# Getting Started

## Overview

GroupClone is a robust software built on Magento Ecommerce Platform developed on Zend Framework, exclusively designed to set up a deal site in no time! Showcase fascinating deals on your website to supercharge your business and sales with this fabulous software. To add more to your joy, the installation and setup of this ingenious software is completely free of cost and start-to-end assistance will be provided for all your customization needs at affordable pricings. Seize the opportunity before it's gone and kick start your deal business today!

The screenshot displays the Contus GroupClone website interface. At the top, there is a navigation bar with the logo, a search bar, and links for 'New York', 'SIGN IN', and 'SIGN UP'. Below the navigation bar, there are four main categories: 'All Deals', 'Getaways', 'Goods', and 'Gift Deals'. The main content area features a large featured deal for a 10-night Bangkok & Phuket break, with a price reduction from \$656.00 to \$456.00. To the left of the featured deal is a sidebar with an 'Explore' section listing various categories like Fitness, Beauty and Spa, Education, Music, Health and Nutrition, Event and Activity, Entertainment, Electronics, Food and Drinks, and Sea Shore. Below the featured deal, there is a 'Fitness' section with a 'View all' link and four smaller product cards, each with a sample deal and a price reduction.

# Features List

## General Features

- Powered with Merchant Login, Referral System, and One Step Checkout.
- Provides option for Email subscription as a default page (splash page).
- Supports multi-store set up with multilingual option.
- Allows customer to login with social accounts.
- Comes up with Facebook Fan Box.
- Facility to add Facebook Comments to individual deal.
- Assists in promotion by allowing deal sharing via Facebook, Twitter, Pinterest and Email.
- Comprises 'Follow Us' links for Facebook, Twitter, and LinkedIn.
- Facility to feed deal information via RSS Feed.
- Incorporates Goods (Listing shipping deals) option on the home page.
- Enthralls with Gift to friend/Buy it for a friend options to make your deals go viral.
- Allows to display deal videos.
- Impresses with image slide show for deals.
- Facilitates with setting background image for each City and Store.
- Provides option to integrate SSL certificates with your Shopping Cart.
- Enthralls with impressive options like Google Maps and Google Analytics.
- Facilitates with options to display Featured, Upcoming, All and more Great deals exclusively.
- Allows to set up Multiple cities and categories on home page.
- Allows to set up Status Box for 'Total Money Saved' and 'Total Bought' on home page.
- IP Tracking.
- Option to configure Mail Chimp and Constant contact for email subscription.
- Allows to configure PayPal and Authorize.net payment gateways.

## For Merchants

- Facility to add and manage deals.
- Option to add multiple images to any particular deal.
- Facility to display Deal summary, Buyer list, and Coupon redemption status.

## Backend Features

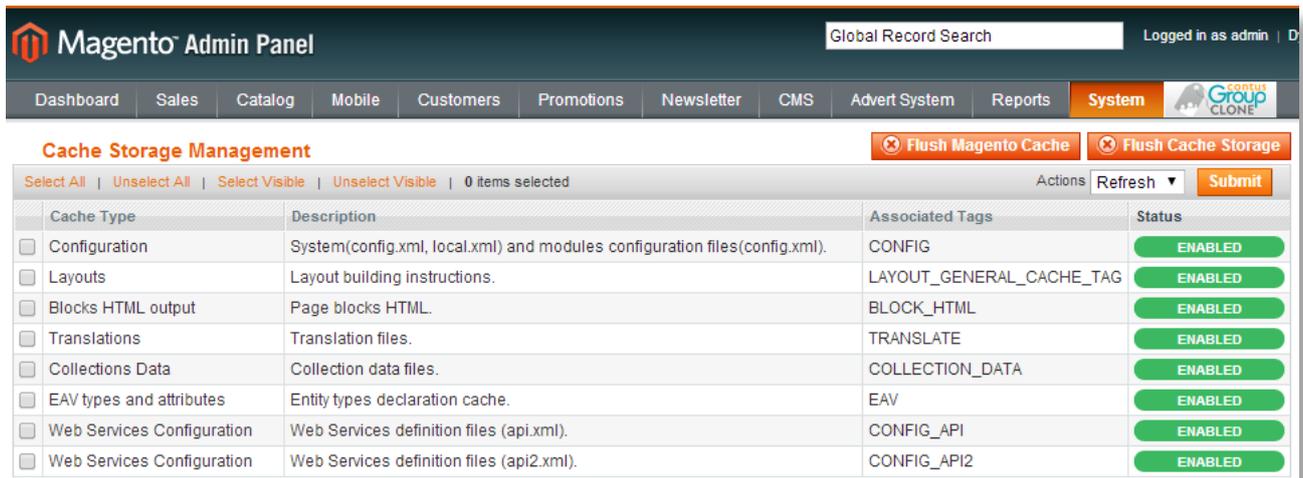

- Impresses with user-friendly Magento Admin panel with secure Login.
- Facility to create Multiple Admin accounts with different privileges.
- Facility to add unlimited number of cities or locations for different deals.
- Option to create new deals in advance.
- Easy-to-use daily deals module in which the admin can specify End Time, Deal dates, Minimum and Maximum purchase requirements.
- Ability to view all the user details and their respective purchase.
- Impresses with good reporting system.
- Facilitates with option to redeem coupons.
- Helps a lot to Manage and customize referral system.
- Facilitates with options to add Recent deals through the administrator module.
- Assists in managing the Customer Details, Newsletter Subscribers and Customer Groups.
- Facilitates to manage Payment Methods, Orders, Invoices, Coupons, Transactions, Configurations, Time Zone, Currency, and Language.
- Facility to customize the e-mail templates.
- One-page deal form.

# Installation

1. Install Magento in your server. ( Installation Guide: [http://www.magentocommerce.com/wiki/1-installation\\_and\\_configuration/magento\\_installation\\_guide](http://www.magentocommerce.com/wiki/1-installation_and_configuration/magento_installation_guide) )

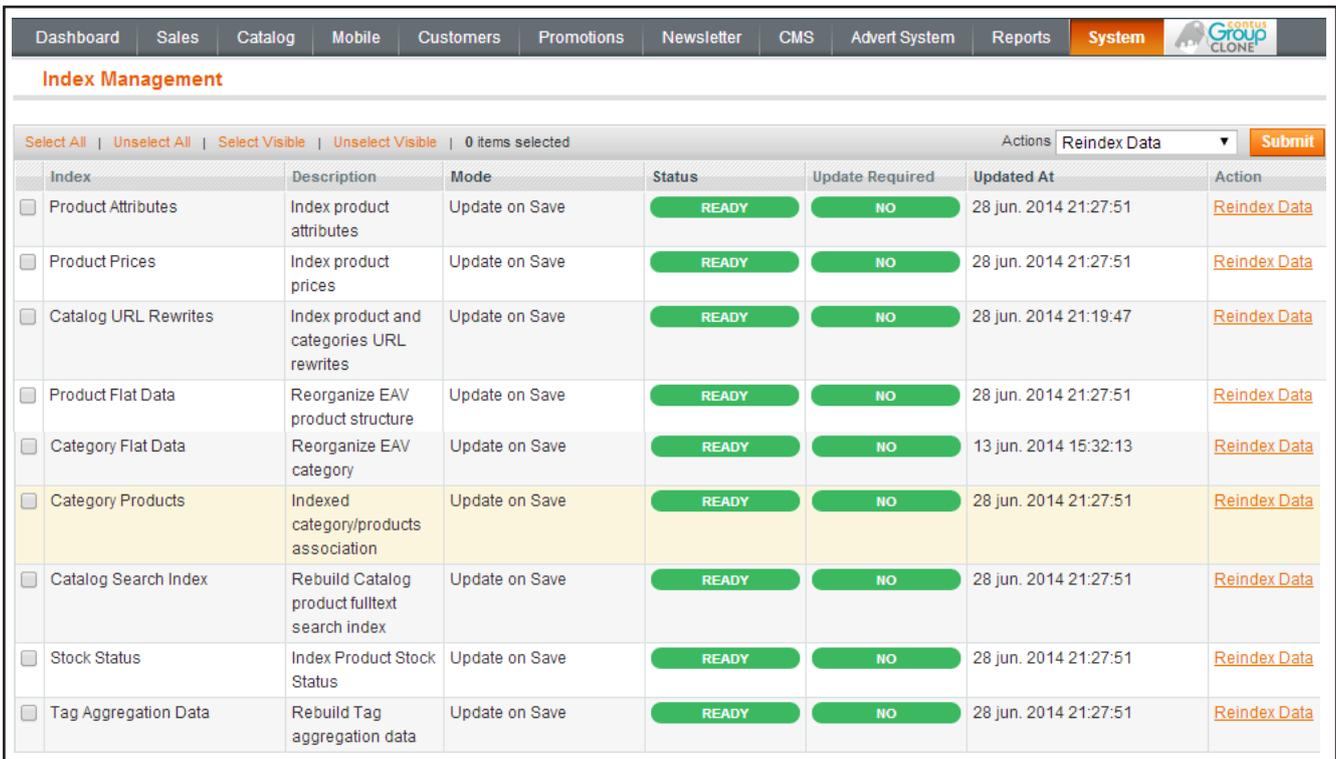

2. Login into your Magento Admin and go to System --> Cache Management.

To disable all cache, select all the checkboxes and select Disable in the Actions Drop-down and click Submit.

3. Now go to Magento --> System --> Index Management.

Select all the checkbox and click Re-Index.

