EBiz Micro Membership Wordpress Plug-in

Overview and 5 Step Quick Start Guide

© 2012 Syncnet

eBiz Micro Membership Wordpress Plug-in

EBiz Micro Membership is a basic, easy to use Wordpress plug-in that adds "membership" functionality to your Wordpress blog. The real benefit of this plug-in is that it seamlessly integrates PayPal or ClickBank payment processing into your blog allowing you to charge for contact and automatically collect payments from your users.

Fully Automated Membership System

EBiz Micro Membership fully automates your membership system from the user registration to confirmation of payment and account activation. EBiz Micro Membership integrates with the subscription and notification services of both PayPal and ClickBank to fully automate the subscription billing and payment process. EBiz Micro Membership generates the required PayPal or ClickBank "Subscribe" buttons on the fly, so you don't need to add or change any Wordpress code.

Fast Activation & Install

EBiz Micro Membership installs just like any other Wordpress plug-in. You can use the Wordpress Manual installation process or you can install "the old way" - using FTP to place the plug-in in your Wordpress plug-ins directory.

Three (5) Membership Levels

EBiz Micro Membership creates and manages three payment levels:

- Free the user has registered thru Wordpress but has chosen not to pay for a subscription
- Standard the user has paid for the "standard" subscription
- Premium the user has pain for a "premium" level subscription
- Executive the user has paid for an "executive" level subscription
- Elite the user has paid for an "elite" level subscription

You don't have to implement all five subscription levels; for example, you may only use the "Paid" subscriptions. That's fine – EBiz Micro Membership still works great.

Flexible Subscription Intervals

You can set how often the PayPal or ClickBank subscription service will automatically collect payments, anything from 1 day to 9999 years.

Content Teasers and Content Protection

With EBiz Micro Membership every post or page of your blog can have a mix of unprotected text (content everyone can view) and protected text (only viewable by registered users at the proper subscription level). This allows you to create "teaser" text that everyone can view but hide the remainder of the content from users who have not paid to see it.

Start Your Own Affiliate Program

EBiz Micro Membership fully integrates with ClickBank allowing you to recruit an army of ClickBank affiliates to promote and send traffic to your membership site. We highly recommend Clickbank as your payment processor because of their network of 100,000+ affiliates.

EBiz Micro Membership - 5 Step Quick Start

STEP #1 Install the Plug-in(s)

Currently there are three (3) plug-ins for EBiz Micro Membership. There's EBiz Micro Membership itself and its companions, EBiz Micro Membership Button Editor, and EBiz Micro Membership Gradual Content. These plug-ins are installed like any other Wordpress plug-ins. The companion plug-ins are separate (for now) and add a "\$" button to the editor window for making EBiz Micro Membership payment buttons and add support for gradual content delivery.

If you're unfamiliar with installing Wordpress plug-in, this link has excellent, step-by-step installation instructions:

How to Install a Wordpress Plug-in

You will have to use installation option 2 (Manually uploading a plug-in through Wordpress) or 3 (Manually uploading a plug-in via FTP) for these plug-ins and each will be installed separately.

STEP #2 Configure EBiz Micro Membership

Go to EBiz Micro Membership configuration page (Settings | EBiz Micro Membership Configuration). The options there are explained by help text to the right of the page. Here are the options you should set immediately:

- 1. Your email address that will be accepting PayPal payments
- 2. An authorization code (make one up)
- 3. Your ClickBank Vendor ID and Authorization Key (if you're using ClickBank)
- 4. Check the Use CB or PayPal for Subscriptions box to automatically bill your users. If you check this box, make sure you select the appropriate payment processor under Subsr. Processing
- 5. Fill in default values for the Item Name, Item Number, Payment Amount, Currency Code, and Payment Period for the primary subscription. These values can be overridden by payment buttons you'll place on your subscription payment page.
- 6. Choose your own Subscription Payment Page Title or accept the default "[pay]" and use that as the title of your Subscription Payment Page
- 7. If you're using the Gradual Content Delivery feature, set the Top Level Course Category to the category (your choice) that will hold all of your dripped content. (More on this later.)

STEP #3 Create Your Subscription Payment Page

This is the most difficult aspect of the installation. That's because EBiz Micro Membership doesn't use your Wordpress theme for the Subscription Page. Consequently, to get it to look decent, you'll have to stick some HTML on the page.

