USER'S MANUAL

**CASIO®**

---

## Safety Precautions

- To use this product safely and correctly, read this manual thoroughly and operate as instructed.  
After reading this guide, keep it close at hand for easy reference.  
Please keep all informations for future reference.
- Always observe the warnings and cautions indicated on the product.

## About the icons

In this guide various icons are used to highlight safe operation of this product and to prevent injury to the operator and other personnel and also to prevent damage to property and this product. The icons and definitions are given below.

Indicates that there is a risk of severe injury or death if used incorrectly.

Indicates that injury or damage may result if used incorrectly.

## Icon examples

To bring attention to risks and possible damage, the following types of icons are used.

The  $\triangle$  symbol indicates that it includes some symbol for attracting attention (including warning). In this triangle the actual type of precautions to be taken (electric shock, in this case) is indicated.

The  $\otimes$  symbol indicates a prohibited action. In this symbol the actual type of prohibited actions (disassembly, in this case) will be indicated.

The  $\bullet$  symbol indicates a restriction. In this symbol the type of actual restriction (removal of the power plug from an outlet, in this case) is indicated.

---

## Warning!

---

## Handling the register

**Should the register malfunction, start to emit smoke or a strange odor, or otherwise behave abnormally, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of fire and electric shock.**

- Contact CASIO service representative.

**Do not place containers of liquids near the register and do not allow any foreign matter to get into it. Should water or other foreign matter get into the register, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of shorting, fire and electric shock.**

- Contact CASIO service representative.

**Should you drop the register and damage it, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of shorting, fire and electric shock.**

- Attempting to repair the register yourself is extremely dangerous. Contact CASIO service representative.
-

---

## **Warning!**

**Never try to take the register apart or modify it in any way. High-voltage components inside the register create the danger of fire and electric shock.**

- Contact CASIO service representative for all repair and maintenance.
- 

### **Power plug and AC outlet**

**Use only a proper AC electric outlet (100V~240V) . Use of an outlet with a different voltage from the rating creates the danger of malfunction, fire, and electric shock. Overloading an electric outlet creates the danger of overheating and fire.**

**Make sure the power plug is inserted as far as it will go. Loose plugs create the danger of electric shock, overheating, and fire.**

- Do not use the register if the plug is damaged. Never connect to a power outlet that is loose.
- 

**Use a dry cloth to periodically wipe off any dust built up on the prongs of the plug. Humidity can cause poor insulation and create the danger of electric shock and fire if dust stays on the prongs.**

**Do not allow the power cord or plug to become damaged, and never try to modify them in any way. Continued use of a damaged power cord can cause deterioration of the insulation, exposure of internal wiring, and shorting, which creates the danger of electric shock and fire.**

- Contact CASIO service representative whenever the power cord or plug requires repair or maintenance.
- 

## **Caution!**

**Do not place the register on an unstable or uneven surface. Doing so can cause the register — especially when the drawer is open — to fall, creating the danger of malfunction, fire, and electric shock.**

**Do not place the register in the following areas.**

- Areas where the register will be subject to large amounts of humidity or dust, or directly exposed to hot or cold air.
- Areas exposed to direct sunlight, in a close motor vehicle, or any other area subject to very high temperatures.

**The above conditions can cause malfunction, which creates the danger of fire.**

**Do not overlay bend the power cord, do not allow it to be caught between desks or other furniture, and never place heavy objects on top of the power cord. Doing so can cause shorting or breaking of the power cord, creating the danger of fire and electric shock.**

**Be sure to grasp the plug when unplugging the power cord from the wall outlet. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.**

**Never touch the plug while your hands are wet. Doing so creates the danger of electric shock. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.**

**Never touch the printer head and the platen.**

## Unpacking the register

### Welcome to the CASIO TK-T200!

Congratulations upon your selection of a CASIO Electronic Cash Register, which is designed to provide years of reliable operation.

Operation of a CASIO cash register is simple enough to be mastered without special training. Everything you need to know is included in this manual, so keep it on hand for reference.

Consult your CASIO dealer if you have any questions about points not specifically covered in this manual.

The main plug on this equipment must be used to disconnect main power.

Please ensure that the socket outlet is installed near the equipment and shall be easily accessible.

*Please keep all information for future reference.*

# Getting Started

This section outlines how to unpack the cash register and get it ready to operate. You should read this part of the manual even if you have used a cash register before. The following is the basic set up procedure, along with page references where you should look for more details.

- 1. Remove the cash register from its box.**  
Make sure that all of the parts and accessories are included.

- 2. Remove the tape holding parts of the cash register in place.**

Also remove the small plastic bag taped to the printer cover. Inside you will find the mode keys.

- 3. Install the three memory backup batteries.**

1. Remove the printer cover and open the platen arm.

printer cover

platen arm

battery compartment cover

2. Remove the battery compartment cover. Slide the cover and pull it up.

## 3. Install the three memory backup batteries. (continued...)

3. Note the (+) and (-) markings in the battery compartment. Load a set of three new SUM-3 (UM-3) batteries so that their positive (+) and negative (-) ends are facing as indicated by the markings.

4. Replace the battery compartment cover.

5. Close the platen arm and replace the printer cover.

### Important!

These batteries protect information stored in your cash register's memory when there is a power failure or when you unplug the cash register. Be sure to install these batteries.

### Precaution!

Incorrectly using batteries can cause them to burst or leak, possibly damaging the interior of the cash register. Note the following.

- Be sure that the positive (+) and negative (-) ends of the batteries are facing as marked in the battery compartment when you load them into the unit.
- Never mix batteries of different types.
- Never mix old batteries with new ones.
- Never leave dead batteries in the battery compartment.
- Remove the batteries if you do not plan to use the cash register for long periods.
- Replace the batteries at least once a year, no matter how much the cash register is used during the period.

### WARNING!

- Never try to recharge the batteries supplied with the unit.
  - Do not expose batteries to direct heat, let them become shorted or try to take them apart.
- Keep batteries out of the reach of small children. If your child should swallow a battery, consult a physician immediately.

# 4. Install receipt/journal paper.

### Important!

Take away the head protection sheet from the printer and close the platen arm.

### Caution! (in handling the thermal paper)

- Never touch the printer head and the platen.
- Unpack the thermal paper just before your use.
- Avoid heat/direct sunlight.
- Avoid dusty and humid places for storage.
- Do not scratch the paper.
- Do not keep the printed paper under the following circumstances:  
High humidity and temperature/direct sunlight/contact with glue, thinner or a rubber eraser.

## To install receipt paper

*Step 1*  
Remove the printer cover.

*Step 4*  
Put the leading end of the paper over the printer.

*Step 2*  
Open the platen arm.

*Step 5*  
Close the platen arm slowly until it locks steadily.

*Step 3*  
Ensuring the paper is being fed from the bottom of the roll, lower the roll into the space behind the printer.

*Complete*  
Replace the printer cover, passing the leading end of the paper through the cutter slot. Tear off the excess paper.

## To install journal paper

### Step 1

Remove the printer cover.

### Step 2

Open the platen arm.

### Step 7

Slide the leading end of the paper into the groove on the spindle of the take-up reel and wind it onto the reel two or three turns.

### Step 3

Ensuring the paper is being fed from the bottom of the roll, lower the roll into the space behind the printer.

### Step 8

Replace the paper guide of the take-up reel.

### Step 4

Put the leading end of the paper over the printer.

### Step 9

Place the take-up reel into place behind the printer, above the roll paper.

### Step 5

Close the platen arm slowly until it locks steadily.

### Step 10

Press the **FEED** key to take up any slack in the paper.

### Step 6

Remove the paper guide of the take-up reel.

### Complete

Replace the printer cover.

# 5. Plug the cash register into a wall outlet.

Be sure to check the sticker (rating plate) on the side of the cash register to make sure that its voltage matches that of the power supply in your area.

# 6. Insert the mode key marked "PGM" into the mode switch.

# 7. Turn the mode key to the "REG" position.

The display should change to the following.

## 8. Set the date.

Example:

15, March 2002 ⇨ 0 2 0 3 1 5

## 9. Set the time.

Example:

08:20 AM ⇨ 0 8 2 0

09:45 PM ⇨ 2 1 4 5

## 10. Select printouts receipt or journal.

### Note !

If you need journal and are sometimes required receipts by customers, select "issue receipt". After business hours, issue the electronic journal report.

# 11. Tax table programming

This cash register is capable of automatically calculating up to four different sales taxes. The sales tax calculations are based on rates, so you must tell the cash register the rates, the type of tax (add-in or add-on), and the type of rounding to apply. Note that special rounding methods (page 15) are also available to meet certain local tax requirements.

## Important!

After you program the tax calculations, you also have to individually specify which departments (page 27) and PLUs (page 29, 31) are to be taxed.

### Programming tax calculations (without special rounding)

Prepare the following subjects:

1. Tax rates
2. Rounding method for tax calculation  
(Round up/Round off/Cut off)
3. Tax calculation system (Add-on/Add-in)

### Programming procedure

Assign tax table 1. .... →

Assigning tax table 2, enter **0 2 2 5** .  
 Assigning tax table 3, enter **0 3 2 5** .  
 Assigning tax table 4, enter **0 4 2 5** .

Enter tax rate (2 integers and 4 decimals)..

Example: 15% = **1 5**  
 8.25% = **8 . 2 5**

Enter rounding method, tax calculation method..

Fraction round up	9	0		
Fraction round off	5	0		
Fraction cut off	0	0		
Always "0"			0	
Add-on tax				2
Add-in tax				3

Terminate the procedure.. .... →

## 11. Tax table programming (continued...)

### Programming tax calculations (with special rounding)

Prepare the following subjects:

1. Tax rates
2. Rounding method for tax calculation (Round up/Round off/Cut off)
3. Tax calculation system (No/Add-on/Add-in)
4. Rounding system (Special rounding 1/Special rounding 2/Special rounding 3/Danish rounding /Australian rounding) :only effective for Tax Table 1

### Programming procedure

Mode Switch

Assign tax table 1. .... →

Assigning tax table 2, enter **0 2 2 5**.  
 Assigning tax table 3, enter **0 3 2 5**.  
 Assigning tax table 4, enter **0 4 2 5**.

Enter tax rate (2 integers and 4 decimals)

Example: 15% = **1 5**  
 8.25% = **8 . 2 5**  
 non tax = **0**

Enter rounding method, tax calculation method..

Fraction round up	9	0		
Fraction round off	5	0		
Fraction cut off	0	0		
Special rounding 1 *			1	
Special rounding 2 *			2	
Special rounding 3 *			6	
Special rounding 4 *			3	
Special rounding 5 *			7	
Add-on tax				2
Add-in tax				3

\* See the next page.

Terminate the procedure. .... →

# 11. About special rounding...

Besides cut off, round off and round up, you can also specify “special rounding” for subtotals and totals or changes. Special rounding converts the right-most digit(s) of an amount to “0” or “5” to comply with the requirements of certain areas.

## 1 Special Rounding 1

Last (right-most) digit		Rounding result	Examples:
0 ~ 2	⇒	0	1.21 → 1.20
3 ~ 7	⇒	5	1.26 → 1.25
8 ~ 9	⇒	10	1.28 → 1.30

## 2 Special Rounding 2

Last (right-most) digit		Rounding result	Examples:
0 ~ 4	⇒	0	1.12 → 1.10
5 ~ 9	⇒	10	1.55 → 1.60

## 3 Special Rounding 3

Last (right-most) digits		Rounding result	Examples:
00 ~ 24	⇒	0	1.24 → 1.00
25 ~ 74	⇒	50	1.52 → 1.50
75 ~ 99	⇒	100	1.77 → 2.00

## 4 Special Rounding 4 (Danish Rounding)

With Danish rounding, the rounding method applies to subtotals depends on whether you finalize the transaction by inputting an amount tendered or not.

