

NRA Booth #2218

THE MOST REVOLUTIONARY,
ENERGY-EFFICIENT, FLEXIBLE,
FOOD-SAFE REFRIGERATION SYSTEM
...EVER.

THE FX SERIES – NOTHING COMPARES

	FX SERIES	TRADITIONAL SYSTEMS
Flexible Refrigeration		
Available in 1-, 2-, 3- and 4-drawer units, installed at point of preparation.	Yes	No
Innovative design and insulated insert keep cold temperatures consistent.	Yes	No
Energy Efficiency		
Unit design prevents cold from pouring out.	Yes	No
Power shuts down when drawer is open to prevent cold air from being pushed out.	Yes	No
According to the Energy Star rating system, FX Series would be rated in the top 1% of all products listed.	Yes	No
Food Safety		
Consistently keeps food safe and cold.	Yes	No
Insulated insert pulls out for easy cleaning.	Yes	No

FX Series units go from fridge to freezer with the touch of a button – utilize the entire inside space of the drawer to store your products at their optimum temperature right next to your prep station, grill or cook top.

WHEN OTHER SYSTEMS CLAIM THEY'RE BETTER AT KEEPING COLD AIR WITH THE FOOD, IT'S JUST A LOT OF HOT AIR.

Traditional refrigeration means traditional problems. Cold air escapes too easily, leading to re-freezing and crystallization, premature thawing and cross-contamination – even bacteria. The FX Series with FlexiCold Technology fulfills the functions of a refrigerator, freezer, rapid chiller and thaw box to give you more energy-efficient, precise control over cold temperatures than ever before, so you can keep your cold air where it belongs – and your food safe.
