

Quick Installation Guide of WLAN Access Point

※ To avoid users without access right through your WLAN Access Point, suggest that use security mechanism like WEP, WPA or set ID/password for web configuration login IP address 192.168.1.254.

Preparation

- 1 At least one PC with IEEE802.11b/g WLAN client installed.
- 2 One straight-through Category 5 Ethernet cable, used to link LAN interface to configure Access Point.
- 3 WLAN Access Point.

Check package contents:

- ✓ WLAN Access Point
- ✓ DC 7.5V Power Adapter
- ✓ User's manual CD-ROM
- ✓ 1.8M RJ-45 Cable Line

Collect Installation Information:

LAN configuration

| | |
|---------------------------|---------------|
| <i>IP Address</i> | 192.168.1.254 |
| <i>Subnet Mask</i> | 255.255.255.0 |

WLAN configuration

| | |
|------------------------------|--------|
| <i>SSID</i> | MyWLAN |

| <i>Channel Number</i> | 11 |

Quick Installation Guide of WLAN Access Point

Parts and Functions of WLAN Access Point:

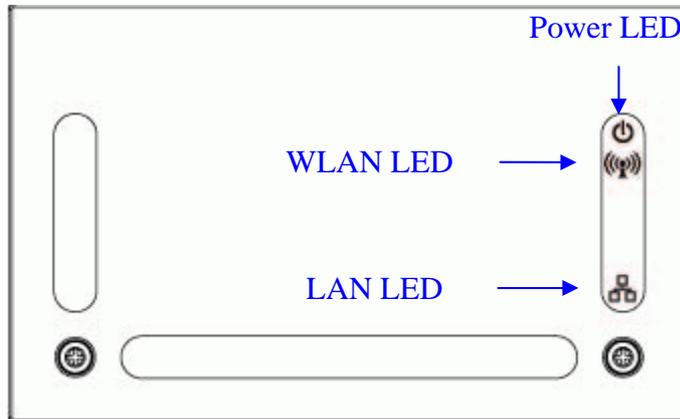

Figure 1 – WLAN Access Point Upper Panel

| LED Indicator | State | Description |
|-------------------|----------|---|
| 1. Power LED | On | The WLAN Access Point is powered on. |
| | Off | The WLAN Access Point is powered off. |
| 2. WLAN LED | Flashing | Data is transmitting or receiving on the antenna. |
| | Off | No data is transmitting or receiving on the antenna. |
| 3. LAN LED ACT | Flashing | Data is transmitting or receiving on the LAN interface. |
| | On | Port linked. |
| | Off | No link. |

