screen" is a gateway to the TV, applications, and more.

It provides easy access to special features such as the Media Player, videos, games, communication tools, etc. as shown below (example).
① Home Screen

② Selected content screen (TV, application, etc.)

③ Home Screen Selection

– Your preferred Home Screen can be selected or added.

How to use

Home Screen provides access to special features such as the Media Player, TV, internet content, data services, communication tools, etc.

1. Display Home Screen with HOME
   (Example)
- The last viewed Home Screen is displayed when the TV is turned on.

- Press again to select or add your preferred Home Screen layout.

   → Watching > my Home Screen > Settings

2. Select a feature with △ / ▽ / ◁ / ▷ and press OK to access

   - To watch full-screen TV

     1) Select the TV viewer with △ / ▽ / ◁ / ▷

        (Example)
     2) Press OK to watch

        (Example)

- Also refer to Tutorial from the tool guide.

Settings

Select the setup menu from the tool guide on the top of the screen, or use coloured button to display the setup menu.

(Example)

■ Home Screen Selection

1. Display Home Screen Selection with HOME

(Example)
2. Select the screen with ◁ / ▷ and press OK to set

Full Screen TV:

Displays full-screen TV

TV Home Screen:

To make your TV experience more convenient and comfortable.

Lifestyle Screen:

Displays the TV with useful information and services for everyday life.

Info Screen:

Enjoy internet content while watching TV.

Add New Screen:

You can add a new screen to personalise.

■ Settings

You can customise any Home Screen. (For example, changing the wallpaper, renaming freely, editing applications, setting the screen launched when the TV is turned on, etc.)

1. Select Settings from the tool guide

2. Follow the on-screen instructions

■ Search

You can search the content from various features.

1. Select Search from the tool guide

2. Follow the on-screen instructions

= Note =

- To use this function fully, you need a broadband network environment. Ensure the network connections and network settings are completed.

  🖼️ → Internet service > Network connections

  🖼️ → Internet service > Network settings

- Be sure to update the software when a software update notice is displayed on the TV screen. If the software is not updated, you will not be able to use

my Home Screen. You can update the software later manually.

🖼️ → Internet service > Network settings > Software Update

Basic

Basic connection

Please ensure that the unit is disconnected from the mains socket before attaching or disconnecting any cables.

  • For VIERA Link connections

    📖 → Functions > VIERA Link "HDAVI Control™" > Summary of VIERA Link

= Note =

  • External equipment and cables shown are not supplied with this TV.

  • Please also read the manual of the equipment being connected.

  • Keep the TV away from electronic equipment (video equipment, etc.) or equipment with an infrared sensor, otherwise distortion of image / sound may occur or operation of other equipment may be affected.

  • When using a SCART or HDMI cable, it is recommended to use fully wired one.

  • Check the terminal type and cable plugs are correct when connecting.

Selecting channel

1. Select DVB or Analogue with `TV`

    • The selectable modes vary depending on the channels stored.

    • You can also select the mode pressing `TV` repeatedly on the remote control or INPUT/OK/HOLD for MENU button on the control panel of the TV.

2. Select a channel with Channel Up / Down or numeric buttons

    • DVB channel position begin from number 1 upward. Analogue channel position numbers are in the 0 - 99 range.

■ To select a channel using information banner

It is possible to confirm the channel name and programme information by using the information banner before changing channels.

1. Display information banner with 🚹 if it is not displayed

2. Select a channel with △ / ▽ and press `OK` to watch while the banner is displayed

    📖 → Watching > Basic > Information banner

■ To select a channel using TV Guide

It is possible to confirm the channel and programme information by using TV Guide (EPG) before changing channels.

1. Display TV Guide with `GUIDE`

2. Select the current programme or channel with △ / ▽ / ◁ / ▷ and press `OK` to access

    – The current programme is displayed on the top left of the screen.

3. Press `OK` to exit TV Guide

    📖 → Watching > TV Guide > Using TV Guide

■ To watch pay-TV

  • For information of the encrypted channels

    📖 → Functions > Common Interface > Using Common Interface

  • Consult the operator / broadcaster or CI module manufacturer for more information and conditions of the services.

Information banner

Display information banner with 🛈.

- Also appears when changing a channel.
  (Example)
1. Channel position and name
2. Channel type (Radio, HDTV, etc.) / encrypted channel (📧) / TV mode (📺, 📺)
3. Programme
4. Programme start / finish time (except Analogue)

   Channel position, etc. (Analogue)

   Progress time indicator of the selected programme (except Analogue)
5. All DVB Channels / All Analogue Channels / Favourites 1 to 4

   - Press ▭ (blue) to switch. (DVB)

     – To list favourite channels, set Favourites Edit.

       🖼 → Watching > Tuning and editing channels > Favourites Edit

6. Current time
7. Features available / message meanings

- Extra information (DVB)

ℹ️

– Press again to hide the banner.

- To adjust banner timeout, set Banner Display Timeout.

🔖 → Settings **>** Setup **>** Display Settings

- AD, STTL, TEXT, Multi Audio indications are displayed as available on particular programmes, but may not be available for all individual programmes being broadcast. Display the extra information to confirm availability of these functions.

Option Menu

Confirm or change the current status.

1. Display Option Menu with OPTION

2. Select one of the following items with △ / ▽ and press OK to access

   Voice Guidance Settings / Audio Description / Multi Audio / AD / Multi Audio / Monaural Audio / Subtitle Language / Teletext Character Set / Teletext Language / NICAM / Volume Correction

   - The function items vary depending on the country you select.

3. Set with △ / ▽ / ◁ / ▷ and press OK to store

Voice Guidance Settings

Guidance settings for visually impaired users

   ▣◣ → Settings > Sound > Voice Guidance Settings

Audio Description

Set to Auto if the programme has Audio Description service, then you will hear an additional audio track to describe events on screen.

- To adjust the volume for Audio Description (UK only)

   ▣◣ → Settings > Sound > Audio Description

- For DVB mode

Multi Audio / AD

Selects between alternative language or Audio Description for sound tracks (if available).

- Set Audio Description to Auto in the Sound Menu to select the audio description sound track.

   ▣◣ → Settings > Sound > Audio Description

- This setting is not memorised and it will return to the default setting once you exit the current programme.

- For DVB mode (Ireland only)

Multi Audio

Selects between alternative languages for sound tracks (if available).

- This setting is not memorised and it will return to the default setting once you exit the current programme.

- For DVB mode

Monaural Audio

Selects stereo / monaural (if available).

- This setting is not memorised and it will return to the default setting once you exit the current programme.

- Not valid in Analogue mode

Subtitle Language

Selects the language in which subtitles should appear (if available).

- This setting is not memorised and it will return to the default setting once you exit the current programme.

- Not valid in Analogue mode

Teletext Character Set

Sets the teletext language font.

📖 → Settings > Setup > Display Settings

- Ireland only

Teletext Language

Selects between alternative languages for teletext (if available).

- For DVB mode (Ireland only)

NICAM

Switches NICAM sound (if available).

- For Analogue mode

📖 → Settings > Sound > Audio output settings

Volume Correction

Adjusts the volume of each individual channel or input mode.

Subtitle

■ DVB

Display / hide subtitles (if available) with STTL.

■ Analogue

Display subtitles with STTL.

- Hide subtitles with EXIT.

= Note =

- If you press STTL in Analogue mode, the TV switches to teletext service and calls up a favourite page. Press EXIT to return to TV mode.

- This is the same as switching to analogue teletext service and selecting "P888" (subtitle service).

  📖 → Watching > Teletext > Viewing Teletext

Off Timer

Turn the TV Standby mode automatically after a fixed period with OFF TIMER.

- Press repeatedly until desired time appears.

  0 / 15 / 30 / 45 / 60 / 75 / 90 (minutes)

- To cancel, set to 0 or turn the TV off.

- The remaining time displays on the information banner.

  📖 → Watching > Basic > Information banner

- When the remaining time is less than 3 minutes, the remaining time will flash on the screen.

- You can also set the time from Off Timer in the Timer Menu.

  📖 → Settings > Timer > Off Timer

Last view

Switch to a previously viewed channel or input mode easily with LAST VIEW.

- Press again to return to the current view.

= Note =

- Watching less than 10 seconds is not reflected in the previously viewed channel or input mode.

External equipment

External connection

These diagrams show our recommendations for connection of your TV to various pieces of equipment. For other connections, consult the instructions for each piece of equipment.

- For basic connection

  📖 → Watching > Basic > Basic connection

- Check the terminal type and cable plugs are correct when connecting.

■ HDMI equipment
1 HDMI terminal

2 Fully wired HDMI compliant cable

3 Recorder / Player / Set top box / Camcorder / Amplifier with speaker system

= Note =

- For VIERA Link connections

  → Functions > VIERA Link "HDAVI Control™" > Summary of VIERA Link

- Use HDMI2 for connecting an amplifier. This connection is applicable when using an amplifier that has ARC (Audio Return Channel) function.

■ AV devices
1 AV2 (COMPONENT) terminals

2 Component cables

3 DVD player

4 AV2 (VIDEO) terminals

5 Composite cables

6 Camcorder / Game equipment

■ USB devices

1 USB port

2 USB cable

3 Communication Camera

= Note =

- It is recommended to connect the devices to the TV's USB ports directly.

- You cannot use two or more of the same kind of USB devices simultaneously except USB Flash Memory.

- Use USB 1 port for connecting the Communication Camera.

- Some USB devices or USB HUB may not be used with this TV.

- You cannot connect any devices by using USB card reader.

- Additional information for the devices may be on the following website. (English only)

  http://panasonic.net/viera/support

■ To listen with speakers

1 DIGITAL AUDIO

2 Optical digital audio cable

3 Amplifier with speaker system

- To enjoy the sound from the external equipment in multi-channel sound (e.g. Dolby Digital 5.1ch), connect the equipment to the amplifier. For the connections, read the manuals of the equipment and amplifier.

■ Headphones
1 Headphone jack

2 M3 stereo mini plug

3 Headphones

- To adjust volume, set Headphone Volume.

   → Settings > Sound > Volume settings

Watching external input

Connect the external equipment (VCRs, DVD equipment, etc.) and you can watch through the input.

1. Display the input selection menu with AV

2. Select the input mode connected to the equipment with △ / ▽ and press OK to watch (The selected mode is displayed on the top left of the screen)

- TV receives input signals automatically connecting with SCART when playback starts.

  – Input signals are automatically identified by the SCART (pin 8) terminal.

  – This function is also available for HDMI connections.

  – When input mode is not switched automatically, perform as above or check the setup of the equipment.

- You can also select the input pressing AV on the remote control or INPUT/OK/HOLD for MENU button on the control panel of the TV. Press repeatedly until the desired input is selected.

- To switch between COMPONENT and VIDEO in AV2, select with ◁ / ▷.

- You can label or skip each input mode. Skipped inputs will not be displayed when AV is pressed. (Input Labels)

   → Settings > Setup > Display Settings

- The remote control is capable of operating the contents or external equipment.

   → Watching > External equipment > Operating with TV's remote control

- To return to TV mode

  TV

= Note =

- If the external equipment has an aspect adjustment function, set it to 16:9.

- For details, read the manual of the equipment or ask your local dealer.

■ Screen display

If the following information is permanently displayed on the top left of the screen, press 🛈 to clear.

- Manual input (default setting in Input Labels)

    AV1: AV1, AV1-RGB

    AV2: COMPONENT, VIDEO

    HDMI1: HDMI1

    HDMI2: HDMI2

    HDMI3: HDMI3

- Auto input (EC mode or VIERA Link)

    AV1: EC/AV1, EC/AV1-RGB

    AV2: ---

    HDMI1: HDMI1

    HDMI2: HDMI2

    HDMI3: HDMI3

Operating with TV's remote control

You can operate the contents in Media Player / media server, recording functions or the connected equipment with the below buttons of this TV's remote control.

▶ :

    Playback videocassette / DVD / video content

■ :

    Stop the operations

◄◄ :

    Rewind, view the picture rapidly in reverse (VCR)

    Skip to the previous track, title or chapter (DVD / video content)

◄◄ :

    Rewind, view the picture rapidly in reverse (VCR)

    Search backward (DVD / video content)

►► :

    Fast-forward, view the picture rapidly forward (VCR)

    Skip to the next track, title or chapter (DVD / video content)

►► :

    Fast-forward, view the picture rapidly forward (VCR)

Search forward (DVD / video content)

⏸ :

Pause / Resume

Press and hold to play at slow speed (DVD)

⏺ :

Start recording (DVD Recorder / VCR)

■ How to change the code

Each Panasonic product has its own remote control code. Change the code according to the product for operation.

1. Press and hold Standby On / Off switch during the following operations

2. Enter the appropriate code as follows with numeric buttons

- Codes for each product and features

    70: DVD Recorder, DVD Player, Blu-ray Disc Player

    71: Player theatre, Blu-ray Disc theatre

    72: VCR

    73 (default):

        Using in Media Player, DLNA features, product using in VIERA Link

3. Press ⏹ to change

= Note =

- Confirm if the remote control works correctly after changing the code.

- The codes may be reset to defaults if batteries are replaced.

- Some operations may not be available depending on the equipment.

HDMI features

HDMI (high-definition multimedia interface) is the world's first complete digital consumer AV interface complying with a non-compression standard.

HDMI allows you to enjoy high-definition digital images and high-quality sound by connecting the TV and the equipment.

HDMI-compatible equipment* with an HDMI or DVI output terminal, such as a DVD player, a set top box or game equipment, can be connected to the HDMI terminal using an HDMI compliant (fully wired) cable.

＊: The HDMI logo is displayed on HDMI-compliant equipment.

■ Applicable HDMI features

- Input audio signal:

    2ch Linear PCM (sampling frequencies - 48 kHz, 44.1 kHz, 32 kHz)

- Input video signal:

    Matches the output setting of the digital equipment.

- VIERA Link (HDAVI Control 5)

- Content Type

- Deep Colour

- Audio Return Channel

    – Audio Return Channel (ARC) is a function to send digital sound signals via an HDMI cable.

    – For HDMI2 terminal

■ DVI connection

If the external equipment has only a DVI output, connect to the HDMI terminal via a DVI to HDMI adaptor cable. When using the DVI to HDMI adaptor cable, connect the audio cable to the audio input terminal (use AV2 audio terminals).

- Enquire HDMI adaptor cable at your local digital equipment retailer shop.

= Note =

- Audio settings can be made on HDMI1 / 2 / 3 Input in the Sound Menu.

- If the connected equipment has an aspect adjustment function, set the aspect ratio to "16:9".

- These HDMI connectors are "type A".

- These HDMI connectors are compatible with HDCP (High-Bandwidth Digital Content Protection) copyright protection.

- Equipment having no digital output terminal may be connected to the input terminal of component or video to receive analogue signals.

- This TV incorporates HDMI™ technology.

1,125 (1,080) / 60p, 50p, 24p		○

○: Applicable input signal

= Note =

- Signals other than above may not be displayed properly.

- The above signals are reformatted for optimal viewing on your display.

For best picture

Viewing Mode

1. Display the menu with MENU

2. Select Picture > Viewing Mode with △ / ▽ and press OK to access

3. Select the mode with △ / ▽ and press OK to set

Viewing Mode

(Dynamic / Normal / Cinema / True Cinema / Custom)

Selects your favourite picture mode for each input.

Dynamic:

    Improves contrast and sharpness for viewing in a bright room.

Normal:

    Normal use for viewing in a normal lighting condition.

Cinema:

    Improves the performance of contrast, black and colour reproduction for watching movies in a darkened room.

True Cinema:

    Reproduces the original image quality precisely without any revision.

Custom:

    Adjusts each menu item manually to suit your favourite picture quality.

In each Viewing Mode, Backlight, Contrast, Brightness, Colour, Tint, Sharpness, Colour Temperature, Vivid Colour, Adaptive Backlight Control, Ambient Sensor, Noise Reduction and MPEG Noise Reduction can be adjusted and stored.

When in True Cinema or Custom mode, Advanced Settings can be adjusted additionally. The settings in True Cinema or Custom mode can be stored for each input.

Ambient Sensor

1. Display the menu with MENU

2. Select Picture > Ambient Sensor with △ / ▽ and press OK to access

3. Select On / Off with △ / ▽ and press OK to set

Ambient Sensor

(On / Off)

• Automatic Brightness Control function

Adjusts picture settings automatically depending on ambient lighting conditions.

Auto power standby function

The TV will automatically go into Standby mode in the following conditions:

• Off Timer is active.

    → Watching > Basic > Off Timer

• No operation is performed for 4 hours while Auto Standby is set to On.

    → Settings > Timer > Auto Standby

• No signal is received and no operation is performed for 10 minutes while

No signal Power off is set to On.

⬛➔ Settings > Timer > No signal Power off

Aspect

Change the aspect ratio (image size) with ASPECT.

- Enjoy viewing the image at its optimum size and aspect. Programmes usually contain an "Aspect Control Signal" (Widescreen signal, etc.), and the TV will choose the aspect ratio automatically according to the "Aspect Control Signal".

⬛➔ Watching > For best picture > Auto aspect

■ To change the aspect ratio manually

1. Display Aspect Selection list with ASPECT

2. Select the mode with △ / ▽ and press OK to set

- You can also change the mode pressing ASPECT.

  (Press repeatedly until you reach the desired mode.)

- Programmes usually contain an "Aspect Control Signal" (Widescreen signal, etc.), and the TV will select the aspect ratio automatically according to the "Aspect Control Signal".

⬛➔ Watching > For best picture > Auto aspect

Auto:

⬛➔ Watching > For best picture > Auto aspect

16:9:

Directly displays the image at 16:9 without distortion (anamorphic).

14:9:

Displays the image at the standard 14:9 without distortion.

Just:

Displays a 4:3 image full-screen. Stretching is only noticeable at the left and right edges.

4:3:

Displays the image at the standard 4:3 without distortion.

Zoom:

Displays a 16:9 letterbox or 4:3 image without distortion.

4:3 Full:

Displays a 4:3 image enlarged horizontally to fit the screen.

- For HD (High definition) signals

Sidecut Just:

Displays a 16:9 letterbox (anamorphic) image full-screen. Stretching is only noticeable at the left and right edges.

- For HD (High definition) signals

Sidecut Zoom:

Displays a 16:9 letterbox (anamorphic) image full-screen without distortion.

- For HD (High definition) signals

= Note =

- Display the image (TV, external input, etc.) full-screen to use this function completely.

- Aspect mode can be memorised separately for SD (Standard definition) and HD (High definition) signals.

- Aspect cannot be changed in teletext service.

Auto aspect

The optimum size and aspect can be selected automatically, and you can enjoy finer images.

User:

> Adjusts the sounds manually using the equaliser to suit your favourite sound quality.

- For the User mode, Equaliser will be available in the Sound Menu instead of Bass and Treble. Select Equaliser and adjust the frequency.

  🖥️ → Settings > Sound > Basic settings

- This function is not effective for the sound from headphones.

TV Guide

Using TV Guide

TV Guide - Electronic Programme Guide (EPG) provides an on-screen listing of the programmes currently broadcast and the forthcoming broadcasts over the next seven days (depending on the broadcasters).

1. Select DVB or Analogue with TV

2. Press GUIDE to view TV Guide

- To change the layout of TV Guide, set TV Guide View.

  🖥️ → Settings > Setup > TV Guide Settings

  (Example)
1 TV screen

2 TV Guide date

3 TV Guide time

4 Programme

5 D (DVB) / A (Analogue)

6 Channel position and name

- To watch the programme

  1) Select the current programme with △ / ▽ / ◁ / ▷ and press OK to access

     – The current programme is displayed on the top left of the screen.

  2) Press OK to exit TV Guide

- To the previous day (DVB)

  ▬ (red)

- To the next day (DVB)

  ▬ (green)

- To view a channel list of the selected type

  1) Display the type list with ▬ (yellow)

  2) Select the type with △ / ▽ and press OK to view

     – Ireland only

- To search programme titles and view a list of the searched programmes (DVB) (UK only)

  1) Display the search list with ▬ (yellow)

  2) Select Search Titles... with △ / ▽ and press OK to access

  3) Enter characters with △ / ▽ / ◁ / ▷ and press OK to set

     – You can set characters using numeric buttons.

       📖 → Functions > Setting characters > Using numeric buttons

  4) Start Search with ▬ (green)

     – All the programme titles including the word you set will be listed.

     – Searching without any characters will list all programmes including current programmes.

- To view a channel list of the selected category

  1) Display the category list with ▬ (blue)

  2) Select the category with △ / ▽ and press OK to view

     – To list favourite channels, set Favourites Edit.

       📖 → Watching > Tuning and editing channels > Favourites Edit

- To view more details of the programme (DVB)

  1) Select the programme with △ / ▽ / ◁ / ▷

  2) Press ℹ to view

     – Press again to return to TV Guide.

- To exit TV Guide

`EXIT`

= Note =

- When this TV is turned on for the first time, or the TV is switched off for more than a week, it may take some time before TV Guide is completely shown.

- DVB and Analogue channels are displayed on the same TV Guide screen. D means DVB channel and A means Analogue channel. There will be no programme listings for Analogue channels.

Teletext

Digital text service

Digital text services (MHEG) differ greatly from analogue teletext.

When you switch to a digital text service, the images you see can contain graphics and text, laid out and controlled in a manner decided by the broadcaster.

1. Select DVB with `TV`

   - DVB programmes may have digital text services (MHEG).

2. Switch to a digital text service with `TEXT`

■ How to operate services

In all cases, it is possible to navigate the pages using buttons on the remote control, but because the commands available must apply to all manufacturers of digital equipment, some on-screen commands may not correspond exactly to the remote control buttons.

- To exit a digital text service

  `TEXT`

= Note =

- As soon as you switch to a digital channel with links to a digital text service, software is downloaded in the background over air to enable the teletext function. This means that when switching to a digital channel, you should wait for approximately 5 seconds before pressing `TEXT` - this will allow the software to be downloaded. If you press `TEXT` before download is complete, it will be ignored and you will have to press `TEXT` again when the download is complete.

- While navigating digital text service, you will find there is a short delay when moving between pages while the page downloads. There is often a prompt shown on the page (for example "Loading") to let you know that this is happening.

Viewing Teletext

1. Switch to teletext with `TEXT`

   - Displays the index page (content varies depending on the broadcasters).

   - Current / sub page numbers are displayed on the top left of the screen.

   - Time / date is displayed on the top right of the screen.

   - Colour bar is displayed on the bottom of the screen.

2. Select the page with numeric buttons, △ / ▽ or 🟥 🟩 🟨 🟦 (Coloured buttons)

   ```
   1 2 3
   4 5 6
   7 8 9
     0
   ```

   - To adjust contrast

     1) Press `MENU` three times to display Contrast

     2) Adjust with ◁ / ▷ and press `OK` to set

   - To exit teletext

     `EXIT`

■ Reveal hidden data

1. Press `MENU`

2. Reveal with 🟥 (red)

   - Press again to rehide.

■ To view a favourite page stored

Press `STTL` to view a favourite page.

   - Call up the page stored on 🟦 (blue) (List mode).

   - Factory setting is "P888" (subtitle service) on 🟦 (blue) (List mode).

■ FULL / TOP / BOTTOM

1. Press `MENU`

2. Press 🟩 (green) to change the layout

■ Watch TV and teletext in two windows at once

1. Press `TEXT` to view in multi window

   - Operations can be made only in teletext screen.

2. Press TEXT repeatedly to return to TV or teletext

■ Store frequently viewed pages in the colour bar (List mode)

1. Press ▬ ▬ ▬ ▬ (Coloured buttons) while the page is displayed

2. Press and hold OK

- The stored page number changes to white.

- If you use Subtitles, do not change number on ▬ (blue).

- To change stored pages

  1) Press ▬ ▬ ▬ ▬ (Coloured buttons) to change

  2) Enter a new page number with numeric buttons

  1 2 3
  4 5 6
  7 8 9
  0

  3) Press and hold OK

■ View sub page

The number of sub pages is displayed on the top of the screen. Press ◁ / ▷ to view sub page. (Only when teletext has more than one page.)

- The number of sub pages varies depending on the broadcasters (up to 79 pages).

- Searching may take time while you are watching TV.

- To view a specific sub page

  1) Press MENU

  2) Press ▬ (blue)

  3) Enter the 4-digit number (e.g. P6, press 0 0 0 6)

Teletext mode

Teletext services are the text information provided by the broadcasters.

- The features may vary depending on the broadcasters.

- The availability of teletext services for a programme is indicated by TEXT in the information banner.

1. Display the menu with MENU

2. Select Setup > Display Settings > Teletext with △ / ▽ and press OK to access

3. Select FASTEXT / List with △ / ▽ and press OK to set

  ▣ → Settings > Setup > Display Settings

■ FASTEXT mode

In FASTEXT mode, four differently coloured subjects are situated on the bottom of the screen.

To access more information about one of these subjects, press the appropriate coloured button.

This facility enables fast access to information on the subjects shown.

■ List mode

In List mode, four differently coloured page numbers are situated on the bottom of the screen. Each of these numbers can be changed and stored in the TV's memory.

🖼️ → Watching > Teletext > Viewing Teletext

Tuning and editing channels

Setting menu

You can retune channels, create your favourite channel lists, skip unwanted channels, etc.

1. Select DVB or Analogue with TV

2. Display the menu with MENU

3. Select Setup **>** DVB Tuning Menu / Analogue Tuning Menu with △ / ▽ and press OK to access

   • The menu name varies depending on the TV mode.

4. Select one of the functions with △ / ▽ and press OK to access

   Favourites Edit / Channel List / Auto Setup / Channel Sorting by Region / Manual Tuning / Update Channel List / New Channel Message / Signal Condition

   • The function items vary depending on the country you select.

   🖼️ → Settings > Setup > Tuning Menu

Favourites Edit

■ List favourite DVB channels

Create your favourite channel lists from various broadcasters (up to 4: Favourites 1 to 4).

The DVB Favourites lists are available from Category in the information banner and the TV Guide screen.

🖼️ → Watching > Basic > Information banner

1. Select Favourites Edit with △ / ▽ and press OK to access

2. Select a channel to list from all DVB channels with △ / ▽

   - 🔒 appears when the channel is encrypted.

   - To display other Favourites

     ▢ (green)

3. Press OK to add it to Favourite List

   - To add all channels to the list

     1) Press ▢ (yellow)

     2) Press ▢ (green) to add all

4. Press BACK/RETURN and OK to store

■ Edit DVB Favourites list

You can edit the favourites list while the cursor is on the channel in the favourites list.

- To move the channel

  1) Select the channel with △ / ▽

  2) Press ▢ (green)

  3) Select the new position with △ / ▽ or select the turn with numeric buttons

     ⌨

  4) Press ▢ (green) to store

- To delete the channel

  1) Select the channel with △ / ▽

  2) Press OK to delete

  – Press ▢ (yellow) to delete all channels

- To name the Favourites

  1) Press ▢ (red)

  2) Enter characters (maximum 10 characters) with △ / ▽ / ◁ / ▷ or numeric buttons, and press OK to set

     ⌨

3) Press BACK/RETURN to store

= Note =

- Channel position numbers (known as logical channel numbers) can be swapped in Channel List. To swap the channel position number.

Channel List

■ Skip unwanted DVB / Analogue channels

You can hide (skip) unwanted channels. The hidden channels cannot be displayed except in this function.

1. Select Channel List with △ / ▽ and press OK to access

2. Select a channel with △ / ▽

3. Press OK to set Reveal / Hide (skip)

   ☑ : Reveal

   ☐ : Hide (skip)

   - To reveal all channels (DVB / Analogue)

     ▭ (yellow)

■ Edit DVB / Analogue Channels

- To swap the channel position number (logical channel number)

  1) Press ▭ (green) to edit

  2) Enter the new position number with numeric buttons, and press ▭ (green) to store

     1 2 3
     4 5 6
     7 8 9
       0

- To retune each channel (Manual Tuning)

  ▭ (red)

  – Only for the revealed channels

- To rename the channel name (Analogue)

  1) Press ▭ (blue) to edit

  2) Enter characters (maximum 5 characters) with △ / ▽ / ◁ / ▷ or numeric buttons, and press OK to set

     1 2 3
     4 5 6
     7 8 9
       0

3) Press BACK/RETURN to store

= Note =

- If a VCR is connected only with the RF cable in Analogue mode, edit VCR.

Auto Setup

Automatically retunes the channels received in the area.

- This function is available if channel tuning is already performed.

- Only the selected mode is retuned. All the previous tuning settings are erased.

- If Child Lock PIN number has been set, the PIN number is required.

  📖 → Functions > Child Lock > PIN number

- If tuning has not been done completely, set Manual Tuning.

  📖 → Watching > Tuning and editing channels > Manual Tuning

■ DVB, Analogue channels

1. Select Auto Setup with △ / ▽ and press OK to access

2. The confirmation screen is displayed and press OK to start Auto Setup (Settings are made automatically)

   - When the operation is completed, the channel at the lowest position will be displayed.

■ Auto Setup using the buttons on the TV

1. Press and hold INPUT/OK/HOLD for MENU button for 3 seconds to display the menu

2. Set Auto Setup with following control panel buttons

   - Move the cursor / select from a range of options / select the menu item (up and down only)

     CH ∧ ▲ / ∨ ▼   VOL + ► / − ◄
   - Access the menu / store settings after adjustments have been made or options have been set with INPUT/OK/HOLD for MENU button.

Channel Sorting by Region

You can sort DVB channels so that those with the best signal quality, or those for your preferred region, appear nearer the top of your Channel List. (UK only)

1. Select the region with △ / ▽ and press OK to access

2. Select repeatedly until you reach the available region

- Normally, you should select Best signal quality (All Regions).

- If you choose to select your preferred region, you could find channels with a weaker signal appear nearer the top of your Channel List. If you have any image or sound problems, select Best signal quality (All Regions) instead.

Manual Tuning

- Normally use Auto Setup or Update Channel List to retune DVB channels.

- If tuning has not been done completely or for adjusting the direction of the aerial, use this function. (DVB)

- All DVB channels found will be added to Channel List.

■ DVB (UK)

1. Select Frequency with △ / ▽

2. Press OK to search

- All channels found will be added to the Channel List.

■ DVB (Ireland)

1. Select a channel with △ / ▽ and adjust frequency with ◁ / ▷ for each channel

   - Set where the level of Signal Quality becomes the maximum.

2. Press OK to search

■ Analogue

Set Analogue channel manually after Auto Setup.

1. Select the channel position with numeric buttons

```
[1] [2] [3]
[4] [5] [6]
[7] [8] [9]
    [0]
```

2. Select the channel with Channel Up / Down button

```
[ ∧ ]
[ ∨ ]
```

3. Search with ◁ / ▷

4. Select Store with △ / ▽ and press OK to set

- Use Fine Tuning to make small adjustments to the tuning of an individual programme (affected by weather conditions, etc.).

– Ireland only

- If a VCR is connected only with the RF cable, select channel position 0.

Update Channel List

By updating the DVB channel list, you can add new channels, delete removed channels or change channel names and positions automatically.

- The channel list is updated while keeping your settings in Favourites Edit, Channel List, Child Lock, etc.

- Depending on the signal condition, the update may not work properly.

New Channel Message

Selects whether to give a notification message when a new DVB channel is found or not.

- When a notification message appears, you can perform Update Channel List pressing OK.

Signal Condition

Selects a channel and checks the signal condition.

A good Signal Strength is not an indication of suitable signal for DVB reception.

- Use the Signal Quality indicator as follows.

  – Green bar: Good

  – Yellow bar: Poor

  – Red bar: Bad (Check the terrestrial aerial)

- Vertical lines show the maximum signal value of the selected channel.

- To change the channel

  ∧
  ∨

- For DVB mode

Internet service

Internet content

Information

You can access some specific websites supported by Panasonic, and enjoy internet contents such as videos, games, communication tools, etc. from APPS list.

(Example)

- To enable this function, you need a broadband network environment. Ensure the network connections and network settings are completed.

    📖 ➔ Internet service **>** Network connections

    📖 ➔ Internet service **>** Network settings

Selecting internet content

1. Display APPS list with `APPS`

    - For details of APPS list

        📖 ➔ Functions **>** APPS list

    - Depending on the usage conditions, it may take a while to read all the data.

2. Select the desired item with △ / ▽ / ◁ / ▷ and press `OK` to access

    (Example)
    - To return to APPS list

        `APPS`

    - To exit APPS list

        `EXIT`

    - You can connect a keyboard and a gamepad for character input and playing games in the applications. You can also use the keyboard or

gamepad for TV operation as well as for APPS list.

⬛→ Functions > Keyboard / Gamepad

- Video communication (for example Skype™) requires an exclusive Communication Camera TY-CC20W. For details, read the manual of the Communication Camera.

⬛→ Support > Optional accessories > Communication Camera

Note

- If you cannot access the internet contents, check the network connections and settings.

⬛→ Internet service > Network connections

⬛→ Internet service > Network settings

- APPS list is subject to change without notice.

- Not all the features of the websites are available.

- Be sure to update the software when a software update notice is displayed on the TV screen. If the software is not updated, you will not be able to use APPS list. You can update the software later manually.

⬛→ Internet service > Network settings > Software Update

- The services through APPS list are operated by their respective service providers and such service may be discontinued either temporarily or permanently without notice. Therefore, Panasonic will make no warranty for the contents or the continuity of the services.

- Some contents may be inappropriate for some viewers.

- Some contents may only be available for specific countries and may be presented in specific languages.

- Depending on the connection environment, the internet connection may be slow or may not be successful.

- During the operation, audio signal is output from DIGITAL AUDIO and HDMI2 (ARC function) terminals. But no video signals are output. To use HDMI2 with ARC function, connect an amplifier that has ARC function and set to use theatre speakers.

⬛→ Functions > VIERA Link "HDAVI Control™"

Network connections

Internet connection

To use internet service, you need a broadband network environment.

- If you do not have any broadband network services, please consult your retailer for assistance.

- Dial-up internet connections cannot be used.

- Required speed (effective): at least 1.5 Mbps for SD (Standard Definition) and 6 Mbps for HD (High Definition) picture quality, respectively. If the transfer speed is not enough, contents may not be played back properly.

■ Wireless connection

[1] Built-in wireless LAN (Rear of the TV)

[2] Access point

[3] Internet environment

■ Wired connection
[1] ETHERNET terminal

[2] LAN cable (Shielded)

- Use the Shielded Twist Pair (STP) LAN cable.

[3] Internet environment

Note

- Ensure to use a LAN straight cable.

- Set up and connect equipment required for the network environment. You cannot make such settings on this TV. Read the manual of the equipment.

- If your modem has no broadband router functions, use a broadband router.

- If your modem has broadband router functions but there are no vacant ports, use a hub.

- Ensure that the broadband routers and hubs are compatible with 10BASE-T / 100BASE-TX.

- If you use the equipment compatible only with 100BASE-TX, category 5 or later LAN cables are required.

- Contact your Internet Service Provider (ISP) or telecommunications company for further assistance regarding the network equipment.

- Confirm the terms and conditions of the contracts with your Internet Service Provider (ISP) or telecommunications company. Depending on the contracts, additional fees may be charged or multiple connections to the internet may be impossible.

- Turn the TV off, and then on again when changing or making the network connection again.

Network settings

Network Connection

Ensure the connections are completed before starting network setup.

🖼 → Internet service > Network connections

■ Quick setup - Wireless

1. Display the menu with MENU

2. Select Network > Network Connection with △ / ▽ and press OK to access

   - Confirm the encryption key, settings and position of your access point before starting setup. For details, read the manual of the access point.

3. Select Quick setup with ◁ / ▷ and press OK to access

   - When the LAN cable is connected, wired setup will be done automatically.

4. Select your desired access point with △ / ▽ and press OK to access

   - Available Wireless Networks are displayed automatically.

     ⊡ : Encrypted access point

   - For WPS(Push button)

     1) Select Easy setup with Push button with △ / ▽ and press OK to access

     2) Press the WPS button on the access point until the light flashes

     3) Connect the TV with the access point with OK

        – WPS: Wi-Fi Protected Setup™

        – If the connection has failed, check the settings and positions of your access point. And then, follow the on-screen instructions.

   - It is recommended to select the encrypted access point.