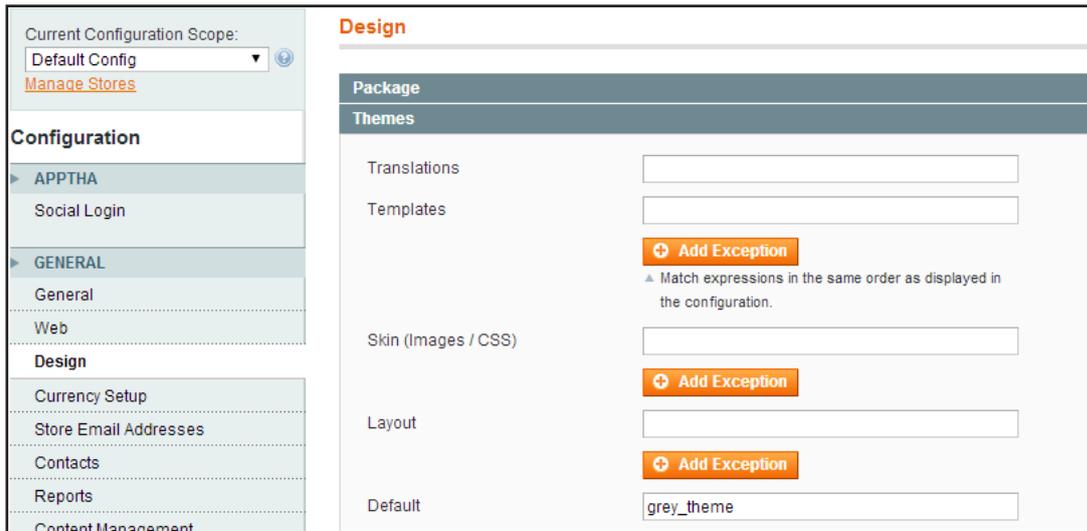

4. Now, install GroupClone in Magento.

Connect with FTP server. Extract the “.zip” folder and move the files in root directory of Magneto installed directory in the server. The files and folders will be copied in the respective places. (You need to overwrite some files too).

5. Now go to Admin -> System -> Configuration -> Design Tab -> Select Theme -> Enter the theme name.

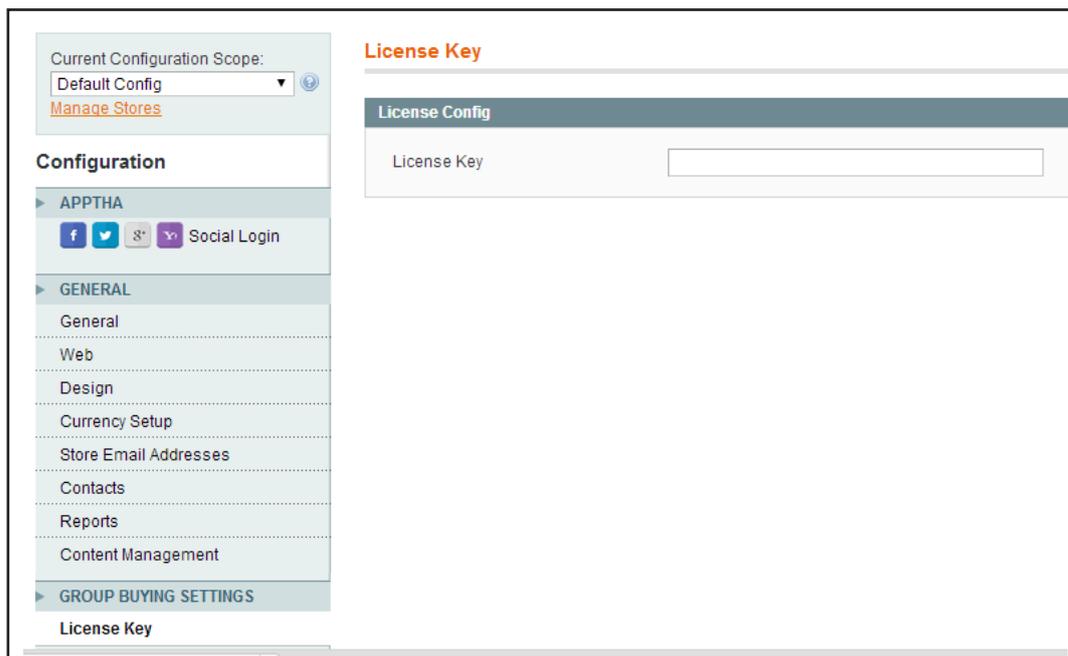

for example ; “grey\_theme”

6. Navigate Admin -> System -> Index Management. Then click Select All to select all the checkbox and select re-index data from the Actions Drop-down and then click submit.

7. Enter the License key

Admin --> GroupClone --> Global Configuration --> License key.

# Configuration

## Add Deal

Login to Magento Admin panel ->Contus Group Clone tab -> Deals -> Add new deal.

**Deal Title:** Enter a title for the deal. The text entered in this field will be displayed as the main title of the deal.

**Deal Subtitle:** Enter a subtitle for the deal. The text entered in this field will be displayed as the subtitle of the deal.

**Deal Regular Price:** Enter a regular price for the deal. Enter the actual price of the deal without discount price.

**Deal SKU:** Enter a special price for the deal. Enter the discounted price of the deal.

**Deal Start Date:** Enter a start date for the deal. The date entered in this field will be the start date of the deal. The deal will be automatically started on this date.

**Deal Start Time:** Enter a start time for the deal. The time entered in this field will be the start time of the deal. The deal will be automatically started on this time.

**Deal End Date:** Enter an end date for the deal. The date entered in this field will be the end date of the deal. The deal will automatically end on the specified date.

**Deal End Time:** Enter an end time for the deal. The time entered in this field will be the end time of the deal. The deal will end automatically on the specified time

**Coupon Valid Till:** Enter a date for coupon validity. The date entered in this field will appear in the deal coupon and the coupon should be redeemed within the validity period specified here. If the coupon is not redeemed within the validity period, then the coupon could be disregarded by the merchant.

**Deal Inventory:** Enter the available quantity in stock. If the stock is limited for a specified amount of quantity, then it should be specified in this field. When the sale reaches the available quantity then “Out of Stock” notification will be displayed in the front-end of the website, and further sales will be stopped for this particular deal.

**Categories:** Choose the categories for the deal to be displayed. Select any one or multiple categories for the deal to be displayed. For Example: Let’s imagine there are 5 categories: Food, Spa, Dress, Chocolate, and Electronics. If you want to display the deal under Food and Chocolate, then just select Food and Chocolate so that the deal will be displayed under the Food and Chocolate categories.

**Deal City:** Choose the city in which the deal should be displayed. You can place the deal in any one city or multiple cities of your choice.

**Deal Image:** Upload an image for the deal. Please upload the image for the deal here. The uploaded image will be displayed in the front-end of the website. The supported image formats are PNG and JPG.

**Deal Video:** Upload a video for the deal. The uploaded video will be played in the front-end of the website. The supported video formats are MP4 and MOV.

**Video status:** Option to enable/disable videos

### Meta information:

**1. Meta title:** This is used to give each product page a unique title. This title can be seen at the top bar of a web browser. It is also used as the title on a search engine results page (SERP).

**2. Meta keywords:** Meta keywords are words and phrases relevant to the product or page.

**3. Meta description:** Meta description is a short description of the page or product. This description is sometimes used by search engines in a little snippet used on SERP.

**Deal Status:** Enable or disable the deal. This option allows you to enable or disable the deal at any point of time.

**Deal Description:** Contains detailed deal description. Explain in detail about your deal/product/service and its features and benefits. The information entered in this field will be displayed in “Description” section in the front-end.

**Fine Prints:** Enter Fine Print for the deal. Explain full conditions and limitations of your deal. The information entered in this field will be displayed in “Fine Print” section in the front-end and the deal coupon.

**Highlights:** Enter highlights for the deal. Enter the highlights or catchy points of the deal to attract the visitors.

**Deal Location Map:** : Copy & Paste i-frame code here to locate the deal in map. Go to Google Maps, and specify the address of the deal merchant and enter. Then, click on the “Link” icon/button (the chain-like symbol). Then, copy and paste i-frame code in this section. The map of the given address/location will be displayed in the front-end.

**Company Address:** Enter the company address, merchant’s address (deal owner), where the coupons can be redeemed.

**Website:** Enter the merchant website address or the website address associated to deals.

**Merchant Email:** Field for merchant’s E-mail ID. Please enter the merchant’s (deal owner) email ID. The coupon report will be sent to the email ID specified here.

The screenshot shows a configuration form with the following fields and values:

- Deal Status \* : Please Select
- Deal Description \* : (Empty text area)
- Fine Prints : (Empty text area)
- Highlights : (Empty text area)
- Deal Location Map : (Empty text area)
- Company Address : (Empty text area)
- Website : (Empty text input)
- Merchant Email \* : (Empty text input)
- Merchant Phone : (Empty text input)
- Getaways Deal : Enabled
- Weight : (Empty text input)
- Tax Class \* : None
- Add multiple offers : Please Select

**Merchant Phone:** Field for merchant phone number. Please enter the merchant’s phone number here. The specified phone number will be displayed in the front-end and the purpose of displaying the phone number is to allow contact between the visitors and the merchant for clarification of queries.

**Featured deal:** Select if deal should be “Featured”.

**Getaways deal:** Select the deal to be displayed in “Getaways”.

**Weight:** Enter the weight of the deal product if applicable.

**Tax class:** Select the Tax class. Tax classes are used to define Tax Rules. Tax Rules are defined as a combination of Tax Rates with a Product Class and Customer Class.

**Add multiple offers:** Create multiple offers for deals.

## Manage Deals

Here you can manage all the deals which are uploaded by Admin and Merchant. You can see Deal name, Target, From date, Expiring date, Expiry time, Current deal status, number of users purchased, Deal report, Preview and the Payment status of the deals. Also you can Export the deals in a XML or CSV format.

## Manage Orders

All the orders can be displayed here. You can see the order name, the store name, Date of purchase, Bill to name, actual price, deal price, status of the deal. You can also export the orders in the XML or CSV format.

## Manage Coupons

In Manage coupons section, you can see all the coupons generated for the achieved deals. Also you can verify whether the coupon is used or not in the status. Here you can find the details such as Order number, Customer name, Product name, Quantity, Coupon code, Created date and Status.

## Coupon Validation

This module is included to validate or redeem the coupons by both admin and merchant.

1. Enter the coupon code in the text field and click the "Search" button.
2. This shows you the table with some coupon, customer, product name and coupon-used details.
3. If the coupon is not used, then "Use Coupon" button is displayed; just click it to make use of the coupon.

