using this manual

Instructional Icons

Before you start, familiarize yourself with the icons that are used in this manual:

Warning: Situations that could cause injury to yourself or others.

Caution: Situations that could cause damage to your phone or to other equipment.

Note: Notes, usage tips, or additional information.

Refer to: Pages with related information. For example: ▶ p. 12 (represents “see page 12”).

Followed by: The order in which options or menus must be selected to perform a step. For example: Select **Messaging** → **New message** represents: select **Messaging** followed by **New message**.

[] **Square brackets:** Device keys. For example:
[] (represents the Lock key).

introducing your phone

When you subscribe to a cellular network, you are provided with a plug-in SIM card loaded with your subscription details, such as your PIN, available optional services, and many other features.

Install the SIM Card and Battery

Prior to use it is necessary to install both the battery and S M into their corresponding internal compartments. The microSD™ card slot is also located in this same internal area.

Install the SIM card:

1. Remove the battery cover by sliding the bottom section of the phone downward (1).

2. Lift the cover up (2) and away from the phone (3).

3. Carefully slide the SIM card into the SIM card socket (as shown) until the card locks into place. Make sure that the card's gold contacts face into the phone and that the

upper-left angled corner of the card is positioned as shown.

- If the card is not inserted correctly, the phone does not detect the SIM card. Re-orient the card back into the slot if the SIM is not detected.

Install the battery:

4. Insert the battery into the opening on the back of the phone, making sure the connectors align (1).
5. Gently press down to secure the battery (2).

6. Place the battery cover onto the back of the phone (1) and press down (2).

7. Press up on the bottom of the phone (3) until you hear a light click.

Charge the Battery

Before using the phone for the first time, you must charge the battery. You can charge the phone with the provided travel adapter or by connecting the phone to a PC using a PC data cable.

Only use Samsung-approved chargers and cables. Unauthorized chargers or cables can cause batteries to explode or damage your phone.

When your battery is low, the phone will emit a warning tone and display a low battery message. The battery icon  will also be empty and turn red. If the battery level becomes too low, the phone will automatically power off. Recharge the battery to continue using the phone.

Long backlight settings, searching for service, vibrate mode, browser use, and other variables may reduce the battery's talk and standby times.

To charge the battery using the travel adapter:

1. Open the cover to the multifunction jack on the top of the phone.
2. Plug the small end of the travel adapter into the multifunction jack.

Improperly connecting the travel adapter can damage the phone. Damage due to misuse is not covered by the warranty.

3. Plug the large end of the travel adapter into a power outlet.

- You can use the phone while it is charging, but it will take longer to fully charge the battery.
- While charging, the battery might heat up. This does not affect the phone's life span or performance.

4. When the battery is fully charged (the battery icon  is no longer moving), unplug the travel adapter from the power outlet and then from the phone.

Failure to unplug the travel adapter before you remove the battery can damage the phone.

5. Close the cover to the multifunction jack.

To charge the battery using the PC data cable:

1. Open the cover to the multifunction jack on the top of the phone.
2. Plug the micro USB end of the PC data cable into the multifunction jack.
3. Plug the USB end of the PC data cable into a USB port on a PC.

Depending on the type of PC data cable you are using, it might take some time before charging begins.

4. When the battery is fully charged (the battery icon  is no longer moving), unplug the PC data cable from the phone and then from the PC.

Insert a Memory Card (optional)

Your phone accepts a microSD™ or microSDHC™ memory card up to 32GB to expand available memory space. This secure digital card enables you to exchange images, music, and data between SD-compatible devices.

- Your phone only supports the FAT file structure for memory cards. If you insert a card formatted with a different file structure, your phone will prompt you to reformat the memory card.
- When you insert a memory card into your phone, it appears in My Files as a folder labelled sd.

Samsung uses approved memory standards for memory cards but some brands might not be fully compatible with your phone. Using an incompatible memory card might damage your phone or corrupt data stored on the card.

To insert a memory card:

1. Remove the back cover.
2. Insert a memory card with the gold-coloured contacts facing down.

3. Push the memory card into the memory card slot until it locks into place.
4. Replace the back cover.

To remove a memory card:

Before removing the memory card, unmount it for safe removal.

Do not remove the memory card while the phone is transferring information. This can damage the memory card or phone.

1. In Idle mode, select **Applications** → **Settings** → **SD card and phone storage**.
2. In the External SD card section, select **Unmount SD card**. Wait until the message "External SD card safe to remove" displays at the top of the screen.
3. Remove the back cover.
4. Push the memory card gently until it disengages from the phone.
5. Pull the memory card out of the memory card slot.
6. Replace the back cover.

To format a memory card:

Formatting your memory card on a PC might cause incompatibilities with your phone. Only format the memory card on the phone.

Memory card must be unmounted before it can be formatted (see above).

- In Idle mode, select **Applications** → **Settings** → **SD card and phone storage** → **Format SD card** → **Format SD card** → **Erase everything**.

Formatting a memory card erases all data stored on the card. Remember to make backup copies of all important data stored on the card before formatting. The manufacturer's warranty does not cover the loss of data resulting from user actions.

Phone Layout

This section outlines some key features of your phone and describes the screen and the icons that appear when the phone is in use. It also shows how to navigate through the phone.

Front of phone

getting started with your phone

Turn Your Phone On and Off

To turn your phone on, press and hold the lock key []. Your phone will automatically connect to the network. When you turn on your phone for the first time, tap the Android image on the screen and follow the on-screen instructions to set up your phone for its first use.

