

The first mobile that doesn't need a user manual.

The new emporiaLIFE.

With the new emporiaLIFE, our main focus was to make it as uncomplicated as possible for you to make calls. In the development process a lot of attention was paid to user friendliness - the special display enables excellent readability and the large tactile keys are at your finger tips by simply sliding the phone open. The unique defining highlight of the EmporiaLIFE phone is the emergency call function: By pressing the button situated on the back of the phone, it will automatically dial up to five preset emergency numbers, making sure you are always on the safe side.

Communication made easy.

emporia

More safety.

Simple operation

Large display and buttons

High volume speaker and ringtone

Emergency function

Technical profile:
