# Installing Your Jessops MultiMedia Card Reader/Writer on Windows XP

---

Please read this entire installation guide prior to installing the software for the Jessops reader. It is recommended that these instructions be printed for reference during the installation process. By continuing to install this software, you acknowledge that you have read and agree to the terms of the Software License Agreement located below. The software may be obtained from a link following the Software License Agreement.

## Installing the drivers:

1. Begin by downloading the compressed (zipped) driver file to the root directory of your hard drive. In most cases, this will be C:\.
2. Now right-click the downloaded file (file will have an icon consisting of a folder with a zipper) and select "Extract All" from the drop-down menu.
3. This will deploy the "Extraction Wizard". Click "Next" to continue.
4. This will generate a new window in which you will be asked to "Select a Destination.". The default location C:\filename, where "C:\\" represents the root directory of your hard drive and "filename" represents the name of the file that you are extracting, will be highlighted. Click "Next" to begin extracting the drivers.
5. You will now see a window informing you that the extraction was complete. Remove the check from the "Show extracted files" check box. Click "Finish" to complete the extraction process. This process has created a folder on your hard drive with the same name as the file that you had originally downloaded. The folder will appear without the zipper icon. This newly created folder will contain the Windows XP driver files for your Jessops reader.
6. Now connect the USB plug of your Jessops reader to the USB port on your computer.
7. This will deploy the "Found New Hardware Wizard", which will ask you what you would like the wizard to do. Select "Install from a list or specific location (Advanced)", and click "Next" to continue.
8. This will bring you to the "Choose your search and installation options" menu. By default, the "Search for the best driver in these locations" will be selected. Now place a check in the "Include this location in the search" check box and click "Next."
9. Now the "Browse for Folder" window will appear. Click on the "+" next to "My computer" and then on the "+" next to (C:) to expand the two listings. Listed under (C:) you should see the newly created folder from the previous steps. Select this folder and click "OK" to continue.
10. Click "Next" in the "Found New Hardware Wizard" window to proceed with the install of the drivers.
11. Click "Finish" in the next window and restart your computer to complete the installation.
12. You are now ready to use your Jessops card reader. Please refer to the User's Manual for information regarding product usage.
