DO NOT USE FOR FLIGHT

ABOUT THIS MANUAL

VERSION: 10 NOVEMBER, 2009

WARNING: THIS MANUAL IS DESIGNED FOR MICROSOFT® FSX USE ONLY. DO NOT USE FOR FLIGHT.

The '767 Captain' FLIGHT MANUAL is organized into three Parts.
Each Part is provided as a separate Acrobat® PDF document:

Click START > Programs > Captain Sim > 767 Captain >

- **Part I – User's Manual** - this document.
 - o The User's Manual describes the '767 Captain' Sim product as a software title.
- **Part II – Aircraft and Systems**
- **Part III – Normal Procedures**
- **Part IV – Flight Characteristics and Performance Data**
- **Part V - Flight Management System**

Adobe Acrobat® Reader Required

FOR GENERAL INFORMATION ON THE '767 CAPTAIN' PRODUCT PLEASE USE WWW.CAPTAINSIM.COM .
THIS MANUAL PROVIDES ADDITIONAL INFORMATION ONLY, WHICH IS NOT AVAILABLE ON THE WEB SITE.

DO NOT USE FOR FLIGHT

THE BOEING 767 AIRCRAFT

The Boeing 767 family is a complete family of airplanes providing maximum market versatility in the 200- to 300-seat market. The Boeing 767 family includes three passenger models - the 767-200ER, 767-300ER and 767-400ER - and a freighter, which is based on the 767-300ER fuselage.

The twin-engine 767 - sized between the single-aisle 757 and the larger, twin-aisle 777 - has built a reputation among airlines for its profitability and comfort.

The 767-400ER brings significant improvements in operating economics over competing airplanes in the 240- to 300-seat market. The payload capability, intercontinental range, passenger comfort and commonality with other Boeing jetliners give this airplane strong market appeal.

The 767 Freighter is a derivative of the popular 767-300ER (extended range) passenger twinjet. All the advancements in avionics, aerodynamics, materials and propulsion that were developed for passenger versions of the 767 are incorporated in the freighter. Its design provides excellent fuel efficiency, operational flexibility, low-noise levels and an all-digital flight deck.

You can breathe easy with the 767 family. 767s produce less pollutant emissions per pound of fuel than any comparably sized jetliner, including the A330-200. When combined with the fact that the 767 also burns significantly less fuel, the 767 is truly the "clear" winner. The 767 family is cleaner than industry standards for all categories of emissions -- nitrogen oxides, hydrocarbons, smoke and carbon monoxide.

DO NOT USE FOR FLIGHT

767-300 Base Pack

The **767-300 Base Pack** delivers the following features for all of the '767 Captain' models:

- 767-300 exterior models
- Interior models (VC)
- 2D panels
- Systems and flight instruments
- Authentic Sound Set

SPECIFICATION

The **767-300 Base Pack** is available as a separate product at www.captainsim.com

File Name: csx767_XX00.exe

Size: ~68 MB

INSTALLATION

1. Right after a purchase you will receive an automated email message from Captain Sim Sales with your Order Number and download links.

Note:

- How to get the product download links if you did not receive our email receipts?
 - Please check-in to [Your Profile](#)
 - In Your Profile click: **Product Name** > **Extended Download Service** and download the product.
- Please keep your ORDER NUMBER safe. You will need it for future re-install, updates etc.

2. Download the .exe file to any folder. **Please backup the files to avoid the extra charge in future please keep your downloads and Check-in info safe!**
3. Double click on the .exe file and follow the prompts.

Note:

- YOUR PC MUST BE CONNECTED TO THE INTERNET FOR THE INSTALLATION.
- ORDER NUMBER IS REQUIRED FOR THE INSTALLATION.
- The installation software will automatically add the '767-300 Base Pack' to your MSFS.
- Upon installing the models will appear as 'Boeing 767-300' under 'Boeing' manufacturer, 'Captain Sim' publisher in the MSFS aircraft selection menu.
- Links to Manuals and Uninstall will be available via:
START > Programs > Captain Sim > 767 Captain >

UNINSTALLATION

Click START > Programs > Captain Sim > 767 Captain > 767-300 Base Pack > Uninstall

Note:

The *767 Captain Expansion Models* will not work after the 767-300 Base Pack deinstallation.

DO NOT USE FOR FLIGHT

SYSTEMS

See *FLIGHT MANUAL Part II – Aircraft Systems* for details.

2D PANELS

'ICONS' CONTROL 2D PANEL

Press Shift+1 to show/hide the 'ICONS' CONTROL PANEL.

CAPTAIN VIEW PANEL

Day and Night version of the 1600x1200 High Resolution Captain View 2D Panel is included.

Day

Night, Glareshield Lights ON

Night, Glareshield Lights OFF

See *FLIGHT MANUAL Part II – Aircraft Systems, Part V – FMS* for details.

DO NOT USE FOR FLIGHT

OVERHEAD PANEL

Press Shift+6 or its icon to show/hide the panel.

Day and Night version of the 1600x1200 High Resolution Overhead 2D Panel is included.

Day

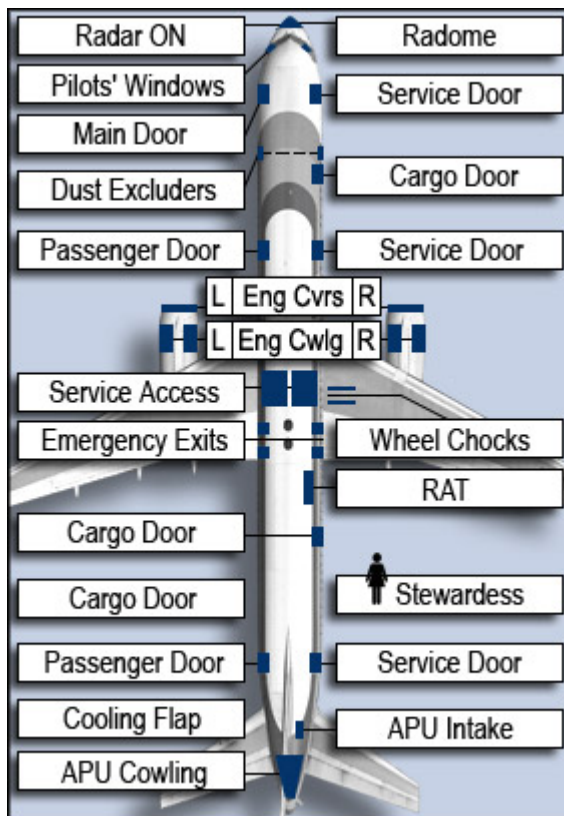

Night

See FLIGHT MANUAL Part II – Aircraft Systems, Part V – FMS for details.

MODEL ANIMATION CONTROL PANEL

Press Shift+2 or its icon to show/hide the panel.

Press any white label/button to initiate the corresponding animation of the Exterior Model. The initiated animation button will turn green.

Notes:

- You cannot put the ENGINE COVERS if an engine is running.
- You cannot open ENGINE COWLINGS and put DUST EXCLUDERS inflight.
- If your speed is more than 0 KIAS you cannot set the WHEEL CHOCKS.

Available animations key combinations:
Main Door - Shift+E

DO NOT USE FOR FLIGHT

WINGLETS

The 767-300ER can be retrofitted with blended winglets from Aviation Partners Boeing. These winglets are 11 ft (3.4 m) long and will decrease fuel consumption an estimated 6.5% on the -300ER

External View

The Winglets are available for both, VC Passenger Views and all external views.

PRE- SAVED FLIGHTS

Two flights are included into the '767-300 Base Pack':

1. 767-300 Captain Cold-n-Dark (KSEA)
2. 767-300 Captain Cleared for takeoff (KSEA)

To load a flight:

1. Start FSX
2. Click 'Load'
3. Select any of two flights.
4. Click 'Fly Now'

OR if FSX is already started, any other flight loaded:

1. Go to Main FSX Menu – Flights
2. Click 'Load'
3. Select any of two flights.
4. Click 'Fly Now'

KC-767A Expansion Model

The '767-300 Base Pack' is required!

The **KC-767A Expansion Model** delivers KC-767A exterior model for 767-300 Base Pack.

This part of the manual describes the KC-767A specific features only.

THE BOEING KC-767 AIRCRAFT

The Boeing KC-767 is a military aerial refueling and strategic transport aircraft developed from the Boeing 767-200. The tanker received the designation KC-767A in 2002 after being selected by the US Air Force initially to replace older KC-135Es. In December 2003, the contract was frozen and later canceled due to corruption allegations.

The tanker is currently being developed for use by the Italian and Japanese air forces, who have ordered four tankers each. Financing of the development of the aircraft, over \$1 billion, has been borne by Boeing, in that it hoped to get major orders from the U.S. Air Force.

For the KC-X competition, Boeing offered a KC-767 based on the forthcoming 767-200 Long Range Freighter. In February 2008 the DoD selected Northrop Grumman/EADS's KC-30 offering, now officially designated the KC-45A. The Boeing Company submitted a protest to the Air Force's decision on 11 March 2008. The United States Government Accountability Office upheld their protest on 18 June, placing the status of the KC-45A in doubt and allowing for a rebid of the contract by Boeing. However in September 2008, the KC-X bidding was canceled.

In September 2009, the USAF announced it would again start the bidding process for the new refueler.

E-767AWACS Expansion Model

The '767-300 Base Pack' is required!

The **E-767AWACS Expansion Model** delivers E-767AWACS exterior model for 767-300 Base Pack.

This part of the manual describes the E-767AWACS specific features only.

THE BOEING E-767 AIRCRAFT

The Boeing E-767 is an Airborne Early Warning and Control aircraft. It was designed in response to the Japan Air Self-Defense Force's requirements, and is essentially the E-3 Sentry mission package on a Boeing 767-200 platform.

In 1976, the United States Air Force was about to deploy the E-3 Sentry airborne warning and control system aircraft, which was considered to be the prime candidate for the airborne early warning mission by JASDF. However, the Japan Defense Agency (JDA, now Ministry of Defense) realized that the E-3 would not be readily available due to the needs of USAF and opted to procure the E-2 Hawkeye instead. The E-2C was put into service with the Airborne Early Warning Group (AEWG) at JASDF Misawa Air Base in January 1987.

In 1991, the JDA requested funds to upgrade the airborne early warning system procuring the E-3. Unfortunately, production of the Boeing 707-based E-3 airframe had ended in 1991 and the plan was shelved. The following year, Boeing proposed a 767-based AWACS, and the JDA agreed to procure two E-767 in fiscal year 1993 and two more in fiscal year 1994.

Due to the sensitivity of the AWACS mission, description of mission equipment is limited. The base airframe for E-767 is that of a 767-200ER, Boeing designation 767-27C. (The "7C" designation indicates the aircraft was originally delivered to the Japanese government.) The E-767 offers 50 percent more floor space and nearly twice the volume of the E-3. Mission equipment is installed in forward cabin to balance the weight with the rotodome on the aft fuselage. The aft cabin contains the crew rest area, galley and lavatory.

The system on E-767 is essentially the same as the late E-3 models, using Northrop Grumman's (formerly Westinghouse Electronic Systems) AN/APY-2 radar system. This system is a three dimensional radar that measures azimuth, range, and elevation simultaneously, and has superior surveillance capability over water compared to the AN/APY-1 system on the earlier E-3 models.