- When a finalization is performed without an amount tendered entry
- When a finalization is performed with an amount tendered entry

Last (right-most) 2 digits of subtotal		Rounding result	Last (right-most) 2 digits of change due		Rounding result
00 ~ 12	⇒	00	00 ~ 12	⇒	00
13 ~ 37	⇒	25	13 ~ 37	⇒	25
38 ~ 62	⇒	50	38 ~ 62	⇒	50
63 ~ 87	⇒	75	63 ~ 87	⇒	75
88 ~ 99	⇒	100	88 ~ 99	⇒	100

## 5 Special Rounding 5 (Australian Rounding)

Last (right-most) digit		Rounding result	Examples:
0 ~ 2	⇒	0	1.21 → 1.20
3 ~ 7	⇒	5	1.26 → 1.25
8 ~ 9	⇒	10	1.28 → 1.30

- Partial tenders (payments): for Danish Rounding

No rounding is performed for the amount of tendered nor for the change amount due when the customer makes a partial tender. When a partial tender results in a remaining balance within the range of 1 through 12, the transaction is finalized as if there was no remaining balance.

- Display and printing of subtotals: for Danish and Australian Rounding

When you press the  key, the unrounded subtotal is printed and shown on the display. If the cash register is also set up to apply an add-on tax rate, the add-on tax amount is also included in the subtotal that is printed and displayed.

### Important!

When you are using Danish rounding, you can use the  key to register tendered amount in which the last (right-most) digits are 00, 25, 50 or 75. This restriction does not apply to the  and  keys.

## 12. For Australia only

You can set some programmable options to suit the Australian GST by the following procedure.

After completion of this procedure, the “GST system was changed” message was printed on receipt and;

- 1 Tax symbol (\*) is printed.
- 2 Taxable amount is skipped.
- 3 “GST INCLUDED” is set to the TX1 descriptor.
- 4 “TAXABLE AMT” is set to the TA1 descriptor.
- 5 Total line is printed even in direct (cash) sale.
- 6 Australian rounding is set.
- 7 “\$” is set to the monetary symbol.
- 8 Print “MOF message” on receipt.
- 9 Tax (10% tax rate, add-in tax, fraction round off) is set to the tax table 1.  
No data is set to other tax tables.
- O The taxable amount and tax amount except TA1/TX1 are not printed on report.
- A Restriction (to 0, 5) on last amount digit of cash sales, received on account, paid out, and money declaration.

\* Sign on operation (page 24) is necessary before this operation.

# Introducing TK-T200

## General guide

This part of the manual introduces you to the cash register and provides a general explanation of its various parts.

### Roll paper

You can use the roll paper to print receipts and a journal (page 9 ~ 10).

### Receipt On/Off key

When you are using the printer for receipt printer, you can use this key (in the REG and RF modes only) to turn the printer on and off. If a customer asks for a receipt while receipt printing is turned off by this key, you can issue a post-finalization receipt (page 45).

### Mode key

There are two types of mode keys: the program key (marked "PGM") and the operator key (marked "OP"). The program key can be used to set the mode switch to any position, while the operator key can select the REG, CAL and OFF position.

### Drawer

The drawer opens automatically whenever you finalize a registration and whenever you issue a read or reset report. The drawer will not open if it is locked with the drawer key.

### Drawer lock

Use the drawer key to lock and unlock the drawer.

### Multipurpose tray

This tray can always be opened if the locking knob is in the unlock position.

Use the locking knob to lock and unlock this tray.

Program key

Operator key

# Introducing TK-T200

## Mode switch

Use the mode keys to change the position of the mode switch and select the mode you want to use.

Mode Switch	Mode Name	Description
Z	RESET	Reads sales data in memory and clears the data.
X	READ	Reads sales data in memory without clearing the data.
CAL	CALCULATOR	Use this mode for calculator.
REG	REGISTER	Use this mode for normal registration.
OFF	STAND-BY	Cash register standing by.
RF	REFUND	Use this mode to register refund transaction.
PGM	PROGRAM	Use this mode for cash register programming.

## Lock/unlock the multipurpose tray

### When the cash drawer does not open!

In case of power failure or the machine is in malfunction, the cash drawer does not open automatically. Even in these cases, you can open the cash drawer by pulling drawer release lever (see below).

### Important!

The drawer will not open, if it is locked with a drawer lock key.

## Displays

### Main Display

(alphanumeric + numeric display)

### Pop-up (customer) display

(numeric display)

#### Item registration (by department/PLU)

#### Repeat registration

#### Totalize operation

#### 1 Amount/Quantity

This part of the display shows monetary amounts. It also can be used to show the current time. (The current date is shown in the alphanumeric display.)

#### 2 Item/Key descriptor

When you register an item or key, the item/key descriptor appears here. Mode descriptor is also displayed here.

#### 3 Number of repeats

Anytime you perform a repeat registration (page 26, 30), the number of repeats appears here.

Note that only one digit is displayed for the number of repeats. This means that a "5" could mean 5, 15 or even 25 repeats.

#### 4 Total/Change indicators

When the TOTAL indicator is lit, the displayed value is monetary total or subtotal amount.

When the CHANGE indicator is lit, the displayed value is the change due.

#### 5 Receipt on/off indicators

When the register is in "issuing receipt" mode, under-bar sign is lit on this digit. (REG/RF mode, during standing-by only)

# Introducing TK-T200

### • Register Mode

#### 1 Flat PLU key , ~

Use these keys to register items to flat PLUs.

#### 2 Guest/Post receipt key

Guest receipt key: Use this key to produce a guest receipt (page 73) in a check tracking system.

Post receipt key: Use this key to produce a post-finalization receipt (page 45).

#### 3 Menu shift key

Use this key to shift the flat PLU key number from 1 through 30 to 31 through 60 or 61 through 90.

<input type="text" value="1"/>	⇒ 1,	<input type="text" value="MENU SHIFT"/>	<input type="text" value="1"/>	⇒ 31,	<input type="text" value="MENU SHIFT"/>	<input type="text" value="MENU SHIFT"/>	<input type="text" value="1"/>	⇒ 61
<input type="text" value="2"/>	⇒ 2,	<input type="text" value="MENU SHIFT"/>	<input type="text" value="2"/>	⇒ 32,	<input type="text" value="MENU SHIFT"/>	<input type="text" value="MENU SHIFT"/>	<input type="text" value="2"/>	⇒ 62
⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮
<input type="text" value="30"/>	⇒ 30,	<input type="text" value="MENU SHIFT"/>	<input type="text" value="30"/>	⇒ 60,	<input type="text" value="MENU SHIFT"/>	<input type="text" value="MENU SHIFT"/>	<input type="text" value="30"/>	⇒ 90

#### 4 Clear key

Use this key to clear an entry that has not yet been registered.

#### 5 Multiplication/Date/Time key

Use this key to input a quantity for a multiplication operation. Between transactions, this key displays the current time and date.

#### 6 Open/Clerk number key

This key is initialized as Clerk number key.

Clerk number key: Use this key to sign clerk on and off the register.

Open key: Use this key to temporarily release a limitation on the number of digits that can be input for a unit price.

In case of using “Open” function, allocate “Open” key by programming.

#### 7 PLU key

Use this key to input PLU (subdepartment) numbers.

#### 8 Paper feed key

Hold this key down to feed paper from the printer.

#### 9 Receipt on/off key

Use this key twice to change the status “receipt issue” or “no receipt”. This key is only effective when the “use printer for receipt printer” in the printer control program is selected. In case of “receipt issue”, the “RECEIPT ON” indicator is lit.

#### O Discount key

Use this key to register discounts.

#### A Add/Price key

Add check key: Use this key to combine the details of more than one check into a single check in a check tracking system.

Price key: Use this key to register unit prices for subdepartment.

#### B Ten key pad , , ~ , ,

Use these keys to input numbers.

#### C Department keys , , and

Use these keys to register items to departments.

#### D Received on account key

Use this key following a numeric entry to register money received for non-sale transactions.

#### E Paid out key

Use this key following a numeric entry to register money paid out from the drawer.

**F Minus key** 

Use this key to input values for subtraction.

**G Old check key** 

In a check tracking system, use this key to input the number of an existing check (previously created using the  key) whose details are stored in the check tracking memory. Existing checks are reopened to perform further registration or to finalize them.

**H Non-add/No sale key** 

Non-add key: To print reference number (to identify a personal check, credit card, etc.) during a transaction, use this key after some numerical entries.

No sale key: Use this key to open the drawer without registering anything.

**I Check key** 

Use this key to register a check tender.

**J Refund key** 

Use this key to input refund amounts and void certain entries.

**K New check key** 

In a check tracking system, use this key to input a new check number in order to open a new check under that number.

**L Subtotal key** 

Use this key to display and print the current subtotal (includes add-on tax) amount.

**M Credit key** 

Use this key to register a credit sale.

**N Error correct/Cancel key** 

Use this key to correct registration errors and to cancel registration of entire transactions.

**O New balance key** 

In a check tracking system, use this key to add latest registered total to the previous balance to obtain a new balance.

**P Cash amount tendered key** 

Use this key to register a cash sale.

## • Calculator Mode

**4 Clear/All clear key** **O Percent key** **B Ten key pad** **C Arithmetic operation key** **D Memory recall key** **H Drawer open key** **P Equal key** 

## How to read the printouts

- The journal and receipts are records of all transactions and operations.
- The contents printed on receipts and journal are identical, except the date printing line. (The date line is printed on receipts and reports.)
- You can choose the journal skip function (page 46).  
If the journal skip function is selected, the cash register will print the total amount of each transaction, and the details of premium, discount and reduction operations only, without printing department and PLU item registrations on the journal.
- The following items can be skipped on receipts and journal.
  - Time
  - Consecutive number
  - Taxable status
  - Taxable amount

In the operation examples contained in this manual, the print samples are what would be produced if the roll paper is being used for receipts. They are not actual size. Actual receipts are 58 mm wide. Also, all sample receipts and journals are printout images.

# How to use your cash register

The following describes the general procedure you should use in order to get the most out of your cash register.

## BEFORE business hours...

- Check to make sure that the cash register is plugged in securely. Page 11
- Check to make sure there is enough paper left on the roll. Page 9, 10
- Read the financial totals to confirm that they are all zero. Page 85
- Check the date and time. Page 25

## DURING business hours...

- Register transactions. Page 26
- Periodically read totals. Page 84

## AFTER business hours...

- Issue electronic journal report. (if necessary) Page 87
- Reset the daily totals. Page 44
- Remove the journal. Page 97
- Empty the cash drawer and leave it open. Page 18
- Take the cash and journal to the office.

# Basic Operations and Setups

## Clerk sign on and sign off

Any time you begin any registration or program, clerk sign on operation is necessary.

## Clerk sign on

	OPERATION	RECEIPT
Signing clerk 1 on:	<b>1</b> →	<pre> REG 15-03-2002 08:35 CLERK 01 000001 DEPT01 .1.00 DEPT02 .2.00 DEPT03 5 X @1.00 .5.00                     </pre> <p>Clerk name/consecutive No.</p>
Signing clerk 2 on:	<b>2</b> →	
Signing clerk 20 on:	<b>2 0</b> →	

## Clerk sign off

	OPERATION
Signing clerk off:	<b>0</b> →

- The current clerk is also signed off whenever you set the mode switch to OFF position.