You might be charged for data connection because the connection to the Google web server is always active by default.

To turn your phone off:

1. Press and hold [].
2. Select **Power off**.

- Follow all posted warnings and directions when in areas where the use of wireless devices is restricted, such as airplanes and hospitals.

- To only use your phone's non-network services, switch to Flight mode. Press and hold [] and select **Flight mode**.

Use the Touch Screen

Your phone's touch screen lets you easily select items or perform functions.

- To avoid scratching the touch screen, do not use sharp tools.
- Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause it to malfunction.
- Do not allow the touch screen to come into contact with water. The touch screen may malfunction in very humid conditions or when exposed to water.

- For optimal use of the touch screen, remove the screen protection film before using your phone.
- Your touch screen has a layer that detects small electrical charges emitted by the human body. For best performance, tap the touch screen with your fingertip.

To control the touch screen:

- **Tap:** Tap once with your finger to select or launch a menu, option, or application.
- **Tap and hold:** Tap an item and hold it for more than two seconds to open a pop-up option list.
- **Scroll:** Tap and drag your finger up, down, left, or right to move to items on the list.
- **Drag and drop:** Tap and hold your finger on an item and then drag your finger to move the item.

- **Double-tap:** Tap twice quickly with your finger to zoom in or out while viewing photos or web pages.

- Your phone turns off the touch screen when you do not use the phone for a specified amount of time. To turn on the touch screen, press [].
- You can also adjust the backlight time. In Idle mode, select **Applications** → **Settings** → **Sound and display** → **Screen timeout**.

To lock or unlock the touch screen and keys:

You can lock the touch screen and keys to prevent any unwanted phone operations.

- To lock, press [].
- To unlock, turn on the touch screen by pressing [, and then swipe the screen with your finger.

Get to Know the Idle Screen

When your phone turns on or is in Idle mode, the Idle screen is displayed. From this screen, you can access various features and status information.

The Idle screen has seven panels. Scroll left or right to a panel on the Idle screen. You can also select a dot on the top of the screen to move to the corresponding panel of the Idle screen.

Add items to the Idle screen:

You can customize the Idle screen by adding shortcuts to applications or items in applications, widgets, or folders.

To add items to the Idle screen:

- **Bluetooth:** Activate or deactivate the Bluetooth wireless connection feature. ► p. 74
- **GPS:** Activate or deactivate GPS mode.
- **Vibration:** Activate or deactivate Vibration mode.

Add or remove panels from the Idle screen

You can add or remove panels from the Idle screen to organise widgets according to your preferences and needs.

1. In Idle mode, press [Edit.
2. Select  to remove a panel or  to add new panels.
3. Press [Save.

Access Applications

To access your phone's applications:

1. In Idle mode, select **Applications** to access the application list.
2. Scroll left or right to display the application screens. You can also select a dot at the top of the screen to move to the corresponding main menu screen.
3. Select an application.

- In order to use applications provided by Google™, you must have a Google account. If you do not have a Google account, you will need to create one.
- You can add a shortcut to an application by tapping and holding an application icon in the application list. You can then move the icon on the Idle screen as needed.

4. Press [] to return to the previous screen or press [] to return to the Idle screen.

Your phone has a built-in motion sensor that detects its orientation. While using some features, if you rotate the phone the interface automatically switches to landscape view. To set the interface to retain the portrait orientation when the phone is rotated, select **Settings** → **Sound and display** → **Orientation**.

Customize Your Phone

Get more from your phone by customizing it to suit your needs.

To set the current date and time:

1. In Idle mode, select **Applications** → **Settings** → **Date and time**.

2. Set the date and time and change other options as needed.

To turn the touch tone on or off:

- In Idle mode, select **Applications** → **Settings** → **Sound and display** → **Audible selection**.

To adjust the volume of the ringtones:

- In the Idle mode, press the Volume key up or down to adjust the ringtone volume.

To activate animation for switching windows:

- In Idle mode, select **Applications** → **Settings** → **Sound and display** → **Animation** → **Some animations** or **All animations**.

To select wallpaper for the Idle screen:

1. In the Idle mode, press [Wallpaper and select an option.
2. Select an image.
3. Select **Save** or **Set wallpaper**.

Samsung is not responsible for any use of default images or wallpapers provided on your phone.

To adjust the brightness of the display:

You can quickly adjust the brightness of the display.

1. In Idle mode, select **Applications** → **Settings** → **Sound and display** → **Brightness**.
2. Clear the checkbox next to **Automatic brightness adjustment**.
3. Drag the slider left or right to adjust the level of brightness.
4. Select **OK**.

The brightness level of the display will affect how quickly the phone uses battery power.

To set an unlock pattern:

You can set an unlock pattern to prevent unauthorized people from using your phone without your permission.

1. In Idle mode, select **Applications** → **Settings** → **Location and security** → **Set unlock pattern**.
2. Follow the on-screen instructions and example patterns and select **Next** (if needed).
3. Draw a pattern by dragging your finger to connect at least 4 dots.
4. Select **Continue**.
5. Draw the pattern again to confirm.
6. Select **Confirm**.

- When you have set an unlock pattern, you have to use the pattern each time you turn on the phone. If you do not want the phone to require a pattern, clear the checkbox next to **Require pattern** in **Location and security**.
- If you forget the unlock pattern, take your phone to a Samsung Service Centre to be unlocked.
- Samsung is not responsible for the loss of passwords or private information or other damages caused by third-party software.