Here's sample code you can use to start out with:

<div style="width: 500px;">

Yes! For just \$1 per week I want to have full access to all of the information on the How to Do It Fast web site.

[paybutton]\$1 Subscription | 1001[[-STANDARD-]]|1|USD|1|W|[/paybutton]

<hr />No thank you. I'll take the free access.

I understand the full access offer above is a one time offer that is only available during this signup process and will never be available again.

[freebutton]Free Subscription | FR1001 | 0 | USD | 85 | D | [/freebutton] </div>

And the steps to use the sample code:

- 1. Copy the code above
- 2. Create a new Wordpress Page.
- 3. Type [pay] as the title (or whatever you replaced [pay] with in EBiz Micro Membership Configuration Page)
- 4. Click on the "HTML" tab
- 5. Paste the code from this document
- 6. Click the "Visual" tab
- 7. Edit the text as you normally would

Without any changes, this page will display like:

You can get creative with your Wordpress editor and make a much more attractive page. When this page is displayed, it doesn't use your Wordpress theme which sets it apart from your normal content and lets your subscribers know that something needs to be done. The key here, however, is in the two buttons – the [paybutton] and the [freebutton]. Notice how EBiz Micro Membership automatically replaces the button code with the appropriate PayPal or regular button.

*** IMPORTANT ***: You will not see your payment buttons unless you create a test user and attempt to log in as that user. For details, please see the FAQs at the end of the document.

STEP #4 Configure Your Payment Button(s)

EBiz Micro Membership has a nifty button editor that frees you from having to worry about the [paybutton] and [freebutton] syntax. Simply click on the **\$** to display the editor window.

Micro-Membership Button Editor	Fill in the Basic information.
Basic Subscription	
Item name: * Item No: * Amount: Currency: USD	Item name, Item No., and Amount are used by nearly all of the button types.
* - Required	**IMPORTANT**: If you are using ClickBank, the
Cancel Insert	"Item No:" field must contain the ClickBank item number of the product you have created in ClickBank.

Micro-Membership Button Editor X Basic Subscription Subscription Type: Standard V Duration: Day(s) V Initial Trial Amount: Initial Trial Duration:	Click the Subscription tab and fill in the subscripton information. Choosing Subscription Type to "Free" will create [freebutton][/freebutton] tags while the "Standard" and "Premium" subscription types create the [paybutton][/paybutton] tags that translate into either the PayPal or ClickBank "Subscribe" button.
Cancel Insert	 PayPal and ClickBank lets your subscribers sign up for an initial trial For example: Initial Trial Subscription: <i>\$1 for 14 days</i> Regular Subscription: <i>\$27 each month after</i> If you want to offer an initial trial subscription, fill in the amount and duration below the line.

STEP #5 Protect Your Content

Protecting (hiding) content is easy using EBiz Micro Membership. Simply use **[pay][/pay]** tags around protected text to hide content from Free (registered or unregistered) users.

Ex.: [pay]** this text will be hidden **[/pay].

To hide text from Free and Paid users so only Premium subscribers have access, use [pay-prem][/pay-prem] tags.

Here's a more visual example. If the code in your post or page looks like this [pay]then this text would be hidden from all unpaid subscribers (registered or not).[/pay]

When the unpaid user visits that post or page, it will look like this:

Here's a more visual example. If the code in your post or page looks like ...

Login/Register to see more

The <u>Login/Register to see more</u> is a link to your Subscription Payment Page and the text is configurable on the EBiz Micro Membership Configuration page using the "Login Message" parameter.

To hide text from unregistered visitors so that only registered users (Free, Standard, Premium, Executive, and Elite) subscribers have access, use [free-reg][/free-reg] tags.

To hide text from Free and Paid users so only Premium, Executive, and Elite subscribers have access, use **[pay-prem][/pay-prem]** tags.

To hide text from Free and Paid, and Premium users so only Executive and Elite subscribers have access, use **[pay-exec]** [/pay-exec] tags.

To hide text from Free and Paid, Premium, and Executive users so only Elite subscribers have access, use **[pay-elite][/pay-elite]** tags.

To hide text from paid subscribers use **[free][/free]** tags. These tags can be used to hide stuff from paid members that doesn't relate to them. For example, a single post could tell the free members what they're missing, while giving different levels of paid members the content without having to see the "pitch."

Managing User Subscriptions

EBiz Micro Membership uses Wordpress capabilities to record the membership access levels. EBiz Micro Membership adds three (3) custom capabilities: Read Registered, Read Paid, and Read Premium. Here's how they're used to define subscription levels.