5. Enter the encryption key of the access point with △ / ▽ / ◁ / ▷ and press

OK to set

- You can set characters using numeric buttons.

```

   📖 ➔ Home network **>** Technical information

● To use a PC as a media server

Prepare the PC with Windows 7 / Windows 8 or ensure the server software is installed on the PC. "Windows 7 / Windows 8" and "Twonky 7 (installed on the PC with Windows XP or Mac)" are the server software that has been tested for compatibility with this TV (as of January, 2012). Any other server software has not been tested with this TV, therefore compatibility and performance cannot be assured.

- Windows 7 / Windows 8

   The setup for homegroup settings of Windows 7 / Windows 8 is required.

For details, refer to the help functions of Windows 7 / Windows 8.

- Twonky

  "Twonky" is the product of PacketVideo Corporation.

  To obtain the Installation Guides for installing and setting "Twonky", visit the website of TwonkyMedia.

  Additional fees may be charged to obtain server software.

= Note =

- For more information about the server software, please consult each software company.

- When server software for the media server is installed on the PC, the data on the PC may be at risk of being accessed by other people. Please take care of the settings and connections under the network circumstances in office, hotel or even at home when not using a router.

● To use a DLNA compatible DIGA Recorder as a media server

By connecting a DLNA compatible DIGA Recorder to your home network, you can control it as one of the media servers.

- Please read the manual of your DIGA Recorder to check if the recorder is compatible with DLNA.

■ Playback of sharing contents on this TV with the DMC (Digital Media Controller) network equipment

You can enjoy contents stored in the media server by controlling with the DMC network equipment (smartphone, PC with Windows 7 / Windows 8 installed, etc.) connected to your home network.

- To use this function with your smartphone or Windows 7 / Windows 8, set VIERA remote of this TV to On.

  🖼 ➔ Home network > Network settings > VIERA remote Settings

  And you need to install the application for controlling VIERA on your smartphone. For information of the application (English only):

  http://panasonic.net/viera/support

  For the operations, refer to the support information of the application.

- "Windows 7 / Windows 8" are the OS that have been tested for compatibility of this TV (as of January, 2012). For the operations, refer to the help functions of Windows 7 / Windows 8.

■ Sharing the TV programme or contents of this TV with another piece of network equipment

You can enjoy the contents[1] of this TV on the other DLNA Certified VIERA[2], your smartphone[3], etc. connected to your home network. You can also watch the current digital TV programme on the other DLNA Certified VIERA[2].

For example, watching the continuation of the current programme on another VIERA, etc.

[1] : Available contents:

- Contents that can be played back in Media Player of this TV and another piece of network equipment

[2] : DLNA Certified VIERA manufactured before the year 2009 may not be available. The compatibility with future products is not guaranteed.

- To use this function with another DLNA Certified VIERA, set Network Link Settings of this TV.

   🖼️ ➔ Home network **>** Network settings **>** Network Link Settings

[3] : To use this function with your smartphone, you need to install the application for controlling VIERA in your smartphone. For the information of the application (English only):

   http://panasonic.jp/support/global/cs/tv/

   For the operations, refer to the support information of the application.

- Sharing the current programme may not be available when selecting radio channels, encrypted (copy-protected) programmes or when the broadcast prohibits the output of video and audio.

= Note =

- To use this function, turn this TV on.

- This function is available only with 1 piece of other equipment.

- This function may not be available in the following conditions of this TV:

   – When in internet service

   – When accessing the media server

   – When the data service is active

Using DLNA

To use DLNA® features, ensure the preparations of the media server, network connections and network settings are completed.

   🖼️ ➔ Home network **>** DLNA **>** Information

   🖼️ ➔ Home network **>** Network connections

   🖼️ ➔ Home network **>** Network settings

1. Display APPS list with APPS

2. Select Media Server with △ / ▽ / ◁ / ▷ and press OK to access

3. Select one of the media servers with △ / ▽ and press OK to access

- For the operations to access another TV, select the name of another TV from the displayed media server list.

- To display / hide information of the highlighted media server

  ℹ️

4. Select the file with △ / ▽ and press OK to access

(Example)

- Depending on the condition of media server, you may need to select the folder before selecting the file.

- To display / hide information of the highlighted file

  ℹ️

= Note =

- Non-playable files are also listed but cannot be selected.

- You can use the following buttons during playback. Confirm the remote control code is "73".

  ◀◀ ◀◀| ▶▶ ▶▶| ▶ ■ ||

  📖➡ Watching > External equipment > Operating with TV's remote control

Network connections

DLNA connection

To use DLNA features, you need a home network environment and you can operate the features without a broadband network environment.

- To use internet service, you need a broadband network environment.

  📖➡ Internet service > Network connections > Internet connection

■ Wireless connection (For DLNA and internet service)
1 Built-in wireless LAN (Rear of the TV)

2 Access point

3 Hub or Router

4 Internet environment

5 Smartphone

6 DLNA Certified media server

■ Wired connection (For DLNA and internet service)
1 ETHERNET terminal

2 LAN cable (Shielded)

- Use the Shielded Twist Pair (STP) LAN cable.

3 Hub or Router

4 Internet environment

5 DLNA Certified media server

■ Wireless connection (For DLNA)
① TV

 • To use the TV as a wireless access point

  🖼️ → Home network > Network settings > Custom - Wireless Access Point

② DLNA Certified media server

③ Smartphone

Note

 • Ensure to use a LAN straight cable.

 • Set up and connect equipment required for the network environment. You cannot make such settings on this TV. Read the manual of the equipment.

 • If you use the equipment compatible only with 100BASE-TX, category 5 or later LAN cables are required.

 • Turn the TV off, and then on again when changing or making the network connection again.

Network settings

Network Connection

Ensure the connections are completed before starting network setup.

  🖼️ → Home network > Network connections

■ Quick setup - Wireless

1. Display the menu with MENU

2. Select Network > Network Connection with △ / ▽ and press OK to access

 • Confirm the encryption key, settings and position of your access point before starting setup. For details, read the manual of the access point.

3. Select Quick setup with ◁ / ▷ and press OK to access

 • When the LAN cable is connected, wired setup will be done

automatically.

4. Select your desired access point with △ / ▽ and press OK to access

- Available Wireless Networks are displayed automatically.

  ▣ : Encrypted access point

- For WPS(Push button)

  1) Select Easy setup with Push button with △ / ▽ and press OK to access

  2) Press the WPS button on the access point until the light flashes

  3) Connect the TV with the access point with OK

  – WPS: Wi-Fi Protected Setup™

  – If the connection has failed, check the settings and positions of your access point. And then, follow the on-screen instructions.

- It is recommended to select the encrypted access point.

5. Enter the encryption key of the access point with △ / ▽ / ◁ / ▷ and press OK to set

- You can set characters using numeric buttons.

  [1] [2] [3]
  [4] [5] [6]
  [7] [8] [9]
      [0]

- Press BACK/RETURN to store

6. Automatically setup is done and the Network Status screen is displayed

- To set manually

  📺 → Home network **>** Network settings **>** Custom - Wired

Custom - Wireless

Ensure the connections are completed before starting network setup.

> 🖼 → Home network > Network connections

1. Display the menu with MENU

2. Select Network > Network Connection > Custom > Wireless with △ / ▽ / ◁ / ▷ and press OK to access

   - Confirm the encryption key, settings and position of your access point before starting setup. For details, read the manual of the access point.

3. Select your desired access point with △ / ▽ and press OK to access

   - Available Wireless Networks are displayed automatically.

     🔒 : Encrypted access point

   - For WPS(Push button)

     1) Press ▬ (red)

     2) Press the WPS button on the access point until the light flashes

     3) Connect the TV with the access point with OK

     – WPS: Wi-Fi Protected Setup™

     – If the connection has failed, check the settings and positions of your access point. And then, follow the on-screen instructions.

   - For WPS(PIN)

     1) Press ▬ (green)

     2) Enter the PIN code to the access point

     3) Connect the TV with the access point with OK

   - For Manual

     1) Press ▬ (yellow)

     2) You can set up SSID, security type, encryption type, and encryption key manually

     3) Follow the on-screen instructions and set manually

     – When you use 11n (5 GHz) for the wireless system between the built-in wireless LAN and access point, select AES for the encryption type.

   - To search access points again

     ▬ (blue)

   - To display / hide information of the highlighted access point

     ℹ

   - It is recommended to select the encrypted access point.

4. Enter the encryption key of the access point with △ / ▽ / ◁ / ▷ and press

- 63 -

OK to set

- You can set characters using numeric buttons.

```
1 2 3
4 5 6
7 8 9
  0
```

- Press BACK/RETURN to store

5. The VIERA Name/IP/DNS Settings screen is displayed

VIERA Name

- You can set your favourite name for this TV.

- This name will be used as the name of this TV on the screen of the other network equipment.

Acquire IP Address / Acquire DNS Address

- Auto is recommended.

- Available settings are displayed automatically.

- To set manually, select and set IP Address / Subnet Mask / Default Gateway / DNS Address.

Proxy Settings

- It is not required for normal household use.

- Some internet services may not be available depending on the proxy settings.

    Proxy:

    This is the address of the relay server connected between the browser and the target server and sends data to the browser.

    1) Select Proxy with △ / ▽ and press OK to access

    2) Enter the address with △ / ▽ / ◁ / ▷ or numeric buttons, and press OK to set

    ```
    1 2 3
    4 5 6
    7 8 9
      0
    ```

    3) Press BACK/RETURN to store

    Proxy Port:

    This number is also specified by the provider with the Proxy address.

    1) Select Proxy Port with △ / ▽

   ▣▶ → Home network **>** Network settings **>** Network Status

7. Select Exit with ◁ / ▷ and press OK to set

Custom - Wired

Ensure the connections are completed before starting network setup.

   ▣▶ → Home network **>** Network connections

1. Display the menu with MENU

2. Select Network **>** Network Connection **>** Custom **>** Wired with △ / ▽ / ◁ / ▷ and press OK to access

3. The VIERA Name/IP/DNS Settings screen is displayed

VIERA Name

- You can set your favourite name for this TV.

- This name will be used as the name of this TV on the screen of the other network equipment.

Acquire IP Address / Acquire DNS Address

- Auto is recommended.

- Available settings are displayed automatically.

- To set manually, select and set IP Address / Subnet Mask / Default Gateway / DNS Address.

Proxy Settings

- It is not required for normal household use.

- Some internet services may not be available depending on the proxy settings.

  Proxy:

    This is the address of the relay server connected between the browser and the target server and sends data to the browser.

    1) Select Proxy with △ / ▽ and press OK to access

    2) Enter the address with △ / ▽ / ◁ / ▷ or numeric buttons, and press OK to set

```
 ⬚①②③
 ④⑤⑥
 ⑦⑧⑨
    ⓪
```

3) Press BACK/RETURN to store

Proxy Port:

This number is also specified by the provider with the Proxy address.

1) Select Proxy Port with △ / ▽

2) Enter the number with numeric buttons

