Preliminaries

The ADRA EUD Project Tracking System is a web based data bank. It is hosted on a server in Germany. It has been developed by ADRA EUD Regional Office. There is no need to install a special software on your computer. It does work on the most common internet browsers. It also work on "Windows Mobile". However we have discovered that it works best on the Microsoft Windows Internet Explorer.

It can be accessed from the ADRA EUD Website protected "Members Section". ADRA EUD does give personal logins to all ADRA employees around the entire ADRA network. These logins will allow you to look at and download all the tools and information that is made available by the ADRA Euro-Africa Regional office. ADRA EUD provides this service in the spirit of "Information Sharing".

The use of the "Project Tracking System" (PTS) is compulsory (see ADRA EUD board action 05-03 of September 29, 2005) for the ADRA country offices located within the ADRA EUD region. This is a service provided by the ADRA EUD regional office to its country offices within the EUD region. It was designed in a way that it can easily be used by each ADRA country office in the entire ADRA network. The ADRA EUD board decided however that a small user fee would be requested. This income would contribute to develop and adapt this tool to new requirements. So far emphasis has been given to keep the tool user-friendly, without many graphics.

It has been used successfully by the ADRA EUD country offices since September 2005. In the beginning some of the offices have been very sceptic, but now our workers are beginning to realize that it can be a very valuable and practical tool. It helps ADRA offices to share information and to have project files organized. One of the nice side effects is that it helps ADRA to set protocols and procedures in place in order to work more professionally and in a more organized way.

In connection with this tool ADRA EUD has developed some important rules such as:

- The initiative to plan and start a project shall come from the implementing (beneficiary) side.
- Each project shall be documented by the following documents:
 - Proposal
 - Budget
 - Time schedule
 - Project agreement
 - Interim and final report(s)
 - Evaluation report
 - Any other document as required by the donor organization and/or needed for a successful implementation of the project like:

Local agreements, maps, graphics, photographs, videos (352x288 pixels), etc.

The system does also provide an electronic archive which will be accessible from the internet for five years. All data recorded on the PTS will be backed up automatically. **View information!** Enter the ADRA Members website. You need a **personal login** for this website. Note: *Do not reveal this personal login to any body else.* In the column "Project Coordination"

click on "**Project Tracking**" You will now see the list of ADRA **Implementing offices**.

In the "Navigation" line you can:

- Switch between "Implementing Offices" and "Supporting Offices".
- Search for Projects and Supporting Offices
- Look at the Archives
- Look at Statistics

The **basic currency is EUR**, but you can also switch to other currencies. The system will then convert based on the current Yahoo exchange rates as published on the web.

You can view these lists at three different levels:

- 1. Country offices
- 2. Country offices and name of projects
- 3. Country offices, name of projects and detail information about project

View information as Supporting Office

In the navigation line click on "Supporting Offices". The project list for the supporting offices is created automatically while they are entering their financial contributions to a project.

To view the project listed according to supporting offices, click on "Supporting Offices" in the navigation line. You will then see the list of supporting offices. Here also you can switch between the three different levels.

Status of Projects!

Projects recorded in the PTS have one of the following status:

- Planned
 - A project shall get the status "Planned" when:
 - The ADCOM has decided to plan a certain project.
 - A first cost estimate has been made.
- Submitted

A project shall get the status "submitted" when: - The proposal has been submitted to a local donor and/or to at least one ADRA supporting office. - The "Notes" function in the PTS shall be used to indicate to which donor(s) the proposal has been submitted.

Being Implemented

A project shall get the status "Implemented" when: - Funds to cover the full budget have been fully secured to successfully implement the project.

- A project agreement has been signed between all the parties involved.

Completed

- A project shall get the status "completed" when:
- The Implementation has been fully completed

- The final report has been accepted by all the parties involved.

Declined

A project shall get the status "declined" when:

- After a certain period of time no sufficient funds have been found.

- Any other reason that would hinder a successful implementation of the project.

Declaration and change of status will be explained later.

Archives!

Projects declared as "Completed" or "Declined" will remain in the current list until 31 December. Then at midnight they will be transfer into the archive automatically.

	Others 625'242		Currency: Euro	

You can analyse funding sources at different levels:

- World
- Regions
- Countries

The analysis is based on the project that are being implemented and/or have been completed since the beginning of the current calendar year.

The graphics can be viewed in four different forms:

- 2D bars
- 3D bard
- 2D pie
- 3D pie

How to use it!

