Safety

IMPORTANT SAFETY INSTRUCTIONS

1. To disconnect the machine from the electrical power supply, turn off the power switch and remove the power cord plug from the wall socket. The wall socket must be easily accessible and in close proximity to the machine.
2. Read these instructions carefully. Save these instructions for future reference.
3. Follow all warnings and instructions marked on the product.
4. Do not use this product near water.
5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register or in a built-in installation unless proper ventilation is provided.
7. This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord.
9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

CE MARK

CE This device complies with the requirements of the EEC directive 2004/108/EC with regard to “Electromagnetic compatibility” and 2006/95/EC “Low Voltage Directive”.

FCC

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

CAUTION ON LITHIUM BATTERIES

There is a danger of explosion if the battery is replaced incorrectly. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

Battery Caution

Risk of explosion if battery is replaced by an incorrectly type.
Dispose of used battery according to the local disposal instructions.

Safety Caution

Note: To comply with IEC60950-1 Clause 2.5 (limited power sources, L.P.S) related legislation, peripherals shall be 4.7.3.2 "Materials for fire enclosure" compliant.

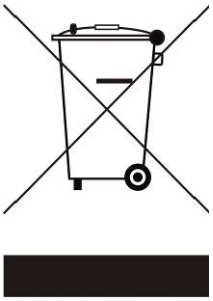
4.7.3.2 Materials for fire enclosures

For MOVABLE EQUIPMENT having a total mass not exceeding 18kg.the material of a FIRE ENCLOSURE, in the thinnest significant wall thickness used, shall be of V-1 CLASS MATERIAL or shall pass the test of Clause A.2.

For MOVABLE EQUIPMENT having a total mass exceeding 18kg and for all STATIONARY EQUIPMENT, the material of a FIRE ENCLOSURE, in the thinnest significant wall thickness used, shall be of 5VB CLASS MATERIAL or shall pass the test of Clause A.1

LEGISLATION AND WEEE SYMBOL

2002/96/EC Waste Electrical and Electronic Equipment Directive on the treatment, collection, recycling and disposal of electric and electronic devices and their components.



The crossed dustbin symbol on the device means that it should not be disposed of with other household wastes at the end of its working life. Instead, the device should be taken to the waste collection centers for activation of the treatment, collection, recycling and disposal procedure.
To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract.

This product should not be mixed with other commercial wastes for disposal.

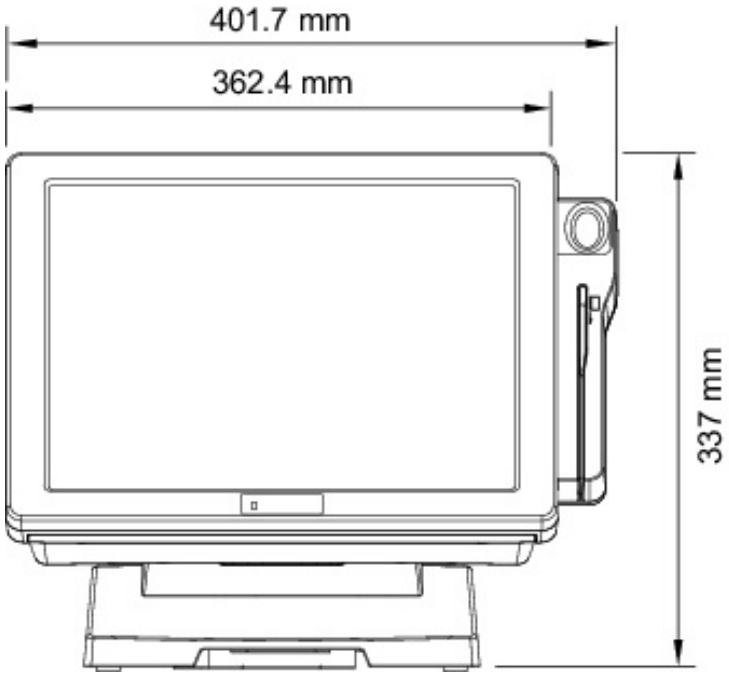
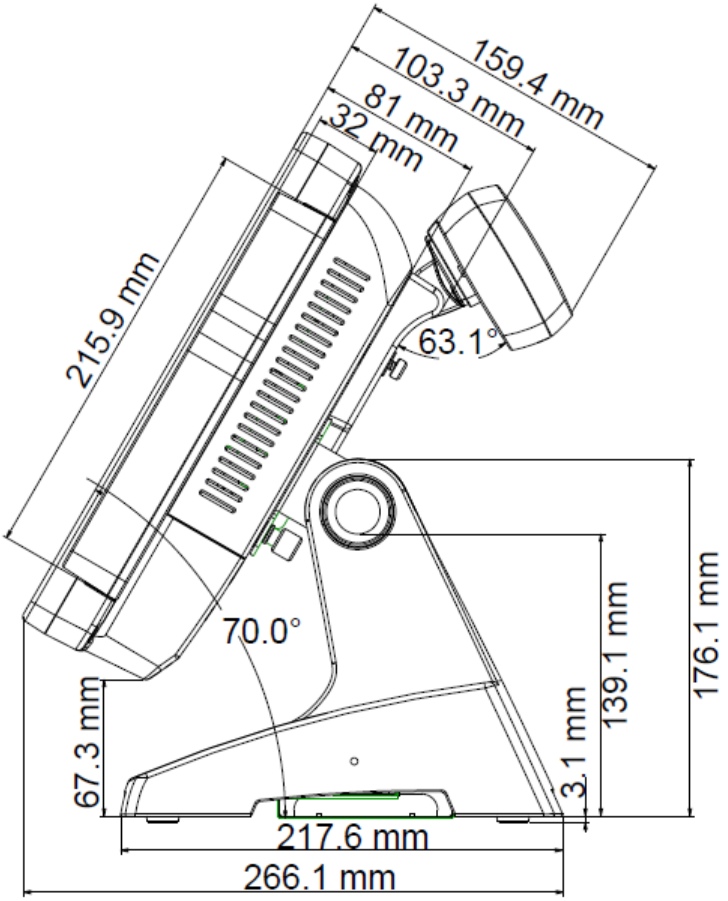
3 System Dimensions