```
 ①②③
 ④⑤⑥
 ⑦⑧⑨
    ⓪
```

3) Press BACK/RETURN to store

4. Select Network Status with △ / ▽ and press OK to access

🖼️ ➔ Home network **>** Network settings **>** Network Status

5. Select Exit with ◁ / ▷ and press OK to set

Custom - Wireless Access Point

You can use the TV as a wireless access point and connect the network equipment without an access point.

- Confirm the PIN code, network settings of the equipment before starting setup. For details, read the manual of the equipment.

1. Display the menu with MENU

2. Select Network **>** Network Connection **>** Custom **>** Wireless Access Point with △ / ▽ / ◁ / ▷ and press OK to access

3. Select Connect to device in WPS with △ / ▽ and press OK to access

- To set manually, select Change settings. (see below)

4. Select and set WPS(Push button) / WPS(PIN) with △ / ▽ and press OK to access

WPS(Push button):

Set the equipment to WPS (Push button) mode. For details, read the manual of the equipment.

WPS(PIN):

Enter the PIN code of the equipment.

- If the connection has failed, check the settings and positions of the equipment. And then, follow the on-screen instructions.

■ Change settings

You can set up Network name(SSID), Encryption key, Wireless type and Channel setting method manually.

Follow the on-screen instructions and set manually.

- Set Reset settings to reset the items of Change settings.

= Note =

- You cannot connect the internet service while the TV is set to Wireless Access Point.

- You can connect up to 7 devices. But the transfer rate will vary according to communication environment or the numbers of connected equipment.

- To confirm the current network settings

  📺 ➜ Home network > Network settings > Network Status

- Ensure the equipment to connect supports WPS for this setup.

- WPS: Wi-Fi Protected Setup™

Network Status

Displays and checks the network status (MAC Address, current network settings, etc.).

1. Display the menu with MENU

2. Select Network > Network Status with △ / ▽ and press OK to access

3. Automatically testing is done and the Network Status screen is displayed

   Try Again:

     Performs automatic testing of the network connection for the TV and displays the current status again.

   Status Details:

     Displays the detailed network status (SSID, security type, encryption type, etc.).

- For more information of the network connection, select Help.

VIERA remote Settings

Sets to control the TV with any VIERA remote connected to your network.

1. Display the menu with MENU

2. Select Network > VIERA remote Settings with △ / ▽ and press OK to access

3. Select one of the following items with △ / ▽ and press OK to access

---

VIERA remote

(On / Off)

Enables to control the TV from the network equipment (smartphone, etc.).

- You need to install the application for controlling VIERA on your smartphone. For information of the application (English only):

  http://panasonic.net/viera/support

  For the operations, refer to the support information of the application.

Device to upload contents

Selects device to upload contents from the network equipment (smartphone, etc.).

= Note =

- Depending on the area, this function may not be available. For details, consult your local Panasonic dealer.

Network Link Settings

Sets to control the TV with devices connected to the network.

1. Display the menu with MENU
2. Select Network > Network Link Settings with △ / ▽ and press OK to access
3. Select one of the following items with △ / ▽ and press OK to access

   DLNA Server / Registration Type / Remote Device List
4. Set with △ / ▽ / ◁ / ▷ and press OK to store

DLNA Server

(On / Off)

Enables to share the TV programme or contents of this TV with the network equipment (DLNA Certified VIERA, etc.).

- To use this function with another VIERA, select the name of this TV from the DLNA server list of another VIERA, and then select the content to share. Also read the manual of another VIERA.

Registration Type

(Auto / Manual)

Selects the type to restrict the access to this TV for each piece of equipment on the home network.

Auto:

All available equipment on the home network is accessible. (maximum 16 pieces of equipment)

Manual:

Sets the restrictions for each piece of equipment in the Remote Device List.

Remote Device List

Lists the equipment accessible to this TV on the home network.

= Note =

- Depending on the area, this function may not be available. For details, consult your local Panasonic dealer.

Software Update

Accesses the specific website to update the TV's software if any updates are available.

1. Display the menu with MENU

2. Select Network **>** Software Update with △ / ▽ and press OK to access

3. Follow the on-screen instructions

New Software Message

Selects whether to give a notification message when new software is found via network or not.

1. Display the menu with MENU

2. Select Network **>** New Software Message with △ / ▽ and press OK to access

3. Select On / Off with △ / ▽ and press OK to set

Photos

Selecting file

Ensure the preparations of the media server, network connections and network settings are completed.

Audio codec:

    Dolby Digital, LPCM, MPEG Audio

● TS (.mts, .m2ts, .tp, .trp, .ts, .tts)

Video codec:

    H.264 BP/MP/HP, MPEG1, MPEG2

Audio codec:

    AAC, Dolby Digital, Dolby Digital Plus, HE-AAC, MPEG Audio

■ Supported Subtitles formats

● MicroDVD, SubRip, TMPlayer (.srt, .sub, .txt)

• The video file and subtitles text file are inside the same folder, and the file names are the same except for the file extensions.

• If there are more than one subtitles text files inside the same folder, they are displayed in the following order of priority: ".srt", ".sub", ".txt".

= Note =

• Some files may not be played back even if they fulfil these conditions.

• Do not use two-byte characters or other special codes for file names.

• Connected devices may become unusable with this TV if the file or folder names are changed.

• Supported Video formats are different in Media Player and media server.

Music format

■ Supported Music formats

● MP3 (.mp3)

● AAC (.m4a)

• Copy-protected files cannot be played back.

● WMA (.wma)

• Copy-protected files cannot be played back.

● LPCM (.wav)

● FLAC (.flac)

= Note =

• Some files may not be played back even if they fulfil these conditions.

• Do not use two-byte characters or other special codes for file names.

• Connected devices may become unusable with this TV if the file or folder names are changed.

Media Player

Using Media Player

Information

Media Player allows you to enjoy photo, video or music recorded on a USB Flash Memory.

(Example)
Photo mode:

    Still pictures recorded with digital cameras will be displayed.

Video mode:

    Moving pictures recorded with digital video cameras will be played back.

Music mode:

    Digital music data will be played back.

- During operation, audio signals are output from DIGITAL AUDIO and HDMI2 (ARC function) terminals, however, no video signals are output. To use HDMI2 with ARC function, connect an amplifier that has ARC function and set to use theatre speakers.

   → Functions > VIERA Link "HDAVI Control™"

- Date shows the date on which the recording was made with the recording equipment. "**/**/****" appears on a file on which recording date has not been recorded.

- Pictures may not appear correctly on this TV depending on the recording equipment used.

- Displaying may take some time when there are many files and folders.

- Partially degraded files may be displayed with reduced resolution.

- Picture setting may not work depending on the conditions.

- Folder and file names may be different from those on the digital camera or digital video camera used.

■ To insert or remove the USB Flash Memory

Insert or remove straight and completely.
- To remove the USB Flash Memory safely from the TV, perform Safely remove USB in USB Device Setup.

  🖼️ ➔ Settings **>** Setup **>** USB Device Setup

- Connect the USB Flash Memory to the USB 1 or 2 port.

= Note =

- Check the terminal type and devices are correct when connecting.

- For the information of the devices

  🖼️ ➔ Media Player **>** Technical information

     OK

   - To return to thumbnail

     BACK/RETURN

   - You can change the back ground music by setting Back Ground Music in Slideshow Settings (see below).

■ Slideshow Settings

Set up the settings for Photo mode.

1. Display the option menu with OPTION

2. Select Slideshow Settings with OK

3. Select one of the following items with △ / ▽ and press OK to access

   Frame / Colour Effect / Auto Makeup / Screen Mode / Burst Playback / Interval / Repeat / Back Ground Music

- 85 -

4. Set with △ / ▽ / ◁ / ▷ and press OK to store

Frame

(Off / Multi / Collage / Drift (+ calendar) / Drift / Gallery (+ calendar) / Gallery / Cinema)

Selects the frame type of the slideshow.

Multi:

9 photos are displayed orderly at once.

Collage:

Each photo is displayed at a random position and random scale.

Drift (+ calendar) / Drift:

Photos are displayed with flow images.

- You can select whether to display the calendar or not. The month of calendar is changed with ◁ / ▷.

Gallery (+ calendar) / Gallery:

Various sizes of photos in the frames are displayed.

- You can select whether to display the calendar or not. The month of calendar is changed with ◁ / ▷.

Cinema:

Photos are displayed as old films (sepia tone).

Colour Effect

(Off / Sepia / Gray scale)

Selects the colour effect of photos in Single view and Slideshow.

- Not valid when Frame is set to Drift, Gallery or Cinema

Auto Makeup

(On / Off)

Automatically detects the face in the photo and improves luminance and contrast.

Screen Mode

(Original / Zoom)

Selects enlarged or normal viewing in Single view and Slideshow.

- Not valid when Frame is set to Collage, Drift, Gallery or Cinema

- Depending on the photo size, the photo may not be fully enlarged to fill the

screen (e.g. portrait style picture).

Burst Playback

(On / Off)

Selects whether to display burst photos in a fast-paced slideshow mode or not.

- Not valid when Frame is set to Drift, Gallery or Cinema

Interval

(Long / Normal / Short)

Selects slideshow interval.

- Not valid when Frame is set to Drift, Gallery or Cinema

Repeat

(On / Off)

Slideshow repeat

Back Ground Music

(Off / Type1 / Type2 / Type3 / Type4 / Type5 / User / Auto)

Selects the background music during Photo mode.

Type1 - 5:

Music files installed on this TV at the factory settings will be played back.

Auto:

Music files stored in the root folder of the current device will be played back randomly.

- If there is no available music data, no sound will be played back.

User:

Music files in the device registered by yourself will be played back.

- If no music files have been registered or the device which had registered music files is removed, no sound will be played back.

● To register music

1) Select the music file with △ / ▽ and press OK to access

  - Depending on the condition of the device, select folders until you reach the desired music file.

2) Select File / Folder with △ / ▽ and press OK to set

File:

The selected music file will be registered.

Folder:

All the music files in the folder which contains the selected music file will be registered.

= Note =

- Picture quality may be degraded depending on the slideshow settings.

- Picture setting may not work depending on the slideshow settings.

Video mode

Selecting file

1. Select the title in the thumbnail view with △ / ▽ / ◁ / ▷

   ▣ : Error display

   ▣ : The file does not support thumbnail view.

   - The preview will start when the title / scene is highlighted in the thumbnail view if it supports a preview. To turn off the preview, set Video Preview to Off.

     📖 ➔ Media Player > Video mode > Video Setup

2. Start playback with ▬ (red)

   - If you have stopped the last playback halfway, the confirmation screen is displayed to select whether to start from where you stopped last time or from the beginning.

- For supported file formats

Technical information

Device handling caution

- Data modified with a PC may not be displayed.

- Do not remove the device while the TV is accessing data. Otherwise this can damage the device or TV.

- Do not touch the pins on the device.

- Do not subject the device to a high pressure or impact.

- Insert the device in the correct direction. Otherwise this can damage the device or TV.

- Electrical interference, static electricity, or erroneous operation may damage the data or device.

- Back up the recorded data at regular intervals to prevent data deterioration, data damage or erratic operation of the TV. Panasonic is not liable for any deterioration or damage of recorded data.

USB devices

- It is recommended to connect the USB Flash Memory to the TV's USB ports directly.

- Some USB devices or USB HUB may not be used with this TV.

- You cannot connect any devices using a USB card reader.

- Additional information for the devices may be found on the following website. (English only)

  http://panasonic.net/viera/support

■ USB Flash Memory

(for playing back in Media Player)

USB Flash Memory format:

FAT16, FAT32 or exFAT

- USB HDDs formatted on a PC are not guaranteed to work in Media Player.

Photo format

■ Supported Photo formats

- JPEG (.jpg, .jpeg)

  Image resolution (pixel):

      8 × 8 to 30,719 × 17,279

  Sub-sampling:

      4:4:4, 4:2:2, 4:2:0

  • DCF and EXIF standards

  • Progressive JPEG is not supported.

= Note =

- • Some files may not be played back even if they fulfil these conditions.

- • Do not use two-byte characters or other special codes for file names.

- • Connected devices may become unusable with this TV if the file or folder names are changed.

Video format

■ Supported Video formats

- AVI (.avi)

  Video codec:

      H.264 BP/MP/HP, MPEG1, MPEG2, MPEG4 SP/ASP, VC-1, Windows Media Video Ver. 9

  Audio codec:

      AAC, ADPCM, Dolby Digital, Dolby Digital Plus, DTS core, HE-AAC, LPCM, MPEG Audio, MP3, WMA, WMA Pro

  • Some subtitles or chapter functions may not be available.

