II Operation Guide

1. Charge

The battery is built-in lithium rechargeable battery, so when you use it the first time, please charge firstly. The method for charging as following:

- 1.) Connect computer: use USB cable to connect the computer, then it can be charged.
- 2.) Use adaptor: connect charger plug with USB cable, then plug into electrical connector receptacle, it can be charged.

When you charge it, green light and red light will bright simultaneously, of which states are stillness.

Notice: when battery power is not enough, D006 will enter into protection mode, so it cannot be turn on. Now, please charge for it.

2. Power on to video

Please confirm the TF card has already insert products!

Press “POWER” button , blue indicator light begins to bright, now it enters into standby mode, Holding the “VIDEO/CAMERA” button, blue indicator light flashing slowly, .At this time, it begins to make a video. press “ VIDEO/CAMERA” button. blue indicator light begins to bright , Pause and Save the record. If you need to continue to video, please holding the “VIDEO/CAMERA” again.

Video file resolution for: 720 * 480, frames for 29 ~ 30fps/S.

Notice:

- a. Please make sure T-flash (Micro SD) card has been inserted, if not, it will be power off automatically after 15 seconds.
- b. The maximum capacity of T-flash card is 16GB.
- c. Saving file needs certain time, so please don't press Operation button continuously in order to avoid saving unsmoothly and generating incomplete file.
- d. When you make a video, please focus on the object and keep 50cm under sufficient

illumination. Then the video will be right, natural color, clear and stable.

3. Take Photo

Press “POWER” button, blue indicator light begins to bright, now it enters into startup ready mode. which can enter into standby mode. Press “VIDEO/CAMERA” button. blue indicator light flash once, represents a photo shoot. Repeated press, repeat photo.

Pictures resolution:1280*1024

4. Time set

There is a CD with the product which contains a file named time synchronization file. Please copy it to TF card. When connect D001 with computer, whose time will be displayed with computer synchronously.

The detail as following:

1. build a text called TAG.TXT under root directory of card.
2. open TAG.TXT,write synchronous date according to enclosure strictly.

Details as following:

[date] need space with newline

2009/07/22 need space with newline

12: 00: 00

Power on the machine everytime, system will check and analyse TAG.TXT, then set system time according to file time. After that the text will be deleted by system automatically.

5. Power off

In the halted state, Holding “POWER” button, then release till indicator goes out. Then the machine is turned off.

6. Auto-power off function

MINI DV will save file and turn off automatically as following:

- a. When you shoot video without enough power, file will be saved automatically, then auto-power off.
- b. When disk space of MINI DV is not enoughn, after indicator goes out immediately, file will be saved automatically then auto-power off.
- c. Under standby mode, without any operation in 45 seconds, it will be auto-power off.

7. Connecting computer

It can connects computer under power off mode, standby mode or video mode, after that which can be used as U disk, who can copy, cut and paste, delete file.

When you connect it with USB port, a portable disk mark will be seen after several seconds. Red indicator light always brights, yellow indicator light will be from flashed quickly to always brights.

Notice:

- a. When you connect computer, if the machine cannot be identified, or not see the portable U disk mark in 30 seconds, please insert it again.
- b. It is better copy or cut video file into computer hardware then play. Video file which is saved

in the machine is played directly will cause unsmooth play, the reason is that gigantic data cannot be transmitted synchronously.

8 PC Camera

When you first use PC camera, please install driver. The driver name is SPCA1528_V2220_M...Setup.exe, which is placed in attached CD. When you install please double press this document, and as per guide to do. After that there will be an AMCAP icon on the computer desk.

Under power off or power on mode, use USB cable to connect computer, the mode is U disk mode. Then short press "POWER" button, at this moment it can be switched into PC camera mode. Then double press AMCAP icon can be used as PC camera.

9. Reset

When machine works abnormal for illegal operation or other unknown reasons, it needs to be reset.

The specific operation method as following:

Use slim pole to press the Reset button, and then finish one reset operation.

PS : the Reset button Located above the yellow indicator light

10.Charge

three times before charging to charge more than 12 hours , make the battery to achieve maximum efficiency . Start charging, Red indicator light often bright and blue indicator light flashing slowly. When charging 3 ~ 4 hours continuously fully charged , blue indicator light are often bright.