**Coupon Validator**

Enter the Coupon Code:

**Coupon Details**

Coupon Id	Order Id	Customer Name	Product name	Quantity	Coupon Number#	Coupon Code	Created Date	Status
1	100000002	Praveen Laxmanan	(Sample deal) \$229 for 28 Healthy Lunches & Dinners Delivered to Your Door	1	1	36UVNXDBL	2014-08-13 14:44:22	Not Used

## Categories

You can create more categories to display deals in the following path:

Admin --> Groupclone --> Deals --> Categories --> Add Subcategory

Dashboard Sales **Catalog** Mobile Customers Newsletter CMS Advert System Reports System

**Categories**

Choose Store View:

[Collapse All](#) | [Expand All](#)

## Deal Configuration

Deal configuration is to provide the homepage information and to enable the deals which should be displayed in front end of the site.

**Homepage Info**

Title

Meta Description

Meta Keywords

▲ Words Separated by comma(.). (Ex: deal, big offer)

**Title :** Home page title should be entered. Eg : Contus Groupclone Script Demo.

**Meta Description :** Meta descriptions are HTML attributes that provide concise explanations of the contents of web pages. Meta descriptions are commonly used on search engine result pages to display preview snippets for a given page.

**Meta Keywords :** Meta Keywords, an attribute of meta tags, are a list of comma-separated words included in the HTML of a Web page that describe the topic of that page.

<b>All Deals</b>	
Enabled	Yes
<b>Goods</b>	
Enabled	Yes
<b>Getaways</b>	
Enabled	Yes
<b>Upcoming Deals</b>	
Enabled	Yes
<b>Groupclone-4</b>	
Enabled	Yes
Title	
<b>IP Tracking</b>	
Enabled	No

**All deals** : If you want to display the all deals tab in home page, then you have to enable this field.

**Goods** : Shipping or physical products, are listed individually under the goods category. If you want to display the shipping products in a tab, then you have to enable this field.

**Getaways** : Travel deals will be listed under this category. If you want to display the Travel Deals in a tab, then you have to enable this field.

**Groupclone 4** : This is an additional field where you can add your own menu in order to display in the front end.

**IP Tracking** : If you enable this option then it will track the IP address and if the deals are not available in that cities then it will display the deals of default city.

## Advert system

Advert system is a concept by which customers can earn credits by referring the site to their friends.

## Customers

This tab is to know the customer details. Go to Admin -> Contus Group Clone -> Advert System -> Customers

Here, you can see the customer details with credit earned amounts.

Customer Details				
Page 1 of 1 pages   View 20 per page   Total 1 records found				
ID	Customer Name	Customer Email	Discount Amount	Discount Percentage
2	brindha nadimuthu	brindhanadimuthu@gmail.com		
1	jhon arellano	jarellano@nerubia.com		
3	Erik Raes	erik@shopbox-belgium.com		

The Admin can enable/disable the advert system from the backend. Go to Admin -> Contus GroupClone -> Advert System -> Configuration -> Advert Configuration.

The screenshot shows a configuration window titled 'Advertsistem'. Inside, there is a sub-section 'AdvertConfiguration' with two settings: 'Allow invite' and 'Enable Advertsistem'. Both settings have a dropdown menu currently displaying 'Yes'.

**Allow Invite:** Admin can allow the customers to send the referral invitation to friends from their account and view the summary of the referral credits in their account.

**Enable Advertsistem :** Admin can enable/disable this Advert System feature.

## Manage Rule

Manage rules is not control the Advert system of the site. Here you can find two type of rules to control the system. Go to Admin ->Contus GroupClone -> Advert System -> Manage Rule.

In this view click Edit and configure the rule that you prefer for your business. Once you have clicked Edit you'll be viewing a new page as the following

The screenshot shows the 'Rule Manager' interface. At the top, there are navigation tabs: Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Advert System (highlighted), Reports, and System. Below the tabs, there is a 'Rule Manager' section with a table. The table has the following data:

Rule Type	Target Limit	Trigger Limit	Discount Percentage	Discount Amount	Min Order Amount	Action
Purchased	1	5	2	15.0000	20.0000	<a href="#">Edit</a>

Additional details in the screenshot include: Page 1 of 1 pages, View 20 per page, Total 1 records found, and buttons for 'Reset Filter' and 'Search'.

## Rule Settings

This setting helps you to enter the value for the rule types and also you can set the rule informations.

**Rule Type :** There are two types of rule type

1. **Sign Up :** A customer earns credit once the person he/she has referred via invitation registers in the store. It means if the rule type is set as "Sign Up" and if you have invited your friend, the credit will be added to your account immediately after your friend signed up to the site.

2. **Purchase :** A customer earns credit once the person he/she has referred via invitation, purchases from the store. It means if Rule Type is set as "Purchased" the credit will be added to your account only after the friend you have invited completes a purchase.

**Target limit** : This field is to create a particular limit to discount credits of any customer whose invitation is used by his/her friends.

**Trigger limit** : This field is to create a threshold to discount credits of any particular customer, beyond which there won't be any discount credited to his/her account.

**Purchase type**: If you have selected 'Purchased' in Rule type then you can specify whether it should be based on Order/Amount. (Applicable only for Purchased Rule type).

Edit Rule	
<b>Rule Settings</b>	
Rule Type	Purchased
Target Limit *	1
Trigger Limit *	5
Purchase Type	Quantity
Discount Type	% Percent
Percentage	30
Maximum Percentage Earn Limit	40
Discount Amount	15.0000
Minimum Order Amount	20.0000

**Discount Type**: Discount type or method can be selected. The discounts type are as follows.

1. % Percentage method
2. Flat rate method.

**Percentage** : This is to set the number of percentage that the site owner is willing to provide for the customers.

**Maximum percentage earn limit** : Admin can set the maximum percentage that user can earn.

**Discount amount** : Amount to be credited in their accounts, if rule is satisfied for referring friends.

**Maximum order amount** : To specify the order amount the customer needs to buy for credit discount. If their order amount is equal or less than this amount, they will not get the desired discount.

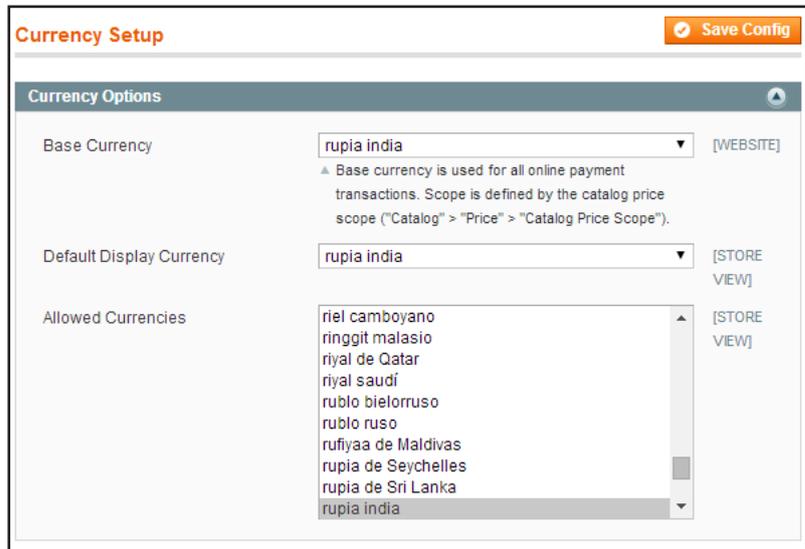

# Global Configuration

## License Key

License key is a mandatory field. This field is to enter the generated license key for your domain name. Without entering this license key the deals will not be displayed in front end.

## Currency Settings

**Currency Options :** Here you can choose the base currency of your country and your sites default display currency. It also lists all the allowed currencies.

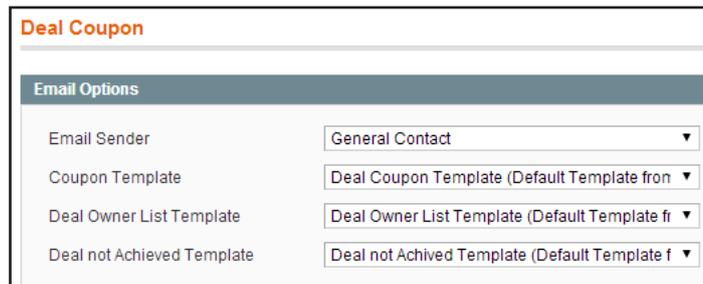

## Deal Coupon Sender

**Email Sender:** Select the Email ID through which all the mails for deal coupon will be sent.

**Coupon Template:** Select the Email Template for the Coupon Email.

**Deal Owner List Template:** Select the Email Template for the Deal Owner List Email.

**Deal Not Achieved Template:** Select the mail Template for the Deal not Achieved Email.

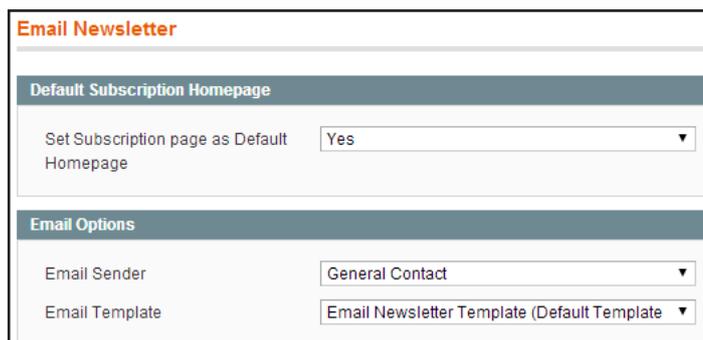

## Email Newsletter

**Default Subscription Home Page :** If you want the home page of your site to display the subscription page, then you have to enable this field.

**Email Sender :** You can select the sender in the drop down to send the newsletters.

**Email Template :** You can select the email template of the newsletter.

## Featured Business

The featured business is like offering the business to the merchants, who likes to merge their business with the site. The featured business process starts with the merchant requesting the featured business to the site owner using a form, which looks like a contact form.

**Featured Business** : Here you can enable/disable this filed.

**Send emails to** : Here you can specify the email address to which a Merchant should send his/her email regarding business request.

**Email sender** : You can select the sender in the drop down to send the newsletters.

**Email Template** : You can select the email template of the newsletter.

## Customer Configuration

Here you can manage the following options

1. Creating New Account and Account sharing options.
2. Login options.
3. Address templates
4. Email templates for Password options.
5. Name and address fields to display in front end.
6. Facebook Connect Options
7. CAPTCHA

## Store Email Address

Store email Address is to configure the email id for the email actions that is taken in the site. In this filed you can set email sender name and email address.

The following are the email contacts that you can set.

1. General Contact
2. Sales Representative
3. Customer support
4. Custom email 1
5. Custom email 2

	<small>▲ Enable to show social login</small>
Redirect Customer to Account Dashboard after Logging in	Yes <input type="text"/>
	<small>▲ Customer will stay on the current page if "No" is selected.</small>

**Enable Social login:** Select 'Yes' to enable Social Login Module.

**Redirect Customer to Account Dashboard after Logging in :** Select 'Yes' to redirect customer to Account Dashboard after Logging in. Customer will stay on the current page if 'No' is selected.

## Facebook Login Configuration Tab

**Enable Facebook login :** Select 'Yes' to enable Facebook Login.

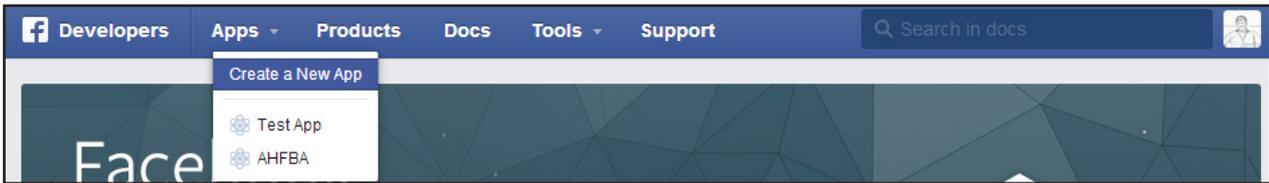

The screenshot shows the 'Facebook Login Configuration' form. It has three main sections: 'Enable Facebook Login' with a dropdown menu set to 'Yes', 'Facebook App Id' with an empty text input field, and 'Facebook App Secret Key' with an empty text input field. Below each input field is a small triangle icon and a prompt: 'Enable Facebook Login', 'Please enter facebook app id', and 'Please enter facebook app secret key' respectively.

**Facebook App Id :** You can get the facebook app id through your facebook application. Kindly go through the below steps to create app in facebook.

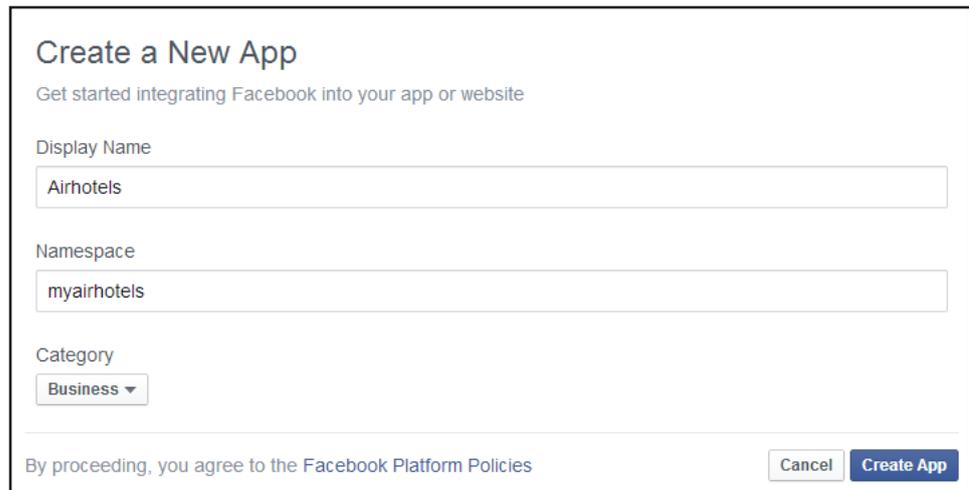

**Facebook App Secret Key :** You can get the facebook app secret key through your facebook application. Kindly go through the below steps to create app in facebook.

### Steps to create Facebook App Id and Secret Key:

1. Go to <https://developers.facebook.com/> and login with your facebook username and password.
2. Click on Apps and click on Create a New App

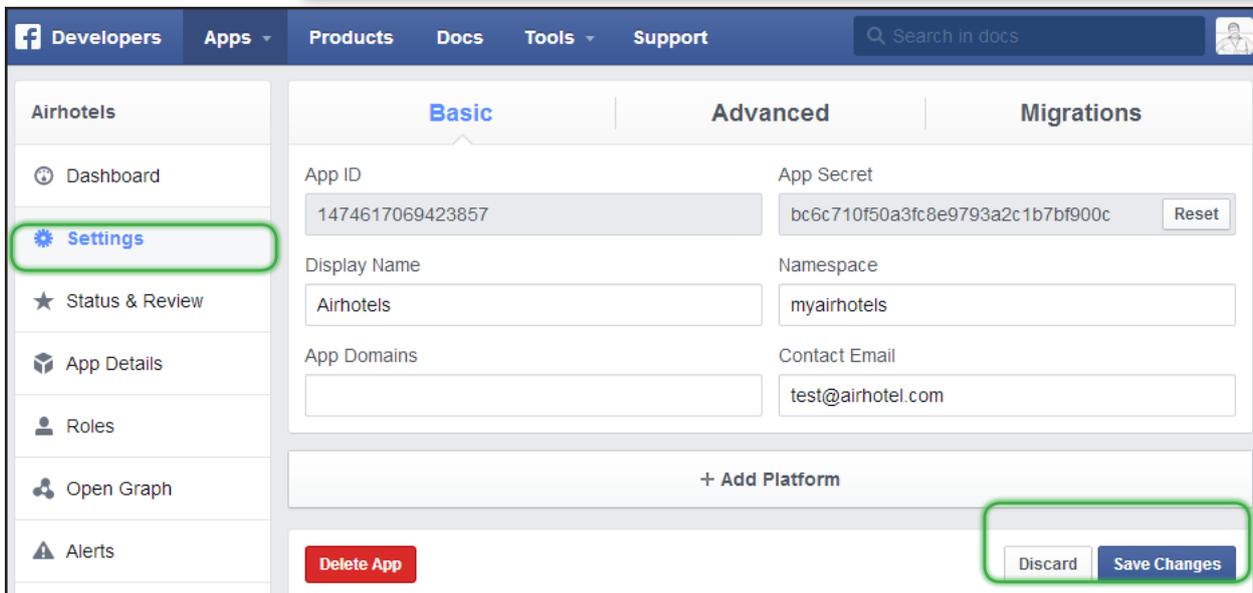

3. Enter the Display name, Namespace and select the category and then click "Create App"

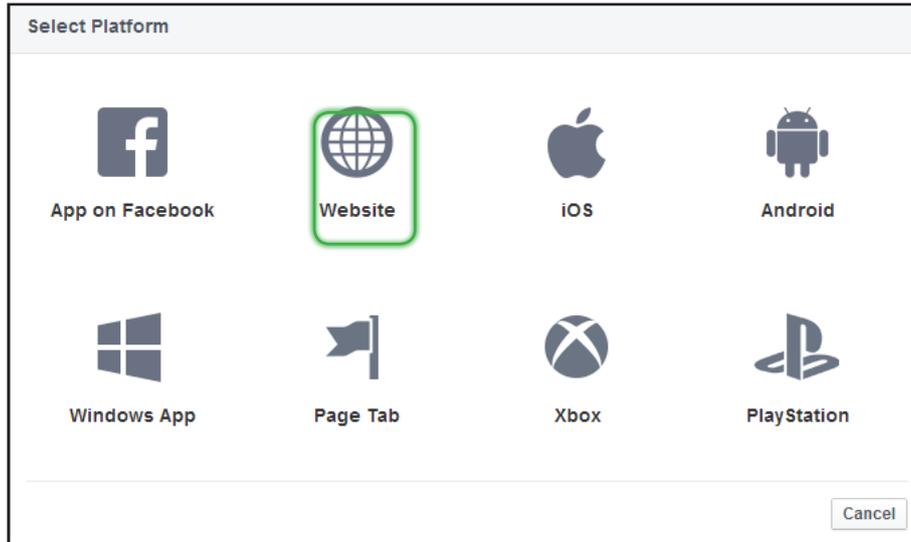

The screenshot shows the 'Create a New App' form. It has the following fields: 'Display Name' (Airhotels), 'Namespace' (myairhotels), and 'Category' (Business). At the bottom, there is a checkbox for 'By proceeding, you agree to the Facebook Platform Policies' and two buttons: 'Cancel' and 'Create App'.

4. Enter your contact email address in the Settings tab and click Save Changes.

The screenshot shows the Facebook App Settings page for the 'Airhotels' app. The 'Settings' tab is selected in the left sidebar. The main content area is divided into three sections: 'Basic', 'Advanced', and 'Migrations'. The 'Basic' section contains the following fields: 'App ID' (1474617069423857), 'App Secret' (bc6c710f50a3fc8e9793a2c1b7bf900c), 'Display Name' (Airhotels), 'Namespace' (myairhotels), 'App Domains' (empty), and 'Contact Email' (test@airhotel.com). At the bottom, there is a '+ Add Platform' button, a 'Delete App' button, and a 'Save Changes' button (highlighted with a green box).

5. Now in settings tab, select Add Platform --> select Website

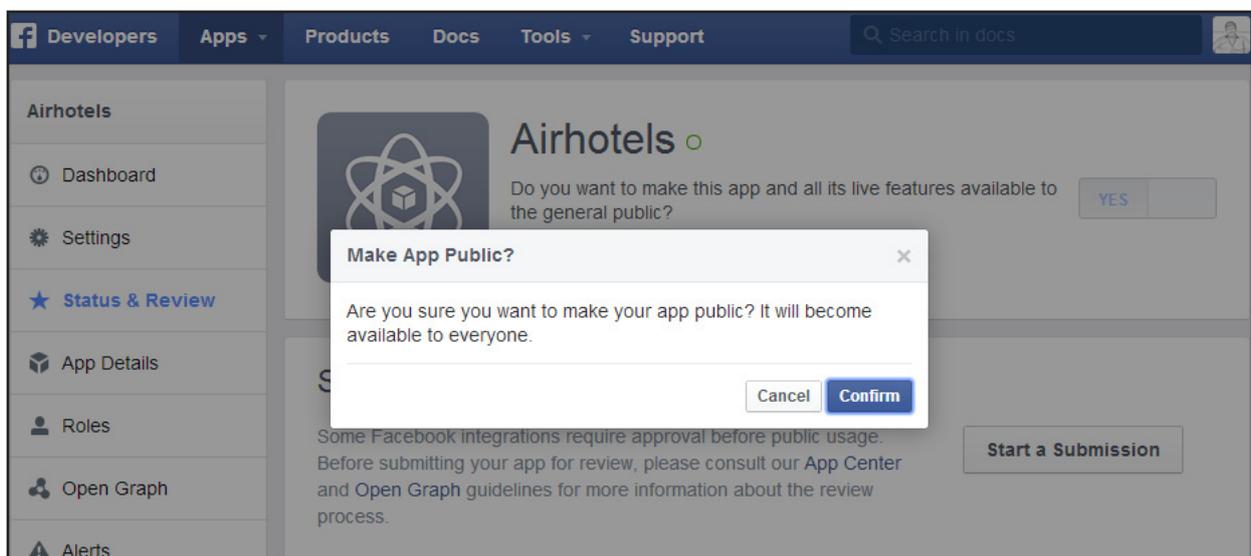

6. Enter your domain name and click the "Save Changes"

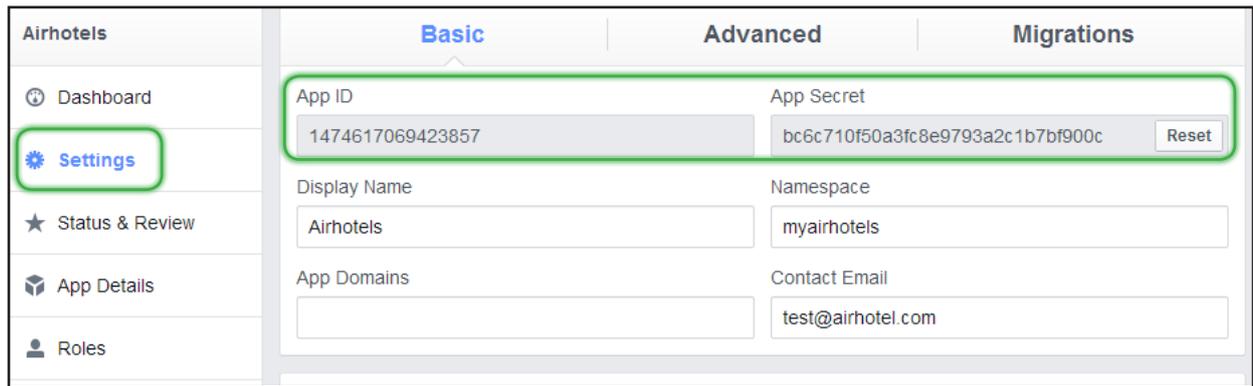

7. Select the 'status' and 'Reviews' Tab.

8. Select the option "yes" for "Do you want to make this app and its live features available to the general public".

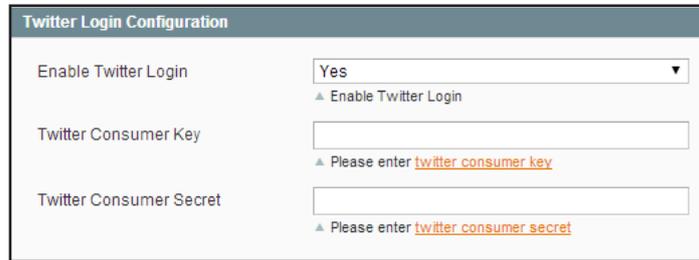

9. A popup will appear to confirm the changes.

10. Click the “show” option from ‘Settings’ tab to view the Secret key

## Twitter Login Configuration Tab

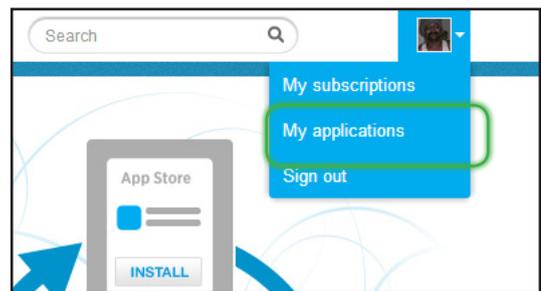

**Enable Twitter login :** Select ‘Yes’ to enable Twitter Login.

**Twitter Consumer Key :** You can get the twitter consumer key through your twitter application. Kindly go through the Steps given below to create app in twitter.

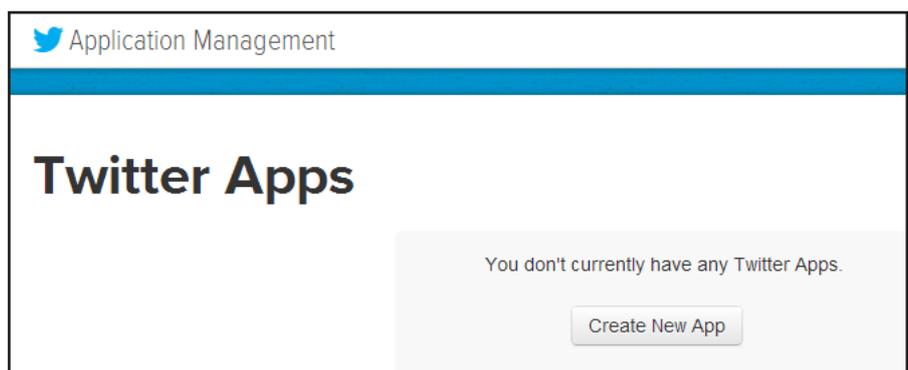

**Twitter Consumer Secret :** You can get the twitter consumer secret key through your twitter application. Kindly go through the Steps given below to create app in twitter.

### Steps to configure the Twitter login :

1. Go to <https://dev.twitter.com/> and login with your credentials and click ‘My applications.’

2. Click on ‘Create New App’ button.

3. Enter the name of the app, description, domain and call back url in that form and click 'Create your Twitter application'.

### Application details

**Name \***

*Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.*

**Description \***

*Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.*

**Website \***

*Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens. (If you don't have a URL yet, just put a placeholder here but remember to change it later.)*

**Callback URL**

*Where should we return after successfully authenticating? OAuth 1.0a applications should explicitly specify their oauth\_callback URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.*

### Developer Rules of the Road

*Last Update: July 2, 2013.*

Twitter maintains an open platform that supports the millions of people around the world who are sharing and discovering what's happening now. We want to empower our ecosystem partners to build valuable businesses around the information flowing through Twitter. At the same time, we aim to strike a balance between encouraging interesting development and protecting both Twitter's and users' rights.

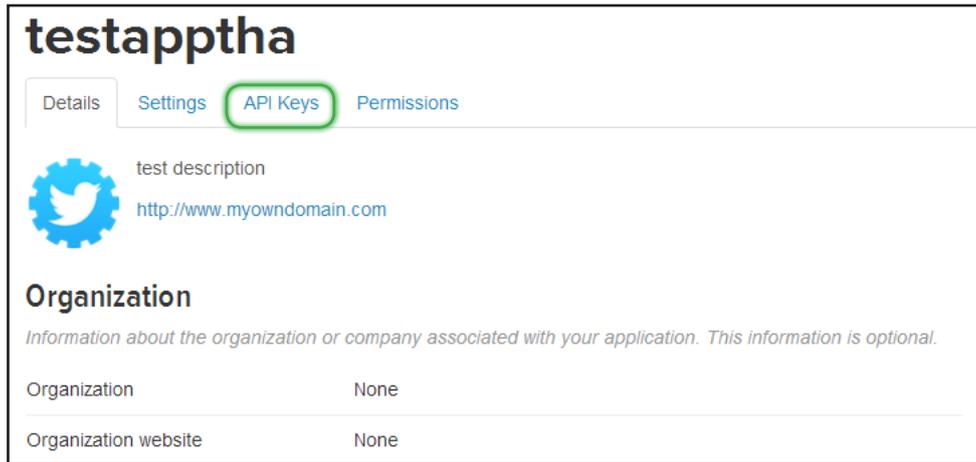

So, we've come up with a set of Developer Rules of the Road ("**Rules**") that describes the policies and philosophy around what type of innovation is permitted with the content and information shared on Twitter.

The Rules will evolve along with our ecosystem as developers continue to innovate and find new, creative ways to use the Twitter API, so please check back periodically to see the current version. Don't do anything prohibited by the Rules and talk to us if you think we should make a change or give you an exception.

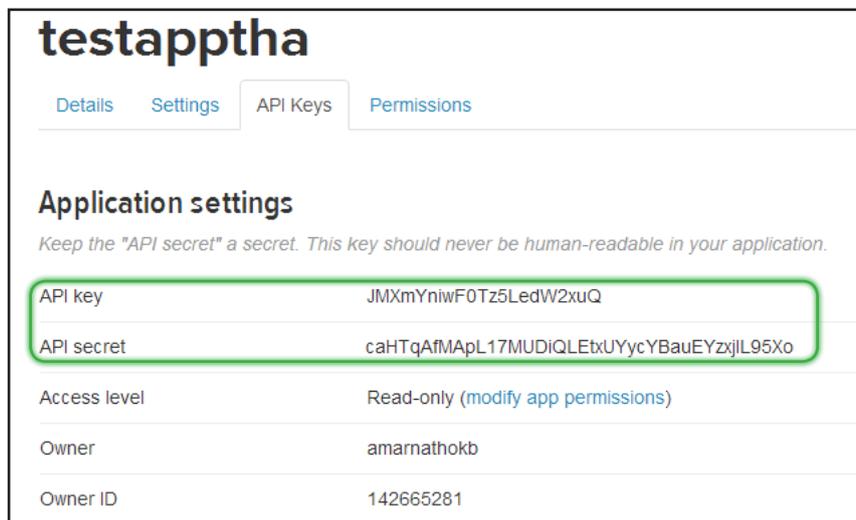

Yes, I agree

Create your Twitter application

3. Now click the 'API Keys' in the menu.

4. Here you can see the API key and API secret key.

## Google Login Configuration Tab

**Enable Google login :** Select 'Yes' to enable Google Login.

**Google App Id :** You can get the google app id through your google application. Kindly go through the Steps given below to create app in google.