Enter and edit information:

Again, the initiative to plan and start a project shall come from the implementing (beneficiary) side. Supporting offices may propose opportunities to implementing offices, but the registration of a new project will have to be done by the implementing office.

Supporting offices may only register a project for implementing offices which did not yet buy into the system. In this case, the supporting office will do all the editing in behalf of the implementing office. It will automatically have the login rights to do so.

We have to be aware that a project will go through different stages such as:

- Planned
- Submitted
- Being Implemented
- Completed or Declined

Here are some explanations concerning the different stages or **status** of the project as outlined in the ADRA EUD Operations Policies:

- Planned
 - A project shall get the status "Planned" when:
 - The ADCOM has decided to plan a certain project.
 - A first cost estimate has been made.

Now is the time to register the project in the PTS!

Submitted

A project shall get the status "submitted" when:

The proposal has been submitted to a local donor and/or to at least one ADRA supporting office.
The "Notes" function in the PTS shall be used to indicate to which supporting offices and to which local donor(s) the proposal has been submitted.

Being Implemented

A project shall get the status "Implemented" when:
Funds to cover the full budget have been fully secured to successfully implement the project.
A project agreement has been signed between all the parties involved.

• Completed

A project shall get the status "completed" when: - The Implementation has been fully completed

- The final report has been accepted by all the parties involved.

• Declined

A project shall get the status "declined" when:

- After a certain period of time no sufficient funds have been found.

- Any other reason that would hinder a successful implementation of the project.

In order to use the PTS your ADRA office needs a "User License". The owner of the PTS will sell you a

Login

100%

"User License" for a small yearly fee. You will then receive a "**Login**" which is valid for the whole ADRA country office. SN

Do not confuse the personal login for the ADRA EUD website with the login for the use of the PTS. The personal login allows you to view the PTS but does not allow you to enter and edit data.

You can get a user license for your office as "supporting", "implementing" office or for both.

After you have received your login including the pass word, you will have to change the password. Remember, when you

are registered as implementing and as supporting office you will have to change your password for both. When you are using the same password for both, you will be automatically logged in as both (implementing and supporting office).

The office login gives you automatically the access rights for entering and editing data concerning your country office and for those offices which have not yet subscribed to the PTS.

Important! Do not change the username. Only change the password from time to time.

Start a project

To start a project you have three different functions:

- click your right mouse key
- click "p" on your keyboard
 click at the top of the
- page

A small "Start a new project" window will appear and you will have to enter the required data. Chose that currency on

which the project budget will be base on.

The lines "Cash, Food, Other" correspond to the terms used by ADRA International to prepare the global Annual report. We recommend a **special system to number projects**.

07 year of registering the project XX two letters country abbreviation according to ISO 001 three digit number starting at 001 at the beginning of each year. This system will automatically propose the next available number. The same number cannot be entered twice. JF initials of the desk officer.

Example: 07-CH-001-JF

Currencies

Usually the budget is based on the local currency. In case where the local currency is very soft, that budget can also be based on a hard foreign currency like the Euro or the US Dollar.

Users of the system would like to see the project list and its figures in their local currency. They may also want to present reports in form of current project lists to their board, ADCOM or any other purposes. Of course this reports should be base on their local currency. They system is designed in a way that it can take into account all of these factors.

The implementing office which starts the project can enter budgeted amounts in local currency. They system will then convert this amount into the base currency of the PTS which is the EUR.

Supporting offices can pledge and commit money in their currency. The system will automatically propose the current exchange rate, but the user may overwrite this and define its own exchange rate. This will then stay fix until the end of the project.

As mentioned above, viewers can view the list according to their currency.

When you have a project in Disaster Response you have also the possibility to mark it as such by clicking the "Yes" button in the line "Disaster Response". A window will then pop up asking for some more information concerning the project. This information will then be sent to the "Reuters Alert-Net" automatically by an RSS feed. Since ADRA is a mem-

ber of the "Reuters Foundation" we also have to send in information about what ADRA is doing.

vsten

Tracking

roject

Normally developmentand relief-projects are shown in a light blue line. Relief projects for disaster response will then be shown in a yellow line. This way it is easier to see which projects urgently need support. In order to make sure that your project will be "discovered" you should still send an email to your potential

Upload any **document** which is related to your project. In the planning stage you will probably upload only a concept paper and a rough cost estimate. Before a project reaches the "Being Implemented" status, you will have the following documents uploaded:

- Proposal, describing the scope of work
- Budget reflecting the cost
- Time schedule showing the duration of the project
- Annexes such as official request or declarations, maps, photographs, etc.

