Before you start however a word on MONEY MANAGMENT.

In combination with the ability to use winning predictions and picks, money management is one of the biggest factors that determines players final success or failure at the end of the season. Yet, money management is frequently overlooked, and by not exercising proper money management a player can wager on an overwhelming number of winning picks and still lose money. For truly successful wagering, both the ability to have winning picks and to exercise proper money management is essential.

What does money management mean?

The concept of proper money management can seem obscure to those without a disciplined money management strategy already in place, but basically, money management involves controlling where and how much of your bankroll you put at risk throughout the season on a weekly basis. The objective, of course, is to manage your betting in such a way that making a substantial profit is as easy and risk-free as possible. Of course, risk is unavoidable, and as a result, a proper money management strategy requires discipline and proper bet sizing to minimize risk, yet still make it easy to turn a decent profit.

This is crucial to your success in the handicapper business because an overall performance of over 65 % wins doesn't necessarily mean you can walk away with huge gains... managing your bankroll properly is of ESSENCE... again

Money Management and following the system Is Everything!

Determine Your Bet Size!

Determining your bet size, you must choose an amount small enough to withstand a losing streak, yet large enough to make a sufficient return on your bankroll.

We usually advice new members to bet 1% fixed size each bet.

You can do it two ways:

- a) Conservative approach: you risk 1% of your bankroll each bet
- b) Aggressive approach: you risk to win 1% of your bankroll each bet. This means you will be laying more than 1% if the odd is low.

Use this standard bet size as the amount you wager on each pick during the season. As discussed above, don't change your bet size based upon the number picks that week or recalculate your bet size each week – it should remain fixed.

Many people are wondering which is better way to build your bankroll : to risk 1% or to bet fixed 1% ?

Our expert Zcode Praveen made an interesting research to compare both methods!

Enjoy. here is the report:

<http://zcodesystem.com/blog/to-win-1-or-to-risk-1-which-is-better/>

Stick To The Plan.. and WIN!

Again, great to see you here, now go and make some serious money.. Wishing us a tremendous money making year!

Remember Zcode covers all 4 Major American sports whole year round, it's not just NHL system. We will have MLB, NBA, NFL and NHL! + We have soccer and horse racing picks from our experts!

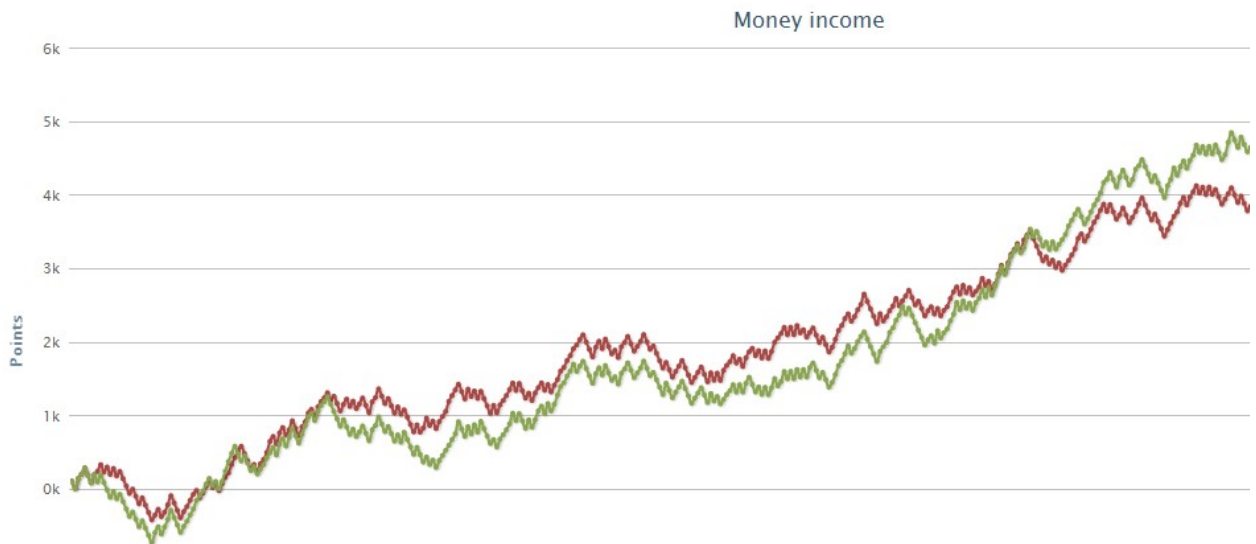

Being a sports investor

When investing in sports, it is very important to only follow the system CONSISTENTLY. As you can see, there is losing and there is winning in this process. No one or company can or will win every day of the week/month/year. That will not happen ever!

What is important to realize is that sports investing is a **PROCESS**. When we lose several games in a row or several days in a row, that is not the time to jump off or abandon what we are doing here. **Not Ever!** When you do that, you will miss the winners that go along with the losses. These winners are crucial to building our bankroll each month. You need to follow exactly what we do each day/week/month. You need to play out program the way it is meant to be played. If you do so you will see profit each month with the system and strategy that we have employed.

We win! This is Documented and proven!

Treat sports investing as a business, not as a gambling.

(Chart shows Z code picks performance for MLB regular season. Local ups and downs but always a profit in the end!)

Again, investing needs to be treated as a **PROCESS**. Only after you profit each month do you increase your wager size. To beat the “book” is one of the hardest things to accomplish on a regular basis. When you find a successful program, such as the one we have created here at Z code system, it is vital you follow that program precisely if you want to truly profit and be a winner each month. When you go off on your own and play your own plays that do not have information behind them, or “cherry pick” other services’ plays here and there that is the worst thing you can do.

In closing, allow us to reiterate some crucial key points. Stay with our proven program we have laid out for you. You will profit long term! Do not get bogged down in day-to-day affairs. Do not get too high or too low during the month. Do not jump around and play random plays in which we do not endorse. Do not chase, do not double down, and do not bet more games unless we tell you to do so. We cannot STRESS enough that this is a **PROCESS**; you need to treat it as such.