4 Peripheral Installation

4-1 VFD Installation

The VFD requires 5V or 12V power and should be connected to the powered COM port (COM3 or COM4). Please refer to the chapter 7-3 for the correct jumper setting and how to enable the power from the BIOS menu..

■ VFD Module View

■ VFD Installation Procedure

1. Slide the VFD module to the VESA bracket on the stand and tighten it with thumb screw.
2. Connect the VFD cable to the COM port on the system.

4-2 Second Display Installation

The Second Display requires 12V power and should be connected to the VGA port. Please refer to the chapter 7-3 for the correct jumper setting and how to enable the power from the BIOS menu.

Warning! Please make sure the system is turned off when you install the Second Display as you can permanently damage your device!

4-2-1 8.4" Second Display Installation

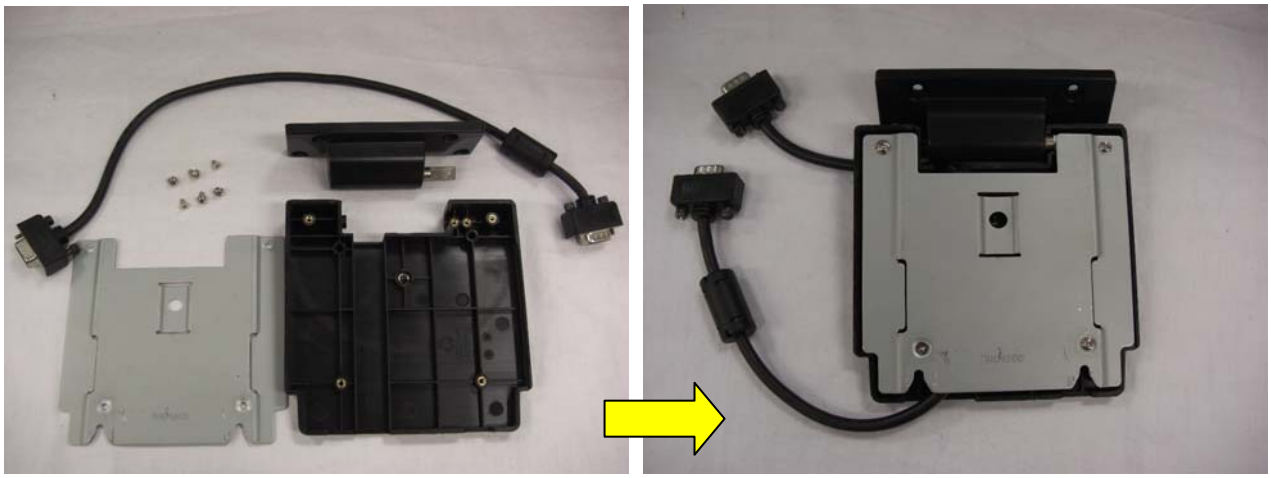
- **Accessories:**

8.4” 2nd Display

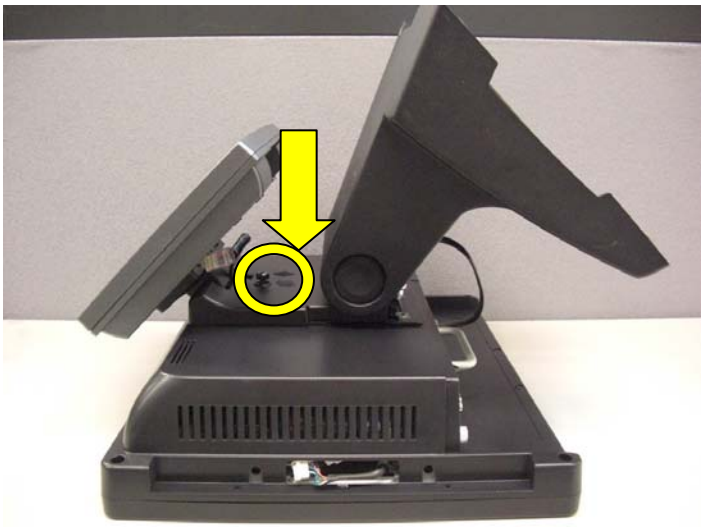
VGA Cable x 1

Screw x 6

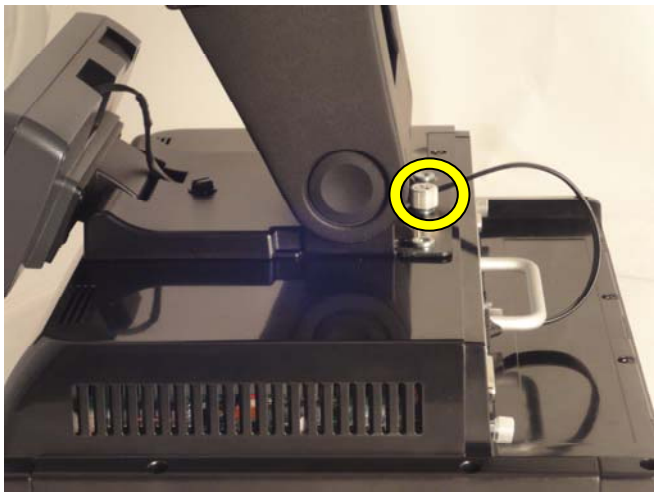
2nd Display Bracket



■ Installation Procedure:

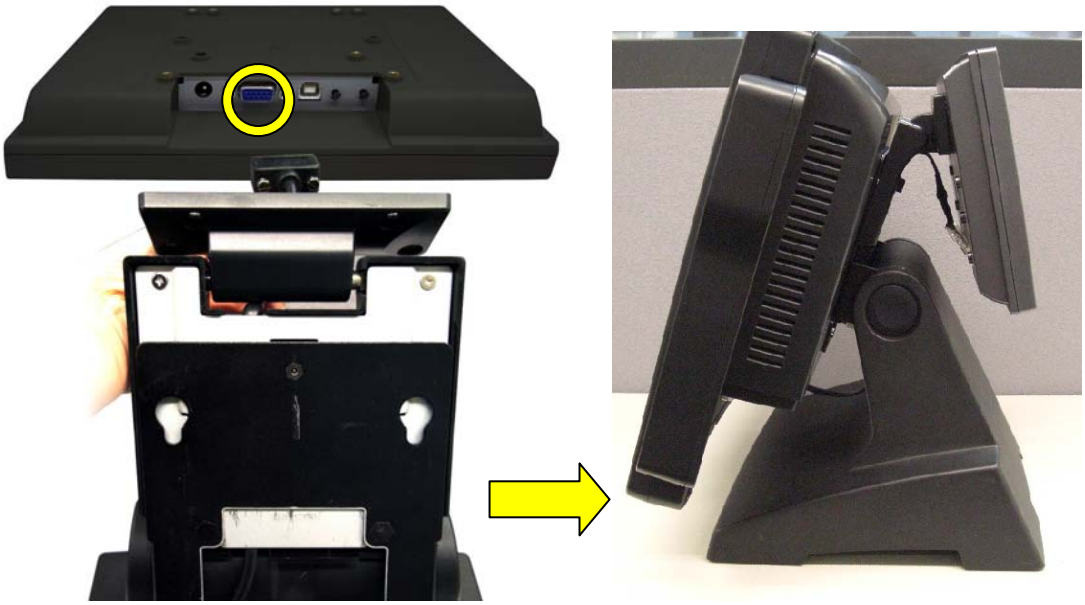


1. Attach the 2nd display bracket to the stand system and fasten the thumb screw (x1)



2. Attach the stand with 2nd display bracket to the LCD touch panel. Fix the stand with 2nd display bracket on the VESA holes (x4) and fasten the thumb screw (x1).

3. Connect the VGA cable to the LCD touch panel.



4. Attached the 2nd display and connect the other end of cable to the system port.

4-2-2 12.1" / 15” Second Display Installation

Warning! Please make sure the system is turned off when you install the Second Display as you can permanently damage your device!

■ Accessories:

2nd display

VGA Cable x 1

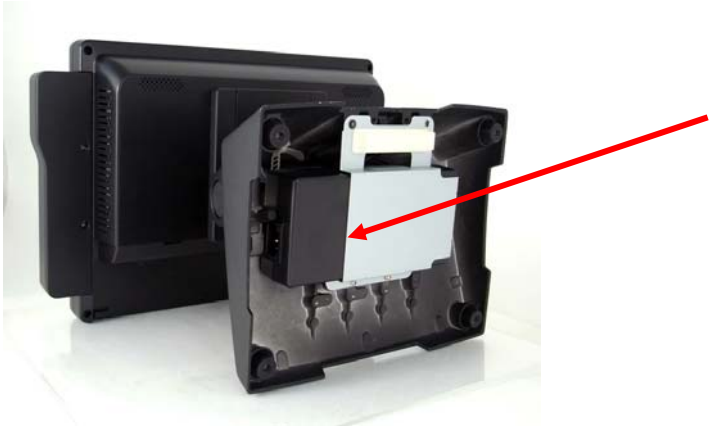
Screw x 2

■ Installation Procedure:

1. Thread two ends of the cable respectively through the upper and the lower gap on the 2nd display on the bracket.
2. Attach the 2nd display to the stand and fasten the screws (x2). Thread the VGA cable through the hole at the bottom of the system.

