Great tool for professionals

*G-Note 700*0 is a multifunctional digital device from Genius for students, sales, hospital or insurance employees, etc., to take notes, draw or capture inspirations anywhere, anytime.

When you attend a meeting or visit customers, *G-Note 7000* can capture your notes, doodles, drawings and inspirations digitally. Put normal paper on the digital pad and turn on the power, then you can write down everything you want with the digital pen. What you wrote is immediately saved in the digital pad memory. The built-in 32 MB memory can store more than one hundred pages, and there is a file management function. You won't lose anything you wrote and you can manage your recordings very easily and efficiently.

When you come back to the office or home, just connect *G-Note 7000* to your computer with the USB cable. Then you can transfer your data from *G-Note 7000* to the PC (install the G-Note Editor software first). With a variety of tools in the G-Note Editor, you can view, organize, annotate and edit the digital pages. Furthermore, you can copy or attach the pages into Outllook Express, Word, Powerpoint or Excel and share them with others by e-mail. You will be surprised how smart the *G-Note 7000* really is!.

When *G-Note 7000* is connected to a PC, you can use the digital pad as a tablet and the digital pen can move on the pad just like how a mouse works. In addition, G-Note 7000 can work as a mass storage device because it has 32MB memory built-in and a SD memory card slot is available.

Don't worry about running out of paper and digital pen cartridges. You will find two backup cartridges in the battery compartment and the other two backups in the accessory bag.You can also go to any ordinary stationery store to buy normal paper and cartridges for replacement.

G-Note 7000 is your professional tool in your daily life. This is the Genius promise: we bring you infinite value.