**Google Developer Key :** You can get the google developer key through your google application. Kindly go through the Steps given below to create app in google.

The screenshot shows the 'Google Login Configuration' form. The 'Enable Google Login' dropdown is set to 'Yes'. The other fields are empty, with placeholder text below them.

Enable Google Login	Yes
Google Client ID	
Google API Key	
Google Client Secret Key	

**Google App Secret Key :** You can get the google app secret key through your google application. Kindly go through the steps given below to create app in google.

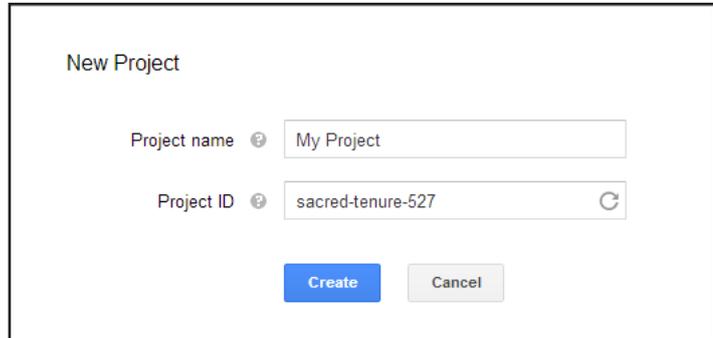

## Steps to create Google App:

1. Go to <https://console.developers.google.com/>, login with your Google credentials and click on 'Projects'

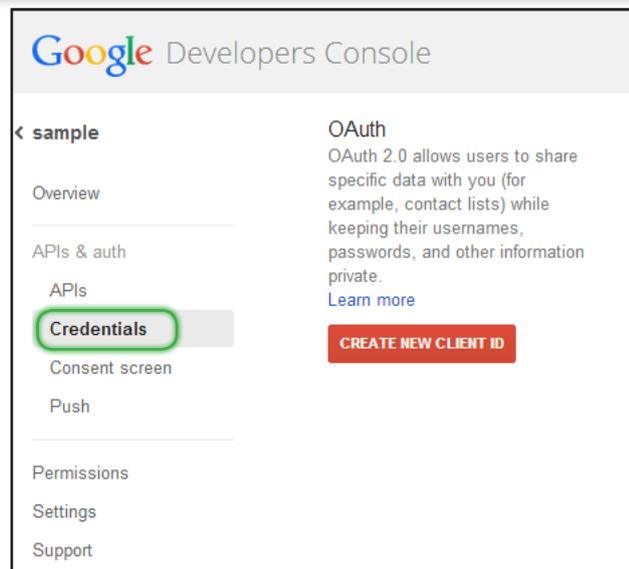

2. Enter your project name and click 'Create Project'

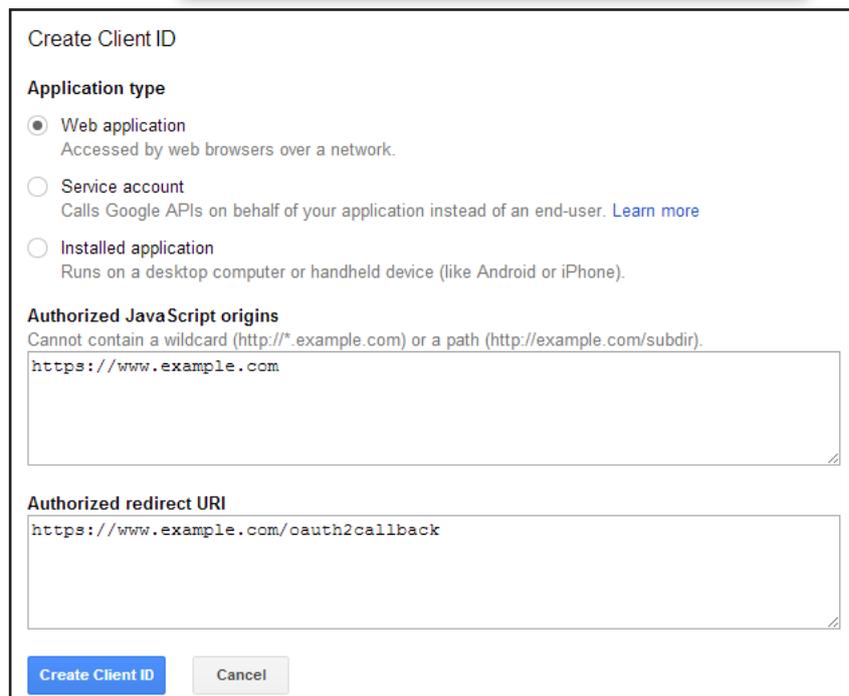

3. Enter your Project name in the popup and click 'Create Project'.

4. Now click on 'API & Auth -> Credentials' in the left pane and click 'Create New Client ID'.

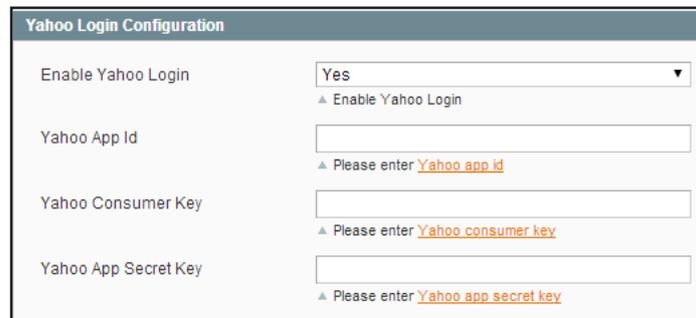

5. Enter the domain url and redirect url and click 'Create Client ID'.

5. Here you can see the Client ID and Secret Key

## Yahoo Login Configuration Tab

**Enable Yahoo login :** Select 'Yes' to enable Yahoo Login.

**Yahoo App Id :** You can get the Yahoo app id through your Yahoo application. Kindly go through the steps given below to create an app in Yahoo.

**Yahoo Consumer Key :** You can get the yahoo consumer key through your Yahoo application. Kindly go through the steps given below to create app in Yahoo.

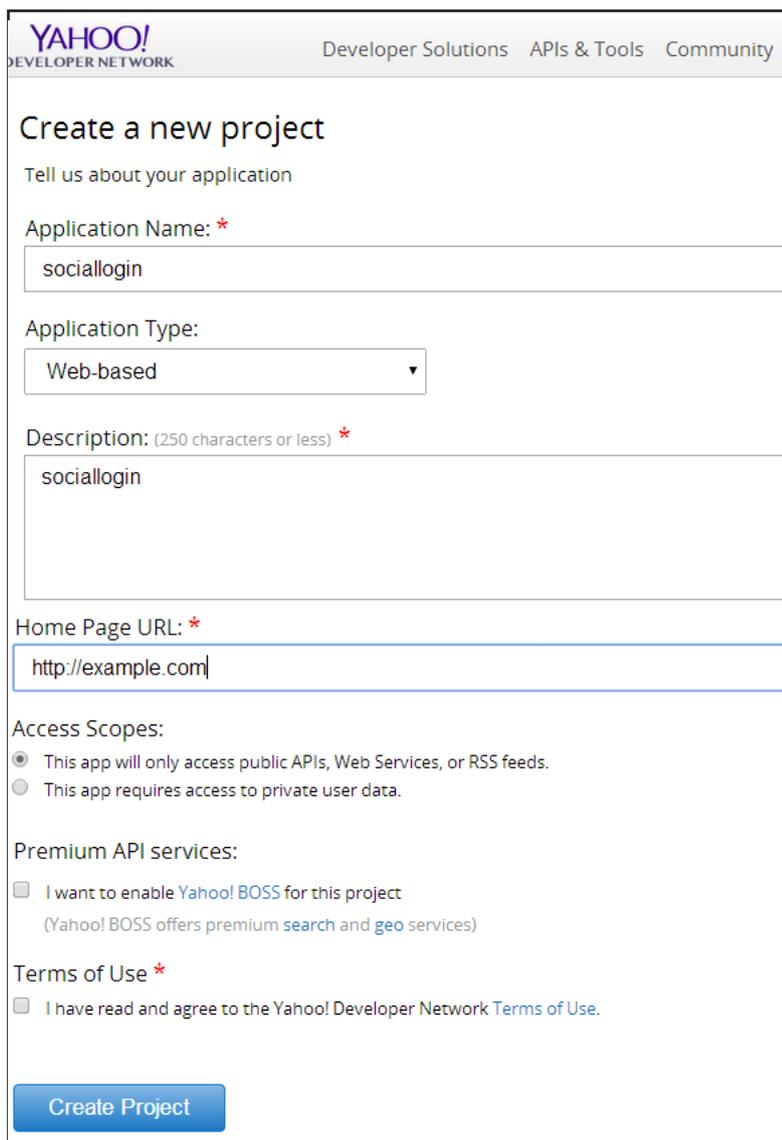

**Yahoo App Secret Key :** You can get the yahoo app secret key through your Yahoo application. Kindly go through the steps given below to create app in Yahoo.

