

User's manual of the DESADV Testing Web platform

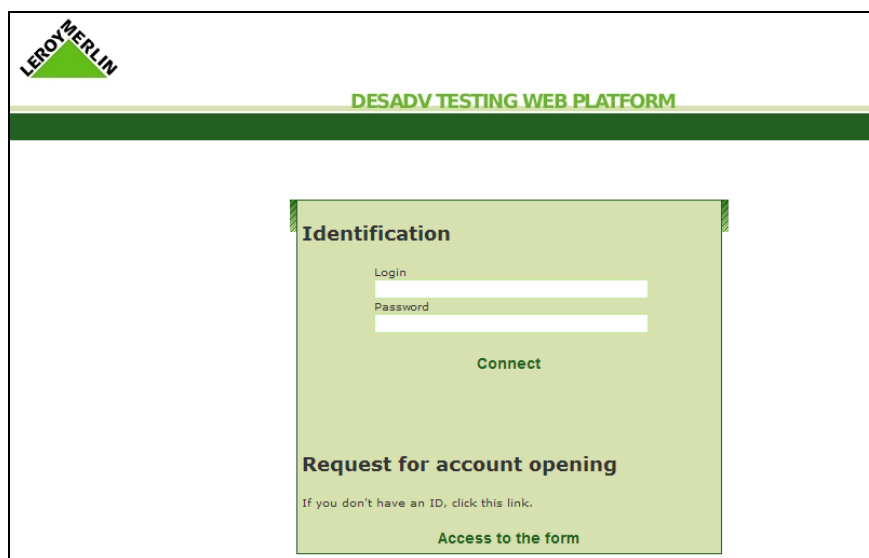

Edition 1 of 20/03/2009

The DESADV Testing Web platform is available in French and English.

1. Connection to the DESADV Testing Web platform

Enter the following URL: <http://leroymerlin.icdsc.com>

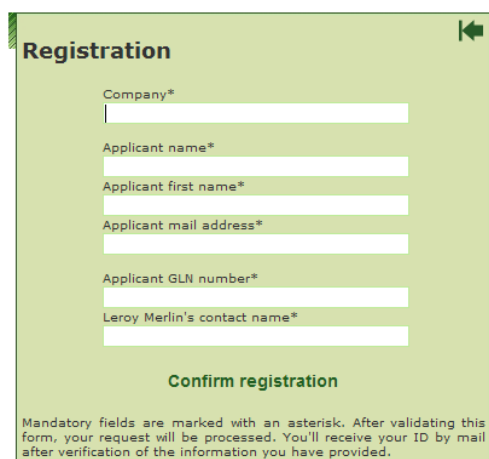

Login and authentication screen to the DESADV Testing Web platform:

The screenshot shows the login and authentication screen for the DESADV TESTING WEB PLATFORM. At the top left is the Leroy Merlin logo. A green header bar contains the text "DESADV TESTING WEB PLATFORM". The main content area is white and contains a green-bordered box with the following elements:

- Identification**
- Login input field
- Password input field
- Connect** button
- Request for account opening**
- If you don't have an ID, click this link.
- Access to the form** button

At the first connection you have access to the application form ID by clicking on "Access to the form". You are led to a registration form:

The screenshot shows the registration form. It has a green header bar with a back arrow icon. The form is titled "Registration" and contains the following fields:

- Company*
- Applicant name*
- Applicant first name*
- Applicant mail address*
- Applicant GLN number*
- Leroy Merlin's contact name*

Below the fields is a **Confirm registration** button. At the bottom, a note states: "Mandatory fields are marked with an asterisk. After validating this form, your request will be processed. You'll receive your ID by mail after verification of the information you have provided."

Fill all the fields and submit the registration form by clicking "Confirm registration".

An email is automatically sent to the Leroy Merlin administrator whom is in charge of account acceptance and validation.

If Leroy Merlin accepts your registration, you will receive login and password by mail. So, you can use this platform.

2. Scheduling tests

The screen has two tabs that have the function:

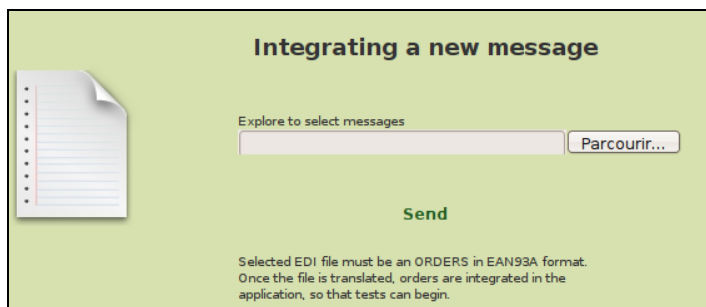

- Order translation
- DESADV messages tests

The tests are carried out in several steps.

1st step: Integration of orders in EDI format

Click on the first icon  and select the EDI file to import.

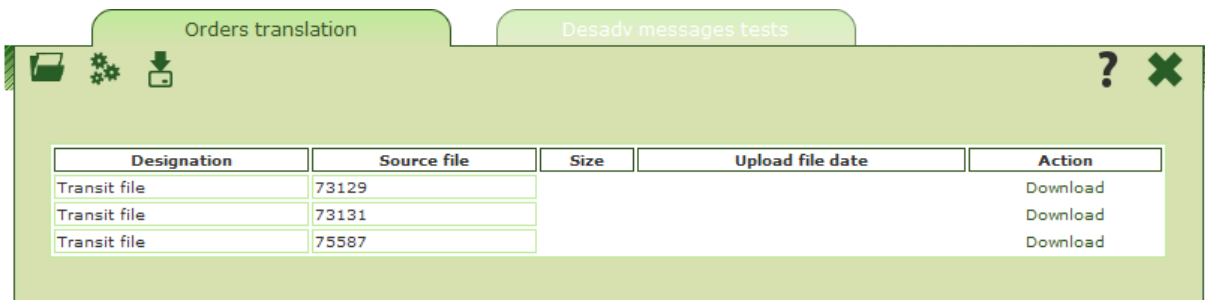

Your orders are therefore in the table.