3. Route the VGA cable through the stand gap of the system and connect the other end of the VGA cable to the system port.

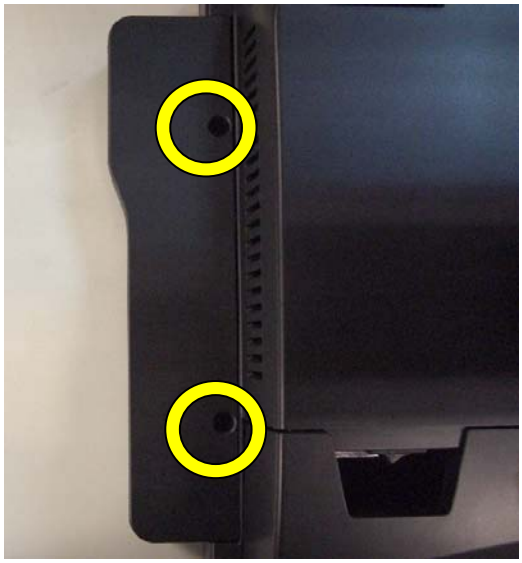
4-3 Power Cord Installation



The Power supply is installed in the metal bracket fixed in the stand gap.

1. Connect the Power cord to the power supply.
2. Route through the base gap for cable management.

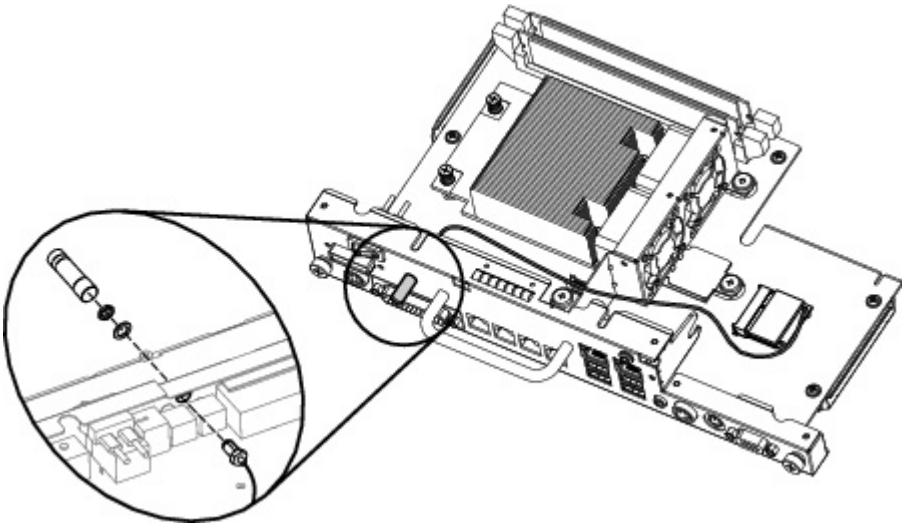
4-4 2-in-1 MSR Installation



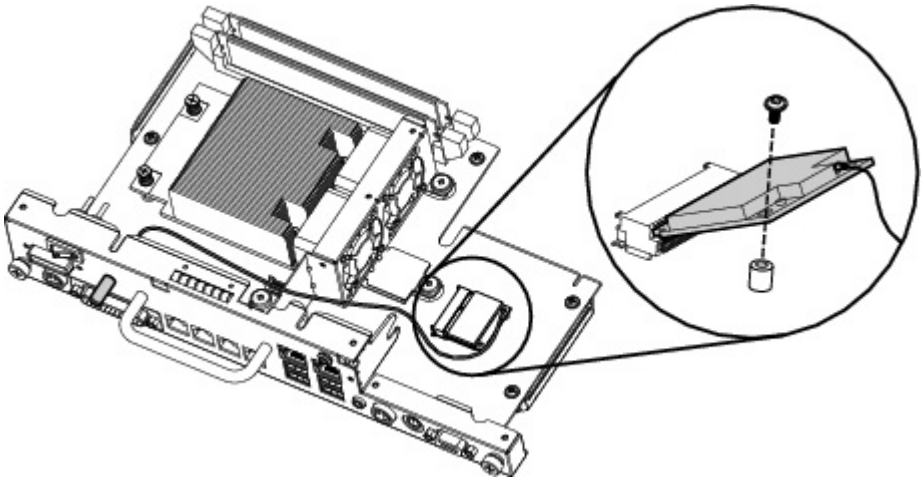
1. Loosen the screws (x2) on the MSR dummy cover.
2. Connect the respective connectors for 2-in-1 MSR module.
3. Fasten the screws (x2) to fix the MSR or 2-in-1 MSR module.

4-5 Wireless Card and Antenna Mount Installation

If you install the wireless LAN module after manufacturer, please buy wireless LAN module with external antenna from your local distributor or dealer.
The installation procedure is slightly different depending on which motherboard your system is equipped with. Please refer the location of motherboard layout on chapter.



1. Press-out the blind hole on the enclosure before starting to assemble the external antenna and the antenna coaxial cable.
2. Assemble the coaxial cable, nut, washer and the external cable as above picture instructs.