Membership	Capabilities									
Levels	Read Registered	Read Paid	Read Premium	Read Executive	Read Elite					
Free	Х									
Paid	Х	Х								
Premium	Х	Х	Х							
Executive	Х	Х	Х	х						
Elite	Х	Х	Х	Х	х					

Here are cropped screen shots from the Wordpress "Edit User" screen.

First, a user with a "Free" subscription:

	Туре ус	our new password again.
	Strength indicator	Hint: The password should be at least seven characters long. To make it stronger, use
	symbols like ! " ? \$ % ^ &).	upper and lower case letters, numbers and
	Additional Capabilities	read_registered
Update User		

Next, a user with a "Standard" subscription:

	Туре уоц	ır new password again.			
S	Strength indicator	Hint: The password should be at least seven characters long. To make it stronger, use			
symbols li	ike!"?\$ % ^ &).	upper and lower case letters, numbers and			
Additional Capabilities	read_regis	tered, read_paid			
Update User					

Finally, a user with a "Premium" subscription:

	Type your new password again.						
	Strength indicator	Hint: The password should be at least seven characters long. To make it stronger, use					
	symbols like ! " ? \$ % ^ &).	upper and lower case letters, numbers and					
Additional Capabilities	read_registered, read_pa	aid, read_premium					
Update User							

Although it's something you shouldn't need to do often, EBiz Micro Membership makes easy work of managing your subscribers. You can access the screen from the **EBiz Micro Membership User Manager** submenu of the Users menu (assuming you have rights to Edit Users – which the admin does).

This will display EBiz Micro Membership's user administration page.

	User Usedate
🟦 Dashboard	User Update

Add New	
Your Profile	Title Post ID Item Number
> Micro-Membership	
User Manager	None Yet
Roles	

Enter a Username in the first text box and click the "Get User Info." button. EBiz Micro Membership will read the user's information from the database and display it for viewing an update.

WARNING: If you're using PayPal's subscription processing, you should be very careful when changing the "Next Payment Date" for a paying customer. Changing it here **does not** change the subscription information stored on PayPal. You don't want to get these out of sync.

Managing Category Access

EBiz Micro Membership has the ability to assign access to Wordpress categories by subscription level. You can place posts in categories and then limit access to subscribers of a certain level. For example, you may have a category for just your Premium subscribers. Any posts placed in

that category cannot be viewed by logged out, free, or standard subscribers. The protected categories won't even show up in standard Wordpress lists (sidebars, menus, search results, widgets, etc.) unless the user has access to them.

EBiz Micro Membership Category Security can also be used to hide tailor the display properties of categories that have nothing to do with security of subscribers. It works well with the Event Calendar plug-in to hide the category from normal lists and search results. Consequently, the events show on the event calendar sidebar widget but don't show up anywhere else.

Category access is managed using EBiz Micro Membership Category Security screen which is part of the "Posts" menu.

Selecting EBiz Micro Membership Category security from the menu displays EBiz Micro Membership Category Security screen.

Micro-Membership Category Security									
ID Name	Visibility Subscriber								
9 Assignments	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Unrestricted 💌							
6 Equipment	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Standard 💌							
3 Events	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Unrestricted 💌							
11 Fun Stuff	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Registered 💌							
8 Markets	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Unrestricted 💌							
5 Plans	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Unrestricted 💌							
7 Private	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Premium 💌							
10 Promotions	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Unrestricted 💌							
4 Public	Front: 🗹 List: 🗹 Search: 🗹 Feed: 🗹 Archives: 🗹 User Level: 0	Unrestricted 💌							
1 Uncategorized	Front: 🗌 List: 🗌 Search: 🗌 Feed: 🗋 Archives: 🗌 User Level: 0	Unrestricted 💌							
 Front: Visibility on the front/main page. List: Visibility on the list of categories on the sidebar. Search: Visibility in search results. Feed: Visibility in RSS/RSS2/Atom feeds. Archive: Visibility in archive links (i.e., calendar links). User Level: Visibility on user level basis. All users this level and higher can see categories as checked. Does not affect feed visibility, obviously. Numeric User Levels: Administrator: 10, Editor: 7, Author: 2, Contributor: 1, Subscriber: 1 Subscriber Levels: Unrestricted (everybody). Registered (all registered users). Standard, and Premium. 									