- MKV (.mkv)

  Video codec:

      H.264 BP/MP/HP, MPEG1, MPEG2, MPEG4 SP/ASP

  Audio codec:

      AAC, Dolby Digital, Dolby Digital Plus, DTS core, HE-AAC, MPEG Audio, MP3

  • Some subtitles or chapter functions may not be available.

- ASF (.asf, .wmv)

Video codec:

MPEG4 SP/ASP, VC-1, Windows Media Video Ver. 9

Audio codec:

AAC, Dolby Digital, Dolby Digital Plus, HE-AAC, LPCM, MP3, WMA, WMA Pro

- Copy-protected files cannot be played back.

● MP4 (.f4v, .m4v, .mp4)

Video codec:

H.264 BP/MP/HP, MPEG1, MPEG2, MPEG4 SP/ASP

Audio codec:

AAC, Dolby Digital, Dolby Digital Plus, HE-AAC, MPEG Audio, MP3

- This TV supports this container recorded with Panasonic products. For details, read the manual of the products.

● FLV (.flv)

Video codec:

H.264 BP/MP/HP

Audio codec:

AAC, MP3

● 3GPP (.3gp, .3g2)

Video codec:

H.264 BP/MP/HP, MPEG4 SP/ASP

Audio codec:

AAC, HE-AAC

● PS (.mod, .mpg, .mpeg, .vob, .vro)

Video codec:

H.264 BP/MP/HP, MPEG1, MPEG2, VC-1

Audio codec:

AAC, Dolby Digital, Dolby Digital Plus, HE-AAC, LPCM, MPEG Audio, MP3

● TS (.mts, .m2ts, .tp, .trp, .ts, .tts)

Video codec:

H.264 BP/MP/HP, MPEG1, MPEG2, VC-1

Audio codec:

AAC, Dolby Digital, Dolby Digital Plus, DTS core, HE-AAC, MPEG Audio, MP3

■ Supported Subtitles formats

● MicroDVD, SubRip, TMPlayer (.srt, .sub, .txt)

• The video file and subtitles text file are inside the same folder, and the file names are the same except for the file extensions.

• If there are more than one subtitles text files inside the same folder, they are displayed in the following order of priority: ".srt", ".sub", ".txt".

= Note =

• Some files may not be played back even if they fulfil these conditions.

• Do not use two-byte characters or other special codes for file names.

• Connected devices may become unusable with this TV if the file or folder names are changed.

• Supported Video formats are different in Media Player and media server.

Music format

■ Supported Music formats

● MP3 (.mp3)

● AAC (.m4a)

• Copy-protected files cannot be played back.

● WMA / WMA Pro (.wma)

• Copy-protected files cannot be played back.

● LPCM (.wav)

● FLAC (.flac)

= Note =

- Some files may not be played back even if they fulfil these conditions.

- Do not use two-byte characters or other special codes for file names.

- Connected devices may become unusable with this TV if the file or folder names are changed.

Functions

APPS list

Information

Various applications (internet contents, network contents, Media Player, etc.) can be accessed easily from APPS list.

■ APPS list

(Example)
= Note =

- APPS list is subject to change without notice.

How to use

You can access special features such as internet contents, network contents, Media Player, etc. from APPS list.

1. Display APPS list with `APPS`

   (Example)
   - To exit APPS list

     `EXIT`

2. Select an icon of the features with △ / ▽ / ◁ / ▷ and press `OK` to access

   Internet contents

   → Internet service > Internet content

   Photo

   → Media Player > Photo mode

   Video

   → Media Player > Video mode

Settings

You can set up APPS list manually. (For example, screen settings, account information, restriction, etc.)

1. Display APPS list with APPS

2. Select the setup menu on APPS list with △ / ▽ / ◁ / ▷ and press OK to access

　🔧

3. Follow the on-screen instructions

= Note =

- Setup menu items may be change without notice

VIERA Link "HDAVI Control™"

Summary of VIERA Link

Enjoy additional HDMI Inter-Operability with Panasonic products which have "HDAVI Control™" function.

VIERA Link (HDAVI Control) connects the TV and the equipment with VIERA Link function, and enables easy control, playback, energy saving, creating home theatre, etc., without complicated settings. Connections to the equipment (DIGA Recorder, HD Video Camera, Player theatre, Amplifier, etc.) with HDMI and SCART cables allow you to interface them automatically. These features are limited to models incorporating "HDAVI Control" and "VIERA Link".

- This TV supports "HDAVI Control 5" function.

- Some functions are not available depending on the equipment's version of HDAVI Control. Confirm the connected equipment's version of HDAVI Control.

- VIERA Link features may be available even with other manufacturers' equipment supporting HDMI CEC.

- VIERA Link "HDAVI Control" is a unique function that we have developed and added based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control).

As such, its operation with other manufacturers' product that supports HDMI CEC cannot be guaranteed.

- Please refer to individual manuals for other manufacturers' product supporting VIERA Link function.

- For information about applicable Panasonic equipment, consult your local Panasonic dealer or refer to the following website.

  www.panasonic.co.uk

■ VIERA Link (HDMI connection)

- Use a fully wired HDMI compliant cable.

- Connect the equipment supporting VIERA Link to the TV's HDMI terminal via an HDMI cable.

  About HDMI cable for connecting Panasonic HD Video Camera or LUMIX Camera, read the manual of the equipment.
1 HDMI terminal

2 HDMI cable

3 Equipment with VIERA Link function (DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera)

■ Available features (HDMI connection)

DIGA Recorder / DVD Player / Blu-ray Disc Player

- Easy playback

■ VIERA Link Control of compatible equipment

The following is the maximum number of compatible equipment that can be controlled by VIERA Link Control. This includes connections to equipment already connected to the TV. For example, DIGA Recorder connected to Amplifier which is connected to the TV via an HDMI cable.

> 📖 → Functions > VIERA Link "HDAVI Control™" > VIERA Link Control

- Recorder:

    Maximum 3 (DIGA Recorder, etc.)

- Player:

    Maximum 3 (DVD Player, Blu-ray Disc Player, HD Video Camera, LUMIX Camera, Digital Camera, Player theatre, Blu-ray Disc theatre, etc.)

- Audio system:

    Maximum 1 (Player theatre, Blu-ray Disc theatre, Amplifier, etc.)

- Tuner:

    Maximum 4 (Set top box, etc.)

Preparations

- Connect the equipment supporting VIERA Link.

- For VIERA Link connections

    📖 → Functions > VIERA Link "HDAVI Control™" > Summary of VIERA Link

- Use a fully wired HDMI compliant cable. Non-HDMI-compliant cables cannot be used.

- Use a fully wired SCART cable.

- Set up the connected equipment. Read the manual of the equipment.

- Set VIERA Link to On in the Setup Menu.

    📖 → Settings > Setup > VIERA Link Settings

- Set up the TV. After connection, turn the equipment on and then switch the TV on. Select the HDMI input from Input Selection with AV and make sure that an image is displayed correctly. (This setup should be done each time the following conditions occur.)

    – first time operation

    – adding or reconnecting equipment

    – changing setup

Easy playback

Automatic input switching - When the connected equipment is operating, the input mode is switched automatically.

Power on Link

Set Power on Link On in the Setup Menu to use this function.

🖼️ ➔ Settings **>** Setup **>** VIERA Link Settings

When the connected equipment starts playback or direct navigator / function menu for the equipment is activated, the TV is automatically turned on. (Only when the TV is in Standby mode.)

Power off Link

Set Power off Link On in the Setup Menu to use this function.

🖼️ ➔ Settings **>** Setup **>** VIERA Link Settings

When the TV is set to Standby mode, the connected equipment is also automatically set to Standby.

- This function will work even if the TV enters Standby mode automatically by auto power standby function.

Standby Power Save

Set Standby Power Save On in the Setup Menu to use this function.

🖼️ ➔ Settings **>** Setup **>** VIERA Link Settings

The power consumption of the connected equipment in Standby mode is controlled higher or lower in synchronisation with the TV on / off state to reduce the consumption.

When the TV is set to Standby mode, the connected equipment is automatically set to Standby and the power consumption of the connected equipment is automatically minimised.

When the TV is turned on, the connected equipment is still in Standby mode, but the power consumption is increased to start the connected equipment fast.

- This function is effective if the connected equipment can change the power consumption in Standby mode and is set to higher consumption.

- This function works when Power off Link is set to On.

Intelligent Auto Standby

Set Intelligent Auto Standby On in the Setup Menu to use this function.

🖼️ ➔ Settings **>** Setup **>** VIERA Link Settings

When the TV is on, non-used connected equipment goes into Standby mode automatically to reduce the power consumption. For example, when the input

mode is switched from HDMI or when Speaker Selection is changed to TV (except for watching a disc).

- This function may not work properly depending on the connected equipment. In this case, set to Off.

VIERA Link Control

You can control some functions of the connected equipment with this TV's remote control by pointing at the TV's signal receiver.

1. Display APPS list with APPS

2. Select VIERA Link with △ / ▽ / ◁ / ▷ and press OK to access

3. Select VIERA Link Control with △ / ▽ and press OK to access

4. Select one of the following items with △ / ▽ and press OK to access

   Recorder / Player / Home Cinema / Video Camera / LUMIX / Digital Camera / Other

   (The menu of the accessed equipment will be displayed. The input mode will be changed automatically.)

   - The displayed item may vary depending on the connected equipment.

   - Home Cinema means Player theatre, Blu-ray Disc theatre or Recorder theatre.

   - Other means Tuner set top box.

5. Follow the on-screen instructions to operate the menu of the equipment

   - Confirm the remote control code is "73".

      → Watching > External equipment > Operating with TV's remote control

   - To display the operation guide

     OPTION

     (If other manufacturers' product is accessed, Setup / Contents Selection menu may be displayed.)

   - Available VIERA remote control buttons depend on the connected equipment.

■ If multiple recorders or players are connected

Each recorder / player is numbered. The number is given from the TV's lower number of HDMI terminal connected to the same type of equipment. For example, when two recorders are connected to HDMI2 and HDMI3, the recorder connected to HDMI2 is displayed as Recorder1, and the recorder connected to HDMI3 is displayed as Recorder2.

■ If you access non-VIERA Link equipment

The type of the connected equipment is displayed. Although you can access the connected equipment, you cannot operate it. Use the remote control of the connected equipment.

= Note =

- If you cannot operate the equipment, check the settings and the equipment.

  🖼 → Functions > VIERA Link "HDAVI Control™" > Summary of VIERA Link

- Some operations may not be available depending on the equipment. In this case, use the remote control of the connected equipment.

- For details of the operations for the connected equipment, read the manual of the equipment.

Speaker Selection

You can control the theatre speaker with this TV's remote control by pointing at the TV's signal receiver.

1. Display APPS list with APPS

2. Select VIERA Link with △ / ▽ / ◁ / ▷ and press OK to access

3. Select Speaker Selection with △ / ▽ and press OK to access

4. Select Home Cinema / TV with △ / ▽ and press OK to set

   Home Cinema:

   The sound is delivered from theatre speakers. Player theatre, Blu-ray Disc theatre or Amplifier will be automatically turned on if it is in Standby mode.

   - The sound of TV speakers is mute. When the equipment is turned off, TV speakers will be activated.

   - You can use the Volume Up / Down button and MUTE.

   ```
   +
   −
   ```

   TV:

   TV speakers are active.

■ Multi-channel sound

If you want to enjoy the multi-channel sound (e.g. Dolby Digital 5.1ch) via an Amplifier, connect it with an HDMI cable and Optical digital audio cable, and then select Home Cinema. If your Amplifier has the "HDAVI Control 5" function, you only need to connect it with an HDMI cable to the TV's HDMI2 terminal.

To enjoy the sound from the DIGA Recorder in multi-channel sound, connect

an HDMI cable from the DIGA Recorder to the Amplifier.

= Note =

- If you cannot operate the equipment, check the settings and the equipment.

  🖼️ ➔ Functions > VIERA Link "HDAVI Control™" > Summary of VIERA Link

Note

- These functions may not work properly depending on the connected equipment.

- Image or sound may not be delivered for the first few seconds when the input mode is switched.

- "HDAVI Control 5" is the newest standard for HDAVI Control compatible equipment. This standard is compatible with conventional HDAVI equipment.

- To confirm the HDAVI Control version of this TV

  🖼️ ➔ Support > Information > Using Help menu

Child Lock

Using Child Lock

You can lock specific channels / AV input terminals to restrict access to them. When the locked channel / input is selected, a message appears. Enter the PIN number to watch.

1. Display the menu with MENU

2. Select Setup > Child Lock with △ / ▽ and press OK to access

3. Enter the PIN number (4 digits) with the numeric buttons

   ⌨️

   - Enter the PIN number twice at first setting.

   - Make a note of the PIN number in case you forget it.

4. Select Child Lock List with △ / ▽ and press OK to access

5. Select the channel / input with △ / ▽ and press OK to lock

   - 🔒 appears when the channel / input is locked.

   - To cancel

     1) Select the locked channel / input with △ / ▽

     2) Press OK

   - To lock all

■ (green)

- To cancel all locks

■ (yellow)

- To jump to the head of the next channel / input group

■ (blue)

■ Freeview Players

Applies access control for some digital text services.

= Note =

- For DVB mode (UK only)

PIN number

You can change the PIN number.

1. Select Change PIN with △ / ▽ and press OK to access

2. Enter a new PIN number twice with the numeric buttons