### Important!

- The error code "E08" appears on the display whenever you try to perform a registration, a read/reset operation without signing on.
- The signed on clerk is also identified on the receipt/journal.
- The clerk numbers are initialized as 1 through 20. In case of using other clerk number, see page 49 for programming.

## Displaying the time and date

You can show the time and date on the display of the cash register whenever there is no registration being made.

Mode Switch

## To display and clear the time and date

### OPERATION

### DISPLAY

Day Month Year

Hour Minutes.  
(24-hour system)

## Preparing coins for change

You can use the following procedure to open the drawer without registering an item. This operation must be performed out of a sale.

(You can use the **RC** key instead of the **#/NS** key. See page 40.)

# Preparing and using discounts

This section describes how to prepare and register discount.

## Programming discounts

You can use the [%] key to register discounts (percentage decreases). The more detailed informations about the discount (and premium) are described in the “Registering discounts and premiums” section in the “Convenient Operations and setups” on page 68.

### To program a rate to the [%] key

Example:  
 10% ⇨ 1 0  
 5.5% ⇨ 5 . 5  
 12.34% ⇨ 1 2 . 3 4

### To program tax status to the [%] key

Note: Tax symbols  
 T1: Tax table 1  
 T2: Tax table 2  
 T3: Tax table 3  
 T4: Tax table 4  
 \*: Tax table 1, 2, 3 and 4  
 [%] is initialized as non-tax.

# Basic Operations and Setups

## Registering discounts

The following example shows how you can use the  key in various types of registration.

## Discount for items and subtotals

### OPERATION

### RECEIPT

Item 1	Unit price	\$5.00
	Quantity	1
	Dept.	1
Item 2	Unit price	(\$10.00)
	Quantity	1
	PLU	16
Discount	Rate	(5%)
Subtotal	Rate	3.5%
Discount		
Payment	Cash	\$15.00

( ): Preset value

5 00 + 1  
1 6 PLU  
%

Applies the preset discount rate to the last item registered.

SUB TOTAL  
3 5 %

The input value takes priority of the preset value.

SUB TOTAL  
1 5 00 CA/AMT =/TEND

```
REG 15-03-2002 09:35
CLERK 01 000013
DEPT01 .5.00
PLU0016 .10.00
5%
%- .0.50
ST .14.50
3.5%
%- .0.51
TOTAL .13.99
CASH .15.00
CHANGE .1.01
```

- You can manually input rates up to 4 digits long (0.01% to 99.99%).

## Taxable status of the key

- Whenever you perform a discount operation on the last item registered, the tax calculation for discount amount is performed in accordance with the tax status programmed for that item.
- Whenever you perform a discount operation on a subtotal amount, the tax calculation for the subtotal amount is performed in accordance with the tax status programmed for the  key.

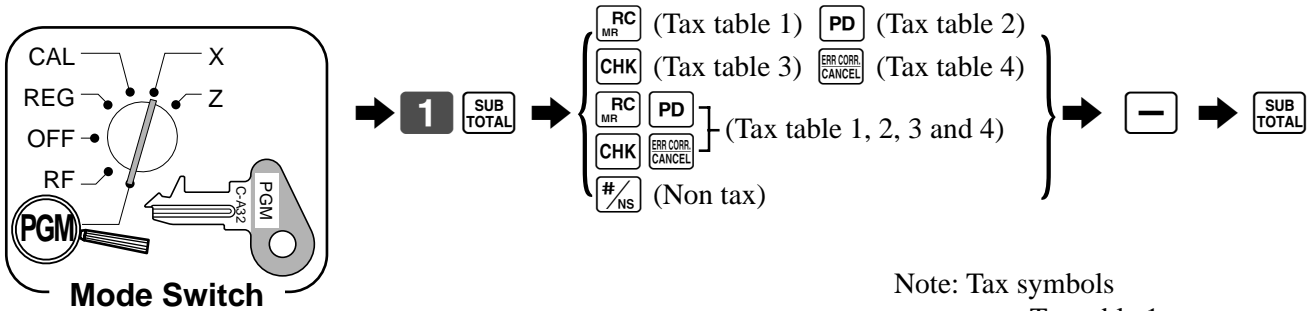

# Preparing and using reductions

This section describes how to prepare and register reductions.

## Programming for reductions

You can use the  key to reduce single item or subtotal amounts. The following procedure lets you program the tax calculation method for the  key.

### To program tax calculation status

Note: Tax symbols

T1: Tax table 1

T2: Tax table 2

T3: Tax table 3

T4: Tax table 4

\*: Tax table 1, 2, 3 and 4

 is initialized as non-tax.

### Taxable status of the key

The tax calculation for the reduction amount is performed in accordance with the tax status programmed for the  key, regardless of whether the reduction is performed on the last item registered or a subtotal amount.

### To program preset reduction amount

Example:

\$1.00 ⇨ 1 0 0

\$10.25 ⇨ 1 0 2 5

\$1,234.56 ⇨ 1 2 3 4 5 6

# Basic Operations and Setups

## Registering reductions

The following examples show how you can use the  key in various types of registration.

## Reduction for items

### OPERATION

### RECEIPT

Item 1	Unit price	\$5.00
	Quantity	1
	Dept.	1
Reduction	Amount	\$0.25
Item 2	Unit price	(\$6.00)
	Quantity	1
	PLU	45
Reduction	Amount	(\$0.50)
Payment	Cash	\$11.00

( ): Preset value

  
  
 Reduces the last amount registered by the value input.  
  
  
  

```

REG 15-03-2002 09:40

# Making corrections in a registration

There are three techniques you can use to make corrections in a registration.

- To correct an item that you input but not yet registered.
- To correct the last item you input and registered.
- To cancel all items in a transaction.

Mode Switch

## To correct an item you input but not yet registered

OPERATION	RECEIPT
<div style="display: flex; flex-direction: column; align-items: center;"> <div style="display: flex; gap: 5px;"> <div style="border: 1px solid black; padding: 2px;">1</div> <div style="border: 1px solid black; padding: 2px;">00</div> <div style="border: 1px solid black; padding: 2px;">+ 1</div> </div> <div style="display: flex; gap: 5px;"> <div style="border: 1px solid black; padding: 2px;">2</div> <div style="border: 1px solid black; padding: 2px;">00</div> <div style="border: 1px solid black; padding: 2px;">- 2</div> </div> <div style="display: flex; gap: 5px;"> <div style="border: 1px solid black; padding: 2px;">3</div> <div style="border: 1px solid black; padding: 2px;">00</div> <div style="border: 1px solid black; padding: 2px;">× 3</div> </div> <div style="display: flex; gap: 5px;"> <div style="border: 1px solid black; padding: 2px;">4</div> <div style="border: 1px solid black; padding: 2px;">00</div> <div style="border: 1px solid black; padding: 2px;">± 4</div> </div> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;">SUB TOTAL</div> </div>	<div style="border: 1px solid black; padding: 5px;"> <p>REG 15-03-2002 11:45 CLERK 01 000028</p> <p>DEPT01 · 1.00 DEPT02 · 2.00 DEPT03 · 3.00 DEPT04 · 4.00 CANCEL TTL .....</p> </div>
<p>Pressing  key is necessary to cancel the transaction.</p> <div style="border: 1px solid black; padding: 2px; margin: 5px auto; width: fit-content;">ERR CORR. CANCEL</div>	

**Important!**

- Note that the number of items included in the transaction to be cancelled is limited (24 ~ 40 items), depending on the complexity of the transaction. If you try to cancel a transaction that exceeds the limit, an error occurs.  
In case of occurrence of this error, register these items in the RF mode.
- You can program the cash register that this cancel operation is not allowed.

**No sale registration**

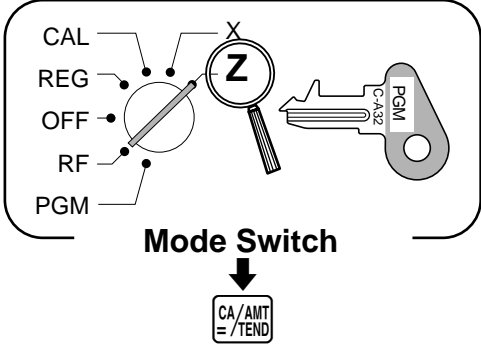

You can use the following procedure to open the drawer without registering a sale. This operation must be performed out of a sale.

\*1 Zero totalled departments (the amount and item numbers are both zero) are not printed.

\*2 Taxable amount and tax amount are printed only if the corresponding tax table is programmed.

\*3 These items can be skipped by programming.

# Convenient Operations and Setups

This section describes more sophisticated setups and operations that you can use to suit the needs of your retail environment.

## Post-finalization receipt format, General printing control, Compulsory, Machine features

### About post-finalization receipt

The post-finalization receipt lets you issue a receipt after finalization of the transaction. Note that all of the following conditions must be satisfied.

- The option “print receipts” is selected.
- The receipt issuance status must be OFF.
- The transaction must be finalized in the REG or RF mode using the ,  or  key.

### Post-finalization receipt example

You can program the cash register to print the transaction total only (below Total format) or full details (below Detailed format) on the post-finalization receipt. Note that if the transaction contains more than 45 lines (including receipt header), the cash register prints in a Total format regardless of your programming.

OPERATION			RECEIPT	
Item 1	Unit price	\$10.00		
	Quantity	1		
	Dept.	1		
Item 2	Unit price	\$20.00		Receipt is not issued.
	Quantity	1		
	Dept.	2		
Payment	Cash	\$30.00		Post-finalization receipt is issued.
				

If “Automatic issue” is selected, no need to press  key.

Total format	Detailed format
REG 15-03-2002 12:35 CLERK 01 000123 CASH .30.00	REG 15-03-2002 12:35 CLERK 01 000123 DEPT01 .10.00 DEPT02 .20.00 TOTAL .30.00 CASH .30.00 CHANGE .0.00

### Important!

- You can issue only one post-finalization receipt per transaction.

# Convenient Operations and Setups

## Programming general printing control

Suppress printing of the subtotal line during tender operation.	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>8</sub>
Print the total line even if no tender operation is made.	b	No = 0 Yes = 2	
Print tax total. (only for Australia)	c	No = 0 Yes = 4	
Print the current time.	a	Yes = 0 No = 1	a+b+c = <input type="text"/> D <sub>7</sub>
Skip the date on journal.	b	Yes = 0 No = 2	
Skip the consecutive number.	c	Yes = 0 No = 4	
Print receipt/Print journal.	a	Receipt = 0 Journal = 1	a+b+c = <input type="text"/> D <sub>6</sub>
Issue post receipt by Finalize key (automatic issue)/ Post receipt key (manual issue)	b	Manual = 0 Automatic = 2	
Detail format/Total format in the post receipt	c	Detail = 0 Total = 4	
Print taxable amount.	a	Yes = 0 No = 1	a+b+c = <input type="text"/> D <sub>5</sub>
Print tax symbols.	b	Yes = 0 No = 2	
Print number of item sold.	c	No = 0 Yes = 4	
Skip item lines on journal. (journal skip)	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>4</sub>
Print subtotal when the key is pressed.	b	No = 0 Yes = 2	
Time system: 1 24 hour system, 2 12 hour system	c	1 = 0 2 = 4	
Digit separator symbol.	a	Comma = 0 Period = 1	a+b+c = <input type="text"/> D <sub>3</sub>
Decimal symbol.	b	Period = 0 Comma = 2	
Journal compressed print (print by half height characters)	c	Yes = 0 No = 4	
Print hyphens before finalizing a transaction.	a	No = 0 Yes = 1	a+b = <input type="text"/> D <sub>2</sub>
Print tax total on receipt and report.	b	No = 0 Yes = 2	
Print Australian GST MOF message.	a	No = 0 Yes = 1	a+b = <input type="text"/> D <sub>1</sub>
Print receipt by double height characters.	b	No = 0 Yes = 2	

**PGM**  
Mode Switch

## Programming compulsory and clerk control function

Force <input type="button" value="SUB TOTAL"/> operation before finalization.	a	No = 0 Yes = 2	a+b = <input type="text"/> D <sub>8</sub>
Force a money declaration before allowing a daily read/reset and financial read operation.	b	No = 0 Yes = 4	
Force to enter the number of customers		No = 0 Yes = 2	<input type="text"/> D <sub>7</sub>
Always "0"			<input type="text" value="0"/> D <sub>6</sub>
Maintain the menu shift status for the next flat-PLU registration. (If "No", press <input type="button" value="MENU SHIFT"/> each time.)	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>5</sub>
Multiplication procedure: 1 Quantity × amount, 2 Amount × quantity	b	1 = 0 2 = 2	
Treat the numeric entries before pressing flat-PLU key as amount or quantity.	c	Amount = 0 Quantity = 4	
Clear the key buffer when a receipt is issued.	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>4</sub>
Perform auto sign-off when a receipt/report is issued.	b	No = 0 Yes = 2	
Restriction (to 0, 5) on last amount digit of cash sales, received on account, paid out and money declaration (only for Australia)	c	No = 0 Yes = 4	
Display "seconds" during time display.		No = 0 Yes = 2	<input type="text"/> D <sub>3</sub>
Reset the consecutive number when the daily reset report is issued.	a	Yes = 0 No = 1	a+b = <input type="text"/> D <sub>2</sub>
Prohibit cancel operation.	b	No = 0 Yes = 2	
Always "0"			<input type="text" value="0"/> D <sub>1</sub>

# Convenient Operations and Setups

## Programming read/reset report printing control

Recording method of electronic journal memory: 1 Superscribe old data , 2 Append to old data	a	1 = 0 2 = 1	a+b = <input type="text"/> D <sub>6</sub>
Print the first and the last consecutive number of the day (consecutive No. range) on the daily sales reset report.	b	No = 0 Yes = 4	
Skip zero total lines on department and transaction read/reset report.	a	Yes = 0 No = 1	a+b+c = <input type="text"/> D <sub>5</sub>
Skip zero total lines on PLU read/reset report.	b	Yes = 0 No = 2	
Skip zero total lines on hourly sales report.	c	Yes = 0 No = 4	
Print the sales ratio on read/reset report.	a	No = 0 Yes = 1	a+b = <input type="text"/> D <sub>4</sub>
Suppress printing of the non-resettable grand total on the daily reset report.	b	No = 0 Yes = 2	a+b = <input type="text"/> D <sub>3</sub>
Suppress printing of RF total and count (both RF mode and RF key) on the read/reset report.	a	No = 0 Yes = 1	
Print tax rate with tax totalizer.	b	No = 0 Yes = 2	0 0 D <sub>2</sub> D <sub>1</sub>
Always "00"			

## Setting a store/machine number

You can set a 4-digit machine number to identify your machine. The machine number is printed on receipts/journal for each transaction.

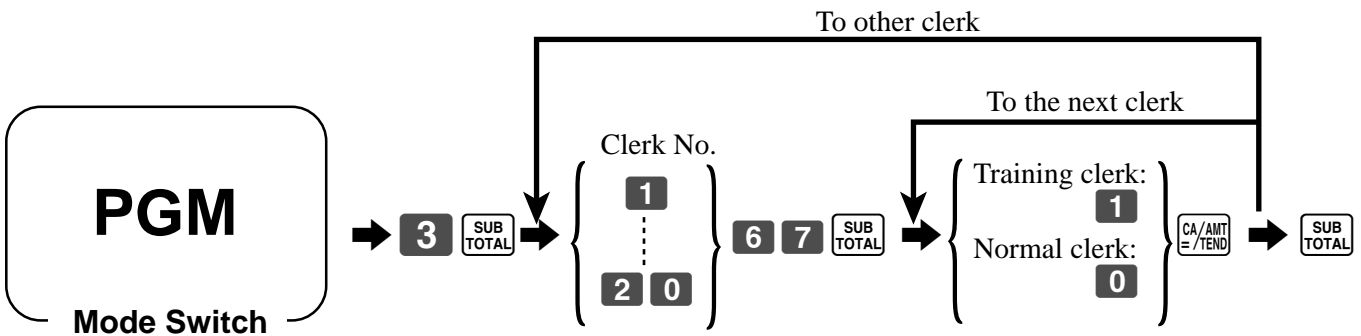

# Programming to clerk

You can program up to 4-digit assigning number (clerk number) and trainee status of clerk (i.e. training cashier) and clerk commission rate for each clerk.

## Programming clerk number

## Programming trainee status of clerk

When a training clerk signs on, the cash register automatically enters the training mode. In the training mode, no operations are affected on any totalizers nor counters. The training mode symbols are printed in the columns of receipt entries produced in the training mode. The cash register exits the training mode when the training clerk signs off.

# Convenient Operations and Setups

## Programming clerk commission rate

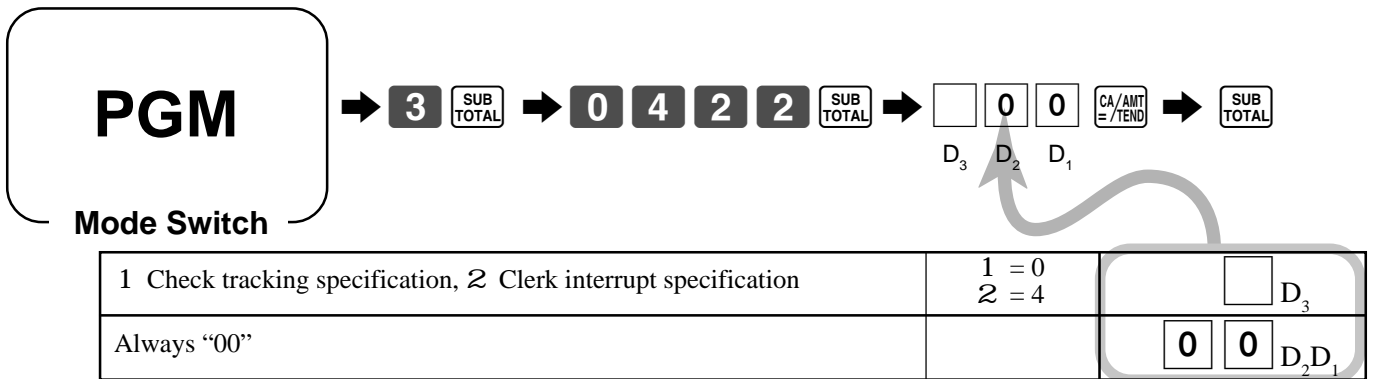

Note: In addition to the commission rate program (this program), *do not* forget to program the commission status for item (department, PLU and flat-PLU).

## About the clerk interrupt function

The register can be programmed to allow the clerk interrupt function, which makes it possible for multiple clerks to simultaneously use the same register. If a clerk starts registration of a transaction, another clerk can interrupt the original registration and begin new one. The original clerk can be later resume the interrupted original registration.

### To use clerk interrupt function

# Entering characters

In this section, the method to enter descriptors or messages (characters) to the cash register during programming is described.

Characters are specified by character keyboard or by codes. In the first half of this section, the usage of character keyboard is described. In the latter half, inputting method by character code is described.

## Using character keyboard

	1	2	3	4	5	( )	2	3			4	5		
	1	6	7	8	9	0	MENU SHIFT	C			PLU	FEED		
A	B	C	D	E	F	G	@	6	7	8	9	/	7	8
a	b	c	d	e	f	g	.					.	SPACE	DBL SIZE
H	I	J	K	L	M	N	#		4	5	6	*		
h	i	j	k	l	m	n	,					,		
O	P	Q	R	S	T	U	%		1	2	3	-	C	
o	p	q	r	s	t	u	:					+	#-2	
V	W	X	Y	Z	9	O	&		A	B		!	D	
v	w	x	y	z	CAPS	SHIFT			0	00	.	?		#-1

### 1 Alphabet keys

Used input to characters.

### 2 Menu shift key

Use this key to shift the flat-PLU key number from 1 through 30 to 31 through 60 or 61 through 90.

### 3 Clear key

Clears all input characters in the programming.

### 4 PLU key

Use this key to input PLU numbers.

### 5 Feed key

Hold this key down to feed paper from the printer.

### 6 Numeric keys

Used to enter program codes, memory number and character codes.

### 7 Space key

Set a space by depression.

### 8 Double size letter key

Specifies that the next character you input to a double size character. You must press this key before each double size character.

### 9 CAPS key

Pressing this key shifts the character from the lowercase letter to upper case letter.

### O Shift key

Pressing this key shifts the character from the uppercase letter to lower case letter.

### A Character fixed key

Enter when the alphabetic entry for a descriptor, name or message has been completed.

### B Backspace/Character code fixed key

Registers one character with code (2 or 3 digits). Clears the last input character, much like a back space key.

### C Program end key

Terminates the character programming.

### D Character enter key

Registers the programmed characters.

### Example:

Input “ **A** p p l e J u i c e ”,  
enter “DBL SIZE”, “A”, “SHIFT”, “p”, “p”, “l”, “e”, “SPACE”, “CAPS”, “J”, “SHIFT”, “u”, “i”, “c”, “e” .

# Convenient Operations and Setups

## Entering characters by code

Every time you enter a character, choose character codes by the character code list (below) and press the  key to settle it.

### Example:

Input “ A p p l e J u i c e ”,  
 enter “ 255  65  112  112  108  101  32  74  117  105  99  101  ”.

## Character code list

# Department key feature programming

There are two different methods you can use to assign features to department keys. With “Batch feature programming”, you can use a single operation to assign multiple features. “Individual feature programming”, on the other hand, let you assign features one-by-one. This method is recommended for programming of special features to individual department keys.

## Batch feature programming

When using this procedure to assign multiple features to departments, use 9-digit codes that you create using the following procedure

Negative department	a	No = 0 Yes = 2	a+b = <input type="text"/> D <sub>9</sub>
Hash department	b	No = 0 Yes = 4	
Single item sale		No = 0 Yes = 1	<input type="text"/> D <sub>8</sub>
High digit limit specification		Significant number	<input type="text"/> D <sub>7</sub>
Taxable status 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>6</sub>
Taxable status 2	b	No = 0 Yes = 2	
Taxable status 3	c	No = 0 Yes = 4	
Commission 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>5</sub>
Commission 2	b	No = 0 Yes = 2	
Taxable status 4	c	No = 0 Yes = 4	
Always “0000”			<input type="text"/> 0 ~ <input type="text"/> 0 D <sub>4</sub> ~ D <sub>1</sub>

# Convenient Operations and Setups

## Individual feature programming

With this procedure, you can assign individual features to specific departments. Please select the command code of the contents you want to program, and follow the procedure below.

Command code	Contents/selection			Program code
0166	Negative department	a	No = 0 Yes = 2	a+b = <input type="text"/>
	Hash department	b	No = 0 Yes = 4	
1866	Single item sale		No = 0 Yes = 1	<input type="text"/>
1566	High digit limit specification		Significant number	<input type="text"/>
0366	Taxable status 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Taxable status 2	b	No = 0 Yes = 2	
	Taxable status 3	c	No = 0 Yes = 4	
0966	Commission 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Commission 2	b	No = 0 Yes = 2	
	Taxable status 4	c	No = 0 Yes = 4	

To program a unit price to a department key, please refer the page 27.

# PLU feature programming

There are two different methods you can use to assign features to PLUs. With “Batch feature programming”, you can use a single operation to assign multiple features. “Individual feature programming”, on the other hand, let you assign features one-by-one. This method is recommended for programming of special features to individual PLUs.

## Batch feature programming

When using this procedure to assign multiple features to PLUs, use 9-digit codes that you create using the following procedure.

Condiment PLU	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>9</sub>
Negative PLU	b	No = 0 Yes = 2	
Hash PLU	c	No = 0 Yes = 4	
Single item sale	a	No = 0 Yes = 1	a+b = <input type="text"/> D <sub>8</sub>
Treat as subdepartment/PLU.	b	PLU = 0 Subdept. = 4	
High digit limit specification (for subdepartment)		Significant number	<input type="text"/> D <sub>7</sub>
Taxable status 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>6</sub>
Taxable status 2	b	No = 0 Yes = 2	
Taxable status 3	c	No = 0 Yes = 4	
Commission 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>5</sub>
Commission 2	b	No = 0 Yes = 2	
Taxable status 4	c	No = 0 Yes = 4	
Department link (00 ~ 08)		Significant numbers	<input type="text"/> <input type="text"/> D <sub>4</sub> D <sub>3</sub>
Group link (00 ~ 50)		Significant numbers	<input type="text"/> <input type="text"/> D <sub>2</sub> D <sub>1</sub>

# Convenient Operations and Setups

## Individual feature programming

With this procedure, you can assign individual features to specific PLUs. Please select the command code of the contents you want to program, and follow the procedure below.

Command code	Contents/selection			Program code
0166	Condiment PLU	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Negative PLU	b	No = 0 Yes = 2	
	Hash PLU	c	No = 0 Yes = 4	
1866	Single item sale	a	No = 0 Yes = 1	a+b = <input type="text"/>
	Treat as subdepartment (If "No", treat as PLU.)	b	No = 0 Yes = 4	
1566	High digit limit specification		Significant number	<input type="text"/>
0366	Taxable status 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Taxable status 2	b	No = 0 Yes = 2	
	Taxable status 3	c	No = 0 Yes = 4	
0966	Commission 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Commission 2	b	No = 0 Yes = 2	
	Taxable status 4	c	No = 0 Yes = 4	
1166	Department link (00 ~ 08)	Significant numbers		<input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/>
	Group link (00 ~ 50)			

To program a unit price to a PLU or a subdepartment, please refer to the page 29.

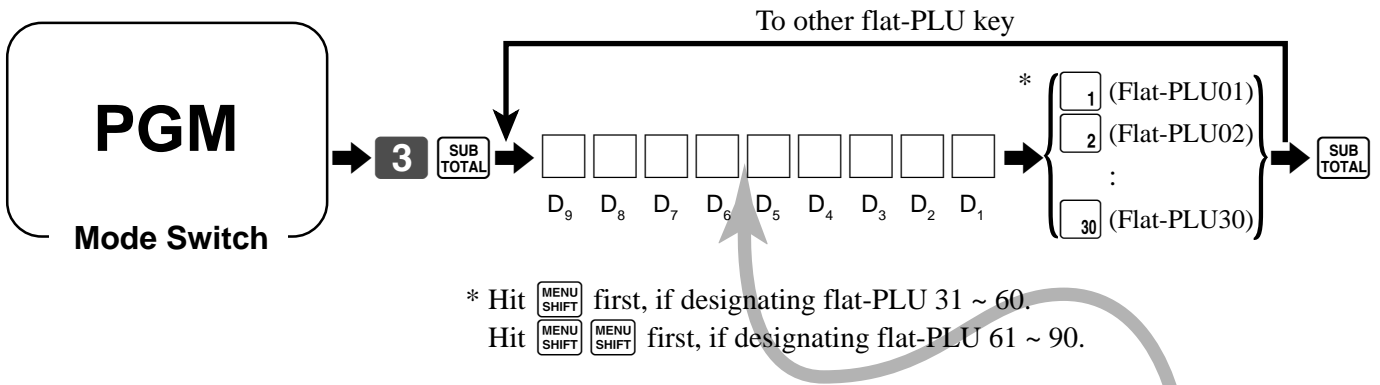

# Flat-PLU feature programming

There are two different methods you can use to assign features to flat-PLUs. With “Batch feature programming”, you can use a single operation to assign multiple features.

“Individual feature programming”, on the other hand, let you assign features one-by-one. This method is recommended for programming of special features to individual flat-PLUs.

## Batch feature programming

When using this procedure to assign multiple features to flat-PLUs, use 9-digit codes that you create using the following procedure.

Condiment PLU	a	No = 0 Yes = 2	a+b+c = <input type="text"/> D <sub>9</sub>
Negative PLU	b	No = 0 Yes = 4	
Hash PLU	c	No = 0 Yes = 1	
Single item sale		Significant number	<input type="text"/> D <sub>8</sub>
High digit limit specification (for subdepartment)		No = 0 Yes = 1	<input type="text"/> D <sub>7</sub>
Taxable status 1	a	No = 0 Yes = 2	a+b+c = <input type="text"/> D <sub>6</sub>
Taxable status 2	b	No = 0 Yes = 4	
Taxable status 3	c	No = 0 Yes = 1	
Commission 1	a	No = 0 Yes = 2	a+b+c = <input type="text"/> D <sub>5</sub>
Commission 2	b	No = 0 Yes = 4	
Taxable status 4	c		
Department link (00 ~ 08)		Significant numbers	<input type="text"/> <input type="text"/> D <sub>4</sub> D <sub>3</sub>
Group link (00 ~ 50)		Significant numbers	<input type="text"/> <input type="text"/> D <sub>2</sub> D <sub>1</sub>

# Convenient Operations and Setups

## Individual feature programming

With this procedure, you can assign individual features to specific flat-PLUs. Please select the command code of the contents you want to program, and follow the procedure below.

Command code	Contents/selection			Program code
0166	Condiment PLU	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Negative PLU	b	No = 0 Yes = 2	
	Hash PLU	c	No = 0 Yes = 4	
1866	Single item sale		No = 0 Yes = 1	<input type="text"/>
1566	High digit limit specification		Significant number	<input type="text"/>
0366	Taxable status 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Taxable status 2	b	No = 0 Yes = 2	
	Taxable status 3	c	No = 0 Yes = 4	
0966	Commission 1	a	No = 0 Yes = 1	a+b+c = <input type="text"/>
	Commission 2	b	No = 0 Yes = 2	
	Taxable status 4	c	No = 0 Yes = 4	
1166	Department link (00 ~ 08)		Significant numbers	<input type="text"/> <input type="text"/>
	Group link (00 ~ 50)			<input type="text"/> <input type="text"/>

To program a unit price to a PLU or a subdepartment, please refer to the page 31.

## Registering example

**REG**

Mode Switch

### Locking out and releasing high digit limitation

First of all, you should allocate the **OPEN** key (refer to page 82).

	OPERATION	RECEIPT												
<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td rowspan="4" style="text-align: center;">Item</td> <td>Unit price</td> <td style="text-align: right;">\$10.50</td> </tr> <tr> <td>Quantity</td> <td style="text-align: center;">1</td> </tr> <tr> <td>Dept.</td> <td style="text-align: center;">3</td> </tr> <tr> <td>Max. digit</td> <td style="text-align: center;">(3)</td> </tr> <tr> <td>Payment</td> <td>Cash</td> <td style="text-align: right;">\$11.00</td> </tr> </table> <p>( ): Preset value</p>	Item	Unit price	\$10.50	Quantity	1	Dept.	3	Max. digit	(3)	Payment	Cash	\$11.00	<p><b>1 0 5 0</b> <b>× 3</b></p> <p><b>ERROR ALARM</b> (Exceeding max. digits)</p> <p><b>C</b> CAC</p> <p><b>OPEN</b></p> <p>Cancels limitations for next entry</p> <p><b>1 0 5 0</b> <b>× 3</b></p> <p><b>SUB</b> <b>TOTAL</b></p> <p><b>1 1 00</b> <b>CA/AMT</b> <b>=/TEND</b></p>	<p>REG 15-03-2002 12:40 CLERK 01 000030</p> <p>DEPT03 .10.50 TOTAL .10.50 CASH .11.00 CHANGE .0.50</p>
Item		Unit price	\$10.50											
		Quantity	1											
		Dept.	3											
	Max. digit	(3)												
Payment	Cash	\$11.00												