Relax, we know what we are doing. This should be a stress free process for you. When you do not get bogged down in day-to-day outcomes sports investing becomes stress free and an enjoyable experience.

Let us worry about the day-to-day affairs. You just make your investments each day that we suggest for you. Collect at the end of each month. It’s that simple. There should be no emotion involved in this process for you. When you let emotion take over, that is when you will make bad decisions, and will lose your bankroll immediately. Follow the system, remove the emotion involved in day-to-day outcomes, and profit long term. Lets have another profitable month!

Looks great? I bet it does. Now it's time to show you how you can win with us.

We want to make you WIN and make cash together. Why? Because if you win - we win as well. We place all bets ourselves on our accounts as well.

So let's get going, shall we?

Step 1: Open bookie accounts

Bookmaker or bookie for short is a place where you are doing your sports investing trades (bets).

You don't need to open many accounts – you can start with just one or two of the best bookies. Sometimes I receive strange emails like "*My bookies does not offer this bet type so I can't place it*". Remember you are **not married to your bookie**. The bookie exists to make you lose and make them rich! By limiting your bet types the bookie is trying to put you in disadvantage. Feel free to change bookies and move the funds! Also please remember there is no such thing as "*ideal* bookmaker".

Make sure that your bookie offers -1 spread lines bet for NHL (puck line). Here is the list of bookies that qualified and offer all necessary bet types we need to win:

- [5Dimes.com](https://5dimes.com) (A+ world bookie, accepts US members) – Pros&Cons: offers all kinds of bets that we need however they usually get greedy and boost the “team totals” on NHL to 3 and even 3.5 instead of proper 2.5. Good for MLB!
- [Bet365](https://bet365.com) (One of the most popular bookies) Pros&Cons: offers good spreads even on underdogs but no team totals before the game though they offer them in-Play during the game! Good for MLB too! Does not accept US members
- [Pinnacle](https://pinnacle.com) (World top bookie, best lines. Does not accept US players) does not have team totals and underdog-1 spreads. Great for MLB!
- [Bookmaker.EU](https://bookmaker.eu) (A+ bookie, Accepts US members) offers team totals but no -1 spreads.
- [William Hill](https://williamhill.com) (A+ bookie, does not accept US members) offers team totals but no -1 spreads
- [Marathon](https://marathonbet.com) and [BetCity](https://betcity.com) (A+ trusted old Russian bookies). Europe and Russia are very serious on sports like hockey, no wonder most NHL players are russian, and provide the best bet offers in their bookies. Don't be scared to trust bookies with over 800 offline offices. Betcity has all kinds of team totals you can dream of and all spreads that ever exist.

You don't have to fund it with thousands, you can start as small as \$100 betting \$1 bets or \$1,000 betting \$10 bets

Remember, you can visit Zcode members area to watch the video tutorials!

Step2: Follow ZCode predictions and hot trends

While we were in public mode for months we have been publishing all our predictions and picks for free on facebook page: <http://www.facebook.com/ZcodeNHLpicks> and <http://www.facebook.com/ZcodeMLBpicks> and others so our betatesters could follow and verify the system.

Now, the system is private as we don't want it to spread and lose effectiveness. It is only available to our VIP members and if you are reading this guide it means **you are one of them** 😊

Every day in Zcode members area in the "VIP PICKS" tab you can find predictions like this one:

Trey's ABC System for MLB

One of the most successful ABC systems on MLB that is offered to private clients for \$490/month is also included in Zcode VIP Forum. Trey is posting his system plays and here are his results:

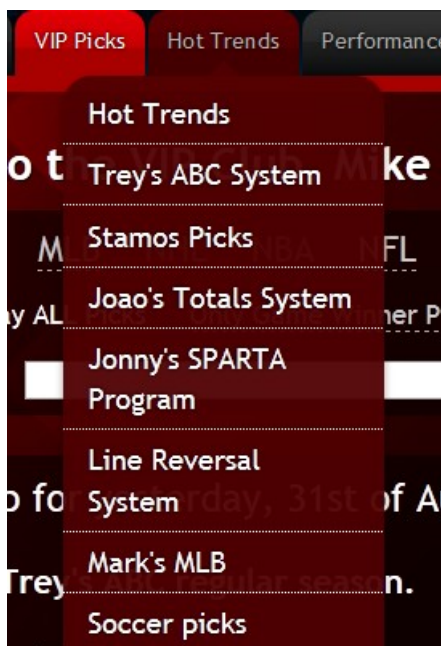

Spreadsheet:

<http://zcodesystem.com/upload/TreyABC.xlsx>

Every MLB season Zcode members enjoy over 50 units of profit by following trey's ABC system.

You can always click on "Hot Trends" in zcode menu to see the current actual systems for the time of the year:

Your Zcode VIP membership include over 10 Expert systems you can follow besides automatic picks!
Each expert is a proven winner with verified winning record every season!

Here is how to use Zcode predictions and hot trends to win.

Note: Zcode is not just NHL system, we cover all 4 Major American sports and will be adding them when they start so our VIP club covers whole year!

First we explain NHL trends, then we cover the MLB and NFL Trends in this guide + NBA. You will receive it as a part of your monthly membership at no extra cost! NBA picks are posted by our experts Trey, Alberto and Jonathan on VIP forum.

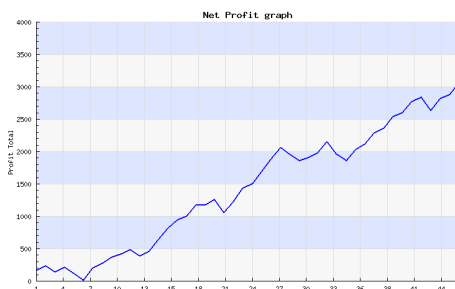

NHL Hockey Trends

We **only** bet 2 trends on NHL for now:

1. **4-5 Star Home Game Winners (Favorites)** by Moneyline (means to win), **-1 spread** line (means to win by 2 goals or more)

For experts: If you are not new to betting you can also start adding additional bets such as Team Total Over 2.5 goals. One more additional possible bet is TTOU2.5 which means “opponent team team total under 2.5”. These additional bets require extra attention and knowledge. If you are totally new just skip them. No problem! You will learn fast!

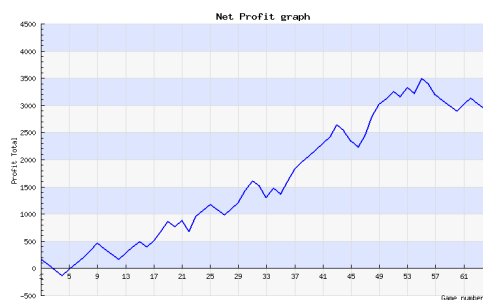

*(Results since October 2011) **+3,020***

Additional good trend is **3.5 Star Home Game Winners in Burning Hot status** by ML and **-1 Spread**. You can trust these too!

2. **5 Star Road Underdogs** by Moneyline (underdog is a team with higher odds here playing away from home, on the road) or **+1 spread**.

For experts: Additional bet here **Team Total over 2.5** and **-1 spread**. One more additional possible bet is TTOU2.5 which means “opponent team team total under 2.5”

(Results since October 2011) **+3,210**

That's all we need to win for now. We are very selective; usually we have 1-2 bets per day or less. Do not bet any other predictions or recommendations such as Game Totals (Over/Under) etc

Lets concentrate on those trends that bring the most profit, right!

Important! We publish also other bets (2-3 star bets!). If you are totally new Do NOT Bet those! They are just for professionals to discuss about!

The recommended bet size is 1% of your bankroll per bet, but if your 1% is \$1,000, maybe that's too much, especially if you're new to ZCode system?

The important thing is to be consistent. Whether you decide on 1% or \$200 or \$1 per bet, just stick to that size for a while.

If you vary your bet size from day to day, you might be unlucky enough to win small one day and lose big another.

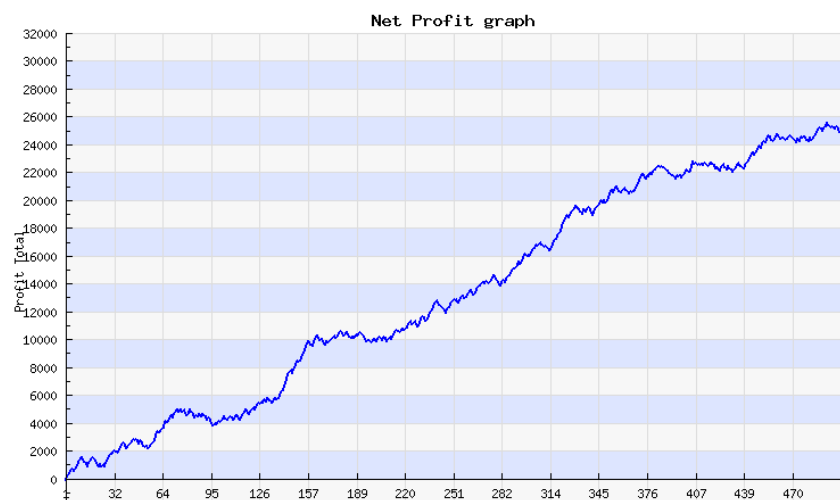

KHL Hockey Picks

During the NHL lockout, our expert Mudrac started posting his KHL Hockey picks with a great success! You can follow them on forum here: <http://zcodesystem.com/vipclub/forum/phpBB3/viewtopic.php?f=7&t=394>

MLB Baseball Trends

MLB Baseball is one of the most profitable sports in the world because there are so many games every day! This is one of the rare sports where teams play every single day and sometimes even 2 (!) games per day! This makes it easy to choose and you don't have to wait a whole week for a game like in NFL or Soccer.

Results: Over +\$84,000 profit since 2006 by betting the flat picks without any progressions!!

Zcode MLB Alpha Trend:

This means we are looking for the games which have the following Trend Notification on the left:

Zcode MLB Alpha Trend 3.0

This game might be a part of the Zcode MLB Alpha Trend 3.0 which means it's one of the best unbeatable automatic long term winning trends. Zcode MLB Alpha Trend 3.0: 5 Star

Home Winners on MLB and -1 spread with Power ranking difference > 12 on Sun, Wed, Sat
The results must be considered long term as the trend is very selective and has a low risk but does not generate many signals per season.
Here are the Zcode MLB Alpha Trend 3.0 Results since 2010:

Cincinnati Reds

Status: *Burning Hot*
Streak: *W + W + W + W + L + L*
Last 6 Games: 4 W/ 2 L
Current rating: 4/30

Odd: 1.74

Game Winner Pick: ★★★★★

Point Spread Bet: -1.50 (38% chance)

Power Rank: 1

When such signal appears the automatic Bot is also posting the signals on the forum!

RULE: The Alpha trend is played on home favourites on Moneyline 1 unit and -1 Spread 3 unit

Remember, the results must be considered long term as the trend is very selective and has a low risk but does not generate many signals per season. You can have several day or even a week without any signals from the hot trend which is normal!

Also: make sure to have all your bets with "**Listed**" pitchers. This ensures that if there is a pitching change, there will be no action.

If your bookie does not offer -1 spread you can use Jonny Ma calculator to simulate it using ML and -1.5

Zcode MLB Delta Trend: 3-5 Star Road Underdogs

(underdog is a team with higher odds here playing away from home, on the road)

The screenshot displays the Zcode MLB Delta Trend interface. On the left, a sidebar contains a 'Hot Trends' section with a bullet point: '5 Stars Road Dogs in Burning Hot status are 8-10 in last 30 days'. Below this is the 'Zcode MLB Delta Trend' section, which explains that this is a long-term winning trend for 3-5 star road underdogs with a power ranking difference > 14. It includes a small line chart showing an upward trend and states: 'If you follow this trend whole season your profit chart will be the same as ours. We place a bet on Milwaukee Moneyline'. The main area shows a prediction for a game between the Milwaukee Brewers (home) and Chicago White Sox (road). The Brewers are listed first as the underdog. Their status is 'Burning Hot' with a streak of W+W+W+L+W+L, last 6 games 4W/2L, current rating 14/30, and a power rank of 5. The White Sox status is 'Ice Cold Up' with a streak of W+L+L+W+L+L, last 6 games 2W/4L, current rating 23/30, and a power rank of 25. The prediction for the Brewers is an 'Underdog Value Pick' with 4 yellow stars, an odd of 2.10, and a 'Point Spread Bet' of -1.50 (38% chance). The prediction for the White Sox is a 'Game Winner Pick' with 4 yellow stars, an odd of 1.77, and a 'Point Spread Bet' of +1.50 (63% chance). At the bottom, there is a comment section with the prompt 'What do you think of this game?' and a 'Post Comment' button.