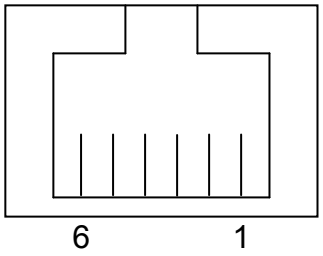


3. Insert the wireless card into the mPCI-e slot on the motherboard. Press down the WLAN card and fix it to the motherboard by fastening the screw (x1) provided.
4. Connect the other end of the antenna coaxial cable to the "Main" connector on the wireless card.

4-6 Cash Drawer Installation

You can install a cash drawer through the cash drawer port. Please verify the pin assignment before installation.

Cash Drawer Pin Assignment



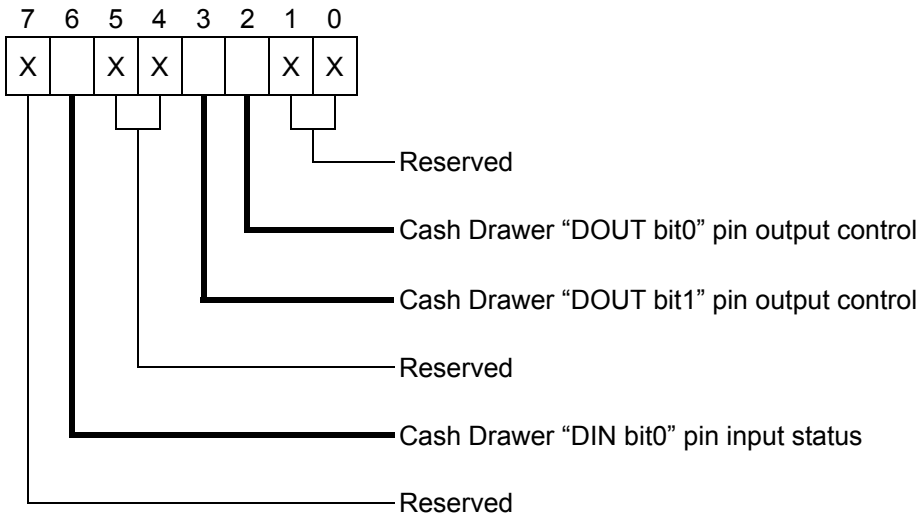
Pin	Signal
1	GND
2	DOUT bit0
3	DIN bit0
4	12V / 19V
5	DOUT bit1
6	GND

Cash Drawer Controller Register

The Cash Drawer Controller use one I/O addresses to control the Cash Drawer.

Register Location: 48Ch
Attribute: Read / Write
Size: 8bit

BIT	BIT7	BIT6	BIT5	BIT4	BIT3	BIT2	BIT1	BIT0
Attribute	Reserved		Read	Reserved	Write		Reserved	



Bit 7: Reserved
Bit 6: Cash Drawer “DIN bit0” pin input status.
= 1: the Cash Drawer closed or no Cash Drawer
= 0: the Cash Drawer opened
Bit 5: Reserved
Bit 4: Reserved
Bit 3: Cash Drawer “DOUT bit1” pin output control.
= 1: Opening the Cash Drawer
= 0: Allow close the Cash Drawer
Bit 2: Cash Drawer “DOUT bit0” pin output control.
= 1: Opening the Cash Drawer
= 0: Allow close the Cash Drawer
Bit 1: Reserved
Bit 0: Reserved

Note: Please follow the Cash Drawer control signal design to control the Cash Drawer.

Cash Drawer Control Command Example

Use Debug.EXE program under DOS or Windows98

Command	**Cash Drawer**
O 48C 04	Opening
O 48C 00	Allow to close
➢ Set the I/O address 48Ch bit2 =1 for opening Cash Drawer by “DOUT bit0” pin control. ➢ Set the I/O address 48Ch bit2 = 0 for allow close Cash Drawer.	

Command	**Cash Drawer**
I 48C	Check status
➢ The I/O address 48Ch bit6 =1 mean the Cash Drawer is opened or not exist. ➢ The I/O address 48Ch bit6 =0 mean the Cash Drawer is closed.	

4-7 VESA Wall-Mount Kit Installation

If you want to mount the POS terminal on the wall, please order the wall mount kit from you distributor and follow the steps below for the installation.

■ Wall-mount kit accessory:

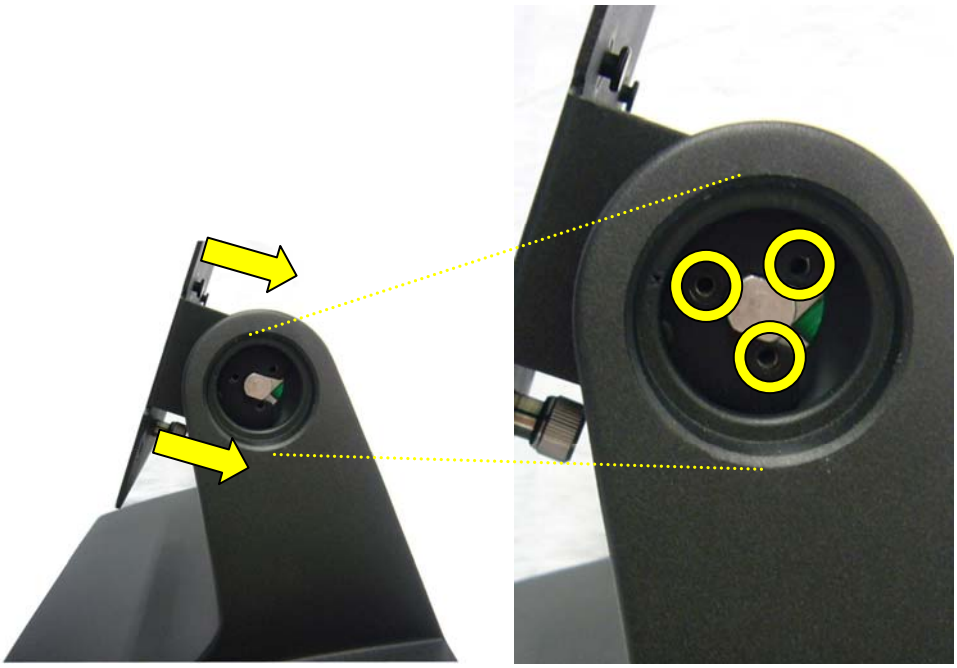
■ Installation procedure:

1. Remove the stand by loosening the thumb screw (x1).
2. Place the wall mount bracket on the rear cover and tighten the screw (x1).

3. Attach the wall mount bracket and tighten with thumbscrew (x1)

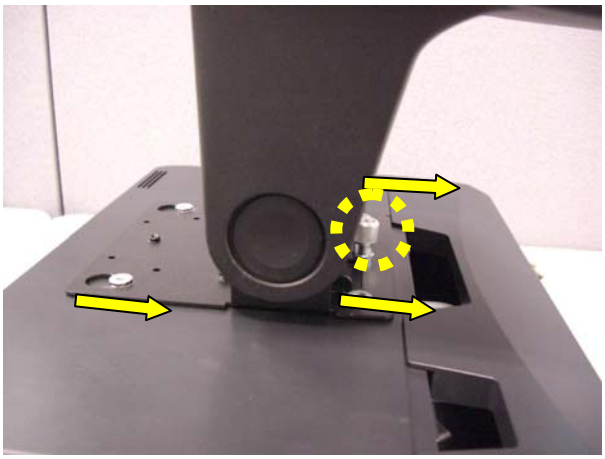
4-8 Stand Assembly & Disassembly

Stand Assembly



1. Slide the VESA hinge bracket into the metal hinge shaft on the stand.
2. Fasten the screws (x6) (3 on both sides) to fix the VESA hinge bracket onto the stand.

3. Use rubber hinge cover to plug the holes on both sides.



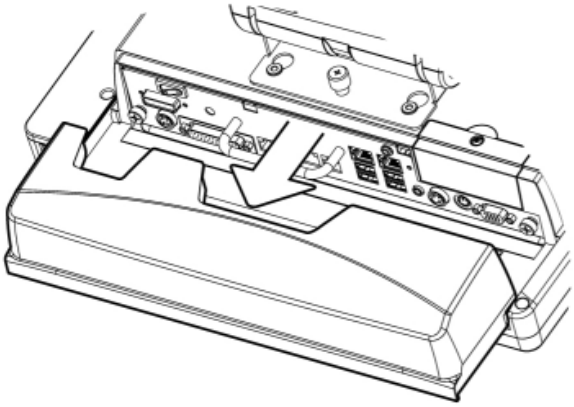
4. Align larger end of the teardrop mounting holes on the VESA hinge bracket with fixing screws (x4) on the rear cover of the system. Slide to narrow end of the mounting holes, and stick the bracket to the system.
5. Push and fasten the thumb screw to fix it to the system.

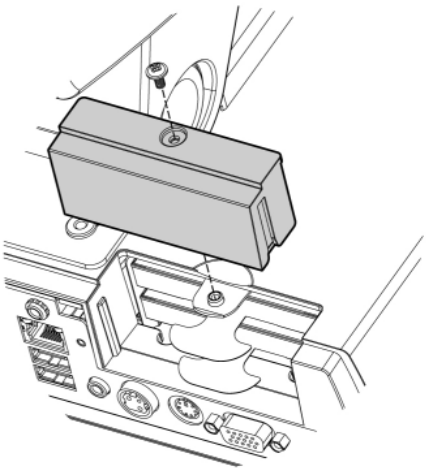
Stand Disassembly

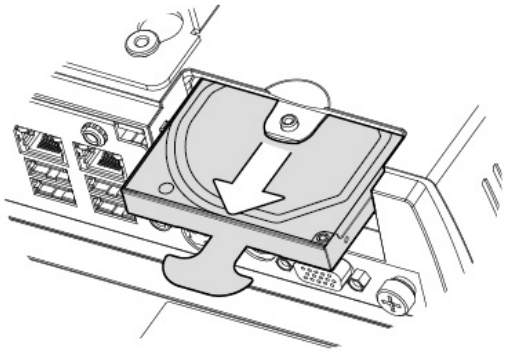
1. Loosen the thumb screw.
2. Slide the system upward to separate from the stand.