### Steps to create yahoo App Id and Secret Key:

1. Go to <https://developer.apps.yahoo.com> and login with yahoo credentials and click "Create Project"

2. Enter the application name, Description and url of the domain and click 'Create Project'

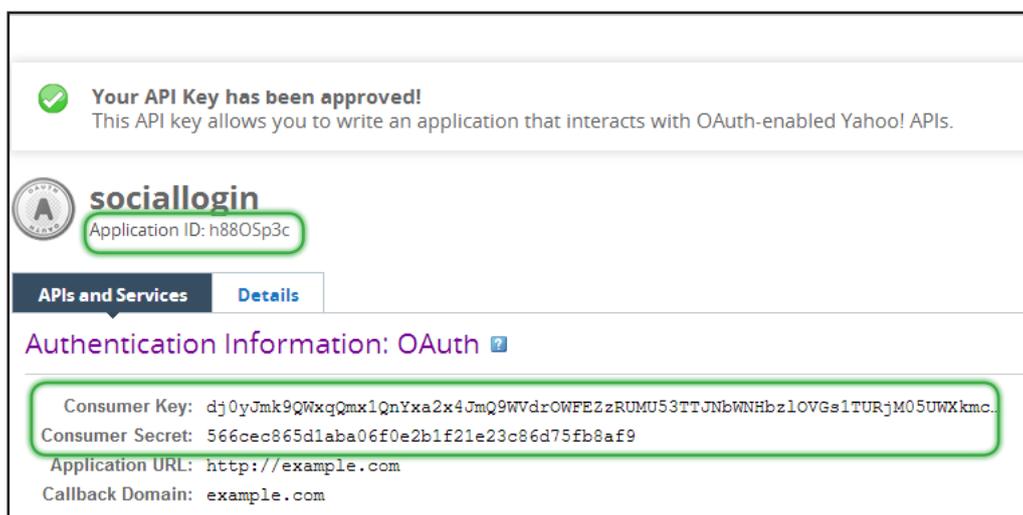

The screenshot shows the 'Create a new project' form on the Yahoo! Developer Network. The form includes the following fields and options:

- Application Name:** sociallogin
- Application Type:** Web-based
- Description:** sociallogin
- Home Page URL:** http://example.com
- Access Scopes:**  This app will only access public APIs, Web Services, or RSS feeds.  This app requires access to private user data.
- Premium API services:**  I want to enable Yahoo! BOSS for this project (Yahoo! BOSS offers premium search and geo services)
- Terms of Use:**  I have read and agree to the Yahoo! Developer Network Terms of Use.

A 'Create Project' button is located at the bottom of the form.

3. Here you can see the Consumer key and Consumer secret key.

The screenshot shows the 'Your API Key has been approved!' notification page. The application name is 'sociallogin' with an application ID of 'h880Sp3c'. The 'Authentication Information: OAuth' section is highlighted with a green box and contains the following details:

- Consumer Key:** dj0yJmk9QWxqQmx1QnYxa2x4JmQ9WVdrOWFEZzRUMU53TTJNbnWNHbz1OVGs1TURjM05UWXkmc..
- Consumer Secret:** 566cec865d1aba06f0e2b1f21e23c86d75fb8af9
- Application URL:** http://example.com
- Callback Domain:** example.com

# Payment Configuration

## Payment Methods

You can configure your Payment methods here. By default our script supports Paypal and Authorize.net payment methods. In order to configure the payments, go to admin --> Groupclone tap --> Payment configuration --> Payment methods. Here you can find all the payments and configure it.

## Optional Settings

Optional Settings is to configure the RSS feeds, bulk emails, (comma spacing corrected) Google Analytics and Site map. This settings option is to actually configure third party extensions which would be of optional or additional help for Groupclone script's function.

### Deal RSS Feed :

#### What is RSS Feed ?

RSS (Really Simple Syndication) is a format for syndicating news. This format is used to publish frequently updated works such as blog entries, news headlines, audio and video in a standardized format.

RSS feeds benefit publishers by letting them syndicate content automatically. A Standardized XML file format allows the information to be published once and viewed by many different programs. They benefit readers who want to subscribe to timely updates from favored websites or to aggregate feeds from many sites into one place.

RSS feeds can be read using software called as "Rss Reader ", " feed Reader " or Aggregator , which can be web based , desktop based or mobile device based. The user subscribes to a feed by entering into the reader feeds URL or by clicking a deed icon in a web browser that initiates the subscription process.

#### RSS Feed :

In order to configure RSS Feed, Go to admin --> Groupclone tab --> Optional Settings --> Deal RSS Feeds. Here, you will find the followings settings.

**Enable RSS Feed :** This field is to enable/disable the RSS Feed. You can choose "Yes "or "No" options to enable /disable the feed.

**Link :** You can enter the URL or link that appear in the feed channel.

#### All Deals Feed :

**Enable All Deals Feed :** This field is to enable/disable the All deals feed. You can choose "Yes "or "No" options to enable /disable this feed.

**Feed Title :** You have to enter the title that appear in the feed channel.

**Title :** You have to enter the title that appear in the feed widgets.

**Caption :** You should enter the caption that appear in the feed widgets.

## Mail Chimp

MailChimp is an email marketing service provider. MailChimp is, at base, a powerful e-mailing system. Precisely MailChimp is an email marketing tool that helps you manage your mailing lists, design bullet-proof emails, and track the results of your email campaigns.

Its uniqueness is that it also offers the following features:

1. Qualifier based imported emails and so collects valuable information.
2. Connect the e-mailing campaigns to social networks like Facebook or Twitter.

To configure mail chimp, please go to Admin -> Group Clone -> Optional Settings -> Mail Chimp. There are three types of configuration. They are listed below as follows.

1. General
2. Mailchimp Subscribe Options
3. Mailchimp Unsubscribe Options

## General

**Enable:** To enable/disable MailChimp

**API Key:** Specify the API Key, mandatory.

**General Subscription:** This is the main list used with the Magento General Subscription.

**Additional Lists:** All selected lists will be available to customers as additional lists.

**Enable Interest Groups:** Allows customers to select the existing groups per each list.

**Enable Ecommerce360 :** If “yes”, send sales info to MailChimp on last checkout step.

**General**

[Get a free MailChimp account now](#)

Enabled: No

API Key:

General Subscription:

Additional Lists:

Enable Interest Groups: No

Enable Ecommerce360 feature: No

## Mailchimp Subscribe Options

**Force Checkout:** If “yes”, subscription mandatory and not visible for guests and new customers at checkout.

**Force Register:** If “yes”, subscription mandatory and not visible for new customers at register.

**Email Type:** Email type preference for the email, defaults to HTML.

**Double Option:** Flag to control whether a double opt-in confirmation message is sent, defaults to “Yes”. **ABUSING THIS MAY CAUSE YOUR ACCOUNT TO BE SUSPENDED.** Magento note: If user subscribes own login email - confirmation is not needed.

**Update Existing:** Flag to control whether existing subscribers should be updated instead of throwing an error, defaults to “No”.

**Replace Interests:** Flag to determine whether we replace the interest groups with the groups provided or we add the provided groups to the member’s interest groups, defaults to “Yes”.

**Send Welcome:** If your double\_optin is false and this is true, MailChimp will send your lists Welcome Email if this subscribe succeeds - this will \*not\* fire if we end up updating an existing subscriber. If double\_optin is true, this has no effect, defaults to “No”.

**General Customer Mapping:** You can choose which fields will be synchronized with MailChimp using the following format: ‘<customer=’attribute\_code’ mailchimp=’merge\_tag’>’. If you want to send the default billing address, you must set ‘address’ as ‘attribute\_code’.

**MailChimp Subscribe Options**

Force Checkout: No

Force Register: No

Email Type: HTML

Double Optin: Yes

Update Existing: No

Replace Interests: Yes

Send Welcome: No

General Customer Mapping:

## MailChimp unsubscribe options

**Delete Member:** : Flag to completely delete the member from your list instead of just unsubscribing, defaults to “No”.

**Send Goodbye:** Flag to send the goodbye email to the email address, defaults to “Yes”.

**Send Notify:** Flag to send the unsubscribe notification email to the address defined in the list email notification settings, defaults to “Yes”.

**Force Checkout:** Subscription mandatory and not visible for guests and new customers at checkout.

**Email Type:** Email type preference for the email, defaults to HTML.

**Double Option:** Flag to control whether a double opt-in confirmation message is sent, defaults to “Yes”. ABUSING THIS MAY CAUSE YOUR ACCOUNT TO BE SUSPENDED. Magento note: If user subscribes own login email - confirmation is not needed.

**Update Existing:** Flag to control whether existing subscribers should be updated instead of throwing an error, defaults to “No”.

**Replace Interests:** Flag to determine whether we replace the interest groups with the groups provided or we add the provided groups to the member’s interest groups, defaults to “Yes”.

**Send Welcome:** If your double\_option is false and this is true, MailChimp will send your lists Welcome Email if this subscribe succeeds then this will \*not\* fire if we end up updating an existing subscriber. If double\_optin is true, this has no effect, defaults to “No”.

**General Customer Mapping:** You can chose which fields will be synchronized with MailChimp using the following format: ‘<customer=’attribute\_code’ mailchimp=’merge\_tag’>’. If you want to send the default billing address, you must set ‘address’ as ‘attribute\_code’.

MailChimp Unsubscribe Options		
Delete Member	No	[STORE VIEW] ▲ Flag to completely delete the member from your list instead of just unsubscribing, default to No.

Update Existing	No	[STORE VIEW] ▲ Flag to control whether an existing subscribers should be updated instead of throwing and error, defaults to

## Google Analytics

Google Analytics is a service offered by Google that generates detailed statistics about a website's traffic and traffic sources and measures conversions and sales. The product is aimed at marketers as opposed to webmasters and technologists from which the industry of web analytics originally grew. This is used to track the visitors of the site which helps to decide on how the site owner can increase the growth of the business.

## Google Sitemap

Site map is to set the layout for the site. It has four options and in order to configure the settings, kindly go to admin --> Groupclone tap --> Optional settings --> Google sitemap.

**Categories, Products and CMS Pages options :** The Frequency settings provide general information to search engines on how often web pages are updated and thus need to be reindexed. The Priority settings lets the search engines know what kind of pages you deem most important for the crawlers to index. For more details on these settings, visit <http://www.sitemaps.org/>.

**Generation Settings :** These settings control how often Magento automatically regenerates its Google Sitemaps to ensure that they are current. Set the Enabled setting to 'Yes' to activate automatic regeneration of sitemaps. Use the 'Start Time' and 'Frequency' to specify how often you want the sitemaps to be regenerated. Use the Error Email settings to define an e-mail recipient for error messages from the automatic sitemap regeneration process.

# Localization

Localization is to configure the language, cities and payment settings. To configure this, go to Admin --> Groupclone tab --> Localization. The brief explanation is given below for reference.

## Language Settings

**Countries Options:** In this settings, you can set the default country and allow other countries which you require. Also there is options to set postal code for few countries.

**States Options:** Here you can set the states which are required for the countries and also set the countries in which the state(s) is (are) not required.