Here we are looking for the "Delta Trend" notification on the left of the prediction with 4-5 star yellow stars on the road team (road teams are listed first)

Then we place a moneyline (which means to win the game) bet on the underdog. Additional bet can be +1.5 spread.

RULE: The Delta trend is played on road underdogs on Moneyline 1 unit and +1.5 Spread 3 units

The results must be considered long term as the trend is very selective and has a low risk but does not generate many signals per season.

If you follow this trend whole season your profit chart will be the same as ours.

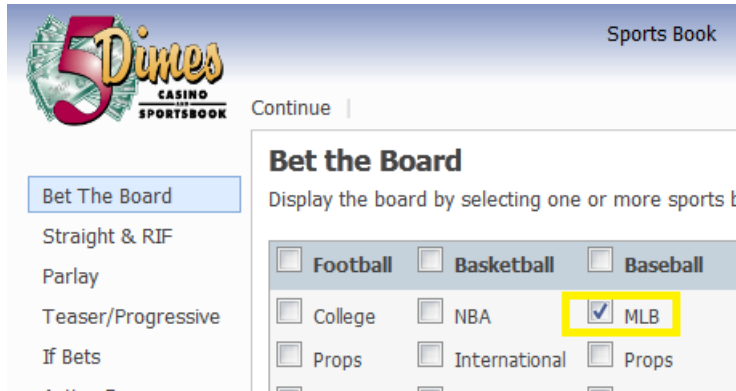

Also: make sure to have all your bets with "**Listed**" pitchers. This ensures that if there is a pitching change, there will be no action.

Important! We give prediction to EVERY SINGLE GAME so people can analyze and discuss. It does not mean that you must bet every single game. Be selective!

The recommended bet size is 1% of your bankroll per bet, but if your 1% is \$1,000, maybe that's too much, especially if you're new to ZCode system?

Placing MLB Bets in the bookies

MLB is very easy to place. For example in [5Dimes.com](https://5dimes.com), go to MLB section:

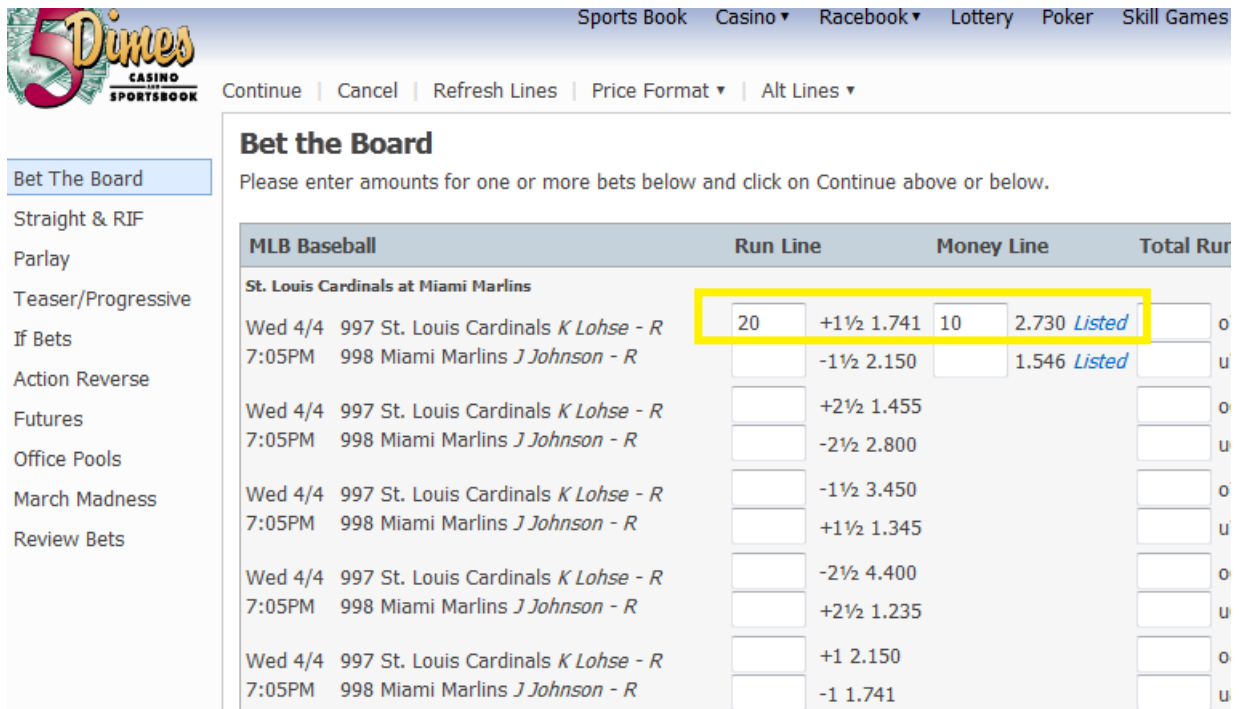

The screenshot shows the 5Dimes Sports Book interface. On the left is a navigation menu with options: Bet The Board, Straight & RIF, Parlay, Teaser/Progressive, If Bets, and Action Reverse. The main area is titled 'Bet the Board' with the instruction 'Display the board by selecting one or more sports b'. There are three main categories: Football, Basketball, and Baseball. Under the Baseball category, there are sub-options: College, NBA, and MLB. The MLB option is selected, indicated by a yellow box and a checkmark.

Then find the game and place the bets. Remember the simple 3:1 ratio.

1 unit on ML and 3 unit on -1 on Alpha Trend

1 unit on ML on Delta Trend (additional bet 3 units on +1.5 can be added for safety)

The screenshot shows the 5Dimes Sports Book interface for MLB Baseball. The 'Bet the Board' section is active, and the instruction 'Please enter amounts for one or more bets below and click on Continue above or below.' is displayed. The table below shows the betting lines for the game 'St. Louis Cardinals at Miami Marlins' on Wednesday, April 4th, at 7:05 PM. The table has four columns: 'Run Line', 'Money Line', and 'Total Run'. The 'Run Line' column is highlighted in yellow.

MLB Baseball	Run Line	Money Line	Total Run

Wed 4/4 7:05PM 997 St. Louis Cardinals <i>K Lohse</i> - R	20	+1½ 1.741	10

Wed 4/4 7:05PM 997 St. Louis Cardinals <i>K Lohse</i> - R		+1 2.150	
998 Miami Marlins <i>J Johnson</i> - R		-1 1.741	

Make sure to have all your bets with "Listed" pitchers. This ensures that if there is a pitching change, there will be no action.

Early and Final Predictions (Locks)

Early Prediction. The early predictions are a long term game forecast.

You have it ready long time before the game but it is less accurate because something can happen later: key player illness or injury, goalier/pitcher change, odd change etc that can influence the prediction.

The Final Prediction is ready 3 hours before the game and does not change anymore.

In 95% cases the Early and Final predictions are the same.

The early prediction is updated automatically every 2 hours as the new information arrives. The final prediction does not update anymore and is locked.

Statuses and Stars explained

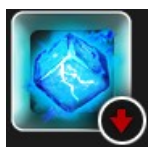

The common misunderstanding in Zcode Star rating is that stars alone are not an indication to bet. The idea of the stars is to show the value on the line, it's one of the stats but not a direct signal to bet like all newbies think they must bet all 5 star games.

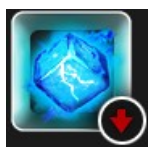

Betting on stars ALONE will not work same way as betting simply based on power rankings or simply betting on hot statuses. It's all part of the stats that help get the full impression of the game and help experts form their systems. You can find and follow expert systems in the "Hot Trends" section or follow automatic Robot "Alpha/Delta trend" on MLB..

- Orange Stars  are for favorites (teams that have lower odds according to bookies). By betting on favorites you have higher chance to win but the reward is smaller.
- Yellow Stars  are for underdogs (teams with odd higher than 2.0 or +100 in American. This means lower chance to win buy higher reward)
- Green Stars  (Game Totals, for experts only). Zcode can be a great helper here for you but you can't bet Totals blindly by stars, they require additional goalie and team strategy analysis. Usually teams with strong offense and good goalie tend to go Under 5.5 in NHL. You can find discussions under each game to see what experts think.

- Team Statuses  (Dead – IceCold – Average – BurningHot) show the current status of the team (Team condition). The higher status differential the better for prediction.

- Status Trends  (IceCold Down etc) show the direction the status is headed to. Obviously the “down” status is a bad sign while “Up” means the team is improving.

- Power rank  shows the current team strength where 1st is the best rank and 30th is the weakest one

- Prediction Bar  shows the zcode[®] simulation for the current game – the chances of the teams to win outright. The high chance to win

does not necessarily means we are going to bet on it because we also need to see the status, star amount and other factors. For underdogs we make a bet even if chance to win is less than 50% because the reward is great!

- Point spread forecast **Point Spread forecast: +1.5 (53%)** shows the chance for the weak team (underdog) to cover the +1.5 spread. Usually +1.5 chance is very high but the odd is very low which is only good for parlays.

Recommendation & odds

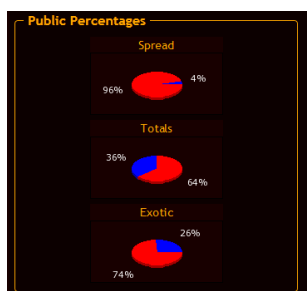

- **Nashville Moneyline (1.47)** shows the possible bet ideas. Zcode gives you a big variety of ideas but if you are new to sports investing you don't have to bet ALL of them, just choose the ones that fit the hot trends we discuss in this guide later.

- Bookie odd approximate bookie odd for the team in Decimal international format. Click on it to switch to American format. Please remember we are not a bookmaker so the real odd in your bookie could differ little bit from the odd we posted, this does not matter at all because it's not arbing and the difference in odds do not matter. If your bookie offers American format like +120 you can always switch to decimal for easier understanding. Remember the higher odd the better reward is but the less chance to win it.

☐ **I placed it**

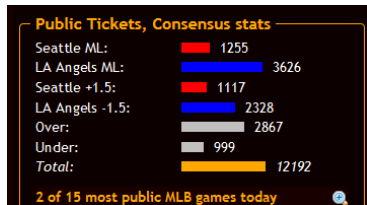

- After you place the bet in the bookie, click it to hide the prediction from the list to help you remember that you already placed it.

- Public percentages on the left of each prediction shows the real time data on how much general gambling public is betting each side. Blue = home team. Red = Away team

- Line moves shows real time odds change and line reversals.

- Public Tickets, Consensus stats. the more public bettors put money on specific team, the more chance there will be an upset because Vegas is always in profit. Be careful with games with a lot of public money.

- Trap Alerts - helps you and alerts you about possible Vegas trap games. (Where upset is most likely to happen)

Now let me give you examples and explain it:

As you can see *Nashville* got 5 star, it's a home team (**Home teams are always listed second**) and it has the necessary recommendation.

Now lets place the bet. We are placing NHL bets called "**Overtime and Shootout Included**".

What amount to bet – if you are new to the system then bet a fixed 1% of your bankroll per bet! If you are a pro sports investor I have prepared a long boring article on money management in the beginning of the guide ;)

So our bet would be:

1 unit *Nashville* Moneline

1 unit *Nashville* -1 Spread (Spread -1 offer usually appears in the evening before the game)

Addition for experts: If you are not new to betting you can also start adding additional bets such as Team Total Over 2.5 goals. One more additional possible bet is TTOU2.5 which means "opponent team team total under 2.5". These additional bets require extra attention and knowledge. If you are totally new just skip them. No problem! You will learn fast!

1 unit *Nashville* Team Total Over 2.5 (additional bet)

1 unit *Columbus* Team Total Under 2.5 (additional bet)

Note: If you bookie does not offer team totals you can switch to [5Dimes](#), [William Hill](#) or [Bookmaker.EU](#) or simply ignore team totals. Beware of bookies boosting team totals to 3.5 – avoid such bet.

Go to Bet-The-Board and click NHL and Continue

Now find our game and place 3 bets, similar size on

- Nashville Moneyline (Moneyline means you bet on win of Nashville)
- Nashville -1 Spreadline (Also called puckline. It wins if Nashville wins the game by 2 or more goals like 2-4, 3-5 etc. In case Nashville wins by 1 goal you will get a Push (bet refund). It is really profitable and safe bet. Don't use -1.5, only -1 !
- Optional: Nashville Team Total over 2.5 (we expect them to score 3 goals or more)

Marathonbet example

It's a popular Russian bookmaker, one of the biggest in the western Europe with hundreds of offline offices.

Their site looks crappy but they have very good odds and rules which makes them attractive to us. Fast payouts, accepts all countries as far as I know.

Very interesting facts for Marathon make things easier to win for us:

1. Team totals are counted **ONLY IN REGULATION TIME**.

This means that winning Team Total Under 2.5 is much easier in Marathon because Shootout/Overtime goals are not counted.

This means if your team ends regular time 2-2 and then loses in OT/SO by 2-3 score you still WIN! However Team Totals Over 2.5 better to place elsewhere.

2. +1 Handicap is counted **ONLY** in regulation too! So it's an easy win if your team ends a game 2-2 and loses in overtime you get a win instead of a Push like on other bookies

3. Game Totals Under 5.5/5 Over 5.5/5 are counted **ONLY IN REGULATION TIME** (yes, confirmed with support). Which means winning Under is much easier here but winning over is harder because Ot/SO goal is not added!

Conclusion

Place +1, Team Total Under 2.5 and Game Under 5.5 in Marathon.

Don't place -1 Bets, Team Total Over 2.5 and Game Over 5 in Marathon.

Recommendation & odds

- Good underdog value pick (5 Stars) on Ottawa
- Ottawa +1.5 Spread line (75.86% chance to cover the spread)
- Very high chance 76% of the tight game that can go into overtime
- Los Angeles team is among 5 most overtime-friendly teams

This game has an interesting controversy. According to the bookies the favorite based on the odds is Los Angeles Kings however based on ZCode calculations the real predicted game winner is Ottawa Senators. Let this not confuse you. We base our predictions on the historical statistical model not on what bookies or fan crowd think of the odds.

Los Angeles Kings are 13-11-4 at home this season. According to bookies the odd for Los Angeles moneyline is 1.71 and the

Please note some bookies like Pinnacle don’t offer Underdog-1 spread bets (it is offered only by 5Dimes and Bet365) while others don’t offer Team totals. The best bookie that offers everything is 5Dimes.com

NFL Trends and Systems

NFL is very popular and profitable sport to follow. The only problem, this sport is not daily like MLB and others, here you have only **1 game per week**. On the other hand you have more time to prepare and check picks!

Take a look how we played NFL last season:

<http://www.facebook.com/ZcodeNFLpicks> (scroll to old games from 2011)

Lets talk a little how we usually plan NFL picks. We have several options:

1. **Moneyline Game winner picks** (3-5 Star selections) with odds from 1.45 to 1.8 usually.

Game Winner Pick: ★★★★★

2. **Spread Line selections**

3. **System plays on hot teams.** When the team is hot we can play 3 step easy progression : 1x-2x-3x following in case of loss. The chance that a hot well selected team will get into a long losing streak is really low.

4. **2 team parlays.** When odds are proper the system gives you parlay recommendation (usually with odds around 1.2-1.3). 2 team parlay is also a system bet, usually with 1x-2x-3x progression. the chance of such parlay to lose 3 times in a row is nearly zero.

5. **Underdog value picks (yellow stars)**

6. **Over Under total picks**

The best way to check NFL picks is Friday evening/Saturday morning before the games start!

QUICK REFERENCE SHEET

- The place to get your picks → <http://zcodesystem.com/vipclub/picks.php> "Hot trends" Tab!
- Moneyline means "bet to win the game" In short often referenced as ML
- Spread/ Puckline / Handicap -1 means "to win by 2 or more goals. If win by 1 goal you get a Push (refund of the bet) Thats part of the system to preserve your money :)
- Don't bet -1.5 on NHL/MLB. Always use -1 instead. It is a much safer bet because of the Push in case your team wins by only 1 goal. All qualified bookies offer -1 bet few hours before the game (**not in the morning**) Those bets usually "show up" later during the day so be patient!
- Away team is listed first, Home team is listed second
- Bet 1% of your bankroll per bet. For example for \$1000 bet \$10 bets, fixed size
- **Odds may change through the day.** That is normal. Sometimes underdog can become a favorite.
- Better to place bets few hours before the game when the situation is clear. (Final prediction)
- Besides NHL we also offer NFL, MLB, NBA, Soccer, Horse racing. Find links in "**Hot Trends**" section in zcode menu!
- **Do not bet other types of bets** (Game Totals Over/under, +1.5, parlays, bets with lower amount of stars and bets for road favorites and home underdogs). Those additional types of bets are posted for experts only, you don't need them for now!
- Do not expect to win every single day. We are doing a sports investing system with a long term profit, not a one day *get-rich scam*. You will not become millionaire overnight with it and you will have losing days and weeks. That is normal. Always see the BIG picture and remember that sports investing is a **PROCESS**! Remember, our system is a proven winner in a long run!
- Do not bet only based on Stars!! Follow expert systems in "**Hot Trends**" section!!
- "Final prediction" is fixed 3 hours before the game time and does not change anymore.