	🔮 Internet	🔍 100% 👻

Once the funding is secured and before the implementation will start, you will have to sign a project agreement with your supporting office. Provisions are made in the system to upload also "Project Agreements". Later on, as the implementation of the project pro-

gresses, you will also upload "Interim-", "Final-* and "Evaluation-Reports".

Under annexes you can also upload short videos in a "Windows Media Compatible" format. The resolution must be 352x288.

A small video projector will then appear behind the country name and the name of the project, indicating that as video is available.

Notes section:

Use the "Notes" section to keep log of steps, actions and small verbal agreements. It can be used like a blog.

Financing prommise from ADRA Luxembourg 04.09.2006 13:30 - Morocco
ADRA Luxembourg commited itself on Friday 01.09.2006 to provide the 6174.07 EUR requested from a donor for the implementation of the project.
ADRA Morocco and it's partners wish to express their appreciation for this commitment.
The financing agreement with ADRA Luxemburg and the project implementation agreement with the local partner shall be signed until the 16th of September.
News 29.08.2006 11:38 - Morocco
Called ADRA Italy and found out that Franca Zucca has to call the donor on Sept. 1st and that she will inform us immediately.
Presented to possible Donor 04.05.2006 12:18 - Morocco
Proposal presented to possible Donor by ADRA Italy on May 3rd 2006
Submitted 04.05.2006 12:13 - Morocco
Proposal submitted to ADRA Italy on May 03rd 2006.

All parties involved an add and read. It helps the network to be transparent.

Add a donor!

If you get contributions locally, you can add a local donor. Click on the small green button next to "Financing".

You can add local donors or donors from those supporting offices that have not yet subscribed to the system.

In a drop down menu you will be able to choose from different categories of donors. These different categories will be reflected later on in the "Funding Source Analysis" (statistics).

If your donor has already conformed his donation you can click on "Confirmed by donor" if your donor has not yet confirmed his contribution you click on "Submitted to donor"

Please provide the det

Normally supporting offices will **join a project** add their donations to the system directly. This can be done either by clicking on the green button next to "Finances" or by clicking on the two rings behind the project title. A pop-up window will then ask you to enter the data concerning your office.

If there are several supporting offices, one (usually the one with the biggest contribution) will act as "Main Supporting Office". Other supporting offices will act as "Co-Supporting Offices". The roles of these different actors are clearly

defined in the document "Tasks of ADRA Offices". The implementing office will have to negotiate with the different supporting offices on which office will become the "Main Supporting Office".

Take note of the small red crosses (delete) and the pencils (edit).

Change of Status: Planned Submitted Being Implemented Completed / Declined (see also pages 12 and 13)

Open the project on level 3 and edit "General Information.

A small window will open where you can select from a drop down menu the status.

Make these changes as soon as they occur!

Project completed:

When the implementation of a project is completed the implementing office will write a final report which includes all relevant document. The narrative report, finance report, photographs and nay other document should be combined in one pdf file. This file can then be uploaded in the PTS as "Final Report". The Main supporting office will then check the report and send it to all relevant stakeholders. As soon as the OK is in from all key players, the main supporting office then declares the final report as "accepted". Only then, the implementing office may change the status of the project to "Completed.

Staff Travel Coordination Tool (STCT) The Staff Travel Coordination Tool is an online instrument to make staff trips visible to our colleagues.

30

It is interlinked with the PTS. You will have to use the same login as you are using to make changes in the PTS. You will then be allowed to make new entries and to edit you own recordings. In a pop-up window you will then be asked to give all the information necessary. In a drop-down list you can select the country your are going to visit. Enter your name. In a pop-up calendar you can select the dates. In the section "Visited Projects" you will see all the projects recorded in that selected country. With a mouse click you can select the project your are going to visit. Holding down the ctrl key will allow you to select several projects at the same time.

If you have other business to do in that country, please indicate it in the section "**Other Purposes**".

You can also upload files which are related to your trip. This is especially helpful to up-load trip reports.

If you hover with your mouse cursor over the bar a small pop-up window will show you **which projects** the person will be visiting.

A click on the bar will show you which files have been uploaded. You can download such files on your computer or you can view them online.

Our colleagues from the ADRA implementing offices wish that project and any other visits would be more coordinated in between the supporting offices. They wish that visitors would come to visit projects at the same time. This would safe them time and money.