Simply choose the subscription level from the drop-down on the right of the screen. In the illustration, posts in the Private category can only be viewed by Premium, Executive, and Elite subscribers. Unregistered (logged out) users, Free, and Standard subscribers would not see the category on any standard Wordpress lists nor will they see any posts in the Private category.

Managing Gradual Content Delivery

Gradual Content Delivery (also known as "dripped content") allows you to do a timely release of your membership site's information instead of making it available all at once.

To use gradual content delivery:

1. In the EBiz Micro Membership Configuration Page (under the Wordpress "Settings" menu), specify the category that will be the top level category for your dripped content. You'll create "courses" and modules underneath this category to hold you dripped posts.

The		
Post Payment Page Title	[Payment Options]	Optional. The page title of a special page for purchasing credits to publish posts.
Category Payment Page Title	[Payment Levels]	Optional. The page title of a special page for purchasing categories.
Top Level Course Category	Courses	Required for gradual content delivery. 'Courses', 'Modules', and 'Nodes' are subcategories of this category.
Update Options »		

2. Build your lists of "Courses" and "Modules". The name of the courses and modules is not relevant – name them what you'd like. What is important is their position. Courses must have as their parent the designated Top Level Course Category – in the example below; for example, the category "Courses" (set on the EBiz Micro Membership Configuration Page above).

Course #1 is a course. Notice that its parent is the top level category "Courses".

Module 1.1 is a module of Course #1 since Course #1 is its direct parent.

Node 1.1.1 is a category that belongs to Module 1.1 and can be used to hold and organize content for the module.

The dripped content is "secured" by course and "delivered" by module. You'll get a better understanding of this concept from the EBiz Micro Membership Course Maintenance Screen discussed next.

3. The EBiz Micro Membership Course Maintenance screen (located under the "Tools" menu) is where you specify your security and setup the delivery schedule for your content.

🖀 Dashboard	Micro-Membership Course Maintenance									
«	ID	Order Name S		Schedule Type	Interval	Date				
🖉 Posts	1.1									
ট্যে Media	13		Course #1	Apply to:	Registered: ♥ Standard: Pre Executive: Elite: ■	emium: 📃				
🖉 Links	16	100	- Module 1.1	Immediate 💌	0 Day(s) 💌					
Pages	22		— — Node 1.1.1							
Comments	17	200	- Module 1.2	Use Interval 💌	1 Week(s)					
«	1				De sistema de 🔲 Otras dans de Das					
Appearance	14		Course #2	Apply to:	Executive: Elite:	emium:				
🖉 Plugins 3	18	100	- Module 2.1	Specific Date 💌	0 Day(s) 💌	2009-09-01				
🖑 Users

Tools	21	100	- Module 3.3	Immediate 💌	0 Day(s) 💌					
Import	19	200	- Module 3.1	Use Interval 💌	1 Day(s) 💌					
Export	26		— — Node 3.1.1							
Upgrade	20	300	- Module 3.2	Use Interval 💌	1 Week(s)					
Micro-Membership	23		Node 3.2.1							
Course Maint	Ord	or: The o	rder (within a course)	that modules will be d	alivered					
Crontrol	Sch	edule Tvi	De:	unaumodules will be de	envereu.					

Notice that on the line for Course #1 you can "Apply to:" Registered, Standard, and/or Premium subscribers. Content from Course #1 is available to both Registered and Premium subscribers. Standard subscribers will not be able to view the content of this "course".

For each module you can specify both the order and the delivery schedule. The order is simply a number between 1 and 9999. The actual number doesn't matter. What is important is the numeric order. It specifies the order that the modules will be "delivered" (made available) to your subscribers. The delivery schedule lets you specify "when" the module is delivered. There are four schedule types:

Not Scheduled: Nothing happens with this module – regardless of the order.
WARNING: Since "delivery" of each module is contingent on the delivery date of the preceding module, modules positioned after a Not Scheduled module will also NOT have their content delivered.
Immediate: The content is delivered without delay.
Use Interval: Specify a time period after the prior module that this content should be delivered.
Specific Date: The date a module should be delivered.

Save the changes using the "Submit Changes" button in the lower left-hand corner of the screen.

4. Before leaving the EBiz Micro Membership Course Maintenance screen, copy the URL for the maintenance script from the textarea at the very bottom of the window. You'll need it

Gradual Delivery Maintenance

Run Gradual Delivery Maintenance

http://www.0-2-60-n-90.com/blog/wp-content/plugins/micro-membership/micro-membership_course_maint.php

in the next section.