See the big picture: remember, Sports investing is a **PROCESS**, not get rich today scam! You need to see results long term and not care much about day to day wins and losses. The system **WORKS** since 1999 and never had a losing year.

That's all for now! Follow the system and win!

Z Code Tools to help you here with money management for system games

Sometimes you see recommendations like "Possible System play on Team X". This is the most popular bet type in MLB. It's not used much in other sports. What does it mean?

During the last 12 years we've developed several successful systems based on the money management. This means it is pure math, no guesswork. In such system our goal is to win by units not by odds.

For example in a 3 series game we can lose 2 times and still be in profit when you finish the series!

We don't just stupidly double the unit size like in martingale like other capers do. This is too risky for the bankroll! Never do that. We use different progressions such as positive progressions, Labouchère system etc to keep us in profit no matter what outcome is! That's why it is important that you follow the units when we state every "system" game! Never bet fixed units on the system games!

Place system games like normal fixed stakes - just follow the units plan carefully! This way even if you lose 2 out of 3 games you are still in profit in most cases!

Use **System Calculator** if you are betting on the system progressions based on our predictions:

System Plays Points Calculator

	Original Bet A	Bet B	Bet C	Bet D
Points:	<input type="text" value="200"/>	410.53	842.66	1729.67
Odds:	<input type="text" value="1.95"/> <small>(old odds)</small>	<input type="text" value="1.95"/>	<input type="text" value="1.95"/>	<input type="text" value="1.95"/>
Profit:	190	390 <small>= 190 + 200</small>	800.53 <small>= 190 + 610.53</small>	1643.19 <small>= 190 + 1453.19</small>

This is a point calculator for the system bets. It has 3 step progression A, B, C. A is an original bet. Say it's 100 points. Then enter the odds for it and it will show the profit you expected to win. If you lose bet A you can enter the odd for bet B and it will calculate the amount of bet B you need to bet to recover the loss from bet A plus get the original desired profit.

Fun bets, Expert Bets and PODs

Fun bets are not advised for newbies but it's a nice way to build your bankroll with no stress if you follow the sport yourself. Z code will be a nice helper here for you! Follow expert systems in "Hot Trends" section!!

Fun bets usually include:

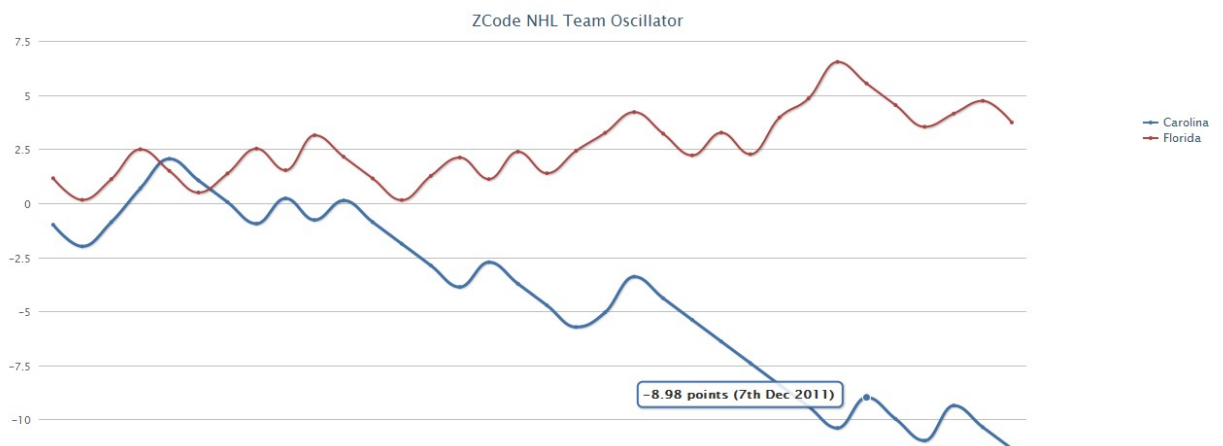

- Bets on predictions with stars less than 4.** Such games require you to perform additional analysis. You should pay very close attention to the starting goalies in NHL. You can find the starting goalies here: <http://goaliepost.com/>
- Game totals.**  (Green stars). Zcode can be a great helper here for you but you can't bet Totals blindly by stars, they require additional goalie and team strategy analysis. Usually teams with strong offense and good goalie tend to go Under 5.5 in NHL. You can find discussions under each game to see what experts think.
- Parlays** – you can parlay low profit safe bets like +1.5 or Under 6 or Over 4.5 when advised.
- Goal Salami (NHL)** When the number of games is low (4-6 games) and most teams are favorites at home you can play a fun bet called Home Goals Salami expecting home teams to win by the sum goal amount.

- e) **Hedging bets.** When you lay big money on strong favorites it's always good to hedge your bet with a small bet on underdog parlayed with something else so the possible upset does not hurt you too much.

Additional useful bonus tools by Zcode:

1. **Team Strength "Incredible" Oscillator:** http://zcodesystem.com/nhl_oscillator/ for NHL, NBA etc (Available for other sports too)

ZCode Team Strength Oscillator shows you the current team shape in a form of an easy chart. Just by looking at the chart you can compare two teams to see each team's pattern and current trend, which team is surging, which is slumping. You will also get the current team status, their last games and the difference (delta) between their conditions. The Oscillator is calculated based on the bookie odds for the closed game.

2. **Power rankings** http://zcodesystem.com/nhl_power_rankings.php

One of the great features of Zcode system will be automatically updated daily power rankings for NHL, NBA, MLB and weekly for NFL. They show the real condition and shape of the teams based on the internal system indicators. You can compare how they differ from the traditional Standings (Place in Ratings) that you can find on public websites like Covers or NHL.com that are usually updated weekly and become outdated too fast.

The value of such table is huge for the professional bettor because it shows you the real **CURRENT** power of the team, not the traditional "general" power shown by public standings tables. Let me give you an example. Team A won a lot of games in October and stays on top of the division with the big amount of points, however it lost 7 out of last 10 games. The traditional standings tables will still show a high position for the team that has collapsed and currently not playing well at all giving you fake indications of the strength!

