AIM 2.6 HD Software Specification	

# AIM Software HD 2.6 User Manual

Central Management Software (AIM Software HD 2.6) is a total solution for managing Acumen's network products including IP cameras and DVRs/NVRs. AIM Software HD 2.6 contains (1) network video recording software, (2) eMap Manager, (3) Database Manager, (4) Web Server, (5) AIM remote playback, (6) video archiving, and (7) remote AIM/DVR/NVR playback and file download.

Major features including managing 72 H.264/JPEG IP cameras and DVR's/NVRs cameras recording, remote DVR/NVR video playback and file download, and camera groupings with user authentication are integrated within one system application. Two monitors for displaying up to 72 channels 1080P H.264 IP cameras are available for TV wall application.

One important feature of eMap is the central management system for live monitoring, alarm snapshot management, and map management. IP devices installed at different locations can be represented and managed by using maps. Face detection, motion detection, audio detection, and tampering detection provided by an IP camera can trigger various alarm outputs including PTZ preset recall, snapshot email, alarm popping up in full screen, PC siren warning, and pre- and post-alarm recording.

Circular recording, schedule recording, limited recording time, individual HDD recording size configurable, and individual camera recording frame rate configurable provide the flexibilities in managing recording storages. For large video storage, video archiving into a NAS for backup purpose and video recording from AIM to eSATA RAID and internal RAID, and network RAID are also supported. POS, network cash drawer, and text overlay recording into a database are available for quick video search.

AIM Software HD 2.6 is designated for hybrid solution for IP camera, video server, IP Fast Dome, and DVRs/NVRs. It provides total solutions for IP Video digital surveillance. Major features are:

# AIM Software HD 2.6 Main Features

- 1. Record and manage up to 72 channels of H.264/JPEG HD IP cameras or DVR/NVR's cameras.
- 2. Up to 72 channels 1080P IP cameras on two monitors for TV wall application
- 3. Scheduling, continuous, and motion detection recording supported
- 4. eMap live video with alarm snapshots
- 5. RAID, network RAID, and video archiving
- 6. Multiple channels playback for remote network AIM
- 7. Integrated alarm management for various alarm outputs
- 8. Web server for live video
- 9. iPhone and Android phones support
- 10. Retail and transportation business solutions
- 11. Device grouping and recall
- 12. IP Fast Dome control
- 13. Export recorded video to AVI file format
- 14. Easy-to-use calendar and time selections for video playback
- 15. User access levels configurable for groupings and features
- 16. Complete operational event logs
- 17. Two-way audio and audio recording
- 18. Digital zoom, device ePTZ and ROI supported
- 19. Dynamically video channels swapping with mouse drag-and-drop

#### **General Notations**

The terms of IP-based devices or products used in this document refer to H.264 HD/JPEG IP Fast Domes, Video Servers, or IP Cameras. The terms of DVR/NVR devices/products refer to DVR 3, DVR5 series, and NVR Touch Series.

#### Before Using AIM Software HD 2.6

AIM Software HD 2.6 contains video recording. AIM Software HD 2.6 supports multiple hard disk drives recording. If overwritten setting is enabled, the oldest recorded video clips get deleted first. If you want logical partitions in your hard disk drive, please setup at least 20 GB for each drive. To setup hard disk setting, please click on "System Setting" button.

Select recording hard drives for AIM Software HD 2.6 recording. To enable HDD overwritten option, please check this option.

Drive N	Free Space
🗹 C3	27% 50000.1MB
🗌 D()	60% 109233.0MB
🗌 H3 🔤	99% 69236.1MB
J	
F HDD Overwritter	1

Furthermore, each logical HDD drive should contain at least 10% empty space for storing video data. AIM Software HD 2.6 deletes the oldest files first until it reaches 90% of the logical drive, and it proceeds to the next logical hard disk drive for recording.

#### **On-line User Manual**

AIM Software HD 2.6 adopts Acrobat Reader for its on-line manual by clicking on "Windows-> ACUMEN AIM HD 2.6->User Manual". You must install Acrobat Reader before opening the on-line manual.

#### Uninstall AIM HD 2.6

To uninstall AIM HD 2.6, please select Start->Program Files-> ACUMEN AIM HD 2.6->Uninstall. A user might want to export the database. Re-import the database after new installation. Please see Database Manager for detail.

#### Using AIM Software HD 2.6 on Windows Vista and Windows 7 platforms

When you install AIM Software HD 2.6 on Windows Vista and Windows 7 platforms, please go to control panel->User Account Control Setting and low the setting to Default. This can make sure that AIM can login automatically when AIM watchdog performs system reboot.

#### **CPU Usage**

To limited AIM Software HD 2.6 CPU usage, a user can click on CPU usage button to limit CPU usage at certain percentage.

