Airvita is taking up an SSangyong fire&products' liability insurance policy.

REFRESH YOUR EVERYDAY! -TECHNOLOGY OF AIRVITA

Airvita's air cleaners technology does not use former high-pressure system but it use low pressure system. At this low pressure system, the air cleaners produce much of air vitamin caused by potentiometric method. This is AICI (Airvita Ions-ozone Complex Ionization), which is Airvita's exclusive and unique technology.

The products generate Bactericidal ion (OH-hydroxyl HOO-hydro Medical), while finding the optimal combination of ion that exists in nature. Airvita's antibacterial function and odor removal function can be excellent by using this technology. This method is superior to Plasma(=corona technology). But most of the Anion air cleaner manufacturers still use this way.

Quality Guarantee

Product Name	AIRVITA AIR CLEANER	Model No	S-AIRVITA
Date of Purchase	20	* Warranty Period : UP to 1 year from the date of purchase	
Name of Customer		Phone	
Address of Customer			

We agree to provide Warranty Program in case of breakage or malfunctioning under conditions stated below with no extra cost.

1. In case of product defects after the initial installation.
2. Breakage because of manufacturing defects

In the following case small fees will be charged to customers.

1. Breakages after warranty period
2. Breakages caused by customer carelessness (Moving and excessive handling of the products)
3. Breakages caused by natural disasters such as fires, floods, voltage problem, etc.