The AN/APY-2 is a pulse-doppler radar that can determine the velocity of a tracked target. This surveillance system includes a flexible, multi-mode radar, which enables AWACS to separate maritime and airborne targets from ground and sea clutter returns that limit other modern radar systems.

Its radar has a 360-degree view, and at operating altitudes it can detect targets more than 320 kilometers (200 miles) away. AWACS mission equipment can separate, manage and display these targets individually on situational displays.

AN/APY-2's antenna and Identification Friend or Foe (IFF) Mk XII system's antenna are housed in the rotodome back to back.

The information acquired by the radar system is processed by IBM's CC-2E central computer conformed to E-3 Block 30/35 Modification and can be displayed on the 14 displays onboard.

Other major subsystems in the E-767 are identification, tactical data link, and navigation.

3. Rotodome Control Switch – controls rotodome switching and rotation speed (revo)

DO NOT USE FOR FLIGHT

HOW IS THE E-767AWACS MODEL DIFFERENT FROM 767-300 MODEL

Antennas (5)

Rotodome

Wing Vortex Generators

Wing Antennas (2)

No Middle Starboard Service Door

No Middle Portside Passenger Door

Narrower Starboard Fwd Cargo Door

No Second Emergency Exits

No Passenger Windows

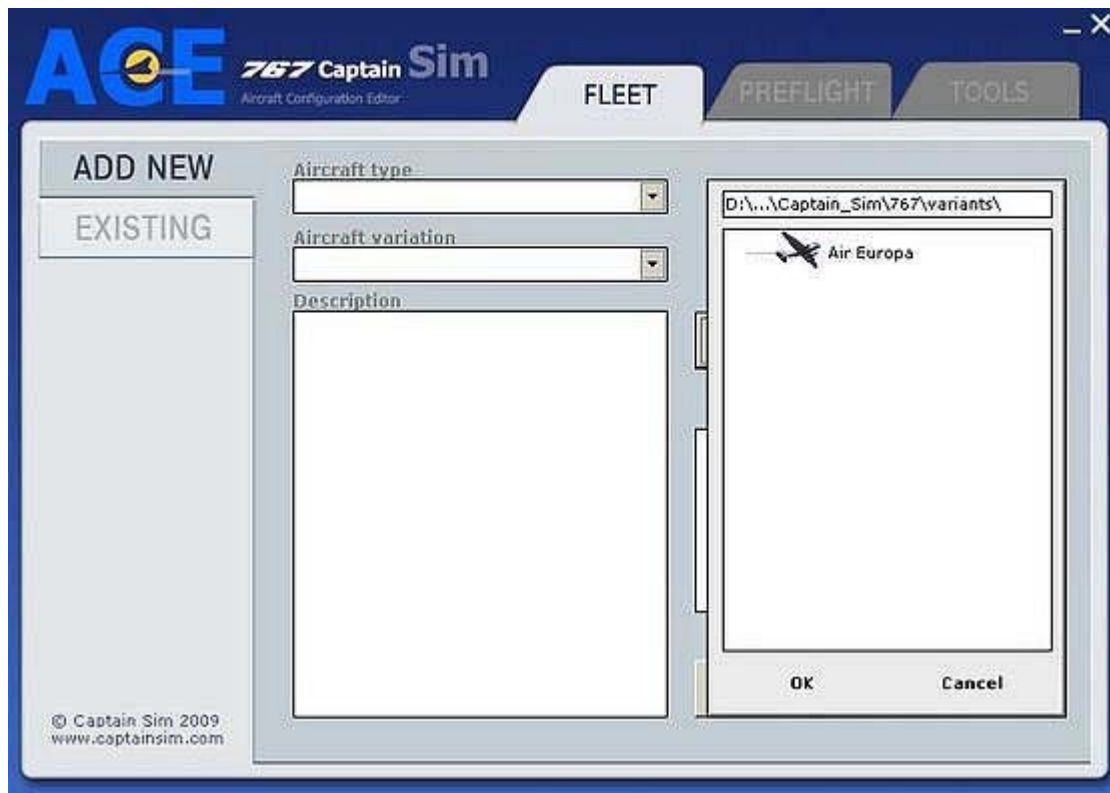

DO NOT USE FOR FLIGHT**ACE (AIRCRAFT CONFIGURATION EDITOR) UTILITY**

The ACE utility is included in the **767-300 Base Pack** and provides the following features:

1. Add new '767 Captain' liveries to FSX.
2. Preview any existing (installed) '767 Captain' livery.
3. Delete any existing '767 Captain' Sim livery from FSX.
4. Edit AIRCRAFT VARIATION text.
5. Edit DESCRIPTION text.
6. Manage selection of the model variations.
7. Number of PREFLIGHT settings features.
8. Number of troubleshooting features.

'FLEET' TAB

The **FLEET** tab contains two vertical tabs: **ADD NEW** and **EXISTING**.

'ADD NEW' TAB

The ADD NEW vertical tab helps you to add new '767 Captain' Sim livery to MS FS.

HOW TO ADD NEW XYZ LIVERY?

1. Make sure your Flight Simulator is not running.
2. Create folder in **[MS FS Root Folder]/Captain_Sim/767/variants** folder.
3. Download new 767 livery archive to the created folder:
[MS FS Root Folder]/Captain_Sim/767/variants/XYZ

DO NOT USE FOR FLIGHT

4. Unzip all content of the downloaded archive to the same folder: **[MS FS Root Folder]/Captain_Sim/767/variants/XYZ**
5. Make sure all textures bmp files and *Description.txt* and *xyz.jpg* files are present and located in the XYZ folder.
6. Start ACE (double-click on the ACE shortcut located at your desktop or go START>PROGRAMS>CAPTAIN SIM> 767 CAPTAIN > ACE.
7. Press 'ADD NEW' tab.
8. Press SELECT VARIATION button and select the variation you want to add. Press OK.

The new variation's image should appear in preview window. Also the new variation info and description should appear in the text fields.

9. Press ADD VARIATION button.

Done! The new variation will appear in your MS FS under Boeing manufacturer Captain Sim publisher.

'EXISTING' TAB

The EXISTING tab helps you to manage existing (installed to MS FS) '767 Captain' Sim liveries:

HOW TO EDIT LIVERY DESCRIPTION?

1. Press 'EXISTING' tab button.

Note

You can modify text in description field. You cannot change Aircraft type and Aircraft variation.

2. Select 'AIRCRAFT TYPE'.

DO NOT USE FOR FLIGHT

3. Select 'AIRCRAFT VARIATION'.
4. Now you can edit texts for the selected livery. When finished, press 'SAVE CHANGES' button to save the changes.

HOW TO DELETE A LIVERY?

1. Press "EXISTING" tab button.
2. Select 'AIRCRAFT TYPE'.
3. Select 'AIRCRAFT VARIATION'.
4. Press 'DELETE VARIATION' button. Pressing 'Yes' button when asked 'Are you sure you want to delete "..." variation?' will delete the selected variation from your '767 Captain' fleet. **No backup copy will be saved.**

MODEL SELECTION:

- **Windshield reflection**
 - Checkbox ticked – windshield reflection is available on **all** 767 models.
 - No tick in checkbox – no windshield reflection on **all** 767 models.
- **Flight Deck Only***
 - Checkbox ticked – no passenger cabin on **all** 767 models.
 - No tick in checkbox – passenger cabin will be present on **all** 767 models.
- **Winglets**
 - Checkbox ticked – winglets will appear on **selected** 767 model and livery.
 - No tick in checkbox – no winglets on **selected** 767 model and livery.

** Not available for 767 Freiter, KC-767A and E-767AWACS Expansion Models*

Press SAVE CHANGES to save all settings.