#### **Streaming Information**

To get live video streaming information, click "F2" function key on the keyboard.

# Chapter 1. Using AIM Software HD 2.6

To access AIM Software HD 2.6, follow these steps:

- 1) Click on AIM Software HD 2.6 via Start->Program Files->ACUMEN AIM Software HD 2.6->AIM Software HD 2.6.
- 2) Click on AIM Software HD 2.6 on desktop.

To login AIM Software HD 2.6, please follow these steps:

- Step 1. Select a user from User name dropdown list.
- Step 2. Type the password or leave it blank if you are first time to use this software.
- Step 3. Click on OK button.

<b>‼</b> User login			×
User name: Password:	admin		<b>•</b>
		OK	Cancel

Note: The default passwords for all users are empty.

#### Chapter 1-1. System Settings

System settings contain HDD settings, device settings, and grouping settings. Please finish System Setting before operating AIM Software HD 2.6.

<ul> <li>System Settings</li> <li>System Settings</li> </ul>	Grouping Schedule Rec	cord Time Networl	ĸ	1100	×
Drive Num	Free Space 62% 286161.0MB 67% 403640.0MB	Recycle Space	Auto sequend	ce after reboot er reboot o resolution at nen system sta e when system PU usage	full screen mode arts n starts 80%
		Free Space	Default grouping	g	Main Grouping 👻

					Close

- Auto run this application when system starts: AIM Software HD 2.6 auto-run when Windows starts
- Auto sequence after reboot: Perform grouping sequence after system reboot.
- Full mode after reboot: Perform full screen mode after system reboot.
- Original video resolution at full screen mode: Use original resolution at single channel view mode. Do not scale original video.
- Auto login when system starts: Bypass login when system starts.
- **Default grouping:** Set default grouping at start-up.
- Auto minimized when system starts: AIM runs in the background when system starts.
- Limit max CPU usage: Limit the CPU usage at certain rate.
- Default grouping: Set default grouping.
- Default window division: Set default window division at start-up.
- To enable circular recording, please check HDD Overwritten option. To select HDDs for recording, please select HDD(s) for recording in HDD Information list box.
- System reboot:

enable the system to reboot every day at certain time.

- Recycle space: Reserved recycling HDD space for other applications or OS using.
- HDD reserved day: Limit video recording within certain days.
- Turn off hardware acceleration
   By default, AIM utilizes Direct3D on a graphics card quick video rendering. It the PC does not have such device, turn off this option.
- AIM ID:

The AIM ID controlled by keyboard

• Language:

To choose language setting, please select your language from Language combo box.

# Chapter 1-2. Add a New Device

To add a particular device, please first select the channel and click on "Property" button for adding a new device. The "Camera Settings" dialog box shows up. Please type at least, IP/DNS address, port number, username, and password for connecting the live video of the device. You can also click on "Find Device" and

selection one device from the IPScan tool. Click on "Detect" button for detecting the device type.

Display/Record		Preview	
Active This Device		Cam 05	12/12/06 09:28:42

To edit Camera Setting dialog box, please right mouse click on a channel and select Camera Properties menu item.

- Name—Camera name which is displayed on top of live video channel
- Location—Indicating the location of the camera installed.
- Frame Rate—Frame rate for the device
- ONVIF—Frame rate and video quality settings based on ONVIF protocol.
- Device Type—Device type selection box, RTSP is for H.264 D1 or H.264 HD IP cameras.
- Enable Recording—Enable or disable recording for the device
- Auto Import DVR--Automatically import DVR/NVR cameras into AIM automatically.
- Low bitrate recording mode—Record one frame per second.
- IP/DNS (required)—The IP address of the device
- HTTP Port Number—The HTTP port number of the device
- Video Port Number—DVR/NVR's video port number/IP camera's RTSP port number
- Username—The username which is allowed to login the device
- Password—The password for the username
- Image Size—The source video size of the device
- Camera/485 ID—IP Fast Dome RS-485 ID.
- Low Bitrate Client and Server Connection—Connect in between AIM in low bitrate mode.
- Synchronize Time with PC—Synchronize time with the remote PC.
- Find device—Search IP cameras and configure the IP camera.
- Auto Audio Switch—For automated two-way audio connection

Note: 1. RS-485 camera ID (1 to 128) must match the ID setting of the IP Fast Dome. The software may not control PTZ movement if the ID setting is incorrect.

If the above settings are done, you can click on Connect button to test if the device is properly For default username and password information, please see appendix for detail.

#### Chapter 1-3. Device Type

There are few device type drivers for connecting streaming:

- RTSP—Connect an IP camera with RTSP streaming protocol.
- DVR/NVR-JPEG--Connect a DVR/NVR by MJPEG protocol.
- DVR/NVR-H264—Connect a DVR/NVR by H.264 protocol.
- AIM-JPEG—Connect a AIM by MJPG protocol.
- Low Bitrate IP Camera—Connect an IP camera by low bitrate protocol.
- Low Bitrate DVR Camera--Connect an IP camera by low bitrate protocol.
- Looping Camera—For demonstration purpose, you can choose Looping Camera at Device Type selection box for duplicate video channel without physically connecting to an IP camera or a DVR's camera. It can reduce bandwidth for the network video.

#### Chapter 1-4. ONVIF Setting

To use RTSP streaming, please first setup ONVIF protocol. The detail setting of ONVIF is described as below:

- Profile—A user can select different streaming profile such as H.264 720P or JPEG 720P.
- Protocol—Streaming protocol such as RTP/UDP, RTP/TCP, or RTP/TCP/HTTP.
- Quality—Compression quality
- Brightness: Brightness setting of the video
- Saturation—Saturation setting of the video
- Contrast—Contrast setting of the video
- Sharpness—Sharpness setting of the video
- Frame rate—Change frame rate setting of the IP camera.
- Bit Rate—Bit rate setting of the video

ONVIF			Video Settings		
IP/DNS	192.168.0.86		Brightness = 46 (0 ~ 100)	-	-0
RTSP Port	554		Contrast = 55 (0 ~ 100)	-	-0
Username	admin		Saturation = 53 (0 ~ 100)		
Password	****		Sharpness = 75 (0 ~ 100) Frame Rate = 25 (1 ~ 30)	-	0

				ОК	Cancel

Note: ONVIF setting can only support Acumen's ONVIF cameras.

#### Chapter 1-5. IPScan Utility

To find out the network devices, IPScan utility can scan through all IP address within LAN.

Name	IP	Subnet Mask	Gateway	Port	Assignment	Mac Address	Name
1.264 2MP HD 1.264 2MP HD I 1.264 2MP HD I	192.168.0.82 192.168.0.83 192.168.0.84 192.168.0.85	255.255.255.0 255.255.255.0 255.255.255.0 255.255.255.0 255.255.255.0 255.255.255.0	192.168.0.1 192.168.0.1 192.168.0.1 192.168.0.1 192.168.0.1 192.168.0.1	81 82 83 84 85 86	固定で ア 定 で で で で で で で で で で で で で	000FFC24R855 000FFC246320 000FFC24C228 000FFC24F000 000FFC246202 000FFC24D135	IP Subnet Mask Gateway HTTP Port No.  C Static C DHCP C PPPo PPPoE Account PPPoE Password Refresh Apply

A user can select a device item in IPScan and click on Close button to setup the device. All the device information such as IP address and port number get automatically carried over AIM Software HD 2.6. Click on Connect button in the device dialog box which can test the connection between the PC and the device.

Note: IPScan can only work under LAN environment, not Internet environment.

#### Chapter 1-6. Dual Monitor Outputs

AIM Software HD 2.6 supports dual-screen outputs. There are up to 72-channel H.264 decoding at same time To do so, please have two monitors' PC first. AIM detects each screen's resolution automatically and display video on its monitor.

# Chapter 2. Recording Settings

AIM Software HD 2.6 is configured as continuous recording after an IP camera is connected.

To change recording configuration, please follow the following selections.

### Chapter 2-1. Schedule Recording Settings

AIM Software HD 2.6 can schedule recording based on "Always", "No Record", and "Motion recording for a particular hour.

To enable recording for a particular hour, please click on the week control and set the recording option for the hour. Please also specify the recording type by selecting one of the recording types.

To enable recording schedule for all hours, please click on Apply button for "Apply All Schedule".

To apply the recording settings for all cameras, please click on Apply button for "Apply Schedule to All Channels"

Reboot Device	Launch Browser		OK Cancel

Please enable on "Motion Detection" option and click on "Optiona" to setup motion detection. There are up to four motion areas available for a user to configure. Perform mouse-dragging on the video area to define a motion area. Perform right-mouse click can clear a area or clear all areas. To change motion detection sensitivity, please click on the scroll bar for adjust.

At live monitoring mode, if a motion detection is triggered, the camera window shows "little man" to indicate a motion detection event.

### Chapter 2-3. Recording at System Startup

After the restart of AIM Software HD 2.6, AIM Software HD 2.6 starts recording automatically. There is no need to restart recording service. If a schedule is set, AIM Software HD 2.6 records video based on the schedule at startup.

### Chapter 2-4. Estimated Recording Days

After system installation, to estimate approximate recording days, a user can click on System setting button to enable system dialog box. Click on "Record time" tab. Estimated recording day and time information gets shown on the dialog box.