To lock your SIM card:

You can lock your phone by activating the PIN supplied with your SIM card.

1. In Idle mode, select **Applications** → **Settings** → **Location and security** → **Set up SIM card lock** → **Lock SIM card**.
2. Enter your PIN and select **OK**.

Once the PIN lock is enabled, you must enter the PIN each time you turn on the phone.

- If you enter an incorrect PIN too many times, your SIM card will be blocked. You must enter a PIN unlock key (PUK) to unblock the SIM card.
- If you block your SIM card by entering an incorrect PUK, bring the card to your service provider to be unblocked.

Enter Text

You can enter text by selecting characters on the virtual keypad or by inputting handwriting on the touch screen. You can enter text and create messages or contacts.

You cannot enter text in some languages. To enter text, change the writing language to one of the supported languages. ► p. 100

These steps may be different depending on your network.

Accessing Your Voice Mail

1. From the Home screen, tap  then touch and hold .
2. When connected, follow the voice prompts from the voice mail center.

Accessing Your Voice Mail From Another Phone

1. Dial your wireless phone number.
2. When you hear your voicemail greeting, press the # key on the phone you are using.
3. Enter your passcode.

Android Market

Android Market provides you with an easy way to shop for games and mobile applications. Based on the Android platform, your phone's functionality can be extended by installing additional applications.

- This feature might not be available in your region.
- Your phone saves downloaded files to the internal moviNAND™ memory. To save the files on a memory card, connect your phone to a PC and copy the files to the memory card.

To install applications:

1. In Idle mode, select **Applications** → **Market**.
2. Select **Accept** in the terms and conditions page.
3. Select an item category and then select an item.
4. Select **Install** (for free items) or **Buy**.
 - If you select **Install**, select **OK** to download the item immediately.
 - If you select **Buy**, you need to enter your credit card information. Follow the on-screen instructions.

To uninstall applications:

1. In the Android Market home screen, press [] → **Downloads**.
2. Select the item that you want to delete.
3. Select **Uninstall** → **OK**.

Download Files from the Web

When you download files or web applications from the web, your phone stores them on a memory card.

Files that you download from the web can include viruses that will damage your phone. To lessen your risk, only download from sources that you trust.

Some media files include Digital Rights Management to protect copyrights. This protection might prevent you from downloading, copying, modifying, or transferring some files.

To download files from the web:

1. In Idle mode, select **Browser**.
 2. Search for a file or application and download it.
- To install applications downloaded from websites other than Android Market, you must select the check box at

Applications → **Settings** → **Applications** → **Unknown sources**.

To view the download history:

1. In Idle mode, select **Browser**.
2. Press [] → **More** → **Downloads**.
3. To clear the download history list, press [] → **Clear list**.

To cancel downloading, press [] → **Cancel all downloads**.

Synchronize Data

You can synchronize data stored in Google Mail™, Calendar and Contacts with the Google web server and back up or restore your data.

When the synchronization is complete, your phone stays connected to the web. If any change is made on your phone

or on the web, the information is updated in the other location automatically. .

- This feature might not be available in your region.
- To synchronize with the Google web server, you must have a Google account. If you do not have a Google account, sign up for a Google account by selecting **Create** on the first setup screen.

To set up a server account:

1. In Idle mode, select **Applications** → **Settings** → **Accounts and sync**.
2. Select **Add account** and select an account type.
3. Follow the on-screen instructions to complete the account setup.

For online community services such as Facebook or MySpace, enter your user name and password and select **Log in**.

To activate automatic sync:

1. In Idle mode, select **Applications** → **Settings** → **Accounts and sync**.
2. Select **Auto-sync**.
3. Select the account that you want to sync information with.
4. Select the applications that you want to synchronize.

For each application that is synchronized, if you add or edit data on your phone or on the web, the updated information appears in the other location automatically.

To exclude applications from automatic synchronization, clear the checkbox next to the application that you do not want to synchronize.

To synchronize data manually:

1. In Idle mode, select **Applications** → **Settings** → **Accounts and sync**.
2. Select an account.

3. Press [] → **Sync now**. Your phone will synchronize the data you have selected for synchronization.

You can use your phone to make and answer calls, use options during calls, and customize and use call-related features.

Make and answer calls

To make a call:

1. In Idle mode, select **Phone**.
2. Enter an area code and phone number.
3. Select  to make the call.
4. To end the call, select **End call**.

When you hold the phone close to your ear during a call, it automatically locks the touch screen to prevent accidental inputs.

- Use the contact list to save the numbers that you dial frequently. ► p. 60
- To quickly access the call log to redial numbers that you have dialed recently, select **Phone** → **Call log**.
- Use the voice command feature to dial by voice.

To answer a call:

1. When a call comes in, slide the **Accept** icon to the right.

When the phone is ringing, press the Volume key to mute the ringtone.

2. To end the call, select **End call**.

To reject a call:

When a call comes in, slide the **Reject** icon to the left. The caller will hear a busy tone.

To send a message when you reject incoming calls, slide the **Reject call with msg** icon.

First set a text message that will be sent to callers. In Idle mode, select **Applications** → **Settings** → **Call settings** → **All calls** → **Reject call with message**. Select an existing message and edit as required, or select **Create** and create a new text message.