Quick Installation Guide of WLAN Access Point

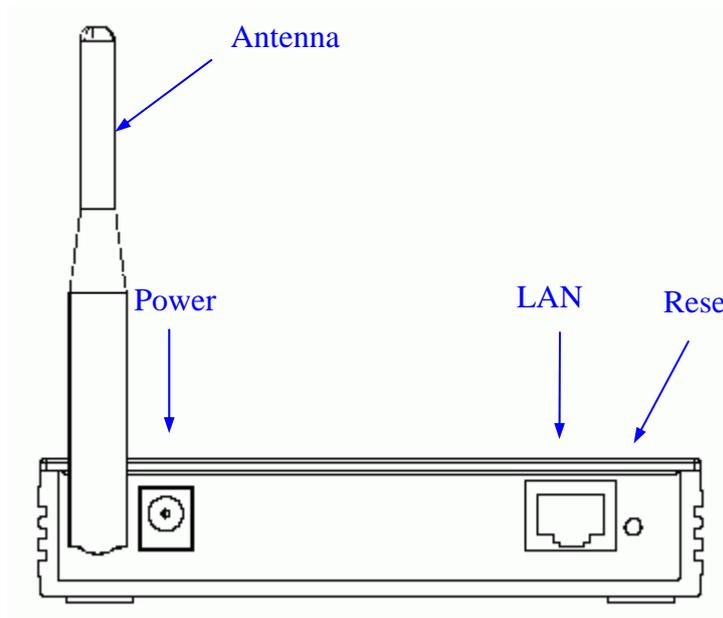

Figure 2 – WLAN Access Point Rear Pane

| Interfaces | Description |
|------------|---|
| 1. Antenna | The Wireless LAN Antenna. |
| 2. Power | The power jack allows an external DC +7.5 V power supply connection. The external AC to DC adaptor provide adaptive power requirement to the WLAN Access Point. |
| 3. LAN | The RJ-45 sockets allow LAN connection through Category 5 cables. Support auto-sensing on 10/100M speed and half/ full duplex; comply with IEEE 802.3/ 802.3u respectively. |
| 4. Reset | Push continually the reset button 5 ~ 10 seconds to reset the configuration parameters to factory defaults. |

Quick Installation Guide of WLAN Access Point

Installation

Step One – Power On WLAN Access Point

Connect DC 7.5V Power Adapter to WLAN Access Point and the wall power socket.

Notice: It will take about 55 seconds to complete the boot up sequence after powered on the WLAN Access Point; Power LED will be active, and after that the WLAN Activity LED will be flashing to show the WLAN interface is enabled and working now.

Step Two – Configure WLAN Access Point

1. Connect your PC to LAN port for configuration setting

WLAN Access Point is delivered with the following factory default parameters on the Ethernet LAN interfaces.

- Default IP Address: **192.168.1.254**
- Default IP subnet mask: **255.255.255.0**
- WEB login User Name: *<empty>*
- WEB login Password: *<empty>*
- Configure your PC with IP address between 192.168.1.1 to 192.168.1.253 and subnet mask to be 255.255.255.0, then open an Internet browser (i.e. Microsoft IE6.1 SP1 or above) to connect WLAN Access Point by entering <http://192.168.1.254> to URL field.

The screenshot displays the web interface for a WLAN Access Point / Client. The page title is "WLAN Access Point / Client" and the main heading is "Access Point Status". Below the heading, a message states: "This page shows the current status and some basic settings of the device." The interface is divided into three sections: System, Wireless Configuration, and TCP/IP Configuration. The System section shows Uptime as 0day:0h:0m:51s and Firmware Version as v1.40. The Wireless Configuration section shows Mode as AP, Band as 2.4 GHz (B+G), SSID as MyWLAN, Channel Number as 11, Encryption as Disabled, and BSSID as 00:0e:8e:7d:3a:bf. The TCP/IP Configuration section shows Attain IP Protocol as Fixed IP, IP Address as 192.168.1.254, Subnet Mask as 255.255.255.0, Default Gateway as 192.168.1.254, and MAC Address as 00:0e:8e:7d:3a:bf. A sidebar on the left contains a "Site contents" menu with items: Status, Setup Wizard, Wireless, TCP/IP Settings, Log, Statistics, Upgrade Firmware, Save/Relead Settings, and Password.

| System | |
|------------------|----------------|
| Uptime | 0day:0h:0m:51s |
| Firmware Version | v1.40 |