P System Settings	
System Settings   Devices Settings   Grouping   Schedule HDD Information	Record Time Total Recording HDDs: 2 Available recording space:460964MB / 450G Averge frame size:481 KB/Sec Approximate Recording Hours:7 days 18 hours 1 Minutes
	Close

#### Chapter 2-5. Network Storage

For recording over network storage such as iSCSI or NAS RAID storage, a user can configure AIM Software HD 2.6 to record the video to the network storage, if the network storage supports "Network Neighborhood" or Samba protocols.

em Settings	Grouping	Schedule	Record Time	Network	
etwork					
Server				Add Network Drive	
Login CMX :	Server			Drive :	•
User ID:				Mapped Drive of CM	X PC
User Pass	word:				
Server URL					Apply
HTTP Port	ĺ	80		<b></b>	
Local Nam	e: (			Drive Number	Free Space
				C:\	0% 230482.0MB
HTTP Port		84		D:\	17% 230482.0MB
http://192.16	58 11 4 84				
					Free Space

To do so, please first select a drive at "Add Network Drive" list. Select network storage by click on "Mapped Drive of AIM PC" button. Once the network storage is selected, click on Apply button. At the last, please check the newly added network storage from Drive Number for enabling the storage. AIM records based on the selected drivers at circular recording basis.

#### Chapter 3-4. Recall a Grouping

To recall a grouping, click on grouping drop down list.

#### Chapter 3-5. Grouping Sequence

In grouping tab, please specify Sequence Time. In live monitoring mode, please click on SEQ button to perform Sequence Display feature.

#### Chapter 3-6. Main Grouping

Main Grouping refers to AIM Software HD 2.6's main screen which contains 36 windows-division screen. To add a device for the main grouping, please follow the steps:

- (1) Select Main Grouping in grouping dropdown list.
- (2) Right mouse click on one of the cameras.
- (3) Select Camera Properties to assign the camera properties.

Alternatively, a user can add devices into Main Grouping at System Settings->Device Settings. Device Settings allows a user to manage up to 36 channels of IP cameras, video servers, and H.264 HD IP' cameras.

#### Chapter 3-7. Window-divisions

Currently, AIM Software HD 2.6 supports four types of window-division including maximized window (each view), 4-window-division, 16-window-division, and 36- window-division. To see the maximized camera window, you can select particular camera window and click on Each View button. You can also double-click on the live video for the maximized window. To see 4-, 16-, and 36-window-division, click on the window-division buttons.

# Chapter 3-8. Dynamic Video Channel Editing

If a user wants to change the arrangement of a camera channel, the user can drag a camera and drop to another video channel. This operation swaps these two cameras' positions dynamically in software. There is no need to re-assign all the IP settings, if the user later changes his/her mind for the camera's display position after installation.

#### Chapter 3-9. Digital Zoom

To perform digital zoom, please first drag on the window for digital. Once the channel is in digital zoom mode, please select the green area for other region.

To perform digital zoom in playback, please follow above procedure.

# Chapter 4. Video Playback

AIM Software HD 2.6 can perform video playback task for all IP-based products including H.264 HD IP Cameras, full D1 IP Cameras, IP Fast Domes, Video Servers, LAN Cameras, and DVR/NVRs. To perform video playback on various IP devices, follow the following sections:

#### Chapter 4-1. Playback

To perform playback operation, you have to select a camera channel or a DVR/NVR. By clicking on playback button, the playback dialog box shows up.

Based on a DVR/NVR device or an IP camera device, each device of the playback operation is described in the following sections:

#### Chapter 4-2. Playback for an IP Camera within

#### the Main Grouping

For the main grouping, the video can be recorded at a local PC. To retrieve stored video clips, playback operation can be performed based on date and time specified. Please follow the following steps to play video clips on the PC:

- Step 1. Click on the date on the calendar control.
- Step 2. Specify starting time and ending time.
- Step 3. Click Search button to search the

video clips.

Once a video clip is playing, click on Stop, Play, Pause, <<, >>, and snapshot buttons for the video clip. A user can also click on the time-bar for video playback.

#### Chapter 4-3. Multiple Channels Playback

A user can select a grouping for multiple channels playback. To do so, please click on multiple channel playback button. A playback button shows up as below:

There are up to 36-channel that is available in the system. Please specify date and time. Perform Search button for playback task.

#### Chapter 4-4. Remote AIM Multiple Channels Playback

A user can perform playback on a remote AIM for its video recording. To do so, click on "Remote Playback" button. Click on "Connect" button and enter IP/DNS address, port number, username, and password for accessing the AIM. Select a grouping for multiple channels playback.