```
1 2 3
4 5 6
7 8 9
  0
```

= Note =

- Setting Shipping Condition erases the PIN number and all settings.

Parental Rating

To watch the DVB programme that has rating information on the selected age, enter the PIN number (depending on the broadcaster).

1. Select Parental Rating with △ / ▽ and press OK to access

2. Select an age for the restriction of programmes with △ / ▽ and press OK to set

= Note =

- Setting Shipping Condition erases the PIN number and all settings.

- Ireland only

Common Interface

Caution

- Turn the TV off with Mains power On / Off switch whenever inserting or removing the Common Interface (CI) Module.

- If a view card and a card reader come as a set, first insert the card reader, then insert the view card into the card reader.

- Insert or remove the CI module completely in the correct direction as shown.
- Remove the CI module from the TV when placing the TV facing upward. This may cause damages to the CI module and CI slot.

Using Common Interface

The Common Interface Module menu provides access to software contained in Common Interface (CI) Modules.

- Video and audio signals may not be output depending on broadcasts or services.

■ Insert the CI module (optional)

- The features that appear on screen are dependent on the contents of the selected CI module.

- Follow the instructions that came with the viewing card to tune in the encrypted channels. If encrypted channels do not appear, perform the below to verify the card is recognised by the TV.

- For more details, read the manual of the CI module, or check with the broadcaster.

4. Select Setup > System Menu > Common Interface with △ / ▽ and press OK to access

1. Select DVB with TV

2. Display the menu with MENU

3. Select Setup > System Menu > Common Interface with △ / ▽ and press OK to access

4. Press OK and follow the on-screen instructions

- On-screen instructions may not correspond to the remote control buttons.

Shipping Condition

Shipping Condition

Resets the TV to its original condition (i.e. no channels tuned in).

All settings are reset (channels, picture, sound settings, etc.).

1. Display the menu with MENU

2. Select Setup > System Menu > Shipping Condition with △ / ▽ and press OK to access

3. When the confirmation screen is displayed, select Yes with ◁ / ▷ and press OK to set

4. Follow the on-screen instructions

   • Auto Setup will automatically start.

= Note =

• To retune TV channels only (e.g. after moving house), set Auto Setup.

  Watching > Tuning and editing channels > Auto Setup

Updating the TV Software

Preparations

A new version of software may be released for download to enhance the performance or operations of the TV.

• In DVB mode, a notification banner will appear when one of the BBC channels is turned to if a new available software is found.

Auto update

You can update new software automatically.

1. Display the menu with MENU

2. Select Setup > System Menu > System Update > Auto Update Search in Standby with △ / ▽ and press OK to access

3. Select On with △ / ▽ and press OK to set

• If any software updates are available, the notification message will appear.

  Standby:

     Installs new software in standby condition.

  Now:

     Installs new software now.

• If System Update is performed, the software will be updated (TV functions may be changed). If you do not want to do so, set Auto Update Search in Standby to Off.

= Note =

• Download may take for a few hours.

- During software download and update, DO NOT perform any operations on the TV or switch Off the TV.

Manual update

You can update new software manually.

1. Display the menu with MENU

2. Select Setup > System Menu > System Update > System Update Search Now with △ / ▽ and press OK to access

3. Searches for an update (for several minutes) and displays a corresponding message if any

4. Download with OK

= Note =

- Download may take for a few hours.

- During software download and update, DO NOT perform any operations on the TV or switch Off the TV.

Setting characters

Using numeric buttons

You can enter characters for free input items using numeric buttons.

Press the numeric button repeatedly until you reach the desired character.

[1] : . @ / 1 ! : # + - * _ ( ) " ' % & ? , ; = $ [ ] ~ < > { } | ` ^ \

[2] : a b c 2 A B C

[3] : d e f 3 D E F

[4] : g h i 4 G H I

[5] : j k l 5 J K L

[6] : m n o 6 M N O

[7] : p q r s 7 P Q R S

[8] : t u v 8 T U V

[9] : w x y z 9 W X Y Z

[0] : Space 0

- The character is set automatically if you leave for 1 second.

- You can also set the character pressing OK or other numeric buttons less than 1 second.

- The characters may vary depending on the input items.

Keyboard / Gamepad

Keyboard

- Keyboards requiring the drivers are not supported.

- To change the language type, set USB Keyboard Layout.

  🖼️ ➔ Settings > Setup > System Menu

- Characters may not be displayed correctly on the TV screen depending on the connected keyboard or the keyboard layout setting.

- Some of the keys of keyboards may correspond to the operation of the remote control.

Keyboard	Remote Control
↑ / ↓ / ← / →	△ / ▽ / ◁ / ▷
Enter	OK

Setting menu

How to use

Various menus allow you to make settings for the picture, sound, and other functions.

1. Display the menu with MENU

   • Displayed items vary depending on the input signal.

2. Select the menu with △ / ▽ and press OK to access

3. Select the items with △ / ▽ and press OK to access

   • Only available items can be selected.

   • You can also access from eHELP pressing ▭ (red) at each item. (if available)

• You can select from among alternatives with △ / ▽ and press OK to set.

• You can adjust using the slide bar with ◁ / ▷ and press OK to set.

• You can go to the next screen with OK.

• You can enter names or numbers freely for some items.

   1) Enter characters one by one with △ / ▽ / ◁ / ▷ and press OK to set

      – You can set characters using numeric buttons.

         🖼 → Functions > Setting characters > Using numeric buttons

   2) Press BACK/RETURN to store

• To reset the settings

   – To initialise picture or sound settings only, select Reset to Defaults in the Picture Menu or Sound Menu.

      🖼 → Settings > Picture > Reset to Defaults

      🖼 → Settings > Sound > Reset to Defaults

   – To initialise all settings, select Shipping Condition.

      🖼 → Settings > Setup > System Menu

• To exit the menu screen

   EXIT

• To return to the previous screen

   BACK/RETURN

• To change menu pages

= Note =

- A different menu will be displayed in the mode of Media Player or Network services.

   → Media Player **>** Using Media Player

   → Home network **>** DLNA **>** Using DLNA

- If Demo Settings is displayed in the Setup Menu, the TV is in "Shop" viewing environment. To return to "Home" viewing environment, initialise all settings by accessing Shipping Condition.

   → Functions **>** Shipping Condition

■ Using control panel buttons

1. Press and hold INPUT/OK/HOLD for MENU button for 3 seconds to display the menu

2. Select and set with following control panel buttons

   - Move the cursor / select from a range of options / select the menu item (up and down only) / adjust levels (left and right only)
   - Access the menu / store settings after adjustments have been made or options have been set with INPUT/OK/HOLD for MENU button.

Picture

Viewing Mode

Selects your favourite picture mode for each input.

(Dynamic / Normal / Cinema / True Cinema / Custom)

   Dynamic:

   Improves contrast and sharpness for viewing in a bright room.

   Normal:

   Normal use for viewing in a normal lighting condition.

   Cinema:

   Improves the performance of contrast, black and colour reproduction for watching movies in a darkened room.

   True Cinema:

   Reproduces the original image quality precisely without any revision.

Custom:

    Adjusts each menu item manually to suit your favourite picture quality.

In each Viewing Mode, Backlight, Contrast, Brightness, Colour, Tint, Sharpness, Colour Temperature, Vivid Colour, Adaptive Backlight Control, Ambient Sensor, Noise Reduction and MPEG Noise Reduction can be adjusted and stored.

When in True Cinema or Custom mode, Advanced Settings can be adjusted additionally. The settings in True Cinema or Custom mode can be stored for each input.

Basic settings

Backlight, Contrast, Brightness, Colour, Tint, Sharpness

Adjusts the levels of these options according to your personal preference.

Colour Temperature

(Cool2 / Cool1 / Normal / Warm1 / Warm2)

Sets the overall colour tone of the picture (bluer - redder).

Vivid Colour

(On / Off)

Automatically adjusts colours to vivid ones.

Adaptive Backlight Control

Automatically controls the level of backlight according to the images.

- If the uncomfortable dark images occur, set to Off.

Ambient Sensor

Automatic Brightness Control function

Adjusts picture settings automatically depending on ambient lighting conditions.

(On / Off)

Noise reduction settings

Noise Reduction

(Auto / Max / Mid / Min / Off)

Reduces unwanted picture noise.

- Not valid when 1080p Pixel Direct is set to On

MPEG Noise Reduction

(Auto / Max / Mid / Min / Off)

Reduces flicker noise in contoured parts of a picture and block noise.

- Not valid when 1080p Pixel Direct is set to On

Advanced Settings

You can adjust and set up the detailed picture settings.

🔲 ➞ Watching > For best picture > Advanced Settings

- To use this function completely, set Viewing Mode to True Cinema or Custom.

🔲 ➞ Settings > Picture > Viewing Mode

Option Settings

Film Cadence Mode

(On / Off)

Improves vertical resolution for movie images.

- This function is available for interlaced signals (except in Network services).

1080p Pixel Direct

(On / Off)

Reproduces the original image quality in detail for 1080p (HDMI) input signal.

HDMI Content Type

(Graphics / Photos / Auto / Off)

Adjusts the picture settings of each HDMI input according to the selected content type.

Auto:

Automatically adjusts the picture settings according to the received HDMI content if the connected equipment supports HDMI Content Type.

- To set the availability of each content type for Auto mode, select Auto Detail Setting.

- For HDMI input

HDMI RGB Range

(Auto / Full / Normal)

Adjusts the black level of the image for each HDMI input.

- When the black level is not suitable, select Full.
- For HDMI input

3D-COMB

(On / Off)

Makes still or slow moving pictures more vivid.

- Occasionally, while viewing still or slow moving pictures, colour patterning may be seen. Set to On to display sharper and more accurate colours.
- For PAL / NTSC signal reception in TV mode or from composite connection

Screen Settings

16:9 Overscan

(On / Off)

Selects the screen area displaying the image for 16:9 aspect.

On:

Enlarges the image to hide the edge of the image.

Off:

Displays the image in the original size.

- Set to On if noise occurs on the edge of the screen.
- This function can be memorised for SD (Standard definition) and HD (High definition) signals respectively.
- Not valid in Network services

H-Size

(H-Size1 / H-Size2)

Switches the horizontal display range to reduce noise on the side edge of the image.

- For TV mode, AV and HDMI input

Zoom Adjustments

Adjusts the vertical position and size when aspect is set to Just, Sidecut Just, Zoom or Sidecut Zoom.

Screen Display

(On / Off)

Turns the screen off when you select Off.

This function is effective in reducing power consumption when listening to the sound without watching the TV screen.

- Press any buttons (except Standby) to turn the screen on.

Copy Adjustment

Copies the selected True Cinema or Custom settings to those of the other input.

🔲 ➔ Watching > For best picture > Copy Adjustment

Reset to Defaults

Press OK to reset the current Picture Viewing Mode to the default settings.

Sound

Mode

Selects your favourite sound mode for each input.

(Standard / Music / Speech / User)

Standard:

Provides the suitable sound quality for all types of scenes.

Music:

Improves sound quality for watching music videos, etc.

Speech:

Improves sound quality for watching news, drama, etc.

User:

Adjusts the sounds manually using the equaliser to suit your favourite sound quality.

- In each mode, Bass, Treble and Surround can be adjusted and stored.

- For the User mode, Equaliser will be available in the Sound Menu instead of Bass and Treble. Select Equaliser and adjust the frequency.

🔲 ➔ Settings > Sound > Basic settings

- This function is not effective for the sound from headphones.

Basic settings

Bass

Adjusts level to enhance or minimise lower, deeper sound output.

Treble

Adjusts level to enhance or minimise sharper, higher sound output.

Equaliser

Adjusts the frequency level to suit your favourite sound quality.

- This function is available when Mode is set to User.

- Select the frequency and change the frequency level using △ / ▽.

- To enhance the bass sound, raise the level of the lower frequency. To enhance the treble sound, raise the level of the higher frequency.

- To reset the levels of each frequency to the default settings, select Reset to Defaults with ◁ / ▷ and press OK.

Balance

Adjusts volume level of right and left speakers.

Surround

(On / Off)

Provides a dynamic enhancer of width to simulate improved spatial effects.

Volume settings

Headphone Volume

Adjusts the volume of headphones.

Auto Gain Control

(On / Off)

Automatically regulates large sound level differences between channels and inputs.

Volume Correction

Adjusts the volume of each individual channel or input mode.

Speaker Distance to Wall

(Up to 30cm / Over 30cm)

Compensates for the low frequency sound due to the distance between the speakers and the wall.

- If the back space between the TV and wall is within 30 cm, Up to 30cm is recommended.

- If the back space between the TV and wall is over 30 cm, Over 30cm is recommended.

Voice Guidance Settings

Voice Guidance

(On / Off)

Set to On to enable voice guidance of the basic features (menu item, on-screen messages, etc.) for visually impaired users.

Speed

(Fast / Normal / Slow)

Selects the readout speed for the voice guidance.

Volume

(Max / Mid / Min)

Selects the volume for the voice guidance.

User Level

(Expert / Beginner)

Selects the level of verbosity for the voice guidance.

Audio Description

Audio Description