### Single item sales items

You can issue a receipt by simply touching the single item sales department or PLU. The following examples show how you register single-item-sale departments. Registration of single item sale PLUs is identical.

#### Single item

	OPERATION	RECEIPT									
<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td rowspan="4" style="text-align: center;">Item</td> <td>Unit price</td> <td style="text-align: right;">\$2.00</td> </tr> <tr> <td>Quantity</td> <td style="text-align: center;">1</td> </tr> <tr> <td>Dept.</td> <td style="text-align: center;">4</td> </tr> <tr> <td>Sales status</td> <td style="text-align: center;">(Single item)</td> </tr> </table> <p>( ): Preset value</p>	Item	Unit price	\$2.00	Quantity	1	Dept.	4	Sales status	(Single item)	<p><b>2 00</b> <b>+ 4</b></p>	<p>REG 15-03-2002 12:45 CLERK 01 000031</p> <p>DEPT04 .2.00 CASH .2.00</p>
Item		Unit price	\$2.00								
		Quantity	1								
		Dept.	4								
	Sales status	(Single item)									

#### Multiple item sale

	OPERATION	RECEIPT																			
<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td rowspan="4" style="text-align: center;">Item 1</td> <td>Unit price</td> <td style="text-align: right;">\$2.00</td> </tr> <tr> <td>Quantity</td> <td style="text-align: center;">1</td> </tr> <tr> <td>Dept.</td> <td style="text-align: center;">3</td> </tr> <tr> <td>Sales status</td> <td style="text-align: center;">(Normal)</td> </tr> <tr> <td rowspan="3" style="text-align: center;">Item 2</td> <td>Unit price</td> <td style="text-align: right;">\$5.00</td> </tr> <tr> <td>Quantity</td> <td style="text-align: center;">1</td> </tr> <tr> <td>Dept.</td> <td style="text-align: center;">4</td> </tr> <tr> <td>Payment</td> <td>Cash</td> <td style="text-align: right;">\$7.00</td> </tr> </table> <p>( ): Preset value</p>	Item 1	Unit price	\$2.00	Quantity	1	Dept.	3	Sales status	(Normal)	Item 2	Unit price	\$5.00	Quantity	1	Dept.	4	Payment	Cash	\$7.00	<p><b>2 00</b> <b>× 3</b></p> <p><b>5 00</b> <b>+ 4</b></p> <p>Single item status is not effective during transaction.</p> <p><b>CA/AMT</b> <b>=/TEND</b></p> <p>It is necessary to press the finalize key.</p>	<p>REG 15-03-2002 12:50 CLERK 01 000032</p> <p>DEPT03 .2.00 DEPT04 .5.00</p>
Item 1		Unit price	\$2.00																		
		Quantity	1																		
		Dept.	3																		
	Sales status	(Normal)																			
Item 2	Unit price	\$5.00																			
	Quantity	1																			
	Dept.	4																			
Payment	Cash	\$7.00																			

Note: The single item sales department or PLU should be registered at the top of the transaction, otherwise the transaction is not finalized. It is necessary to press **CA/AMT =/TEND**, **CR** or **CHK** key.

# Convenient Operations and Setups

## Examples of registering subdepartments

### Single item sale

Item	Unit price	\$6.00
	Quantity	1
	Subdept.	15
Payment	Cash	\$10.00

#### OPERATION

**1 5** **PLU**  
 PLU (subdepartment) code

# Percent key feature programming

In this section, detail information of  (discount) and  (premium) is described.

## Programming to the percent key

To program a percent rate, please refer to the page 33.

Fraction control, round off = 0, cut off = 1, round up = 2	Significant number	<input type="checkbox"/> D <sub>7</sub>
Prohibit manual entry to override programmed percentage.	No = 0 Yes = 2	<input type="checkbox"/> D <sub>6</sub>
Always "0"		0 D <sub>5</sub>
Taxable status 1	a No = 0 Yes = 1	a+b+c = <input type="checkbox"/> D <sub>4</sub>
Taxable status 2	b No = 0 Yes = 2	
Taxable status 3	c No = 0 Yes = 4	
Commission 1	a No = 0 Yes = 1	a+b+c = <input type="checkbox"/> D <sub>3</sub>
Commission 2	b No = 0 Yes = 2	
Taxable status 4	c No = 0 Yes = 4	
Always "00"		0 0 D <sub>2</sub> D <sub>1</sub>

# Convenient Operations and Setups

## Registering discounts and premiums

### Discount for Items and subtotals

Refer to “Registering discounts” in “Basic Operations and Setups” on page 34.

### Premium for Items and subtotals

First of all, allocate the premium key on the keyboard.

#### OPERATION

#### RECEIPT

Item 1	Unit price	(\$10.00)
	Quantity	1
	Dept.	4
Premium	Rate	7%
Item 2	Unit price	(\$5.00)
	Quantity	1
	PLU	32
Subtotal		
Premium	Rate	(5%)
Payment	Cash	\$20.00

( ): Preset value

Applies the input value as a premium rate (7%).

For this operation, press this key instead of .

Applies the preset premium rate (5%) to the subtotal.

REG	15-03-2002	13:15
CLERK	01	000037
DEPT04		· 10.00
7%		
%+		· 0.70
PLU0032		· 5.00
ST		· 15.70
5%		
%+		· 0.79
TOTAL		· 16.49
CASH		· 20.00
CHANGE		· 3.51

- You can manually input rates up to 4 digits long (0.01% to 99.99%).

### Taxable status of the and key

- Whenever you perform a discount/premium operation on the last item registered, the tax calculation for discount/premium amount is performed in accordance with the tax status programmed for that item.
- Whenever you perform a discount/premium operation on a subtotal amount, the tax calculation for the subtotal amount is performed in accordance with the tax status programmed for the key.

# Currency exchange programming

When the  key is pressed, a current subtotal including tax is converted directly into foreign currency and the result is displayed, and the subsequent finalization is handled using the foreign currency. The currency exchange function is released by finalizing a transaction, partial tender operation, receipt issuance, or by pressing the  key. First of all, the  key should be allocated, refer to page 82.

## Currency exchange rate programming

Example:

\$1.00 = ¥110.50 ⇨ **1 · 1 0 5**  
 ¥100 = \$0.9050 ⇨ **0 · 9 0 5**

## Currency exchange feature programming

Fraction control, round off = 0, cut off = 1, round up = 2	Significant number	<input type="text"/> D <sub>7</sub>
Always "00"		<input type="text"/> 0 <input type="text"/> 0 D <sub>6</sub> D <sub>5</sub>
Monetary symbol for foreign currency; Local currency symbol = 0 Monetary symbol 1 (in the special character program) = 1 Monetary symbol 2 (in the special character program) = 2	Significant number	<input type="text"/> D <sub>4</sub>
Totallizer selection; 1 Currency exchange 1, 2 Currency exchange 2	1 = 0 2 = 2	<input type="text"/> D <sub>3</sub>
Digit separator for foreign currency; Period = 0, Comma = 2	Significant number	<input type="text"/> D <sub>2</sub>
Monetary system code (decimal places) following currency exchange operation; Same as local currency = 0, <input type="text"/> <input type="text"/> = 1, <input type="text"/> <input type="text"/> <input type="text"/> = 2, <input type="text"/> = 3	Significant number	<input type="text"/> D <sub>1</sub>

# Convenient Operations and Setups

## Registering foreign currency

### 1) Full amount tender in foreign currency

\* Preprogrammed exchange rate: ¥ 1 = \$0.0090

#### Important!

Tenders in a foreign currency can be registered using the **CA/AMT = /TEND** and **CHK** keys only. Other finalize keys cannot be used.

OPERATION	DISPLAY	RECEIPT																											
<b>1 0 00</b> <b>+ 1</b> ← Enter the unit price and press the applicable department key. CHANGE		· 15.00																											
<b>2 0 00</b> <b>- 2</b> ← Enter the next unit price and press the applicable department key.	 (Displays in \$)																												
 ← Press the  key without entering a numeric value. This operation converts the subtotal (including tax) dollar value into yen by applying a preprogrammed exchange rate. The result is shown on the display but not printed on the receipt or journal.	 (Displays in ¥: 3,333)																												
<b>5 0 00</b>  ← Enter the amount tendered in yen and press the  key. This operation converts the entered yen amount into dollars by applying a preprogrammed exchange rate. The result is shown on the display.	 (Displays in \$: 45.00)																												
 ← Press to finalize the transaction. Note that you do not need to reenter the dollar amount. The register automatically calculates the change amount due in dollars and shows it on the display, receipts and journal.	 (Displays in \$)																												

## 2) Partial tender in a foreign currency

\* Preprogrammed exchange rate: ¥ 1 = \$0.0090

### Important!

Partial tender in a foreign currency can be registered using the **CA/AMT = /TEND** key and **CHK** keys only. Other finalization keys cannot be used, but the remaining tender can be finalized using any finalize key.

#### OPERATION

#### DISPLAY

#### RECEIPT

**1 0 00** **+ 1**

← Enter the unit price and press the applicable department key.

**10.00**  
(Displays in \$)

**2 0 00** **- 2**

← Enter the next unit price and press the applicable department key.

**20.00**  
(Displays in \$)

**Currency Exchange**

← Press the **Currency Exchange** key without entering a numeric value. This operation converts the subtotal (including tax) dollar value into yen by applying a preprogrammed exchange rate. The result is shown on the display but not printed on the receipt or journal.

**3333**  
(Displays in ¥: 3,333)

**2 0 00** **Currency Exchange**

← Enter the partial amount tendered in yen and press the **Currency Exchange** key. This operation converts the entered yen amount into dollars by applying a preprogrammed exchange rate. The result is shown on the display.

**18.00**  
(Displays in \$: 18.00)

**CA/AMT = /TEND**

← Press the **CA/AMT = /TEND** key to specify cash tender for the yen partial tender. Note that you do not need to reenter the dollar amount. The register automatically deducts the dollar equivalent of the yen amount tendered from the total amount due and shows the amount on the display.

**12.00**  
(Displays in \$)

**CHK**

← Press to finalize the transaction.

Item 1	Unit price	\$10.00
	Quantity	1
	Dept.	4
Item 2	Unit price	\$5.00
	Quantity	1
	PLU	32
Payment	Cash	\$15.00

REG	15-03-2002	13:45
CLERK	01	000041
DEPT04		.10.00
PLU0032		.5.00
TOTAL		.15.00
CASH		.15.00
CHANGE		.0.00

## Other function key feature programming

You can define a selection of features for the function keys by specifying an 8-digit program code for each key.

### Cash, Charge, Check, Credit key

Restrict (to 0, 5) on the last digit for amount tendered (except <small>CA/AMT = TEND</small> ) (only for Australia)	No = 0 Yes = 1	<input type="text"/> D <sub>8</sub>
Always "0"		<input type="text" value="0"/> D <sub>7</sub>
High amount limit specification for subtotal and tendering amounts *1	Maximum value (0 ~ 9)	<input type="text"/> <input type="text"/> D <sub>6</sub> D <sub>5</sub>