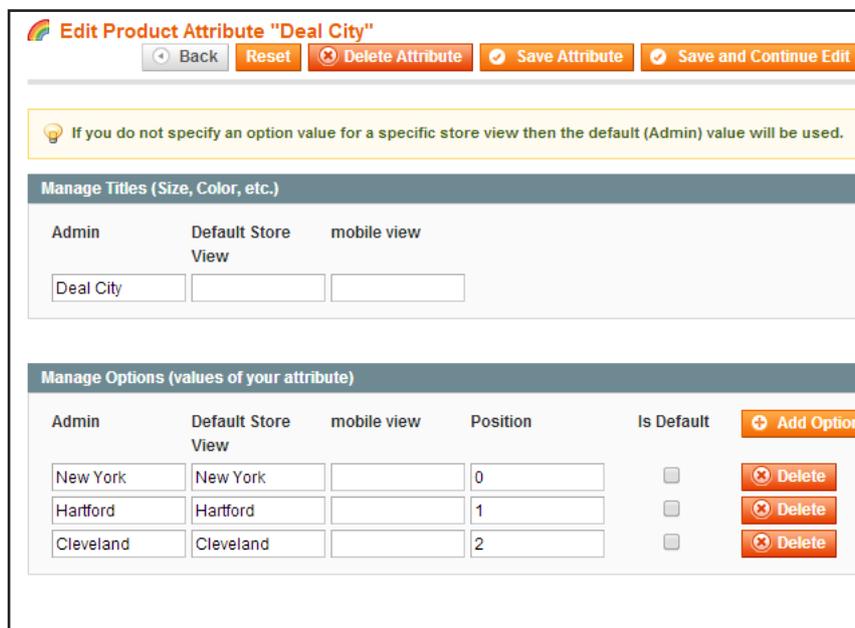

**Locale Options:** Here you can set the time zone of the country, location, first day of week and weekend days.

**Store Informations:** Here you can enter your store name, store contact number , country, VAT number , and store's contact address.

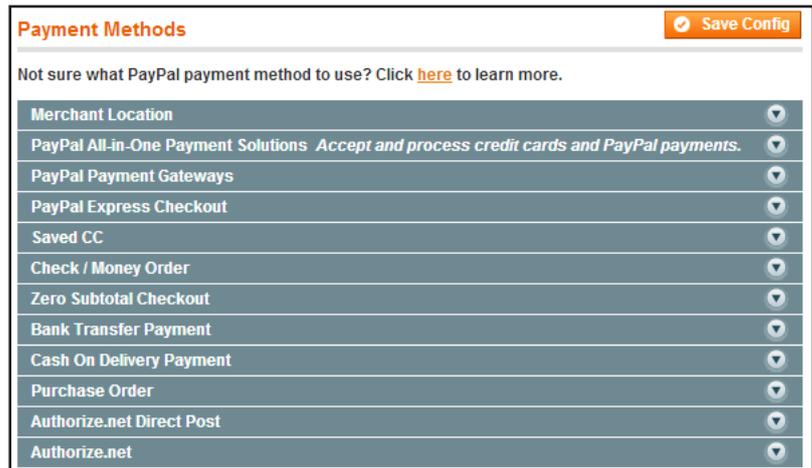

## Manage Cities

To add a new city or to edit the existing city, Go to admin --> Groupclone tab --> Localization--> Manage cities. This settings option will automatically redirect to the page under Admin --> Catalog --> Attributes --> Manage Attributes. Here you can find the list of attributes and from that please select the attribute "dealcity". Now you will get a page and kindly click the Manage label/option->Click Add Item. Here you can change or edit the existing city.

## Payment Settings

Payment settings option is to configure the payment method for the website. In order to configure the payment, go to Admin --> Groupclone tab --> Localization --> Payment settings. Here you can find the list of payment methods including default Magento payment methods.

## HD FLV player configuration

To configure HD FLV Player, Go to admin --> System --> Configuration--> Group Buying Setting --> HD FLV Player. Here, you can find two tabs for Player configuration and Front end configuration.

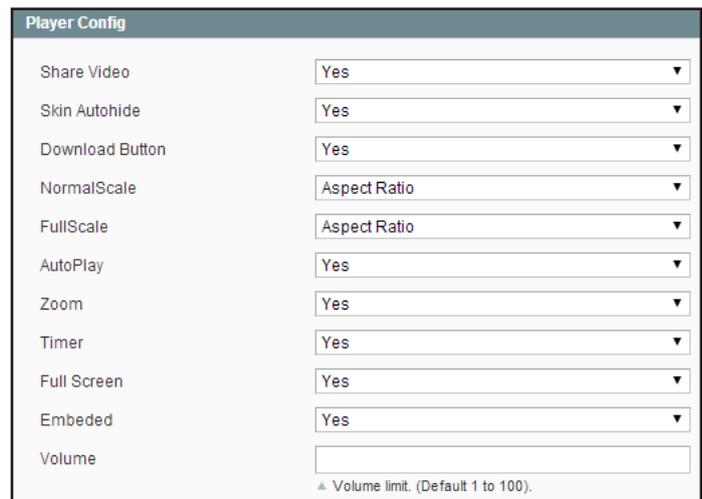

### Player Configuration

**Share Video:** Option to enable/disable “Share” button on the player.

**Skin Auto Hide:** Option to enable/disable player controls to be displayed on the player after a few seconds in idle mode.

**Download Button:** Option to enable/disable “Download” button on share section. Users can download your product videos by clicking on this button.

**Normal Screen Scale:** Provides three choices to set this function:

1. Aspect ratio which controls the player size proportionally
2. Fit to screen which plays the video to the player size that has been declared.
3. Original size plays videos in original size irrespective of the player size declared

**Full Screen Scale:** This setting affects only on full screen mode

**Autoplay:** Enabling this function starts playing video automatically without waiting for user to click the play option.

**Zoom:** Option to enable/disable “Zoom” button on the player control

**Timer:** Option to enable/disable Timer on player controls.

**Full screen:** Option to disable “Full screen” button on player control

**Volume:** Facility to set default volume level when the video is played

**Embed:** Facility to decide whether to show or hide Copy Embed option in “Share” section of the player.

## Front End Configuration:

**Default Product Banner:** Option to set whether to display Image/Banner or Video of any product by default or not.

## Apptha One Step Checkout

To configure Apptha One Step Checkout, kindly go to Admin --> System --> Configuration. Here, at the left hand side you will find Apptha One Step Checkout. Please click to configure the settings. For more information on One Step Checkout, refer the link given below

Link : <http://www.apptha.com/category/extension/Magento/OneStepCheckout>

## Translation

Follow the below steps to translate all keywords in GroupClone software to your language:

**Step 1:** Kindly go to the admin system->Magento connect->Magento connect manager-> Click Magento Connect. Get the language file from the link: <http://www.magentocommerce.com/translations> and install it.

**Step 2:** Go to admin-> system->configuration->General->Locale option->locale->change the language to Your language.

**Step 3:** Kindly find the attached document and translate all the text to your language and put the path given below. In regards with translation if you want to change any text, kindly follow the steps given below.

1. Login to your cpanel or ftp.
2. Go to app --> locale -->es\_MX ( your language).
3. Open Mage\_catalog.csv, Mage\_Contacts.csv, Mage\_Page.csv.
4. Add the text as per below format.

For example: "English Text";"Your Language Text" . For eg.,"Checkout";"Afrekenen"

**Note :** You need to make changes in all the three .csv files that have been mentioned above.

# FAQ

## 1. How to set the cron job in the cpanel?

For setting the cron job, we need to login to the cpanel, go to the cron job. Kindly checkout the below command for more details.

To set the cron job in the server,

```
***** php5 /absolute file path/cron.php>/dev/null 2>&1
```

\* - First star denotes the Minutes

\* - Second star denotes the hour

\* - Third star denotes the day

\* - Fourth star denotes the month

\* - Fifth Star denotes the week

Note: You can find the absolute file path, by running the yourdomainname/phpinfo.php and search 'script\_filename', here you can find the filename. Copy up to phpinfo.php and paste in the absolute file path in the command.

## 2. How to create a facebook api key?

- Go to the developers.facebook.com
- Go to the Apps->click 'Create New App', enter your app name and namespace, choose the category.
- Go to the settings enter your email address there and click 'Add Platform'->click 'Websites' ->
- URL -> enter your site url. Click 'Status & Review' ->Do you want to make this app and all its live features available to the general public?-> Click 'Yes' to make the app available for viewing by others.

## 3. How to create a twitter key?

- Kindly go to dev.twitter.com
- And go to My application->click 'Create new app' ->Enter all the necessary details and click 'Save'.

## 4. How to change the logo and Favicon in the Groupclone website?

First convert the logo in the five format with width =198 and height = 80. The five formats are logo.png, logo\_email.png, logo\_print.png, logo.gif, logo\_email.gif, logo\_print.gif. Login your ftp or cpanel, go to the root folder path and upload these images in the following paths:

```
Skin/frontend/default/{your_theme}/images/logo.png, logo_email.png,logo.gif,logo_email.gif,logo_print.png
```

```
Skin/frontend/default->default/images/logo.png, logo_email.png,logo.gif,logo_email.gif,logo_print.png.
```

```
Skin/adminhtml/default/default/images/logo.png, logo_email.png,logo.gif,logo_email.gif,logo_print.png
```

To change the favicon, Kindly login to ftp or cpanel, change the favicon in the below path

```
Skin->frontend->default->default-> you can find the favicon here, replace with your favicon
```

```
Skin->frontend->default->your_theme-> you can find the favicon here, replace with your favicon
```

```
Skin->Adminhtml->default->default-> you can find the favicon here, replace with your favicon
```

## 25. How to change the order status in groupclone website?

Login to the admin sales->order-> click 'edit order'-> click 'invoice'->Click 'submit invoice' to change the order status.

## 26. Why multiple items are not added in the shopping cart in Groupclone websites?

In our default script we don't have a option to buy multiple product in the shopping cart. if we allow the users to buy 2 different kind of products then it will lead problem when sending coupon as well as in refund the money. Consider if we allow an user to buy 2 products such as A & B in the same purchase.

If product A achieves and B does not achieve (this portion needs to be rephrased for better understanding) then we could not send coupon for product A alone as the order ID will be same for both the products. Coupon will be sent based on Order ID , Order Status and the deal status. This is same for refund also.

## 27. How to set the timezone in the Gropclone website?

Login to the admin system->configuration->General->TimeZone --> Here you can set the time.

## 28. How to set the email address in the Groupclone website?