# Chapter 5. Audio

#### Chapter 5-1. Two-way Audio

To perform two-way audio, please first select a particular channel for listening to the audio of the channel. Click on Speaker icon to enable audio feature. To change volume, please change volume bar.

#### 🔇 🕸 VOL MITTITI

To speak to remote site, please click MIC On button.

# 

To enable audio monitoring, please double click on a channel in full screen mode for audio monitoring.

#### Chapter 5-2. Two-way Audio

AIM Software HD 2.6 supports two-way audio for IP cameras with two-way audio supported. For automatic speak and listen to audio while the camera is triggered by the remote IP camera, enable "Audio Auto Switch" button.

You can also enable various audio input triggering by "Enable Alarm Input (DI)" and activate various alarm output.

#### Chapter 5-3. Audio Recording

For IP cameras with audio input models, AIM Software HD 2.6 can record audio with it video. To listen the audio recording, playback feature can play the audio.

# Chapter 6. Archiving Manager

AIM Software HD 2.6 Archive Manager can archive video to a central storage. Archive Manger is located in each AIM PC. It can perform video clips archiving to the central storage automatically.

#### Chapter 6-1. Archiving Source

To perform video archiving, select the cameras for video archiving. You can keep the video clips from the AIM PC (Duplicate Archiving), remove the video clips from the AIM PC, or choose the time not for archiving. After configuring above, you can apply the archiving hour for the week of the camera or apply the schedule to other cameras.

#### Chapter 7-5. Alarm Email Notifications

For sending alarm email notifications, please configure the email setting in the user. After finishing email setting, please configure Alarm Output Management at Camera Settings.

# Chapter 8. Multiple Monitors, PTZ & Keyboard

In order to perform PTZ movements, you have to select a particular live channel which contains an IP Fast Dome. Once an IP Fast dome is selected, you can control the movements using PC keyboard and/or PTZ control Panel.

#### Chapter 8-1. Preset Point Settings

To setup preset points, please invoke Presets dialog box. Follow the following steps:

- Step 1. Select preset point dropdown list.
- Step 2. Type the time field.
- Step 3. Type the speed field.
- Step 4. Click up, down, left, or right to move the IP Fast Dome to specific position.
- Step 5. Click Apply button to set the position.

### Chapter 8-2. AIM Software HD 2.6 Status Panel

AIM Software HD 2.6 status panel is described as following chart.

#### Chapter 8-3. Control PTZ via Keyboard

To use PIH-931D keyboard for AIM, please follow the following steps. First, please add a RS-232<->RS-485 convertor for connecting keyboard and a AIM PC.

#### Chapter 8-3-1. DVR/NVR Control Mode

Press the SHIFT button and the DVR/NVR button to set the keyboard to DVR/NVR control mode.

To control a AIM, please first enter the DVR/NVR ID (AIM ID) follow by the ENT button.

To recall a grouping, please type 1 + MON and following by grouping ID and the PRESET button.

To recall a grouping on second monitor, please call a DVR/NVR ID (AIM ID) following the ENT button. After that, please type 2 + + MON and following by grouping ID and the PRESET.

#### Chapter 8-3-2. Window-division

To change window-division, please first control a AIM and type the following buttons.

16-division	8-division	36-division	AIM ID + DVR/NVR + ENT
9-division	4-division		

To recall 36-window-division, please type AIM ID followed by DVR/NVR and ENT buttons. The operation is same controlling a AIM.

#### Chapter 8-3-3. Recall a Camera

For recalling a camera, please select camera number and follow by CAM button.

#### Example: Call camera #8

	Zoom in	<b>I</b>	Zoom out
	Tilt up		Tilt down
	Pan left		Pan right
*	Zoom in	ď	Zoom out
	Focus near		Focus far
	IRIS small		IRIS large
	Auto Pan		

#### Chapter 8-4. IP Camera ePTZ or ROI Feature

For some IP cameras, they provide ePTZ or ROI feature. A user can still use the keyboard controller for ePTZ or ROI feature via AIM Software HD 2.6.

#### Chapter 8-5. Multiple Monitors Virtual Matrix Output

AIM can up to support 6 monitors, one main monitor + 5 additional monitors. AIM TV wall virtual matrix can be connected as the system described below: To support 6 monitor outputs, please use ASUS 7970-DC2-3GD5 graphics card.

After installing the graphics card, click on Monitor button. It shows all the detected monitors shown below:

Default grouping									
						Main Groupir	ig		-
Default window divisio	n					36			•
Auto minimize when s	ystem starts					Off			•

				hitor	ОК	Cancel	

Few functions for controlling AIM monitors are described below:

- Quad display: for large LCD panel, AIM can be configured to show 4 AIM monitors on one big LCD monitor.
- Default grouping: the default grouping to be shown on the monitor.
- Sequence time: the monitor can be programmed for sequence display.
- Division: the default camera division of the grouping.
- Low CPU usage mode: this mode can only display I frame for reducing CPU time.