(Auto / Off)

Narration settings for visually impaired users.

Set to Auto to activate the narration sound track when available on the broadcast.

- The availability of audio description sound track is indicated by AD in the information banner.
- For DVB mode

Audio output settings

NICAM

(On / Off)

Near Instantaneous Companded Audio Multiplex

Reproduces NICAM stereo sound.

- Set to Off if reception is poor. (FM monaural sound)

- For Analogue mode

___

Audio Preference

(Multichannel / Stereo / MPEG)

Selects the initial setting for audio tracks.

Multichannel:

The priority is given to multi-channel audio track.

Stereo:

The priority is given to stereo (2ch) audio track.

MPEG:

The priority is given to MPEG.

- MPEG is an audio compression method that compresses audio to the smaller size without any considerable loss of audio quality.

- For digital mode

- Ireland only

___

SPDIF Selection

(Auto / PCM)

Selects the initial setting for digital audio output signal from DIGITAL AUDIO and HDMI2 (ARC function) terminals.

- SPDIF is a standard audio transfer file format.

Auto:

> Dolby Digital Plus, Dolby Digital and HE-AAC multi-channel are output as Dolby Digital Bitstream. MPEG is output as PCM. DTS is output as DTS for video contents of Media Player / Network services.

PCM:

> Digital output signal is fixed to PCM.

- ARC (Audio Return Channel) is a function of digital audio output using HDMI cable.

- For DVB mode or video contents of Media Player / Network services

  📖 ➜ Media Player **>** Video mode **>** Audio output settings

  📖 ➜ Home network **>** Videos **>** Audio output settings

SPDIF Delay

Adjusts the delay time of the sound output from DIGITAL AUDIO and HDMI2 (ARC function) terminals if the sound does not synchronise the image.

- For digital mode
- Ireland only

HDMI1 / 2 / 3 Input

(Digital / Analogue)

Selects to fit the input signal.

Power Save

(On / Off)

Reduces brightness of the picture to economise on power consumption.

Support

FAQs

Picture

Before requesting service or assistance, please follow these simple guides to solve the problem.

If the problem still persists, please contact your local Panasonic dealer for assistance.

Auto aspect

- -

- Auto aspect is designed to provide you with the best ratio to fill the screen.

  📘➔ Watching > For best picture > Auto aspect

- Press ASPECT if you want to change the aspect ratio manually.

  📘➔ Watching > For best picture > Aspect

Black and white picture

- -

- Check that the output of the external equipment matches the input of the TV. When connecting with SCART, ensure the output setting of the external equipment is not S-Video.

Chaotic image, noisy

- -

- Set Noise Reduction and MPEG Noise Reduction in the Picture Menu to remove noise.

  📘➔ Settings > Picture > Noise reduction settings

- Check nearby electrical equipment (car, motorcycle, fluorescent lamp).

No image can be displayed

- -

- Check all required cables and connections are firmly in place.

- Check the correct input mode is selected.

- Check the setting of AV2 (COMPONENT / VIDEO) in Input Selection to match the output of the external equipment.

  📘➔ Watching > External equipment

- Is Contrast, Brightness or Colour in the Picture Menu set to the minimum?

  📖 → Settings **>** Picture **>** Basic settings

Blurry or distorted image (no sound or low volume)

- -

- Reset channels.

  📖 → Watching **>** Tuning and editing channels **>** Auto Setup

---

There may be red, blue, green and black spots on the screen

- -

- This is a characteristic of liquid crystal panels and is not a problem. The liquid crystal panel is built with very high precision technology giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as a fixed point of red, green, blue or black. Please note this does not affect the performance of your LCD.

Digital TV

Before requesting service or assistance, please follow these simple guides to solve the problem.

If the problem still persists, please contact your local Panasonic dealer for assistance.

Block noise, frozen or disappearing image occurs / Some channels cannot be tuned

- -

- Check Signal Condition. If Signal Quality is displayed in red, the DVB signal is weak. Connecting the aerial to the TV directly may improve signal quality than connecting the aerial through the equipment (set top box, DVD, etc.).

  📖 → Watching **>** Tuning and editing channels **>** Signal Condition

  📖 → Watching **>** Basic **>** Basic connection

- Check your postcode area is able to receive the Freeview channels at the following website.

  www.freeview.co.uk

- Weather conditions will affect signal reception (heavy rain, snow, etc.), in particular in poor reception areas. Even during good weather, the high pressure can cause poor reception of some channels.

- Due to the digital reception technologies involved, quality of the digital signals may be relatively low in some cases, despite good reception of analogue channels.

- Turn the TV off with Mains power On / Off switch, and then on again.

- If the problem persists, consult your local dealer or service provider for the availability of services.

No programmes shown on TV Guide

- -

- Check the digital transmission by contacting Digital UK on 08456 50 50 50 or at the following website.

  www.digitaluk.co.uk

- Consult an aerial engineer to check the alignment of your aerial.

Cannot find a channel you have previously watched

- -

- The channel may broadcast for part of the day.

- Check the channel in the TV Guide.

   → Watching > TV Guide

- Channel position numbers may be changed by broadcasters.

- Reset channels.

   → Watching > Tuning and editing channels > Auto Setup

Analogue TV

Before requesting service or assistance, please follow these simple guides to solve the problem.

If the problem still persists, please contact your local Panasonic dealer for assistance.

White spots or shadow image (ghosting) occurs / Some channels cannot be tuned

- -

- Check the position, direction and connection of the aerial.

- Weather conditions will affect signal reception (heavy rain, snow, etc.), in particular in poor reception areas. Even during good weather, the high pressure can cause poor reception of some channels.

- Turn the TV off with Mains power On / Off switch, and then on again.

- If the problem persists, consult your local dealer or service provider for the availability of services.

No programmes shown on TV Guide

- Adjust the direction of the aerial to another transmitter installed nearby.

- Check the analogue broadcast. If the image quality is poor, check the aerial and consult your local dealer.

- Check the analogue broadcast (if still available in your area).

Sound

Before requesting service or assistance, please follow these simple guides to solve the problem.

If the problem still persists, please contact your local Panasonic dealer for assistance.

No sound is produced

- Is "Sound mute" active? Press MUTE to switch sound mute on or off.

- Is the volume set to the minimum?

- Check connections and setting of external equipment.

    📺 ➡ Watching > External equipment

- Ensure that Speaker Selection is set to TV.

    📺 ➡ Functions > VIERA Link "HDAVI Control™" > Speaker Selection

---

Sound level is low or sound is distorted

- Sound signal reception may be poor.

HDMI

Before requesting service or assistance, please follow these simple guides to solve the problem.

If the problem still persists, please contact your local Panasonic dealer for assistance.

Sound is unusual

- Set the sound setting of the connected equipment to "2ch L.PCM".

- Check the HDMI1 / 2 / 3 Input setting in the Sound Menu.

    📺 ➡ Settings > Sound > Audio output settings

- If digital sound connection has a problem, select analogue sound connection.

> → Watching > External equipment > HDMI features

Pictures from external equipment are unusual when the equipment is connected via HDMI

- Check the HDMI cable is connected properly.

     → Watching > External equipment > External connection

- Turn the TV and equipment off, then turn them on again.

- Check an input signal from the equipment.

     → Watching > External equipment > Valid input signals

- Use equipment compliant with EIA/CEA-861/861D.

Network

Before requesting service or assistance, please follow these simple guides to solve the problem.

If the problem still persists, please contact your local Panasonic dealer for assistance.

Cannot connect to the network

- Check the LAN cable or wireless LAN is connected properly.

     → Internet service > Network connections

     → Home network > Network connections

- Check the connections and settings.

     → Internet service > Network settings

     → Home network > Network connections

     → Home network > Network settings

- Check the network equipment and network environment.

- The router may not be set to issue IP address automatically. If the network administrator prefers to allocate an IP address, set an IP address manually.

     → Home network > Network settings

- The router may be using MAC address filtering (security setting). Confirm the MAC Address of this TV and set the router to use it.

     → Settings > Network > Network Status

- If the problem persists, consult your Internet Service Provider or telecommunications company.

Cannot select the file during DLNA operations

- Is media server of the connected equipment prepared?

  📖 → Home network **>** DLNA **>** Information

- Check applicable data format.

  📖 → Home network **>** Technical information

- Check the settings of Network Link Settings

  📖 → Home network **>** Network settings **>** Network Link Settings

Cannot operate internet content

- Check the connections and settings.

  📖 → Internet service **>** Network connections **>** Internet connection

  📖 → Internet service **>** Network settings

- The server or connected line may be busy now.

Other

Before requesting service or assistance, please follow these simple guides to solve the problem.

If the problem still persists, please contact your local Panasonic dealer for assistance.

VIERA Link function does not work and an error message appears

- Check the connections.

  📖 → Functions **>** VIERA Link "HDAVI Control™" **>** Summary of VIERA Link

- Turn the connected equipment on and then switch the TV on.

  📖 → Functions **>** VIERA Link "HDAVI Control™"

Parts of the TV become hot

- Even if the temperature of parts of the front, top and rear panels has risen, these temperature rises do not cause any problems in terms of performance or quality.

Overcurrent error message appears

- The connected USB device may cause this error. Remove the device and

turn the TV off with Mains power On / Off switch, then turn it on again.

- Check foreign objects are not inside the USB port.

An error message appears

- Follow the message's instructions.
- If the problem persists, contact your local Panasonic dealer or the authorised service centre.

The LCD panel moves slightly when it is pushed with a finger

Clattered sound might be heard

- There is some flexibility around the panel to prevent damage to the panel.
- The panel might move slightly when it is pushed with a finger, and clattered sound might be heard. This is not a malfunction.

Maintenance

Care and Cleaning

First, remove the mains plug from the socket outlet.

■ Display panel, Cabinet, Pedestal

Regular care:

Gently wipe the surfaces of the display panel, cabinet, or pedestal using a soft cloth to clean the dirt or fingerprints.

For stubborn dirt:

First clean the dust on the surface. Dampen a soft cloth with clean water or diluted neutral detergent (1 part detergent to 100 parts water). Wring the cloth and wipe the surface. Finally, wipe away all the moisture.

= Caution =

- Do not use a hard cloth or rub the surface too hard, otherwise this may cause scratches on the surface.
- Take care not to subject the TV's surfaces to water or detergent. Liquid inside the TV could lead to product failure.
- Take care not to subject the surfaces to insect repellent, solvent, thinner or other volatile substances. This may degrade surface quality or cause peeling of the paint.
- The surface of the display panel is specially treated and may be easily

damaged. Take care not to tap or scratch the surface with your fingernail or other hard objects.

- Do not allow the cabinet and pedestal to make contact with a rubber or PVC substance for a long time. This may degrade surface quality.

■ Mains plug

- Wipe the mains plug with a dry cloth at regular intervals. Moisture and dust may lead to fire or electrical shock.

Information

Using Help menu

1. Display the menu with MENU

2. Select Help with △ / ▽ and press OK to access

3. Select TV Self Test / System Information / Device Information with △ / ▽ and press OK to access

---

TV Self Test

Makes a diagnosis of picture or sound problems.

Follow the on-screen instructions.

Displays the device information of this TV.

Optional accessories

Communication Camera

■ Communication Camera

- TY-CC20W

  – This camera can be used in the video communication tool.

    ▶ Internet service > Internet content > Selecting internet content

–   Depending on the area, this optional accessory may not be available. For details, consult your local Panasonic dealer.

Wall-hanging bracket

■ Wall-hanging bracket

- Please contact your local Panasonic dealer to purchase the recommended wall-hanging bracket.

= Warning =

- Using other wall-hanging brackets, or installing a wall-hanging bracket by yourself have the risk of personal injury and product damage. In order to maintain the unit's performance and safety, be absolutely sure to ask your dealer or a licensed contractor to secure the wall-hanging brackets. Any damage caused by installing without a qualified installer will void your warranty.

- Carefully read the instructions accompanying optional accessories, and be absolutely sure to take steps to prevent the TV from falling off.

- Handle the TV carefully during installation since subjecting it to impact or other forces may cause product damage.

- Take care when fixing wall brackets to the wall. Always ensure that there are no electrical cables or pipes in the wall before hanging bracket.

- To prevent fall and injury, remove the TV from its fixed wall position when it is no longer in use.