5 System Assembly & Disassembly

5-1 HDD Replacement







1. Pull away the cable manager.
2. Remove the screw (x1) to open the HDD door.
3. Replace the HDD.

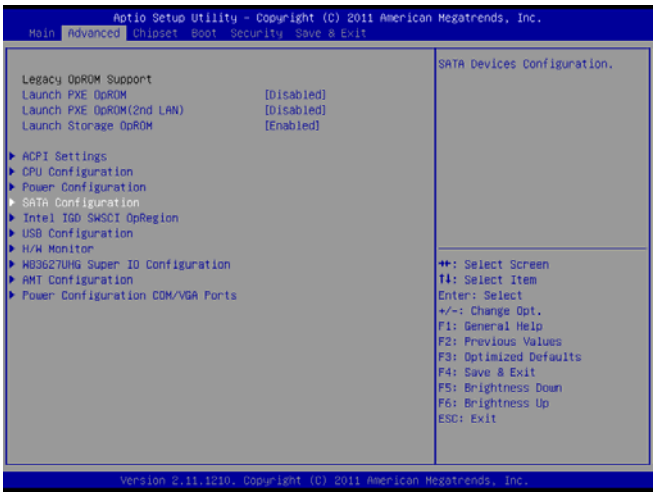
SATA RAID Setting

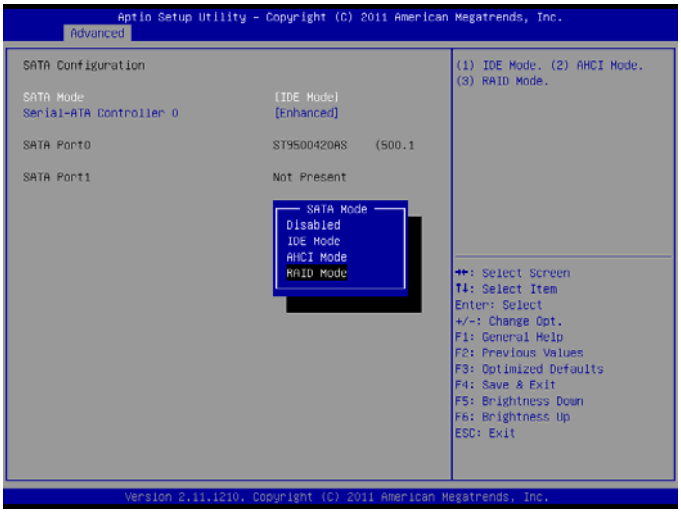
To set the RAID program, you must install two SATA HDD first. After the hardware has been installed, please reboot the system. At system boot, press the <Ctrl> and <I> keys simultaneously to run the Intel RAID Configuration Utility when prompted by the following message: Press <Ctrl> <I> for the Intel RAID Configuration Utility.

BIOS/Utility setup

1. Power on the system, and press the <DEL> key when the system is booting up to enter the BIOS Setup utility.
2. Select the Advanced tab
3. Select "SATA Configuration" and press <Enter> to go to display the available options.



4. Select "SATA Mode" and press <Enter>. Select “RAID Mode” and press <Enter>. Please Save the change by pressing F10



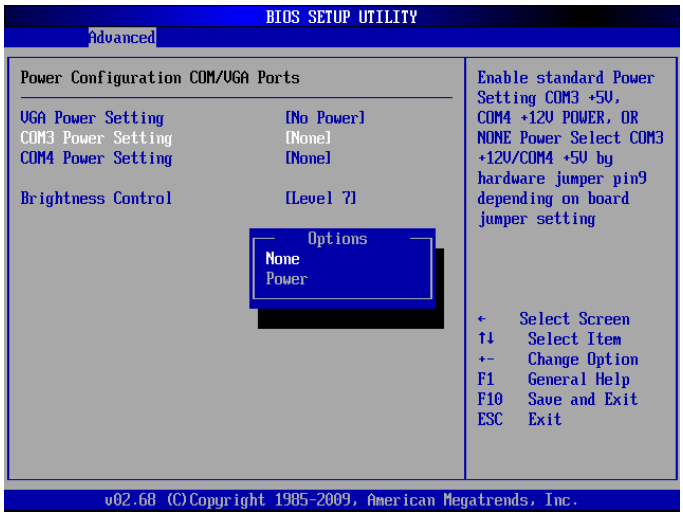
COM3 & COM4 Power Setting

COM3 and COM4 can be set to provide power to your serial device.
The voltage can be set to +5V or 12V by setting jumper JP2 on the motherboard.
When enabled, the power is available on pin 10 of the RJ45 serial connector.
If you use the serial RJ45 to DB9 adapter cable, the power is on pin 9 of the DB9 connector.
By default, the power option is **disabled** in the BIOS.

