Functional definitions for buttons in keyboard

Operation details

Application window

The home display screen is divided into three parts: the top one is Title and status bar, the middle one is content area and the bottom one is page number area.

Title: the name of the file which is applied.

Status bar: time, battery (battery charge status and charging) etc are displayed.

Content area: correspondent functions are displayed on this area, such as functions, file list, texts, pictures etc.

Page number area: the page number of current contents is displayed on this area

Home screen with OSD

The home screen OSD displays all the system menus including “Recent Reading”, “My Books”, “My Music”, “My Pictures”, “Memory Center”, “Radio” “Settings”, “User Manual”, and “shut down” (this only can be seen in “Icon view” mode). Choose correspondent function to activate it.

Warn Note:

In the home screen OSD mode, press the “menu” button to pop up optional menus, you can choose the OSD view mode by “Icon view” and “List view”

Recent Reading

After reading the ebooks in “My Books” or “Memory Center”, the reading history will be recorded in “Recent Reading” menu. Therefore, the user can open these ebooks at faster speed in “Recent Reading” menu, if they want to carry on reading of these files.

In the “Recent” mode, press the “Menu” button to pop up optional menus, you can delete the ebooks in “Recent Reading”.

Warn note:

At most 9 pieces of reading history records can be saved. So if there are more than 9 pieces, the previous ones will be replaced by the latest ones automatically.

In the first time you use the device, The Micro-SD card will automatically create three file folders: “Documents”, “Music”, and “Pictures”

“Documents”: user can store eBooks in this file folder.

“Music”: user can store music files in this file folder.

“Pictures”: user can store picture files in this file folder.

My Books

Supported formats

The device supports e-books in the format of EPUB 、 FB2 、 HTML 、 PDF ,TXT,CHM,RTF, PDB

Open book

Choose “My Books” or “Memory Center” menu and press “OK” button to move into book lists window, on which all the e-books stored in memory card as well as their attributives are displayed. The user chooses the wanted one and presses “OK” button to start reading.

Search book by name

In the book lists, if you have many pages of different books, and if you want to search one of books to read, you can press the “menu” button, and there is a “search by name” menu, type the book name, and then you can go to this book, and choose it to read.

Delete books

In the book lists, there are many books, if you want to delete the book you choose, you can press the “menu” button, and there is a “Delete” in the menu list. Press this “Delete” menu, you can delete one ebook.

Turning page

In the reading book mode, the user can press “previous page” button and “next page” button or press left button and right button in “five-way navigation key” to last page or next page .(The left button and right button can not turn page in the PDF files reading)

Zoom out/in

There is two ways to zoom out or zoom in:

- 1, In the reading book mode, press “menu” button to pop up with menu lists on which the user can chooses Zoom out  or Zoom in  icons to make the reading words big font or small font.
- 2, In the reading mode, user can push the up button and down button in the” five-way navigation key” to zoom out and zoom in. (The up button and down button in the” five-way navigation key” can not zoom out and zoom in in reading the PDF files format)

Go To Page

In the reading mode, press “menu” to pop up with menu lists, choose “go to page” icon  and appear a window for page number typing. You can press the button “  and at the same time to type the number from the keyboard to go to the page you want to go. If you type the wrong number, you can press “delete” button “  ” to delete the wrong number and type again.

Text search

In the reading mode, press “menu” to pop up with the menu lists, choose  icon to come out the window for text search. Type the word you want to search and press”ok” button to find the word you want to search.

Rotate the reading content

In the reading mode, press “menu” button to pop up with the menu lists, choose the icon  on which the user can rotate the reading content. This function is a way of manual application by G-SENSOR.

If you open the “G-sensor” function in the “settings”, you can rotate the reading screen automatically, and then have a better reading interface vertically or horizontally.

Bookmark

On the convenience of the user, bookmark is designed to help the user to resume reading where user left last time automatically.

In the reading mode, press “menu” to pop up with the menu lists, press the bookmark icon  to add new bookmark. Press the bookmark lists icon  to check all the bookmarks you made. Next time when you press one of the bookmarks you made, you will go to the reading position last time you read in the bookmark.

