

## **User Manual**

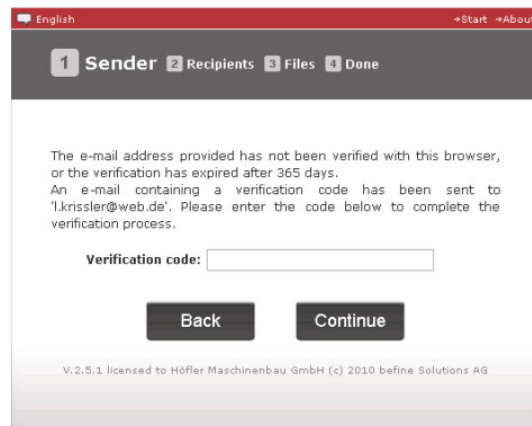

**Manual for using the software application for secure file transfer.**

<b>Landing Page</b>	
<p>When you open the Software, you can choose one of two options:</p> <ol style="list-style-type: none"> <li>1. You can provide a file for a recipient inside or outside of your company</li> <li>or</li> <li>2. You can retrieve a file that somebody has provided for you</li> </ol> <p>To initiate one of the actions, please click on the relevant button.</p>	
<b>1) <u>Providing Files</u></b>	
<p><b>Enter sender's data</b></p> <p>The software will ask you to enter the sender's data. This data is required to inform the recipient accordingly and to enable him to call back the sender and ask for the password.</p> <p>The data can be saved for 30 days as a cookie, so it does not have to be entered again with every file transfer. When the software is being used again, the remaining time period is automatically reset to the specified number of days again.</p>	
<p><b>E-mail verification</b></p> <p>If the sender has not used the Software from his browser before, the system requires a verification of his e-mail address to make sure it is authentic. In order to accomplish verification, the sender receives a verification code via e-mail sent by the server.</p>	

## Verification process

### Accomplishment of sender verification

The sender can copy the verification code out of the e-mail and paste it into the entry field in the Software. The successful verification will be saved as a cookie.

## Entering Recipient Data

In the following dialogue, the Software asks for the recipient data.

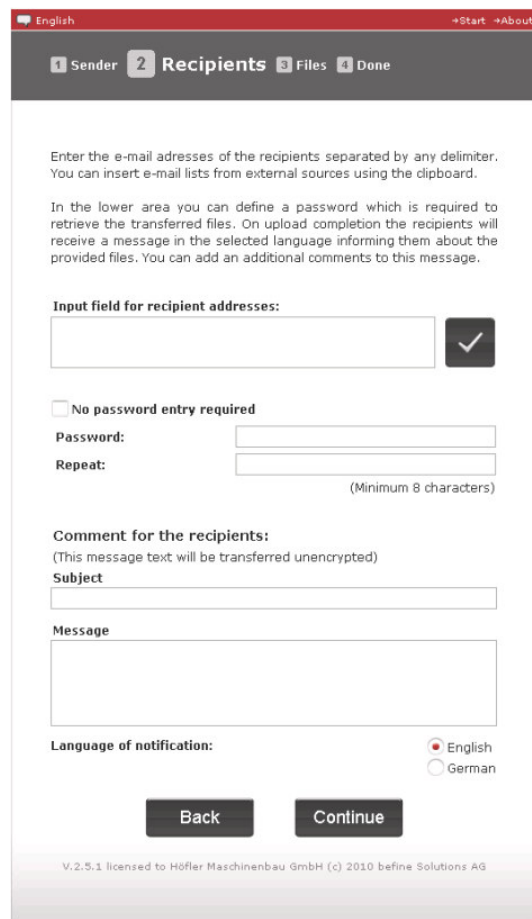

This data will be used to send an automatic information mail to the recipient containing a link to the provided file.

The mail will also contain the sender's phone number, so that the recipient can contact the sender in order to ask for the password or for further inquiries.

Enter a password of your choice. Please note the minimum password length set by the administrator.

You can add a comment for the recipients that will be part of the automatic e-mail notification.

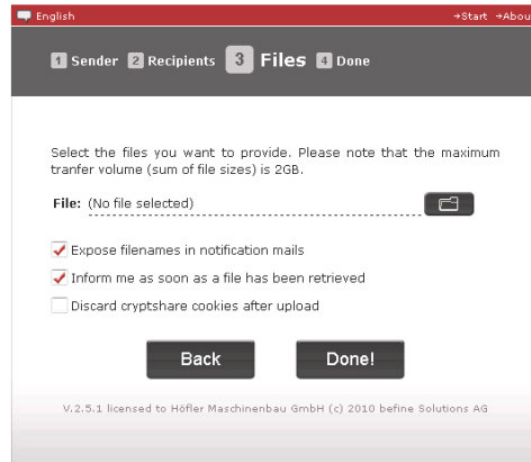

It is not recommended to type the password into the comment field for security reasons.

## Select a File

Choose the file(s) that you would like to transfer.

The Software will initiate the encrypted transfer and storage on the server.

English →Start →About

1 Sender 2 Recipients 3 **Files** 4 Done

Select the files you want to provide. Please note that the maximum transfer volume (sum of file sizes) is 2GB.

File: (No file selected) 

☒ Expose filenames in notification mails

☒ Inform me as soon as a file has been retrieved

☐ Discard cryptshare cookies after upload