To call an international number:

1. In Idle mode, select **Phone** → **Keypad**, and tap and hold **0** to insert the **+** character.
2. Enter the complete number that you want to dial (country code, area code and phone number), and then select  to dial the number.

To call a contact from Contacts:

1. In Idle mode, select **Phone** → **Contacts**.
2. Select a contact's name.

3. Select the number that you want to dial.

To use the headset:

By plugging the supplied headset into the phone, you can make and answer calls:

connectivity

Bluetooth

Bluetooth is a short-range wireless communications technology capable of exchanging information over a distance of about 10 metres without requiring a physical connection.

You do not need to line up the phones to beam information with Bluetooth. If the phones are within range of one another, you can exchange information between them even if they are located in different rooms.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received using the Bluetooth wireless feature. Always ensure that you share and receive data with phones that are trusted and properly secured.
- If there are obstacles between the phones, the operating distance may be reduced.

- Some phones may not be compatible with your phone, especially those that are not tested or approved by Bluetooth SIG.

To turn on the Bluetooth wireless feature:

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Bluetooth settings**. The preset homepage opens.
2. Select **Bluetooth** to turn on the Bluetooth wireless feature. A green check mark appears at the right side to indicate that it is turned on.

To find and pair with other Bluetooth-enabled phones:

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Bluetooth settings** → **Scan devices**.
2. Select a device.

3. Enter a PIN for the Bluetooth wireless feature or the other phone's Bluetooth PIN, if it has one, and select **OK**. Alternatively, select **Accept** to match the PIN between your phone and the phone.

When the owner of the other phone enters the same PIN or accepts the connection, pairing is complete. If the pairing is successful, the phone will automatically search for available services.

Some phones, especially headsets and hands-free car kits, have a fixed Bluetooth PIN, such as 0000. If the other phone has a fixed PIN, you must enter it.

To send data using the Bluetooth wireless feature:

1. Select a file or item, such as a contact, calendar event, memo, or media file, from an appropriate application or from **My Files**.
2. Press [] → **Share**, **Send via**, or **Send namecard via** → **Bluetooth**.

3. Search for and pair with a Bluetooth-enabled phone.

To receive data using the Bluetooth wireless feature:

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Bluetooth settings** → **Visible**.
Your phone is visible to other Bluetooth phones for 120 seconds.
2. When prompted, enter the PIN for the Bluetooth wireless feature and select **OK** (if necessary).
3. If necessary, select **Accept** to confirm that you are willing to receive data from the other phone.

Received data is saved to the appropriate application or to a folder according to its type. For example, a music or sound clip is saved to the sound folder and a contact to the phonebook.

Wi-Fi

You can use your phone's wireless networking capabilities to activate and connect to any wireless local area network (WLAN) compatible with the IEEE 802.11 b/g/n standards. You can connect to the internet or other network phones anywhere an access point or wireless hotspot is available.

Your phone uses non-harmonized frequency and therefore some countries might restrict the use of a WLAN.

To activate the WLAN feature:

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Wi-Fi settings**.
2. Select **Wi-Fi** to turn on the wireless networking feature. A green check mark appears at the right side to indicate that it is turned on.

An active WLAN running in the background will consume battery power. To preserve battery power, only activate the WLAN when needed.

To find and connect to a WLAN:

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Wi-Fi settings**. The phone will automatically search for available WLANs.
2. Select a network under **Wi-Fi networks**.
3. Enter a password for the network (if necessary).
4. Select **Connect**.

To add a WLAN manually:

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Wi-Fi settings** → **Add Wi-Fi network**.

2. Enter the SSID for the network and select the security type.
3. Set the security settings depending on the selected security type.
4. Select **Save**.

To connect to a WLAN using a Wi-Fi Protected Setup (WPS):

Using WPS, you can connect to a secured network.

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Wi-Fi settings**.
2. Select **WPS button connection**.
3. Press a WPS button on the access point within 2 minutes.

To connect to a WLAN with a WPS PIN:

1. In Idle mode, select **Applications** → **Settings** → **Wireless and network** → **Wi-Fi settings**.

2. Select a network indicated by the WPS icon and select **WPS PIN**.
3. On the access point, enter the PIN and press the start button.

AllShare

You can use the Digital Living Network Alliance (DLNA) service to share media files between DLNA-enabled phones over a WLAN.

You must first activate the WLAN feature and add a WLAN profile. ► p. 76

To customize DLNA settings for sharing media files:

To allow other DLNA-enabled phones to access media files on your phone, you must activate media sharing.

Some files may not play on the DLNA-enabled phones, depending on the phones.

1. In Idle mode, select **Applications** → **AllShare**.
2. Select **Settings**.
3. Adjust the following settings to customize the DLNA feature:

Option	Function
Media server name	Enter a name for your phone as a media server.
Share media	Turn on video sharing, image sharing or music sharing with other DLNA-enabled phones.
Access point network	Select a connection profile to use for DLNA connections.
Upload from other devices	Set whether or not to accept upload from other devices.
Default memory	Select the default memory location for saving downloaded media files.

To play your files on another DLNA-enabled phone:

1. In Idle mode, select **Applications** → **AllShare**.
2. Select **Play file from my phone on another player**.
3. Select a media category and then select a file.
4. Select **Add to playlist**.
5. Select a player to play the media file.
Playback begins on the selected player.
6. Control playback using the icons on your phone.

Playback might be buffered, depending on the network connection and the connected server.

To play others' files on your phone:

1. In Idle mode, select **Applications** → **AllShare**.
2. Select **Play file from server on my phone**.

Your phone automatically searches for DLNA-enabled phones.

3. Select a phone as the media server (the one that contains media files).
4. Select a media category and a file.
5. Control playback using the icons on your phone.

To play files from one phone on the other phone:

1. In Idle mode, select **Applications** → **AllShare**.
2. Select **Play file from server on another player via my phone**.

Your phone automatically searches for DLNA-enabled phones.

3. Select a phone to be the media server (the one that contains the media files).
4. Select a media category and a file.
5. Select a player (the one that will play the media file).

Playback begins at the selected player.

- Control playback using the icons on your phone.

TV Connections (TV Out Mode)

You can connect your phone to a TV and view the phone's interface on the TV screen.

- In Idle mode, select **Applications** → **Settings** → **Sound and display** → **TV out**.
- Select **TV out** to activate TV out mode.
- Select **TV system**.

- Select a video encoding system according to your region.

Option	Function
PAL	Australia, Austria, Belgium, China, Denmark, England, Finland, Germany, Italy, Kuwait, Malaysia, Netherlands, New Zealand, Norway, Singapore, Spain, Sweden, Switzerland, Thailand
NTSC	Canada, Japan, Korea, Mexico, Taiwan, USA

- Ensure that the TV is on and connect your phone to the TV with a TV out cable.
Match the colours at the ends of the TV out cable with those on the TV's A/V ports.
- Switch the TV to External input mode.

The phone interface appears on the TV screen.

- Your files might not display correctly due to differences in video systems or quality or the TV display.
- The Bluetooth stereo headset and zoom features will not work in TV out mode.

PC Connections

You can connect your phone to a PC in various USB connection modes: you can synchronize files with Windows Media Player, transfer data to and from your phone directly, or use the Samsung Kies program.

To connect with Samsung Kies:

Ensure that Samsung Kies is installed on your PC. You can download the program from the Samsung website (www.samsungmobile.com).

1. In Idle mode, select **Applications** → **Settings** → **Applications** → **USB settings** → **Kies (Firmware update)**.
2. Press [] to return to Idle mode.
3. Using an optional PC data cable, connect the multifunction jack on your phone to a PC.
4. Run Samsung Kies and use wireless connections or copy data and files.
Refer to the Samsung Kies help for more information.

To synchronize with Windows Media Player:

Ensure that Windows Media Player is installed on your PC.

1. In Idle mode, select **Applications** → **Settings** → **Applications** → **USB settings** → **Media player**.
2. Press [] to return to Idle mode.

3. Using an optional PC data cable, connect the multifunction jack on your phone to a PC on which Windows Media Player is installed.
When connected, a pop-up window will appear on the PC.
4. Open Windows Media Player to synchronize the music files.
5. Edit or enter your phone's name in the pop-up window (if necessary).
6. Select and drag music files to the sync list.
7. Start synchronization.

To connect as a mass storage phone:

You can connect your phone to a PC as a removable disk and access its file directory. If you insert a memory card into the phone, you can also access the file directory of the memory card by using the phone as a memory card reader.

The file directory of the memory card will appear as a removable disk, separate from the internal memory.

1. If you want to transfer files to or from a memory card, insert a memory card into the phone.
2. In Idle mode, select **Applications** → **Settings** → **Applications** → **USB settings** → **Mass storage**.
3. Using an optional PC data cable, connect the multifunction jack on your phone to a PC.
When connected, a pop-up window will appear on the PC.
4. Open the folder to view the files.

5. Copy files from the PC to the memory card.

To disconnect the phone from the PC, click the USB phone icon in the Windows task bar and select the option to safely remove the mass storage phone. Then disconnect the PC data cable from the PC. Otherwise, you might lose data stored on the memory card or damage the memory card.

troubleshooting

If you are having trouble with your mobile phone, try these troubleshooting procedures before contacting a service professional.

When you turn on your phone or while you are using the phone, it prompts you to enter one of the following codes:

Code	Try this to solve the problem:
Password	When the phone's lock feature is enabled, you must enter the password that you set for the phone.
P N	When using the phone for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the S M card. You can disable this feature using the Lock SIM card menu.

Code	Try this to solve the problem:
PUK	Your SIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.
PIN2	When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM card. For details, contact your service provider.

Your phone displays “Service unavailable” or “Network error”

- When you are in areas with weak signals or poor reception, you might lose reception. Move to another area and try again.
- You cannot access some options without a subscription. Contact your service provider for more details.

The touch screen responds slowly or improperly

If the touch screen is not responding properly, try the following:

- Remove any protective covers from the touch screen. Protective covers might prevent the phone from recognising your inputs and are not recommended for touch screen phones.
- Ensure that your hands are clean and dry when tapping the touch screen.

- Restart your phone to clear any temporary software bugs.
- Ensure that your phone's software is upgraded to the latest version.
- If the touch screen is scratched or damaged, take it to your local Samsung Service Centre.

Your phone freezes or has fatal errors

If your phone freezes or hangs, you might need to close programs or reset the phone to regain functionality. If your phone is frozen and unresponsive, press and hold [ⓘ] for 8-10 seconds. The phone will reboot automatically.

If this does not solve the problem, perform a factory data reset. In Idle mode, select **Applications** → **Settings** → **Privacy** → **Factory data reset** → **Reset phone** → **Erase everything**.

Calls are being dropped

When you are in areas with weak signals or poor reception, you might lose your connection to the network. Move to another area and try again.

Outgoing calls are not connected

- Ensure that you have pressed the Dial key.
- Ensure that you have accessed the correct cellular network.
- Ensure that you have not set call barring for the phone number you are dialling.

Incoming calls are not connected

- Ensure that your phone is turned on.
- Ensure that you have accessed the correct cellular network.
- Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using a headset, ensure that it is properly connected.

Audio quality is poor

- Ensure that you are not blocking the phone's internal antenna.
- When you are in areas with weak signals or poor reception, you might lose reception. Move to another area and try again.

When dialling from contacts, the call is not connected

- Ensure that the correct number is stored in the contact list.
- Re-enter and save the number, if necessary.
- Ensure that you have not set call barring for the contact's phone number.

The phone beeps and the battery icon flashes

- Your battery is low. Recharge or replace the battery to continue using the phone.

The battery does not charge properly or the phone turns off

- The battery terminals might be dirty. Wipe both gold-coloured contacts with a clean, soft cloth and try charging the battery again.
- If the battery will no longer charge completely, dispose of the old battery properly and replace it with a new battery (refer to your local bylaws for proper disposal instructions).

Your phone is hot to the touch

When you use applications that require more power or use applications on your phone for an extended period of time, your phone may feel hot to the touch. This is normal and should not affect your phone's lifespan or performance.

Error messages appear when launching the camera

Your Samsung phone must have sufficient available memory and battery power to operate the camera application. If you receive error messages when launching the camera, try the following:

- Charge the battery or replace it with a battery that is fully charged.
- Free some memory by transferring files to a PC or deleting files from your phone.
- Restart the phone. If you are still having trouble with the camera application after trying these tips, contact a Samsung Service Centre.

Error messages appear when opening music files

Some music files might not play on your Samsung phone for a variety of reasons. If you receive error messages when opening music files on your phone, try the following:

- Free some memory by transferring files to a PC or deleting files from your phone.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM protected, ensure that you have the appropriate license or key to play the file.
- Ensure that your phone supports the file type.

Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your phone.
- Ensure that the Bluetooth wireless feature is activated on the device that you wish to connect to, if necessary.
- Ensure that your phone and the other Bluetooth device are within the maximum Bluetooth range (10 metres).
- If the tips above do not solve the problem, contact a Samsung Service Centre.

A connection is not established when you connect the phone to a PC

- Ensure that the PC data cable you are using is compatible with your phone.
- Ensure that you have the proper drivers installed and updated on your PC.

health and safety information

Comply with the following precautions to avoid dangerous or illegal situations and to ensure peak performance of your mobile phone.

Getting the Most Out of Your Reception

Keeping Tabs on Signal Strength

The quality of each call you make or receive depends on the signal strength in your area. Your phone informs you of the current signal strength by displaying a number of bars next to the signal strength icon. The more bars displayed, the stronger the signal. If you're inside a building, being near a window may give you better reception.

Understanding How Your Phone Operates

Your phone is basically a radio transmitter and receiver. When it's turned on, it receives and transmits radio frequency (RF) signals. When you use your phone, the system handling your call controls the power level. This power can range from 0.006 watts to 0.2 watts in digital mode.

Knowing Radio Frequency Safety

The design of your phone complies with updated NCRP standards described below. In 1991-92, the Institute of Electrical and Electronics Engineers (IEEE) and the American National Standards Institute (ANSI) joined in updating ANSI's 1982 standard for safety levels with respect to human exposure to RF signals. More than 120 scientists, engineers and physicians from universities, government health agencies and industries developed this updated standard after reviewing the available body of research. In 1993, the Federal Communications Commission (FCC) adopted this updated standard in a regulation. In August 1996, the FCC adopted hybrid standard consisting of the existing ANSI/IEEE standard and the guidelines published by the National Council of Radiation Protection and Measurements (NCRP).

Maintaining Your Phone's Peak Performance

There are several simple guidelines for operating your phone properly and maintaining safe, satisfactory service.

- Speak directly into the mouthpiece.
- Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, immediately turn the power off and remove the battery. If it's inoperable, return it to a dealer store or call Customer Support for service.

For the best care of your phone, only authorized personnel should service your phone and accessories. Faulty service may void the warranty.

Safe Use of and Access to Your Phone

Failure to follow the instructions outlined may lead to serious personal injury and possible property damage.

Excessive exposure to sound at high volumes can cause hearing damage. Always turn the volume down before plugging the headphones into an audio source and use only the minimum volume setting necessary to hear your conversation or music.

Using Your Phone While Driving

Talking on your phone while driving (or operating the phone without a hands-free phone) is prohibited in some jurisdictions. Laws vary as to specific restrictions. Remember that safety always comes first.

When using your phone in the car:

- Get to know your phone and its features, such as speed dial and re-dial.

- When available, use a hands-free phone.
- Position your phone within easy reach.
- Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions.
- Do not take notes or look up phone numbers while driving.
- Dial sensibly and assess the traffic; if possible, place calls when stationary or before pulling into traffic.
- Do not engage in stressful or emotional conversations that may divert your attention from the road.
- Dial 911 to report serious emergencies. It's free from your wireless phone.
- Use your phone to help others in emergencies.
- Call roadside assistance or a special non-emergency wireless number when necessary.

Following Safety Guidelines

To operate your phone safely and efficiently, always follow any special regulations in a given area. Turn your phone off in areas where use is forbidden or when it may cause interference or danger.