PDF reading edition style

In the PDF format reading mode, you can press the “menu” button to pop up with the menu lists, choose the PDF reading style icon . You can change the different reading style in the PDF reading by choosing this icon

In the PDF format reading mode, press the “menu” to pop up with the menu lists, choose the PDF reading edition style icon  and change the PDF reading style between “Stream reading display” and “composition reading display”. The system defaults the PDF reading as “composition reading display” and will cut the white empty edge automatically. In the “Stream reading display”, the reading content can not be displayed

in full display, there is the arrow icon to indicate the reading content in the reading interface. User can move the “Right arrow” or “Left arrow” buttons to show the contents to read.

Warn note:

In PDF or other ebook formats reading, if the screen can not display the word font clearly, please press the “flush” button in the keyboard to flush the display, which will cause a good display reading result.

Flush setting

In the reading mode, press the “menu” to pop up with the menu lists, choose the flush icon  to open the flush options. There are three flush options “full flush”, “Local flush”, “Black and white flush” and “Full display flush every five minutes”

The flush setting is only for turning page display flush in the reading process
“Full flush”, when full flush is done, the display will be dark suddenly when turning page. This flush mode is the best display flush mode in the reading process, but the disadvantage is the display will be dark suddenly.

“Local flush”, when local flush is done, the reading content area will flush slowly to next page when turning page, this flush mode is good for reading in the reading process, if combine with the “Full display flush every five minutes”, the display flush result will be better.

“Black and white flush”, it means the black and white font flush in the reading process, the speed to show reading content is fast when turning pages, but the disadvantage is the reading font is not so clear. Suggest combining “Full flush every five minutes” to use in the same time.

In the reading interface, the system defaults the flush setting as “local flush”, user can set the different favorite flushing mode.

In the reading mode, if the screen can not display the word font clearly, please press the “flush” button in the keyboard to flush the display, which will cause a good display reading result.

Warn Note:

1, Pressing "back" button or press "menu" button again can be back from the menu or the function window.

2, only 5 bookmarks can be added, when bookmark positions are more than 5, the last one will be replaced automatically.

3: In the reading mode, press "System setting", you can go to the "Settings", and choose the font you love for reading.

4: In the reading mode, press the "flush" button in the keyboard, you can flush the display.

This user manual has been specially designed to guide you through the functions and operations of this device in details.

Shutdown

Choose “Shutdown” on the main home screen and press “OK” button to come up with dialog box saying “Shutdown?”, and then if the user chooses “OK”, the device will power off; if the user chooses Cancel, the user will be back out of the current interface.

System updating

To obtain updating files

Download the latest update software kit on www.wolder.com

Updating procedure

- 1: Connect the device with computer through USB cable and backup data in a Micro-SD card.
- 2: Conduct formatting operation on Micro-SD card during which choose FAT system (non-FAT32).
- 3: Copy the latest update software kit to the root of Micro-SD card.
- 4: Disconnect the device from the computer.

5: Press the” power on/off” button to power on the device at the same time pressing the “OK” button to start the update process.

6: After updating (if there is any mistake, the related tips will be displayed on the screen), the device will restart automatically.

Warn note:

1, When you update the software, please make sure the battery has enough power to complete the operation.

2, Note that the device only supports SD cards of up to 2GB or less for the software upgrades. When formatting the SD card, please choose FAT(NOT FAT32) format.

Attentions

Safety

Always keep your hands off this device while driving. Your first consideration should be road safety.

Display screen

Do not shake, press or hit against this device violently in case of damage the screen because of great pressure on the screen and the device.

Memory card

After plugging on or out the memory card, be sure to restart the device to refresh the contents in card.

Prevent to delete and save data when the battery is in low charge status, because under this occasion reading and writing mistakes are often produced.

You device is not heat-resistant and water-resistant, so keep it dry and cool. Do not expose the memory card to the high temperature or directly strong sun-shine. Do not press or bend memory card. Prevent the card from falling or being knocked violently.

Make sure the memory card stay away from the materials which are characterized by static electricity, magnetic field and corrosion. Do not disassemble the card in order not to touch upon the storage medium of memory card. It is necessary to backup the data in the memory card on regular basis in case of accidents.

When you conduct reading and writing, the space of memory card may disappear in mystery after successive erasing. It is the same with disks. After frequently saving and deleting, then some document fragments can be formed. We can not arrange these fragments and formatting is the only way to solve the problem.