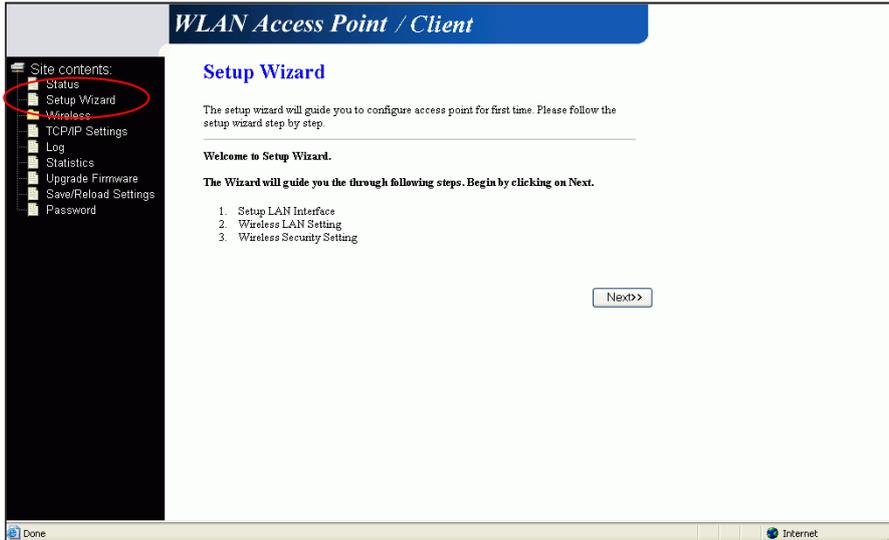

| Wireless Configuration | |
|------------------------|-------------------|
| Mode | AP |
| Band | 2.4 GHz (B+G) |
| SSID | MyWLAN |
| Channel Number | 11 |
| Encryption | Disabled |
| BSSID | 00:0e:8e:7d:3a:bf |
| Associated Clients | 1 |

| TCP/IP Configuration | |
|----------------------|-------------------|
| Attain IP Protocol | Fixed IP |
| IP Address | 192.168.1.254 |
| Subnet Mask | 255.255.255.0 |
| Default Gateway | 192.168.1.254 |
| MAC Address | 00:0e:8e:7d:3a:bf |

Quick Installation Guide of WLAN Access Point

The following example is to configure Access Point as “AP” mode that use factory default value. You may change those values if you think that is necessary.

2. Click “Setup Wizard” in submenu of Site contents

- Click “Next>>” button to go next.

3. Configure LAN Interface

1. LAN Interface Setup

This page is used to configure the parameters for local area network which connects to the LAN port of your Access Point. Here you may change the setting for IP address, subnet mask, DHCP, etc..

| | |
|---------------------|--|
| IP Address: | <input type="text" value="192.168.1.254"/> |
| Subnet Mask: | <input type="text" value="255.255.255.0"/> |

- IP Address – Assign LAN IP address.
- Subnet Mask – Given Subnet Mask
- Click “Next>>” button to go next.
- Click “<<Back” button to go previous
- Click “Cancel button to go back Setup Wizard page.

Quick Installation Guide of WLAN Access Point

4. Configure Wireless Basic configuration

2. Wireless Basic Settings

This page is used to configure the parameters for wireless LAN clients which may connect to your Access Point.

Band: 2.4 GHz (B+G) ▼

Mode: AP ▼

Network Type: Infrastructure ▼

SSID: MyWLAN

Channel Number: 11 ▼

Enable Mac Clone (Single Ethernet Client)

Cancel <<Back Next>>

- Band – Assign Radio Freq.
- Mode – WLAN Mode (AP/Client/WDS/AP+WDS).
- Network Type – Infrastructure/Ad hoc.
- SSID – Assign SSID.
- Channel – Assign wireless channel number.
- Enable Mac Clone(Single Ethernet Client) – Clone Ethernet Mac address to replace default Mac address (Only Client mode).
- Click “Next>>” button to go next.
- Click “<<Back” button to go previous
- Click “Cancel button to go back Setup Wizard page.

5. Configure Wireless Security

3. Wireless Security Setup

This page allows you setup the wireless security. Turn on WEP or WPA by using Encryption Keys could prevent any unauthorized access to your wireless network.

