## WHAT'S IN THE BOX

- **EAGLE™** ENERGY MONITOR
- AC POWER ADAPTER
- ETHERNET CABLE

## CONNECTING TO THE CLOUD

Connect to your **EAGLE™** through the Cloud when you aren't at home.

- In the Rainforest Web View, click on the settings button in the lower right corner and select "Cloud."
- Use the drop down menu to select a Cloud service provider.
- To complete the set-up, set up an account with the Cloud service provider you selected using the 6-digit Cloud ID located on the back of your **EAGLE™**.

## LED LIGHT INDICATOR KEY

LED lights on the device give you a quick way to check the status of your **EAGLE™**.

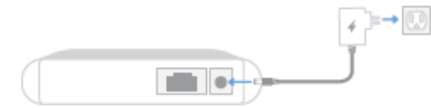

| LIGHT INDICATOR       | POWER                                  | ETHERNET             | CLOUD   | ZIGBEE   |
|-----------------------|--|----------------------|---|--|
| Solid Green           | Power is on.                           | IP address obtained. | Connected to Cloud service.                               | Connected to the electricity meter.                |
| Blinking Green        | n/a                                    | n/a                  | Attempting to connect to Cloud service.                   | Attempting to connect to the electricity meter.    |
| Double Blinking Green | n/a                                    | n/a                  | n/a   | Attempting to re-connect to the electricity meter. |
| Off                   | <b>EAGLE™</b> not receiving any power. | No internet service. | <b>EAGLE™</b> not configured to a cloud service provider. | No ZigBee link to the meter.                       |

## Get direct access to your energy information in three easy steps.

### STEP 1: CONNECT ETHERNET CABLE TO YOUR ROUTER

### STEP 2: CONNECT POWER SUPPLY

### STEP 3: ENTER YOUR **EAGLE™** WEB ADDRESS IN YOUR WEB BROWSER\* OR USE THE EnergyVUE APP AND START VIEWING YOUR ENERGY DATA

\* Browser must be on same network as device. Address is located on the label on the underside of the unit (eg. <http://eagle-000111.local>)