Of course power rankings is not the only thing that matters but it is one of the most important indicators of the team current state and power.

Current rank ▲	Team	Status	Last 6 games streak	Current Standing in Sports Ratings
1	 Boston Bruins		W + W + W + W + W + L	2
2	 Chicago Blackhawks		W + L + W + W + W + W	1
3 ↑	 New York Rangers		W + W + L + L + W + W	6
4 ↑	 Vancouver Canucks		W + W + W + L + L + W	8

3. Totals Predictor for NHL

http://zcodesystem.com/totals_predictor/?team1=NY%20Islanders&team2=Boston

The Totals Predictor is a unique tool developed based on Jonathan Ma ideas. Here is how it works. For every team we are building 2 lines.

The blue line is the Over/Under line. We assigned a value of 1 for the Overs and a value of -1 for the Unders. For the purpose of this prediction tool, over/unders are based on 5.5. Any game with a push on 5 is considered an under for 5.5.

The red line is the differential between the over/under based on the last 10 games. Examples: A 6-4 in favor of over would be +2. A 3-7 in favor of under would be -4.

Next step is to compare the lines and see the repeated patterns. For example if you see both teams are trending up on the red line this means they score much more goals than usual and the game will probably go Over 5.5!

Video tutorial: <http://youtu.be/UMTL0hiHR8s>

Tips for winning with Totals Predictor

1. Use progressions like 1x - 3x - 5x because odds on Over 5 or Under 5.5 usually are around 1.6-1.7 which is too low to be profitable on a flat betting. The chance to lose over 4 totals in a row is very low.
2. Ignore all games with unclear signal. It's better to pass than lose.
3. Check the starting goalies.
4. Remember teams tend to score less on the road even if they score a lot at home
5. Compare your prediction to what Zcode experts say about the game in the VIP section to make sure you don't go against the experts opinion.

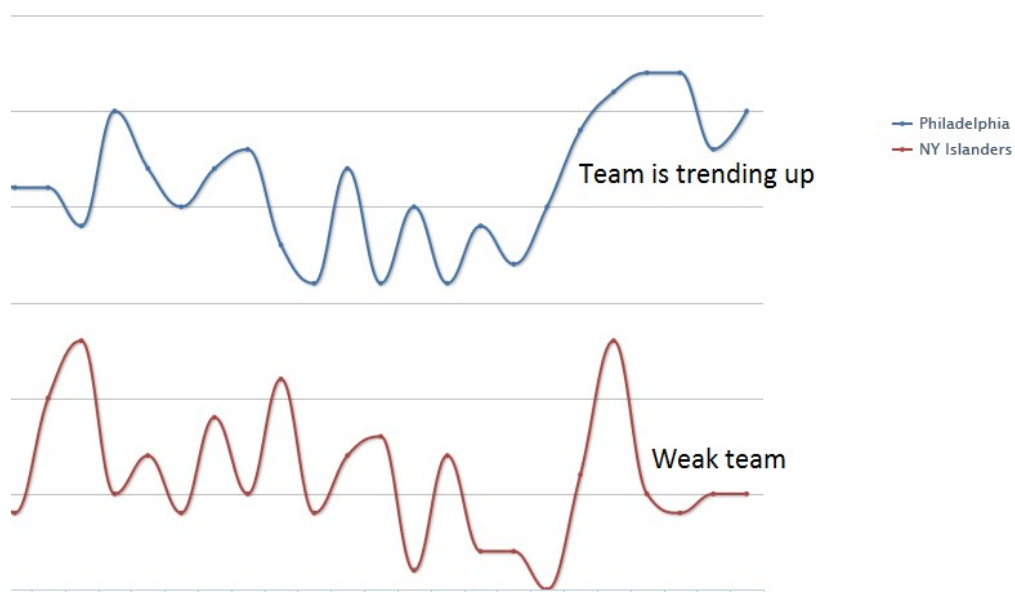

4. Power Ranking Indicator

One of the great features of Zcode system is automatically updated daily power rankings. They show the real condition and power of the teams based on the internal system indicators.

However how can we learn how this power changes over time to predict the future games? This is where Zcode Power Rankings Indicator comes to your help! It shows you how Power Ranks of the teams changed over the course of the season and gives you chance to compare them easily! The higher power rank on the chart the **BETTER**! (we display it as 30 minus power rank).

It helps you understand if your team is stable (straight chart) or unstable (shaky chart with big dips) and where it is trending now. Enjoy!

5. Head to Head Tool

Zcode Head-to-Head Tool is a unique helper that gives you entire information on how 2 teams performed against each other: the results, the odds, who won the game etc. The most important information that makes it really powerful is Team Statuses. Now you can analyze head-to-head performances and find out which was the team status during those games. If you find a team that won most of the recent meetings and the status is proper, it's a very strong confirmation that it will win once again.

Of course you can't base whole pick only on head-to-head results but it will give you an important extra confirmation to the other Zcode predictions and picks to help you win!

Ideas to maximize your profit (FOR EXPERTS ONLY)

- *When the odd is too low (for example on home favorites like Boston playing against super weak last place team) you can risk more by putting bet on “win in regulation” instead of “moneyline including OT”. Usually the odd is better. Some bookies like bet365 also offer Spread-2 Bet for such games for maximizing profit*
- *On some bookies like 5Dimes you can bet super profitable bet like “underdog-1” spread. Use it for 5 star dogs to maximize the profit*
- *When your strong team is known to score a lot and a weak one has poor defense and goalie use Team Total Over 2.5 to maximize the profit*
- *When the odd is super low and you think “things are too good to be true” and expect an upset you can place a hedging parlay on the underdog moneyline parlayed with something else.*
- *Parlay “5 star underdog” on +1.5 spread with something else – it has very high winning rate.*
- *Check what other experts think of the game.*
- *Check line reversals 5-10 mins before the game starts to confirm your bets*
- *Follow expert systems in "**Hot Trends**" section!!*