DO NOT USE FOR FLIGHT

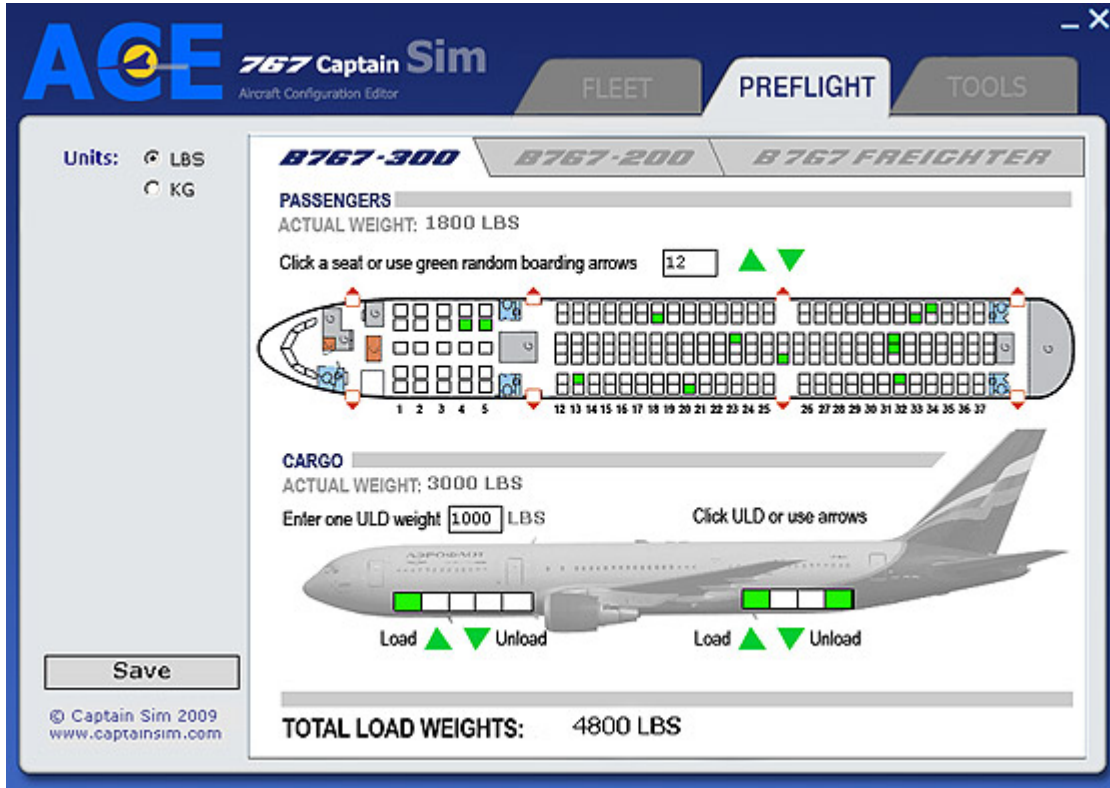

'PREFLIGHT' TAB

Use for payload settings of the 767 models available in 767-300 Base Pack and 767-200 and Freighter Expansion Packs.

Note:

When you open this tab ACE always reads 0 KG/LBS regardless of your previous load settings.

'B767-300'/'B767-200' TABS

Use radio button to select Measurement System – LBS (pounds) or KG (kilograms).

Passengers

Click a seat or use green random boarding arrows or enter a number of passengers in the field. Actual weight will be displayed.

Cargo

Enter one ULD weight. Click ULD section image or use green arrows to load/unload cargo on the lower deck. Actual cargo weight will be displayed.

Total Load Weights – displays current total load weight (PAX + Cargo).

