

Satellite Pro U300

The fashionable ultra-portable.

New and improved!

Toshiba EasyGuard
 Carefree Mobile Computing

Basic

The Satellite Pro U300 is a peerless ultra-portable brimming with extraordinary features for its category. Weighing just 1.99 kg, it comes equipped with Intel® Centrino® Duo processor technology, a brilliant 13.3" WXGA Toshiba TruBrite® widescreen display, a built-in webcam for mobile video conferencing and a DVD Super Multi drive for extra data storage and exciting multimedia on the go. Selected Toshiba EasyGuard features round off the package and provide a more reliable and secure mobile computing experience.

Your data is safe

HDD Protection features shock absorption and full 3-axis motion monitoring to dynamically protect your valuable data.

Make yourself heard with Video/Voice over IP

The integrated webcam and microphone with echo/noise cancellation enable high-quality, real-time voice and video calling over IP-based networks.

Simply connect

Toshiba ConfigFree™ enables you to connect easily anywhere and capture location-based profiles for greater convenience.

Boost efficiency

Intel® Turbo Memory uses flash memory to increase system and application responsiveness and improve multi-tasking performance.

CPU performance may vary from specifications under certain conditions such as the use of battery instead of AC power, certain external peripherals, certain multimedia applications or network connections, complex modeling software and in areas with low air pressure at high altitude (1,000 metres above sea level) and/or certain temperatures. CPU performance may also vary from specifications due to design configuration. Under some conditions, your computer may automatically shut down as a normal protective measure. To avoid risk of lost data, please make periodic back-up copies. For optimum performance, use your computer only under recommended conditions. Please read detailed restrictions in the product resource guide, visit the Toshiba web site: computers.toshiba-europe.com and/or contact Toshiba Technical Support. • Graphics processor unit (GPU) performance may vary depending on product model, design configuration, applications, power management settings and features utilised. • Part of the main system memory may be used by the graphics system and therefore reduce the amount of main system memory available. • For PCs configured with 4 GB of system memory, the full system memory space for computing activities will be considerably less and will vary by model and system configuration. • For information about upgrading your system memory please refer to the user manual or contact your local Toshiba service provider. • One GB means one billion bytes, accessible capacity may be less. • Wired and wireless communication capabilities to be applied in countries where approved. • Battery life may vary depending on applications, power management settings and features utilised. Recharge time varies depending on usage. Battery may not charge while computer is consuming full power. After a period of time, the battery will lose its ability to perform at maximum capacity and will need to be replaced. This is normal for all batteries. To purchase a new battery pack, see your accessories information that shipped with your computer or visit the Toshiba web site at computers.toshiba-europe.com. • Small bright dots may appear on your TFT display when you turn on your PC. Your display contains an extremely large number of thin-film transistors (TFT) and is manufactured using high-precision technology. Any small bright dots that may appear on your display are an intrinsic characteristic of the TFT manufacturing technology. • Weight may vary depending on product configuration, vendor components, manufacturing variability and options selected. • SRS® TruSurround XT™ is only available for WinDVD applications. SRS® WOW™ is only available for Windows Media Player 9 in standard Windows interface. • Please check your system specifications to ensure optimal results. • Certain notebook chassis are designed to accommodate all possible configurations for an entire product series. Your selected model may not have all the features and specifications corresponding to all of the icons or switches shown on the notebook chassis.