Using Your Phone Near Other Electronic Devices

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, RF signals from wireless phones may affect inadequately shielded electronic equipment.

RF signals may affect improperly installed or inadequately shielded electronic operating systems and/or entertainment systems in motor vehicles. Check with the manufacturer or their representative to determine if these systems are adequately shielded from external RF signals. Also check

with the manufacturer regarding any equipment that has been added to your vehicle.

Consult the manufacturer of any personal medical phones, such as pacemakers and hearing aids, to determine if they are adequately shielded from external RF signals.

Always turn off the phone in health care facilities and request permission before using the phone near medical equipment.

Turning Off Your Phone Before Flying

Turn off your phone before boarding any aircraft. To prevent possible interference with aircraft systems, the U.S. Federal Aviation Administration (FAA) regulations require you to have permission from a crew member to use your phone while the plane is on the ground. To prevent any risk of interference, FCC regulations prohibit using your phone while the plane is in the air.

Turning Off Your Phone in Dangerous Areas

To avoid interfering with blasting operations, turn off your phone when in a blasting area or in other areas with signs indicating that two-way radios should be turned off. Construction crews often use remote-control RF phones to set off explosives.

Turn off your phone when you are in an area with a potentially explosive atmosphere. Although it is rare, your phone or its accessories could generate sparks. Sparks could cause an explosion or a fire resulting in bodily injury or even death. These areas are often, but not always, clearly marked. These areas include:

- Fueling areas such as gas stations.
- Below deck on boats.
- Fuel or chemical transfer or storage facilities.
- Areas where the air contains chemicals or particles such as grain, dust or metal powders.

- Any other area where you would normally be advised to turn off your vehicle's engine.

Never transport or store flammable gas, liquid or explosives in the compartment of your vehicle that contains your phone or accessories.

Turning Off Your Phone During Thunderstorms

Do not use your phone during a thunderstorm. Your phone may malfunction and your risk of electric shock is increased.

Restricting Children's Access to your Phone

Your phone is not a toy. Children should not be allowed to play with it because they could hurt themselves and others, damage the phone, dial 911 by mistake or make calls that increase your phone bill.

Warning Regarding Display

The display on your handset is made of glass or acrylic and could break if your handset is dropped or if it receives significant impact. Do not use if screen is broken or cracked as this could cause injury to you.

UL Certified Travel Adapter

The Travel Adapter for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines.

FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE. IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS. DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS. FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN

ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET. THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTATED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.

Caring for the Battery

Protecting Your Battery

The guidelines listed below help you get the most out of your battery's performance.

- Use only Samsung approved batteries and desktop chargers. These chargers are designed to maximize battery life. Using other batteries or chargers voids your warranty and may cause damage.
- In order to avoid damage, charge the battery only in temperatures that range from 32° F to 113° F (0° C to 45° C).

- Don't use the battery charger in direct sunlight or in high humidity areas, such as the bathroom.
- Never dispose of the battery by incineration.
- Keep the metal contacts on top of the battery clean.
- Don't attempt to disassemble or short-circuit the battery.
- The battery may need recharging if it has not been used for a long period of time.
- It's best to replace the battery when it no longer provides acceptable performance. When used correctly, the battery can be recharged hundreds of times before it needs replacing.
- Don't store the battery in high temperature areas for long periods of time. It's best to follow these storage rules:

Less than one month:

-4° F to 140° F (-20° C to 60° C)

More than one month:

-4° F to 113° F (-20° C to 45° C)

Disposal of Lithium Ion (Li-ion) Batteries

For safe disposal options of your Lilon batteries, contact your nearest service center.

Be sure to dispose of your battery properly. In some areas, the disposal of batteries in household or business trash may be prohibited.

For safety, do not handle a damaged or leaking Lilon battery.

Special Precautions and Industry Canada Notice

Cautions

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment, and void your authority to operate this

equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and void the phone warranty if said accessories cause damage or a defect to the phone.

Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending or sitting on it.

Information to User

This equipment has been tested and found to comply with the limits of a Class B digital phone, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful

interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient / relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rates (SAR)

The SAR is a value that corresponds to the relative amount of RF energy absorbed in the head of a user of a wireless handset.

The SAR value of a phone is the result of an extensive testing, measuring and calculation process. It does not

represent how much RF the phone emits. All phone models are tested at their highest value in strict laboratory settings. But when in operation, the SAR of a phone can be substantially less than the level reported to the FCC. This is because of a variety of factors including its proximity to a base station antenna, phone design and other factors. What is important to remember is that each phone meets strict federal guidelines. Variations in SARs do not represent a variation in safety.

All phones must meet the federal standard, which incorporates a substantial margin of safety. As stated above, variations in SAR values between different model phones do not mean variations in safety. SAR values at or below the federal standard of 1.6 W/kg are considered safe for use by the public.

The highest reported SAR values of the 896 are:

GSM850: Head: 0.38 W/Kg; Body-worn: 0.70 W/Kg

GSM1900: Head: 0.23 W/Kg; Body-worn: 0.49 W/Kg

UMTS V: Head: 0.38 W/Kg; Body-worn: 0.36 W/Kg

UMTS II: Head: 0.42 W/Kg; Body-worn: 0.44 W/Kg

2.4 GHz WLAN: Head: 0.36 W/Kg; Body-worn: 0.08 W/Kg

warranty information

Standard Limited Warranty

What is Covered and For How Long?