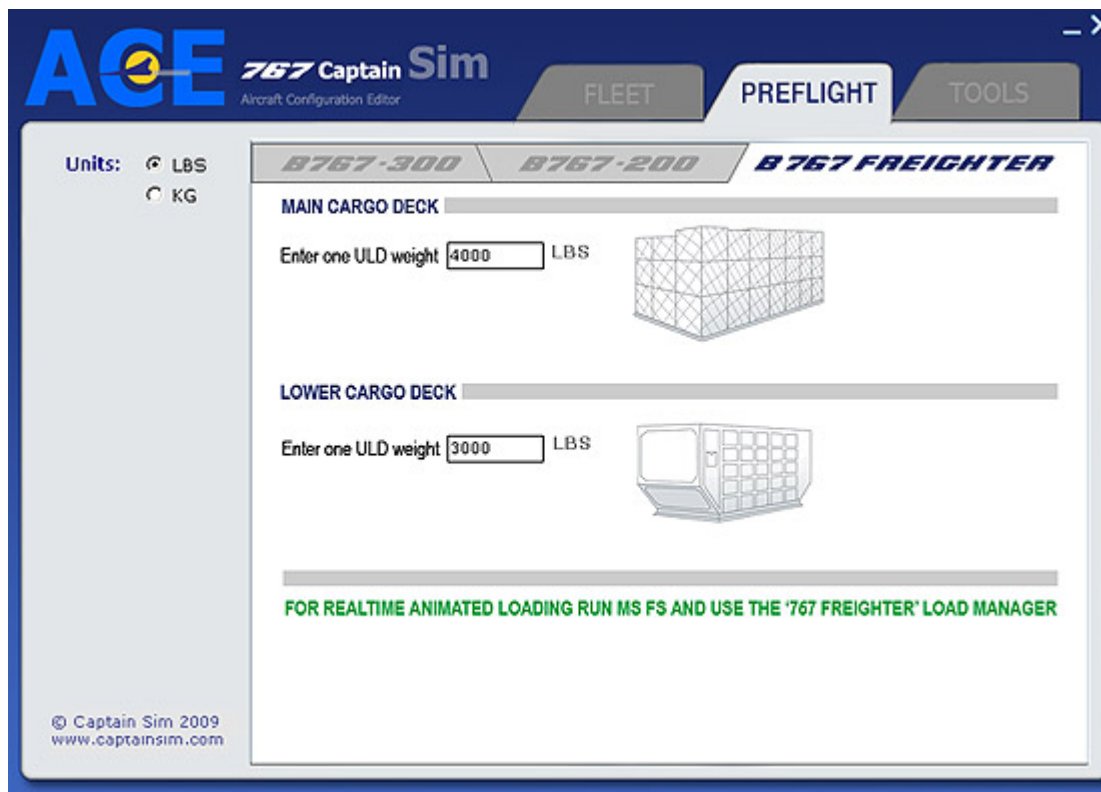

Note:

No fuel included/calculated. For fuel load management use FSX default utilities.

Press 'SAVE' Button. All load settings apply to selected 767 models.

DO NOT USE FOR FLIGHT

'B767 FREIGHTER' TAB

Use radio button to select Measurement System – LBS (pounds) or KG (kilograms).

Enter one ULD weight for Main Cargo Deck and Lower Cargo Deck.

Press 'SAVE' Button.

FOR REALTIME ANIMATED LOAD MANAGEMENT RUN FSX AND USE THE '767 FREIGHTER' LOAD MANAGERS.

DO NOT USE FOR FLIGHT**'TOOLS' TAB****TROUBLESHOOTING**

SET CORRECT MSFS PATH tool. If the 'FLEET' and 'PREFLIGHT' tabs ACE are unavailable please press 'BROWSE' button, set the path to FSX.exe and your MS FS flight files (*.FLT) and press 'SAVE' button. 'FLEET' and 'PREFLIGHT' tabs should be available activated.

TEST '767 CAPTAIN' SIM button.

Please use this tool at Captain Sim support request ONLY.

Click this button to run safe system diagnostic tool and save the data to 'test.txt' file. No personal information collected.