#### Chapter 8-6. Switching in Between AIM and Virtual Matrix Monitors

Please first gain AIM access by press SHIFT button and DVR button.

To control the AIM, please type AIM ID, DVR button and ENT button.

After a AIM gets controlled, a user can address the monitors of the AIM.

To control #5 monitor, please click 5 button + MON for controlling #5 AIM monitor. To recall a grouping, please type the monitor ID + MON and following by grouping ID and the PRESET button.

#### Chapter 8-7. Keyboard Playback

Please press SHIFT and DVR buttons for playback a AIM and press one of the follow buttons for playback.

To control multiple channel playback feature, please click on Stepping Forward button. This invokes multiple channel playback features.

To control single channel playback feature, please click on Play button.

Playback Timer Setup					X
Search Date	2012	1	<b>08</b>	1	<b>21</b>
Start time	00	:	00		
End time	15	:	<b>48</b>		
	ENT	E	SC		

A date and time dialog box shows up. Please use for entering date and time. Press ENT button for searching the video. Please ESC to exit the dialog box and press ESC again to exit playback dialog box.

For operating playback features, please follow the following:

Pause: Press PAUSE button during playing video can pause the video in pause mode.

Play: Replay the video after Pause, Fast Forward, or Fast Rewind.

Fast Forward: Fast Forward the playback video.

Fast rewind: Fast Rewind the playback video.

Stop: Stop the playback video and return to playback menu.

# Chapter 9. eMap Manager

eMap is an application which can manage devices such as IP camera, IP Fast Dome, and DVR/NVRs on multiple maps. With eMap Manager, user can easily locate a particular device on a map.

#### Chapter 9-1. Before Accessing eMap Manager

Before accessing eMap, terms and screen layout are described in the following section:

#### **Find Device Panel**

To find a device, please click on Find Device Panel button or View->Device menu. Click on the device in Find Device Panel.

# **PTZ Control Panel**

To control PTZ device, please double click on a PTZ device. Perform PTZ feature on the PTZ control panel.

### Chapter 9-2. Tool Bar

The buttons from left to right are described as follows:

PTZ control panel: Switch to PTZ control panel.

eMap edit mode: for editing a map, deleting a map, and setup a device on map.

eMap control mode: for PTZ control and live monitoring mode

Chapter 9-3. eMap Alarm Options

ок
Cancel

## Chapter 9-3-1. Setup a Map

To setup a device map, click on File->New Map or New button at Map list. A file opening dialog box gets displayed. Please select the JPEG map file representing the installation site. Type both map name and location information.

New

#### Chapter 11-1. User Operational Report

For showing all logon logs, please click on "User Log Report" menu item. To print out the report, please click on "Print/Print Preview" menu item.

#### Chapter 11-2. Event Report

For showing all alarm event logs, please click on "Event Report" menu item. To print out the report, please click on "Print/Print Preview" menu item.

### Chapter 11-3. Database Maintenance

Database maintenance is constantly required. To perform database maintenance, please click on Tool->Compact DB or click on Compact DB tool button.

### Chapter 11-4. Import Database

Database configuration can be imported from a XML configuration file. To import database, please click on Import Database button.

# Chapter 11-5. Export Database

Database configuration can be export to a XML file for later use. To perform exporting, please click on Export Database button.

# Chapter 12. Alarm Management

#### Chapter 12-1. Enable Alarm Input

AIM Software HD 2.6 can be managed to receive remote IP camera motion detection signal and AIM motion detection signal. Depend on IP camera models, AIM Software HD 2.6 can also receive alarm signals including face detection alarm,

tampering detection alarm, audio alarm, and dry-contact digital input alarm. These alarm signals can be received by AIM and eMap manager. Please enable "Enable Alarm Input (DI)" option for receiving alarms.

#### Chapter 12-2. AIM Motion Detection & Remote Motion Detection

Many IP cameras have motion detector built-in. If a camera do not have a motion detector, a user can use AIM motion detector for detecting camera motion alarm. Software motion detector in AIM is a heavy CPU oriented task. It is highly recommend to use IP camera's remote motion detector.

Note: It is highly recommend to use IP camera's remote motion detector.

### Chapter 12-3. Alarm Output Management

For motion and remote motion alarm detection management, the alarm output feature allows various reactions after receiving an alarm. The alarm output includes:

- Play Sound--Trigger PC alarm sound after receiving an alarm.
- Send Email--Send an JPEG email snapshot after receiving an alarm.
- PTZ Preset Go--Recall a PTZ preset after receiving an alarm.
- Signal Digital Output--Triggering a DO output of an IP camera after receiving an alarm.
- Alarm Full Screen--Triggering full screen mode after receiving an alarm.
- Pre-alarm Record--Record before the alarm event.
- Post-alarm Record--Record after the alarm event.