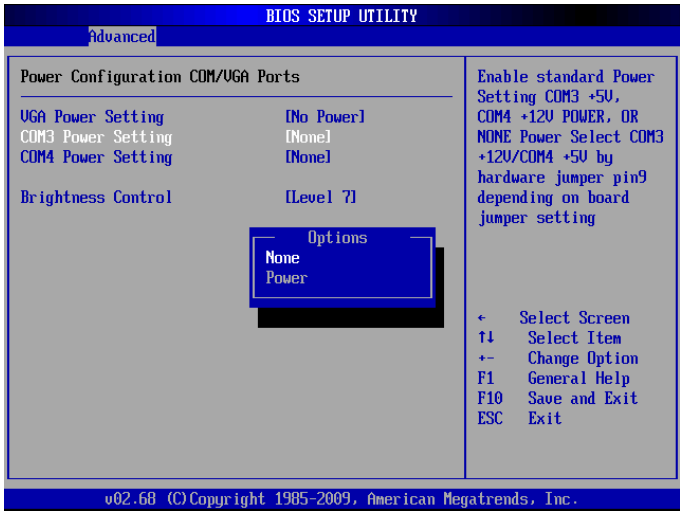
Warning: Please do not plug non-powered peripheral devices (e.g. printers, scanners etc) into the powered COM ports- as you can permanently damage your device!

Enable COM3/COM4 power in BIOS

1. Power on the system, and press the <DEL> key when the system is booting up to enter the BIOS Setup utility.
2. Select the Advanced tab
3. Select **Power Configuration COM/VGA** Ports and press <Enter> to go to display the available options.



4. To enable the power, select **COM3 Power Setting** or **COM4 Power setting** and press <Enter>. Select **Power** and press <Enter>.
   Save the change by pressing F10.

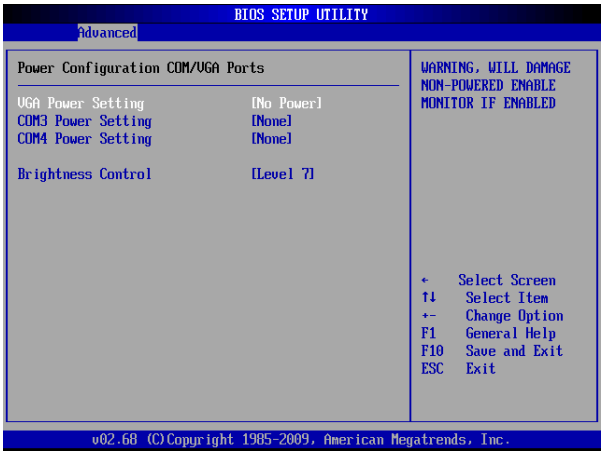


2nd VGA Power Setting

VGA port power must be on through BIOS/Utility for default is “No Power“

1. Power on the system, and press the <DEL> key when the system is booting up to enter the BIOS Setup utility.
2. You can enable power to VGA port in the BIOS menu. By default the power option is disabled in the BIOS.
3. Select "Power Configuration COM/VGA Ports" and press <Enter> to go to display the available options.

4. To switch on the power, select "+12V" press <Enter>. Please Save the change by pressing F10



Warning: Please do not plug any standard monitor into the VGA Port if you have enabled “Power to VGA” in the BIOS, as you can permanently damage your monitor! If you want to use a standard monitor, please make sure you have disabled "power to VGA" in the BIOS!

Appendix A: Drivers Installation

The shipping package includes a Driver CD in which you can find every individual driver and utility that enables you to install the drivers on the system. Please insert the Driver CD into the drive and double click on the “index.htm” to select the models. You can refer to the drivers installation guide for each driver in the “Driver/Manual List”.

8. Command Details

A.1. Overwrite mode

In this mode, the cursor will move towards the right and begin from the upper left position. When the cursor has reached the end of the upper line, the cursor will move down to the bottom left position to continue. When the cursor has reached the end of the bottom line, it will move to up the upper left position and overwrite the previous characters.

A.2. Vertical scroll mode

In this mode, the cursor will move towards the right. The cursor will begin from the upper left position until it has reached the end of the upper line. The cursor will then move down to the bottom left position to continue until it has reached the end of the bottom line.

A.3. Horizontal scroll mode

In this mode, the extent of the cursor activity is bound by a predefined range, limited to the upper line. (Please refer to Set or cancel window command), where the default window is the whole upper line. The cursor will begin from the left-end of the range and move rightward until it reached the end of the range, to continue, the characters that comes thereafter will start pushing the previous characters leftward from the right-end, scrolling the characters to the left.

A.4. Set the string display mode and write string to display

Set the string display mode, write to upper or lower line d1 d2 d3 … dn {1≦n≦20}. ‘A’ stands for the upper line, ‘B’ stands for the lower line. The string display mode will be cancelled and the display will return to the previous mode after receiving CLR or CAN.

A.5. Upper line message continuous scroll

The message (previously defined) will scroll continuously in the horizontal direction until a new command is received.

A.6. Move cursor left

When the current cursor is at the left-end position, this command operates differently depending on the display mode.

- **Overwrite mode:** When the cursor reached the left-end of the lower line, it will continue to the right-end of the upper line, overwrite previous characters. When it reached the left end of the upper line, it will continue to the right-end of the lower line.
- **Vertical scroll mode:** When the cursor reached the left-end of the lower line, the lower line will scroll up and replace the previous upper line, the lower line will be cleared and the cursor will continue to the right end of the lower line.
- **Horizontal scroll mode:** The cursor will remain stationary.

A.7. Move cursor right

Move the cursor to the right. When the cursor has reached the right-end, this command operates differently depending on the display mode.
