- 2 Epilating head
- 3 On/off slide
- 4 Socket for appliance plug
- 5 Adapter
- 6 Appliance plug

Important

Read this user manual carefully before you use the appliance and save it for future reference.

PHILIPS

- Do not use the appliance on irritated skin or skin with varicose veins, rashes, spots, moles (with hairs) or wounds without consulting your doctor first. People with a reduced immune response or people who suffer from diabetes mellitus, haemophilia or immunodeficiency should also consult their doctor first.

Your skin may become a little red and irritated the first few times you use the epilator. This phenomenon is absolutely normal and quickly disappears. As you use the appliance more often, your skin gets used to epilation, skin irritation decreases and regrowth becomes thinner and softer. If the irritation has not disappeared within three days, we advise you to consult a doctor.

- Use and store the appliance at a temperature between 15°C and 35°C.
- Never try to trim your eyelashes.
- If the appliance is subjected to a major change in temperature, pressure or humidity, let the appliance acclimatise for 30 minutes before you use it.

General

- This symbol means that it is not allowed to use this appliance in a bath or shower. (Fig. 5).
- The adapter is equipped with an automatic voltage selector and is suitable for mains voltages ranging from 100 to 240V.

Compliance with standards

This Philips appliance complies with all standards regarding electromagnetic fields (EMF). If handled properly and according to the instructions in this user manual, the appliance is safe to use based on scientific evidence available today.

Using the appliance

- Note:** Clean the epilating head before first use.
Note: This appliance cannot be used cordlessly.
You can only use it in combination with the adapter supplied.

- Epilation is easier just after taking a bath or shower. Make sure your skin is completely dry when you start epilating.
- Make sure your skin is clean, entirely dry and free from grease. Do not use any cream before you start epilating.
- Epilation is easier and more comfortable when the hair has the optimum length of 3–4mm. If the hairs are longer, we recommend that you

Caution

- This appliance is only intended for removing women's body hair from the legs. Do not use it for any other purpose.
- To prevent damage and injuries, keep the running appliance away from scalp hair,

- shave first and epilate the shorter regrowing hairs after 1 or 2 weeks.
- We advise you to epilate in the evening so that any reddening that develops can disappear overnight.

Connecting the appliance

1 Insert the adapter into the wall socket.
2 Insert the appliance plug into the appliance (Fig. 6).

Epilating the legs

- 1** Stretch the skin with your free hand to make the hairs stand upright. Place the epilating head at an angle of 90° onto the skin with the on/off slide pointing in the direction in which you are going to move the appliance. (Fig. 7)
- 2** Move the appliance slowly over the skin, against the direction of hair growth. (Fig. 8) Press the appliance lightly onto the skin.

Cleaning and maintenance

- Never rinse the appliance and the adapter under the tap (Fig. 9).
- Keep the appliance and the adapter dry (Fig. 10).

Never use scouring pads, abrasive cleaning agents or aggressive liquids such as petrol or acetone to clean the appliance.

Cleaning the appliance

- 1** Switch off the appliance and disconnect it from the mains.

2 Push the epilating head in the direction of the arrows on the back of the appliance (1) and remove it (2) (Fig. 11).

3 Rinse the epilating head under the tap for 5-10 seconds while turning it.

4 Shake the epilating head firmly (Fig. 12).

5 Dry the epilating head thoroughly with a tea towel.

Note: Make sure the epilating head is completely dry before you place it back onto the appliance.