Please select the alarm output from the selection list to enable the option.

#### Chapter 12-4. Remote Alarm Input (DI) & Digital Alarm Output (DO)

If a camera is equipped with a digital input and an digital output, a user can configure the digital input (DI) triggered by an access control or an digital relay input. AIM Software HD 2.6 is capable of receiving the digital signal from a camera via network. After receiving the alarm signal, AIM Software HD 2.6 can trigger various alarm outputs including the digital output. The digital output signal is sent to the IP camera via network for external alarm devices such as a siren light or a door lock built-in with a relay input. The following diagram shows digital input marked as DIN and a relay output with triggering state N.O. (normal open).

# Chapter 13. Retail and Distribution Business Solutions

AIM Software HD 2.6 is able to connect to Point of Sale (POS) terminals. POS transaction data can be captured by AIM Software HD 2.6. POS transaction data can be displayed on live video and playback video. AIM Software HD 2.6 also provides smart transaction search for associated video clips. To perform these features, please follow the steps below:

#### Chapter 13-1. POS Connection Basis for Retail Business

AIM Software HD 2.6 basically listens to the ASCII/COM output of a POS system via RS-232. Please check POS's display output or printer output for ASCII data of your POS system. Please consult your POS provider for more detail.

Basically, please connect RX/TX of the RS-232 of a POS register/terminal to AIM PC. Please see wiring diagram below:

To connect more than one POS terminals, add more RS-232/COM port into the AIM PC.

#### Chapter 13-2. Test POS Communication with a PC

After the POS connects to the AIM PC, please use Hyper Terminal or other RS-232 capturing application to test and to verify POS data that can be captured in the AIM PC.

Camera/485 ID	1	•	Motion	Launch Browser
Recording Video Type	H264		E Barcode Scanner	
Synchronize Time With	h PC	Apply	POS	

In POS Setting dialog box, please specify the following information for capturing POS transactions.

- Device: POS register number.
- COM Port: The mapped COM port number for the POS terminal.
- Print on Video File: Record POS transaction into video file.
- Print on Playback: Display POS transaction during playback.
- Print on POS Live: Display POS transaction at live video.
- Text Alignment: Alignment of POS transaction.

🧔 POS Setting			X
Printer Type: Device: Mapping Camera: POS Module: COM Port: 9600,4	Serial Port POS 01 Camera 10 NONE No Use 3,None,1	•	POS Text Print on Video File Print on Playback Print on POS Live View TextAlignment Left Right
			OK Cancel

Once above information is setup correctly, AIM Software HD 2.6 starts to capture and to display POS transactions on live video.

**Note:** For demo purpose, please press F3 to show simulated POS transitions.

#### Chapter 13-4. Playback for POS Transactions

During playback, the recorded POS transactions get shown on the video and displayed on the list box. Click on a POS transaction. The video clip is played associated with the time of the POS transaction.

### Chapter 13-5. Search POS Transactions

Too search a particular search conditions such as an amount, a product item, subtotal, and total, a user can set the search condition for associated time stamp. Click on the item in the listbox. It can play the video of the transaction.

#### Chapter 13-6. Scanner Connection Basis for Transportation Business

For transportation business, a barcode scanner and a keyboard are widely used. The barcode scanner for scanning barcode is connected to a PC via the PS/2 connector of the AIM PC. The barcode scanner acts as a keyboard. In AIM Software HD 2.6, the scanner connection only accepts 0 to 9 for keyboard scanner or the barcode scanner.

To use barcode scanner as transaction device, connect barcode scanner into PS/2 connector. In "Camera Settings" dialog box, enable "barcode scanner" option. For one PC, there is only one video channel that can be set for the barcode scanner.

For search barcode transactions and playback on the barcode transaction, please see "Playback with POS Transactions" and "Search POS Transactions" for detail.

# Chapter 14. Trouble Shooting

# Chapter 14-1. What should I do if I experience video flickering in AIM

If you experience video flickering at AIM of the PC's graphic card, please follow the instruction for solving the problem.

**Step 1:** Please go to "Control Panel->System and Maintenance->System Properties" at Windows 7.

💆 System

# **APPENDIX**

#### Minimum System Requirement

OS: Windows XP Home, Windows Vista Home, SP3 required, Windows 7 Home

CPU: Minimum Intel Duo CPU 2.0 GHz or above

RAM: 4 GB DRAM or above

HDD Size: At least 250 GB for recording storage

Network: Gigabit network

#### Product Supported

- Full HD IP Camera Series: AiP-M24K, AiP-L24N, AiP-B24N, AiP-R24K, AiP-V24K
- AiP-O53N, AiP-P24N, AiP-U24K, AiP-U53K, AiP-Z24N
- H.264 HD IP Camera: AiP-Y14D, AiP-I14D
- H.264 D1 IP Camera: AiP-W04T, AiP-X04T
- Video Server: AiP-E4H, AiP-D4
- DVR/NVR: AiP-N6R, AiP-N6D, AiP-F9U, AiP-F4U, AiP-Q4U

#### Username and password

Default username and password for various devices are described as in the table:

Device	Admin	Admin pass.	Oper	Oper pass.	Guest	Guest pass.
IP Cameras	admin	pass	None	None	guest	guest
DVR/NVR	admin	1111	None	None	guest	2222
AIM Software	admin	EMPTY	operator	EMPTY	guest	EMPTY

#### **Benchmark Environment:**

PC network card—Gigabit network card Gigabit hub \* 1

### **Graphics Card for Supporting 6 Monitors:**

ASUS 7970-DC2-3GD5 is tested and verified for support 6 monitors virtual matrix output.

# AIM 2.6 HD Software Specification

Recording	Schedule / Motion detection / Manual recording
Live	Display up to 72 channels via two monitors
Speed	Up to 1080P 30 FPS and ROI recording supported
Resolution	Full HD: 1920 * 1080 / HD: 1280 * 768 / D1: 720 * 480 / VGA: 640 * 384 / CIF 320 * 240
Schedule	7 days * 24 hrs time table, recording mode configurable
Alarm recording	Face detection, audio detection, tampering, motion, DI alarm detection
Audio recording	Yes
Limited recording	Configurable for 1~180 days
RAID recording	Samba RAID, eSATA RAID, and Network Neighborhood supported
Playback	Time search, event search, date search, POS smart search
Speed	FR: 2x, 4x, 8x, 16X 32X / FF: 2x, 4x, 8x, 16X, 32X
Compression	H.264 / JPEG
Multi-channel playback	Up to 36 channels
Remote AIM playback	Up to 36 channels
Remote DVR playback	Yes
/ideo input	Managing up to 72 ACUMEN IP cameras / DVR / NVR connections
Camera name	20 characters
Channel editing	Mouse drag-n-drop
Digital zoom	Yes, ePTZ supported
Grouping	User grouping authentication assignable for eMap, and AIM Software HD 2.6
Dual-screen	Up to 72-channel display
ive display	Sequence
Split screen	4, 9, 16, 36
Dual stream technology	Multi-channel displays D1 and full screen displays 1080P resolution
TV wall	Dual monitors support up to 1080P 72 channels decoding
√ideo archiving	Video archiving to RAID
Archiving	Individual camera configurable, scheduling and instant archiving
Alarm	
Alarm management	Alarm popup for full screen, PC sound, redirect IP camera DO, eMail snapshots, redirect a PTZ preset recall
Event	Various alarm log, video loss, stop recording, schedule, logon, operation log
Digital output	Controllable via IP cameras
Alarm recording	Pre-alarm:1~5 seconds and post-alarm: 5~50 seconds
Accessories	
P/T/Z protocol	ACUMEN PTZ controllable via HTTP
Audio	PCM/G.711, two-way audio, audio recording
POS/barcode scanner	RS-232/PS/2
Keyboard	keyboard controllable via RS-485 for PTZ, ePTZ, and ROI features
Digital map	
eMap live monitoring	One channel for IP camera/multi-channel for DVR/NVR
eMap snapshot	Yes
PTZ control	Yes
DB Manager	
Database	Database configuration import, export, report, and maintenance
	DVR/NVR remote backup, AVI conversion and JPEG snapshots
Backup	DVR/NVR remote backup, AVI conversion and JPEG snapshots
Backup Management	
Backup Management Access log User management	DVR/NVR remote backup, AVI conversion and JPEG snapshots Complete access log in database manager User authentication: three level: admin, operator, and guest, features configurable

Network	
Web interface	Live video web interface
Mobile support	iPhone and Android
Protocols	ARP / TCP/IP / HTTP / SMTP / DNS / PPPoE
IPScan	Supported, easy-to-setup for IP address
Other	
DST	Daylight saving time by Windows OS
OS	Windows 7 Home, Windows Vista Home, and Windows XP Home
Longuago	English, Chinese, Spanish, French, Italian, Japanese, Russian, Portuguese, Simplified Chinese,
Language	Czech, Slovenia, Chinese, and German
CPU requirement	Minimum Intel Duo CPU 2.0 GHz or above
RAM requirement	4GB memory