Designation	Source file	Size	Upload file date	Action
Order number 62991077	464100	4020	2009-03-31 11:48:29	Delete
Order number 62994377	464100	4020	2009-03-31 11:48:29	Delete
Order number 62998606	464100	4020	2009-03-31 11:48:29	Delete
Order number 62999466	464100	4020	2009-03-31 11:48:29	Delete
Order number 62995406	464100	4020	2009-03-31 11:48:29	Delete
Order number 82457567	464100	4020	2009-03-31 11:48:29	Delete
Order number 83108435	464100	4020	2009-03-31 11:48:29	Delete
Order number 87011672	464100	4020	2009-03-31 11:48:29	Delete
Order number 87332250	464100	4020	2009-03-31 11:48:29	Delete

2nd step: Orders Translation as Transit format

Click on the second icon  so that your orders can be actually converted to transit orders.

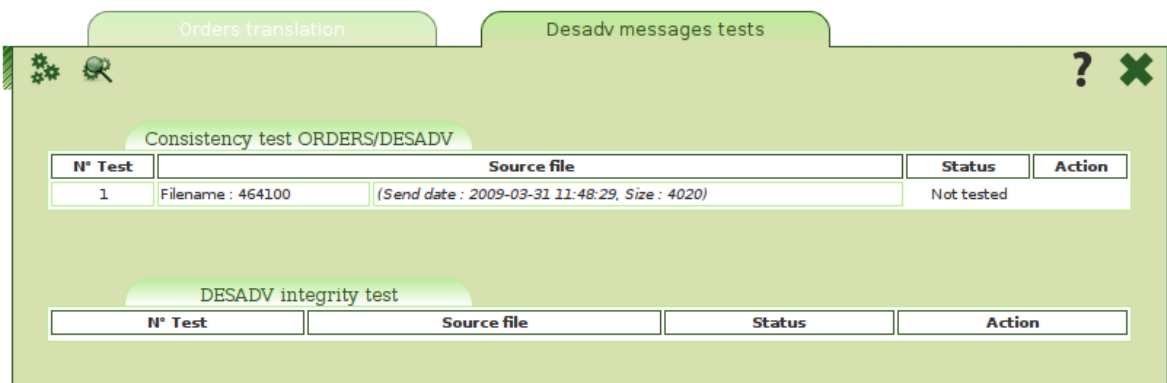

Designation	Source file	Size	Upload file date	Action
Transit file	73129			Download
Transit file	73131			Download
Transit file	75587			Download

You can now download the Transit file and integrate it into your information system in order to create the DESADV.

3rd step: Checking DESADV message

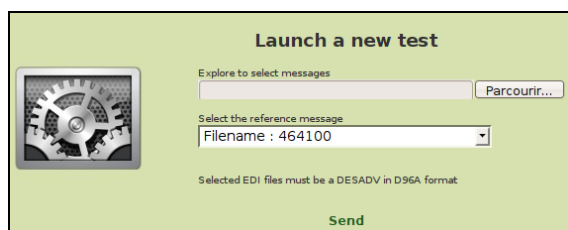

To access the DESADV consistency test, click the second tab "Desadv message tests".

N° Test	Source file	Status	Action
1	Filename : 464100 (Send date : 2009-03-31 11:48:29, Size : 4020)	Not tested	

N° Test	Source file	Status	Action
---------	-------------	--------	--------

Click on the first icon  and select the DESADV corresponding to the order.

Launch a new test

Explore to select messages

Select the reference message
Filename : 464100

Selected EDI files must be a DESADV in D96A format

The platform does several checkouts:

- The integrity of the EDI message
- The consistency of the EDI message
- Data consistency
- The contents of the message

and counts and displays alerts and blocking-errors. Then you can download the report in text format.

Orders translation

Desadv messages tests

<

You have to succeed in passing 3 successive tests with 3 different DESADV in order to meet Leroy Merlin's requirements for migrating to production environment.

As soon as the required test sequence is carried out successfully by an applicant, an email is automatically notifying it to Leroy Merlin's administrator, whom then takes on planning further steps for production migration. You can also test **the integrity and compliance** of your unrelated to order transit DESADV.

To do this, click on the second icon  and select your DESADV.

Send

Same steps as before and you go to the results in the second part of the screen "DESADV integrity test ».

DESADV integrity test			
N° Test	Source file		Action
26	Filename : 349.edi	(Send date : 2009-02-13 17:06:33, Size : 3313)	Test validated
30	Filename : Aviso_expedicion_LM.edi	(Send date : 2009-02-13 17:17:29, Size : 45123)	Test failed
31	Filename : Aviso_expedicion_LM2.edi	(Send date : 2009-02-13 17:19:40, Size : 45043)	Test failed

3. Problem use

If you have any questions regarding the use of the platform click on the Help button  which helps you online in each page.

If however, you couldn't find answers to your questions, you can contact by mail ICDSC technical support supportedi@icdsc.com available on the platform by clicking on "Technical support".