 Set the maintenance script to run periodically. Admittedly, this is currently a bit hokey. But an update will be coming (by the 2nd week of September 2012) that will make this much smoother.

If you can access your system's Cron process or have something else that serves the same scheduling function, you can certainly use that. If not, you can use the included U-Cron plug-in. Install it just like you did the EBiz Micro Membership, EBiz Micro Membership Button Editor, and EBiz Micro Membership Course Widget plug-ins. Once activated, you

🗇 Dashboard	U-Cron (Utopia Cron) Easy Timed Jobs									
🖍 Posts 🔍 🔻	URL Loading/Checks									
Edit Add New	Add New	Check								
Post Tags Categories		Start Time (hh:mm)	How Often (m/h)	Full URL (WITH http://)	Add					
Micro-Membership Category Security					Add					
> U-Cron	Current (Checks								
명 Media 《 Links	Delete	Start Time (hh:mm)	How Often (m/h)	Full URL (WITH http://)	Update	Test	View			
Pages	Delete	00:12	5m	http://www.0-2-60-n-90.com/blog/wp-conter	Update	Test	<u>View</u> Page			

can set it up from the U-Cron menu (under the Posts menu).

Follow the direction you'll find on the screen for entering the time and interval. When it comes to the Full URL, paste the information that you copied from the EBiz Micro Membership Course Maintenance screen in Section #4.

6. Use the standard Wordpress Widget editor to place the EBiz Micro Membership Course Widget on one of your sidebars. Set the "Root Category" to the category you specified as your "Top Level Course Category" on the config page. This widget displays the courses and modules that the user has access to. For security reasons, they don't show up anywhere else.

7. And, YOU'RE DONE! Now you can place your content (posts) in the module and node* categories that you need to for your gradual content delivery.

*Nodes are "delivered" along with their parent modules. You can use them to organize your content.

ClickBank Setup

Using ClickBank to handle your subscription payments has one HUGE benefit – you can business partners from the thousands of ClickBank affiliates. These people will gladly send traffic to and promote your membership site.

ClickBank is a bit different than PayPal, however. The only thing PayPal is interested in is collecting the payment. As a result, you give PayPal all of your membership site's product and subscription information in the payment button.

ClickBank, on the other hand, is product oriented. They capture sales information, payment information, and affiliate statistics by product. Consequently, your membership site's product and subscription information is entered into the product area in ClickBank.

Although you must enter in all of the relevant information in the EBiz Micro Membership Button Editor screen (EBiz Micro Membership uses it to properly post the payment), ClickBank only uses the Item No.

Also, since ClickBank doesn't return any significant product information through its Instant Notification Service (INS), you must always verify that the information entered using the EBiz Micro Membership Button Editor corresponds exactly with the product information you have entered into ClickBank.

Here's part of the ClickBank product screen for a sample product. Notice that you will probably use the "Recurring Billing" product type.

	Standar	d Produ	cts Rec	Recurring Billing Products			Recurring Billing Products						Add New Product		
	One item found.														
	Actions	Item 🖨	Item Type	Product Image	Thank You Page	¢	Title/Description 🖨	Initial Price 🖨	Rebill Price 🖨	Currency 🖨	Frequency 🖨	Duration 🖨	Trial Period ♦	Test Mode ♦	Status 🖨

		Button Editor Duration and Initial
		Trial Duration must both to the same as
		i i ai buracion nusi both be the same as
		what is specified in
		the ClickBank Frequency field.

Frequently Asked Questions (FAQs)

So far, We've only had one question (We hope that's good!)

Q1: Why can't I see my button after I've created my payment ([pay]) page.

A1: Assuming you've created a page with the title that is exactly the same as what you entered as the Subscription Payment Page Title on the eBiz Micro Membership Configuration Page, the problem is likely that you're logged in as an exempt user.

You'll need to create a test user and attempt to log in as that user.

Here's what's happening...

In the eBiz Micro Membership Configuration Page you should see your id on the exception list (near the bottom). If you didn't put it there then eBiz Micro Membership entered the id automatically to ensure that the administrator can log in without paying for a subscription. Since eBiz Micro Membership doesn't bother to create payment buttons for accepted id's, you won't see the buttons if you're logged in with that id.