	Number of zeros (0 ~ 9)	
Prohibit entry of a partial payment	a No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>4</sub>
Prohibit the entry of the amount tendered.	b No = 0 Yes = 2	
Force entry of the amount tendered.	c No = 0 Yes = 4	
Print VAT breakdown.	a No = 0 Yes = 1	a+b = <input type="text"/> D <sub>3</sub>
Restriction (to 00, 25, 50, 75) on last two digits for amount tendered *2	b No = 0 Yes = 4	
High amount limit specification for change amount due. *1	Maximum value (0 ~ 9)	<input type="text"/> <input type="text"/> D <sub>2</sub> D <sub>1</sub>
	Number of zeros (0 ~ 9)	

\*1 High amounts limits:

High amount limitations are specified as 2-digits. The first digit you specify limits the maximum value of the leftmost digit of the value within the range of 0 through 9. The second digit you specify indicates the number of zeros in the limit value, again within the range of 0 through 9.

Example: \$600.00 maximum ⇨ Enter 64.

Entering "00" clears the limitation.

\*2 Always program "Restrict = 4" here for cash amount tendered key when you are using Danish rounding.

## Received on account, Payout key

Always "00"		<input type="text" value="0"/> <input type="text" value="0"/> D <sub>8</sub> D <sub>7</sub>
High amount limit specification for change amount due. (refer to *1 on the previous page.)	Maximum value (0 ~ 9)	<input type="text"/> <input type="text"/> D <sub>6</sub> D <sub>5</sub>
	Number of zeros (0 ~ 9)	
Always "0000"		<input type="text" value="0"/> ~ <input type="text" value="0"/> D <sub>4</sub> ~ D <sub>1</sub>

## Minus, Plus key

Always "00"		<input type="text" value="0"/> <input type="text" value="0"/> D <sub>8</sub> D <sub>7</sub>
Allow credit balance. ( <input type="text" value="-"/> only) Allow registration outside of a sale. ( <input type="text" value="Plus"/> only)	No = 0 Yes = 1	<input type="text"/> D <sub>6</sub>
	High digit limit specification	Significant number <input type="text"/> D <sub>5</sub>
Taxable status 1	a No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>4</sub>
Taxable status 2	b No = 0 Yes = 2	
Taxable status 3	c No = 0 Yes = 4	
Commission 1	a No = 0 Yes = 1	a+b+c = <input type="text"/> D <sub>3</sub>
Commission 2	b No = 0 Yes = 2	
Taxable status 4	c No = 0 Yes = 4	
Always "00"		<input type="text" value="0"/> <input type="text" value="0"/> D <sub>2</sub> D <sub>1</sub>

## #/No sale key

Always "00"		<input type="text" value="0"/> <input type="text" value="0"/> D <sub>8</sub> D <sub>7</sub>
Treat as the first transaction.	No = 0 Yes = 1	<input type="text"/> D <sub>6</sub>
Always "00000"		<input type="text" value="0"/> ~ <input type="text" value="0"/> D <sub>5</sub> ~ D <sub>1</sub>

## Tax shift key

Always "0000"		<input type="text" value="0"/> ~ <input type="text" value="0"/> D <sub>8</sub> ~ D <sub>5</sub>
Taxable status 0 ~ 4; Taxable 1 = 0/1 Taxable 2 = 2, Taxable 3 = 3, Taxable 4 = 4	Significant number	<input type="text"/> D <sub>4</sub>
Always "000"		<input type="text" value="0"/> ~ <input type="text" value="0"/> D <sub>3</sub> ~ D <sub>1</sub>

# Convenient Operations and Setups

## Calculator functions

While registering at the REG mode, you can switch to CAL mode and then return to REG mode to resume the registration.

# CAL

Mode Switch

### Example 1 (Calculation examples)

	OPERATION	DISPLAY
Clear		0
5+3-2=		6
(23-56)×78=		-2574
12 % on 1500		180

### Example 2 (Memory recall)

Item 1	Unit price	\$10.00
	Quantity	1
	Dept.	1
Item 2	Unit price	\$20.00
	Quantity	1
	Dept.	2
Payment	Cash	\$10.00
by 3 persons each,		

OPERATION	DISPLAY/RECEIPT
<p><b>Turn to REG</b></p>	
<p><b>Turn to CAL</b></p>	
<p>Memory recall: Recalls subtotal amount</p> <p>Divides the subtotal by 3 persons</p>	
<p><b>Turn to REG</b></p>	
<p>Memory recall: Recalls the result amount</p>	

## Programming calculator mode control

Open drawer when $\boxed{\text{CA/AMT}=\text{TEND}}$ (equal) is pressed in CAL mode.	a	No = 0 Yes = 1	a+b+c = $\boxed{\phantom{0000}}$ D <sub>5</sub>
Open drawer when $\boxed{\text{\#}/\text{NS}}$ is pressed in CAL mode.	b	No = 0 Yes = 2	
Print calculator total on the daily report.	c	Yes = 0 No = 4	
Always "0000"			$\boxed{0} \sim \boxed{0}$ D <sub>4</sub> ~ D <sub>1</sub>

## About the daylight saving time

It is possible to set the internal clock forward/backward by 1 ~ 9 hour(s) for the daylight saving time.

### OPERATION

### DISPLAY

#### • Forward by 1 hour

#### • Backward by 1 hour

\* Put 2 ~ 9, in case of set the clock by 2 ~ 9 hours.

## Keyboard layout change

You can change the keyboard layout or allocate some new functions on the keyboard.

Note: Before changing the keyboard layout, you must issue the daily and periodic reset reports.

### Configuration of the physical key layout

The shadowed keys are fixed function keys. You cannot change the function of these keys.

#068	#-63	#-58	#-53	#-48	#-43	#-38	#-33	C	#-28	#-27	#-26	FEED	#-18
#-67	#-62	#-57	#-52	#-47	#-42	#-37	#-32	7	8	9	#-25	#-20	#-17

Note: The  key in programming procedures mean the #-13 key on the keyboard.

### Programming the function of each key

Content	Function code	Content	Function code	Content	Function code
Cash/amount tendered	01	Post receipt/guest receipt	38	Open	67
Charge	02	Non-add	40	Preset open	68
Check	03	Non-add/no sale	41	Open/clerk No.	69
Credit	04	No sale	42	Add/price	70
New balance	06	No. of customer	43	Clerk No.	72
Recall character	10	Arrangement	44	Subtotal	75
Tip	15	Currency exchange	45	Receipt on/off	76
Received on account	20	VAT	46	Multiplication/date time	82
Paid out	21	Price	49	Paid out/VAT	89
Minus	27	PLU	50	New check	91
Discount	28	Department 1	0151	Old check	92
Plus	29	Department 2	0251	New/old check	93
Premium	30	:	:	Add check	94
Manual tax	32	Department 8	0851	No function	00
Refund	33	Tax shift	57	"00" double zero	96
Error correct/cancel	34	Flat PLU	63	"000" triple zero	97
Void	35	Menu shift	64	"." decimal point	98

Note: Two zero key, three zero key, decimal point key can only be allocated in #-11 and #-12 position.

---

## The outline of the functions

- **Cash/amount tendered:**  
This key is used to register a cash amount due either with or without a tendered amount input.
- **Charge:**  
This key registers a charge sale.
- **Check:**  
This key is used to register a check payment amount either with or without a tendered amount input.
- **Credit:**  
This key registers a credit sale.
- **New balance:**  
This key adds latest registered total to the previous balance to obtain a new balance.
- **Recall character:**  
This key is used to print programmed text messages.
- **Tip:**  
This key registers tips.
- **Received on account:**  
This key registers a received on account amount.
- **Paid out:**  
This key registers an amount paid out from the register.
- **Minus:**  
This key registers an amount for subtraction.
- **Discount:**  
This key applies a preset or manually input percent rate to obtain the discount amount for the last registered item or subtotal.
- **Plus:**  
This key registers an amount for addition.
- **Premium:**  
This key applies a preset or manually input percent rate to obtain the premium amount for the last registered item or subtotal.
- **Manual tax:**  
This key is used to register manually entered tax.
- **Refund:**  
This key declares next input a return or cancels the last registered item in a transaction.
- **Error correct/Cancel:**  
This key corrects registration errors or cancels entire registrations of current transaction.
- **Void:**  
This key invalidates preceding data registered for departments, PLUs or flat-PLUs.  
This key must be pressed before the transaction involving the data to be invalidated is finalized, but is also effective even after calculation of a subtotal amount.
- **Post receipt/Guest receipt:**  
After finalization, this key produces a post receipt.  
After designating a check number, this key produces a guest receipt.
- **Non-add, No sale:**  
Non-add; These keys print reference numbers during transaction.  
No sale; These keys open the drawer between the transactions.
- **Number of customers:**  
This key is used to enter the number of customers.
- **Arrangement:**  
Executes the multiple operations assigned.
- **Currency exchange:**  
This key calculates subtotal amounts or paying amount dues in foreign currency.
- **VAT:**  
This key prints a VAT breakdown.
- **Price:**  
Use this key to register unit prices for subdepartment.
- **PLU:**  
Use this key to input PLU (subdepartment) numbers.
- **Department:**  
Use these keys to register items to departments.
- **Tax shift:**  
This key changes the tax status of the next item.  
It is necessary to assign the tax status of this key.
- **Flat-PLU:**  
Use these keys to register items to flat-PLUs.
- **Menu shift:**  
This key shifts flat-PLU key from 1st to 2nd, 2nd to 3rd or 3rd to 1st.
- **Open:**  
This key releases maximum digit limit.
- **Preset open:**  
This key suspends compulsory specifications.
- **Clerk number:**  
This key assigns clerk numbers.
- **Subtotal:**  
This key obtains subtotal including the add-on tax and the previous balance.
- **Multiplication/Date•time:**  
This key is used to input quantities for multiple items with the same price.  
This key also displays the time or date between transactions.
- **New check:**  
This key is used in a check tracking system to input a new check number in order to open a new check under that number.
- **Old check:**  
This key is used in a check tracking system to input the number of an existing check whose details are stored in a check tracking memory. Existing checks are reopened to perform further registration or to finalize them.
- **New/Old check:**  
This key is used in a check tracking system to input check numbers in order to open new checks and to reopen existing checks. When the clerk inputs a check number, the register checks to see if that number already exists in the check tracking memory. If there is no match number in memory, a new check is opened under the input number. If the check number already stored in memory, that check is reopened for further registration or finalization.
- **Add check:**  
This key is used in check tracking system to combine the details of more than one check into a single check.

## Printing read/reset reports

- Read report**

You can print read reports at any time during the business day without affecting the data stored in the cash register's memory.

- Reset report**

You should print reset reports at the end of the business day.

### Important!

- The reset operation issues a report and also clears all sales data from the cash register's memory.
- Be sure to perform the reset operations at the end of each business day. Otherwise, you will not be able to distinguish between the sales data for different dates.

### To print the individual department, PLU/subdepartment read report

This report shows sales for specific departments or PLU/subdepartments.

\*1 Money declaration:

Count how much cash is in the drawer and input this amount (up to 8-digits).

The cash register will automatically compare the input with the cash in drawer in the memory and print the difference between these two amounts.

Note that if money declaration is required by programming (page 47), you cannot skip this procedure.

## To print the group read report

This report shows group totals.

### Important!

- When the register shows the above sign, issue this read report (if necessary) and reset this memory immediately. (If you do not need this report, enter "4058" instead of "58".)
- Issue this report before the daily sales reset report, otherwise you cannot get this report.

# Convenient Operations and Setups

## To print the daily sales read/reset report

This report shows sales except for PLUs.

\*1 Money declaration:

Count how much cash is in the drawer and input this amount (up to 8-digits).

The cash register will automatically compare the input with the cash in drawer in the memory and print the difference between these two amounts.

Note that if money declaration is required by programming (page 47), you cannot skip this procedure.

\*2 Zero totalled departments (the amount and item numbers are both zero) are not printed.

\*3 Taxable amount and tax amount are printed only if the corresponding tax table is programmed.

\*4 These items can be skipped by programming.

\*5 The "\*" symbol is printed on the reset report, if memory overflow occurred in the totalizer.

## To print the periodic-1/-2 sales read/reset reports

These reports show sales breakdowns of sales by any two kinds of period you want.

### OPERATION

# To print the print control, compulsory clerk program (except PLU)

\*1 Departments without being programmed are not printed on this report.

# Troubleshooting

This section describes what to do when you have problems with operation.

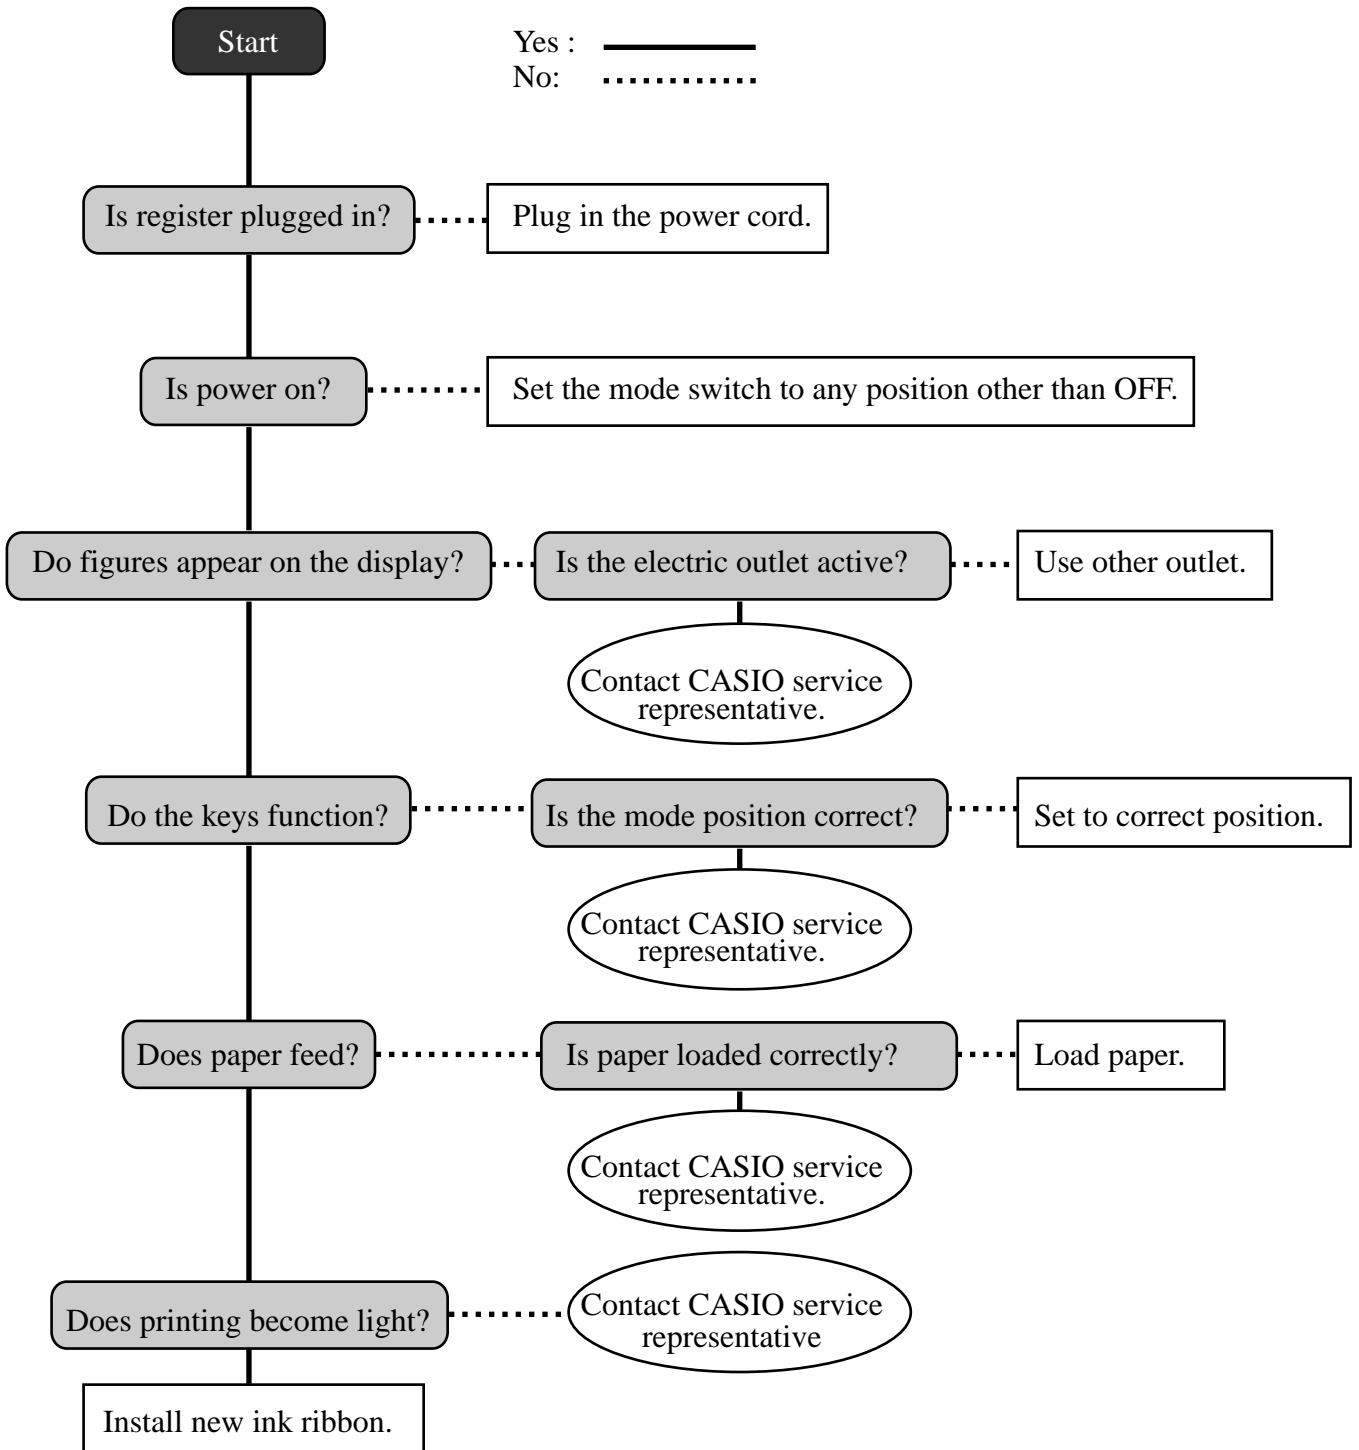

## When an error occurs

Errors are indicated by an error tone. When this happens, you can usually find out what the problem is as shown below.

Error code (Message)	Meaning	Action
<b>E01</b> (ERR-MODE)	Mode switch position changed before finalization.	Return the mode switch to its original setting and finalize the operation.
<b>E03</b> (ERR-CLK)	The signed on clerk differs from the clerk performed the check tracking operation.	Input correct check number or assign the proper clerk number.
<b>E08</b> (SIGN-ON)	Registration without entering a clerk number.	Enter a clerk number.
<b>E10</b> (PRNT-LID)	Platen arm of the printer is opened.	Close the platen arm.
<b>E11</b> (DRW-OPEN)	Registration is made while the cash drawer is opened.	Close the cash drawer.
<b>E12</b> (JPAP-END)	Journal paper end	Replace the new paper roll.
<b>E14</b> (RPAP-END)	Receipt paper end	Replace the new paper roll.
<b>E17</b> (CHECK-NO)	Attempt made to register an item without inputting a table number.	Input a table number.
<b>E19</b> (COVERS)	Registration without inputting number of customers.	Input number of customers.
<b>E27</b> (BUF-FULL)	Transaction cancel buffer full.	Finalize the transaction.
<b>E31</b> (PRESS-ST)	Finalization of a transaction attempted without confirming the subtotal.	Press the  key.
<b>E33</b> (TEND-AMT)	Finalize operation attempted without entering amount tender.	Enter the amount tendered.
<b>E35</b> (CNG-OVER)	Change amount exceeds preset limit.	Input amount tendered again.
<b>E38</b> (DECL-AMT)	Read/reset operation without declaring cash in drawer. This error appears only when this function is activated.	Perform money declaration.
<b>E40</b> (PRNT-RCT)	Attempt made to finalize a transaction without issuing a guest receipt.	Issue a guest receipt.
<b>E50</b> (MEM-FULL)	Check tracking memory full	Finalize and close the check number currently used.
<b>E51</b> (OCCUPIED)	Attempt made to use the new check key to open a new check using a number that is already used for an existing check in check tracking memory.	Finalize and close the check that is currently under used or use a different check number.
<b>E53</b> (NOT-OPEN)	Attempt made to use the old check key to reopen a new check using a number that is not used for an existing check in check tracking memory.	Use the correct check number (if you want to reopen a check that already exists in the check tracking memory) or use the new check key to open a new check.

## When the register does not operate at all

Perform the following check whenever the cash register enters an error condition as soon as you switch it on. The results of this check are required by service personnel, so be sure to perform this check before you contact a CASIO representative for servicing.

## In case of power failure

If the power supply to the cash register is cut by a power failure or any other reason, simply wait for power to be restored. The details of any ongoing transaction as well as all sales data in memory are protected by the memory backup batteries.

- Power failure during a registration  
The subtotal for items registered up to the power failure is retained in memory. You will be able to continue with the registration when power is restored.
- Power failure during printing a read/reset report  
The data already printed before the power failure is retained in memory. You will be able to issue a report when power is restored.
- Power failure during printing of a receipt and the journal  
Printing will resume after power is restored. A line that was being printed when the power failure occurred is printed in full.
- Other  
The power failure symbol is printed and any item that was being printed when the power failure occurred is reprinted in full.

### Important!

Once receipt/journal printing or printing of a report starts, it can be stopped only by interruption of power to the cash register.

## When the L sign appears on the display

### About the low battery indicator...

The following shows the low battery indicator.

If this indicator appears when you switch the cash register on, it can mean one of three things:

- No memory backup batteries are loaded in the cash register.
- The power of the batteries loaded in the unit is below a certain level.
- The batteries loaded in the unit are dead.

To clear this sign, press  key.

### Important!

Whenever the low battery indicator appears on the display, load a set of three new batteries as soon as possible. If there is a power failure or you unplug the cash register when this indicator appears, you will lose all of your sales data and settings.

**BE SURE TO KEEP THE POWER CORD OF THE CASH REGISTER  
PLUGGED IN WHENEVER YOU REPLACE THE BATTERIES.**

## To replace journal paper

### Step 1

Set the mode switch to the REG position and remove the printer cover.

### Step 2

Press **FEED** to feed about 20 cm of paper.

### Step 6

Slide the printed journal from the take-up reel.

### Step 3

Cut the journal paper at the point where nothing is printed.

### Step 7

Open the platen arm.

### Step 4

Remove the journal take-up reel from its holder.

### Step 8

Remove the old paper roll from the cash register.

### Step 5

Remove the paper guide from the take-up reel.

### Step 9

Load new paper.

Go to the step 3 described on page 10 of this manual.

## To replace receipt paper

### Step 1

Set the mode switch to the REG position and remove the printer cover.

### Step 2

Open the platen arm.

### Step 3

Remove the old paper roll from the cash register.

### Step 4

Load new paper.

Go to the step 3 described on page 9 of this manual.

#### NOTE:

After completion of register programming, enter **6 2 0 0** and **SUB TOTAL** in the PGM 3 mode to backup the program data into the internal non-volatile memory.

(This operation takes about 10 seconds.)

## Options

### WT-83 wetproof cover

The optional wetproof cover protects the keyboard from moisture damage.

Consult your CASIO dealer for details.

# Specifications

## Input method

Entry: 10-key system; Buffer memory 8 keys (2-key roll over)  
 Department: Full key system

## Display

Amount 8 digits (Zero suppression) ; No. of repeats, Receipt On/Off  
 Character 8 digits; Item descriptor, Key descriptor, Mode

## Printer

Printer: Single sheet dot matrix thermal printer (Receipt or journal printing)  
 24 digits (Amount 10 digits/descriptor 8, 12 or 24 digits)  
 Journal: Automatic take up roll winding  
 Print speed: 14 lines/sec.  
 Feed speed: 14 lines/sec.  
 Paper roll: 58 mm × 80 mm Ø (Max.)  
 CASIO P-5880T

## Calculations

Entry 8 digits; Registration 7 digits; Total 8 digits

## Chronological data

Date print: Automatic date printout on receipt or journal  
 Automatic calendar  
 Time print: Automatic time printout on receipt or journal  
 Time display: 24-hour system

## Alarm

Entry confirmation signal; Error alarm

## Totalizers

Category	No. of Totalizers	Contents				Periodic Totalizer
		Amount (10 digits)	No. of items (4 digits)	Count (4 digits)	No. of customers (4 digits)	
Department	4 (8)	✓	✓*1			✓
PLU	1200	✓	✓*1			
Hourly sales	24	✓			✓	
Monthly	31	✓			✓	
Clerk	20	✓			✓	
Transaction	51	✓ or	✓ or	✓ or	✓	✓
Non resettable grand sales total	1	✓*2				
Reset counter	6			✓		✓
Consecutive No.	1			✓		

\*1: 4 digit integer + 2 digit decimal, \*2: 12 digits

## Memory protection batteries

The effective service life of the memory protection batteries (three new SUM-3 or UM-3 type batteries) is approximately one year from installation into the machine.

## Power supply/ Power consumption

As noted on the plate affixed to right side of register.

## Operating temperature

0°C ~ 40°C

## Humidity

10 ~ 90%

## Dimensions and Weight

291mm (H) × 410mm (W) × 474mm (D)/10.9kg ..... with medium size drawer

The CE marking below applies to the EU region. Declarer of conformity is as follows:

Casio Electronics Co., Ltd.  
 Unit 6, 1000 North Circular Road  
 London NW2 7JD, U.K.