SAMSUNG Electronics Canada Inc. ("SAMSUNG") warrants to the original purchaser ("Purchaser") that SAMSUNG's phones and accessories ("Products") are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase and continuing for the following specified period of time after that date:

Phone	1 Year
Batteries	1 Year
Leather Case	90 Days
Holster	90 Days
Other Phone Accessories	1 Year

What is Not Covered? This Limited Warranty is conditioned upon proper use of Product by Purchaser. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abuse, neglect, unusual physical, electrical or electromechanical stress, or modification of any part of Product, including antenna, or cosmetic damage; (b) equipment that has the serial number removed or made illegible; (c) any plastic surfaces or other externally exposed parts that are scratched or damaged due to normal use; (d) malfunctions resulting from the use of Product in conjunction with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (e) defects or damage from improper testing, operation, maintenance, installation, or adjustment; (f) installation, maintenance, and service of Product; or (g) Product used or purchased outside Canada.

This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if: (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery; (ii) any of the seals on the battery are broken or show evidence of tampering; or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

What are SAMSUNG's Obligations? During the applicable warranty period, SAMSUNG will repair or replace, at SAMSUNG's sole option, without charge to Purchaser, any defective component part of Product. To obtain service under this Limited Warranty, Purchaser must return Product to an authorized phone service facility in an adequate container for shipping, accompanied by Purchaser's sales receipt or comparable substitute proof of sale showing the date of purchase, the serial number of Product and the sellers' name and address. To obtain assistance on where to

deliver the Product, call Samsung Customer Care at 1-800-Samsung. Upon receipt, SAMSUNG will promptly repair or replace the defective Product. SAMSUNG may, at SAMSUNG's sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product or replace Product with a rebuilt, reconditioned or new Product.

Repaired/replaced leather cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Product will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for 90 days, whichever is longer. All replaced parts, components, boards and equipment shall become the property of SAMSUNG. If SAMSUNG determines that any Product is not covered by this Limited Warranty, Purchaser must pay all parts, shipping, and labor charges for the repair or return of such Product.

What Are the Limits On SAMSUNG's Liability? EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED HEREIN, PURCHASER TAKES THE

PRODUCT "AS IS," AND SAMSUNG MAKES NO WARRANTY OR REPRESENTATION AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO:

- THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS FOR ANY PARTICULAR PURPOSE OR USE;
- WARRANTIES OF TITLE OR NON-INFRINGEMENT;
- DESIGN, CONDITION, QUALITY, OR PERFORMANCE OF THE PRODUCT;
- THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR
- COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO.

NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. ALL IMPLIED WARRANTIES AND CONDITIONS THAT MAY ARISE BY OPERATION OF LAW, INCLUDING IF APPLICABLE THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED TO THE SAME DURATION OF TIME AS THE EXPRESS WRITTEN WARRANTY STATED HEREIN. SOME JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE PURCHASE, USE, OR MISUSE OF, OR INABILITY TO USE THE PRODUCT OR ARISING DIRECTLY OR INDIRECTLY FROM THE USE OR LOSS OF USE OF THE PRODUCT OR FROM THE BREACH OF THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL,

CONSEQUENTIAL OR SIMILAR DAMAGES, OR LOSS OF ANTICIPATED PROFITS OR BENEFITS, OR FOR DAMAGES ARISING FROM ANY TORT (INCLUDING NEGLIGENCE OR GROSS NEGLIGENCE) OR FAULT COMMITTED BY SAMSUNG, ITS AGENTS OR EMPLOYEES, OR FOR ANY BREACH OF CONTRACT OR FOR ANY CLAIM BROUGHT AGAINST PURCHASER BY ANY OTHER PARTY. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM PROVINCE TO PROVINCE. THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THIS PRODUCT AND SHALL BE PURCHASER'S EXCLUSIVE REMEDY. IF ANY PORTION OF THIS LIMITED

WARRANTY IS HELD ILLEGAL OR UNENFORCEABLE BY REASON OF ANY LAW, SUCH PARTIAL ILLEGALITY OR UNENFORCEABILITY SHALL NOT AFFECT THE ENFORCEABILITY FOR THE REMAINDER OF THIS LIMITED WARRANTY WHICH PURCHASER ACKNOWLEDGES IS AND WILL ALWAYS BE CONSTRUED TO BE LIMITED BY ITS TERMS OR AS LIMITED AS THE LAW PERMITS.

THE PARTIES UNDERSTAND THAT THE PURCHASER MAY USE THIRD-PARTY SOFTWARE OR EQUIPMENT IN CONJUNCTION WITH THE PRODUCT. SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRD-PARTY SOFTWARE OR EQUIPMENT, WHETHER SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR

OTHERWISE, INCLUDING THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT. THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT LIE SOLELY WITH THE PURCHASER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT, AS THE CASE MAY BE.

This Limited Warranty allocates risk of Product failure between Purchaser and SAMSUNG, and SAMSUNG's Product pricing reflects this allocation of risk and the limitations of liability contained in this Limited Warranty. The agents, employees, distributors, and dealers of SAMSUNG are not authorized to make modifications to this Limited Warranty, or make additional warranties binding on SAMSUNG. Accordingly, additional statements such as dealer advertising or presentation, whether oral or written, do not constitute warranties by SAMSUNG and should not be relied upon.
