

Communicate like you never have before.

Feature

Scheduling : Fully schedule layouts and groups of layouts (campaigns)

Priority Schedules : Yes

Video : Yes

Images : Display images (png, jpg, bmp) positioned and scaled perfectly for your display

Text : Fully formatted text, sized and positioned on the screen. Scroll in from any side.

RSS : Pull RSS feeds from the internet (requires internet connection), style them and display them on layouts. Fully formatted and scrollable.

Web Page : Embed entire webpages or sections of webpages

Embedded HTML : Display custom HTML content for a true “no limits” layout design.

Background Image : Layouts “come alive” with their own unique background image.

Monitor Health : Monitor the health of your display in real time. Check a simple status light to see if your display is active and fully provisioned with its schedule.

Offline Mode : Play offline without degradation of your display. Content is cached in advance for seamless playback when the connection drops (web page and embedded media types excluded)

Client Runtime Information : Easy to read, up to date client information available at the device. Makes troubleshooting a breeze.

SD Card : Store your content on internal storage or on the SD Card.