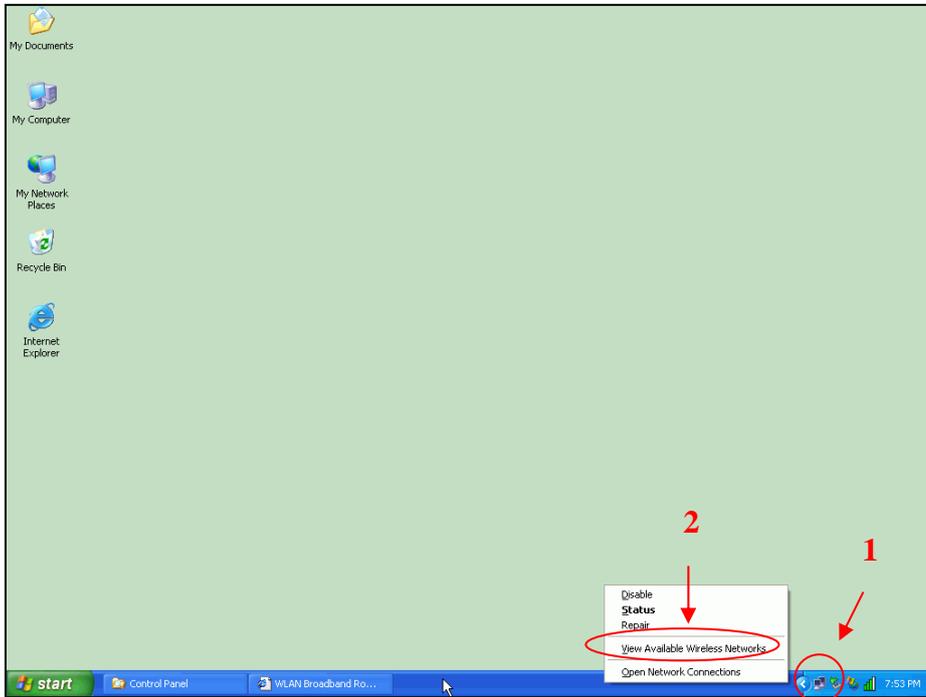

Encryption: None ▼

Cancel <<Back Finished

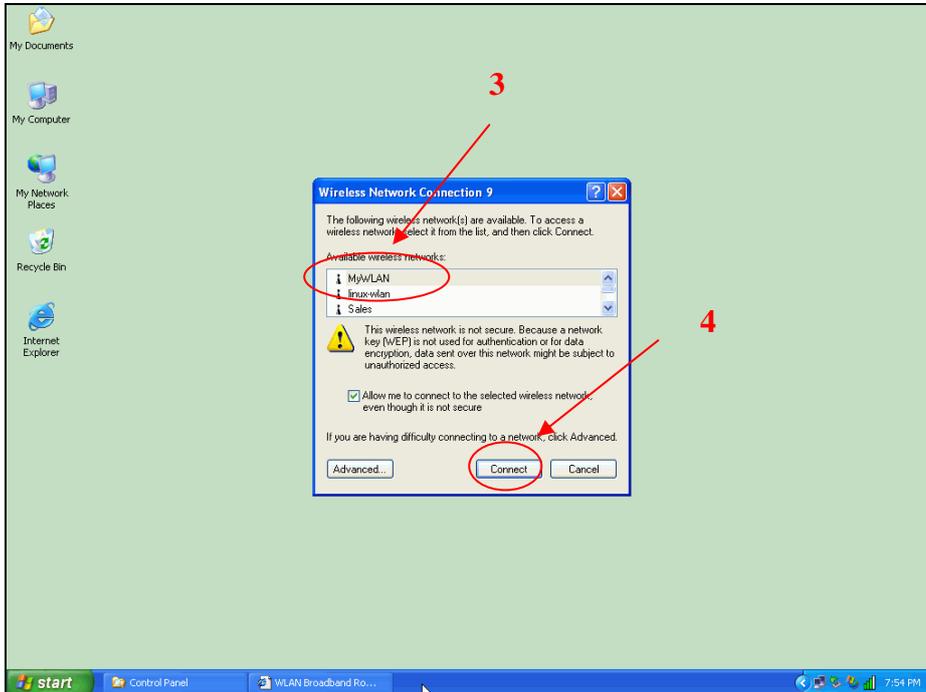

- Encryption – Setup Wireless Security.
- Click “Finished>>” button to end wizard.
- Click “<<Back” button to go previous
- Click “Cancel button to go back Setup Wizard page.

Quick Installation Guide of WLAN Access Point

Step Three – Connect WLAN client to WLAN Access Point wirelessly

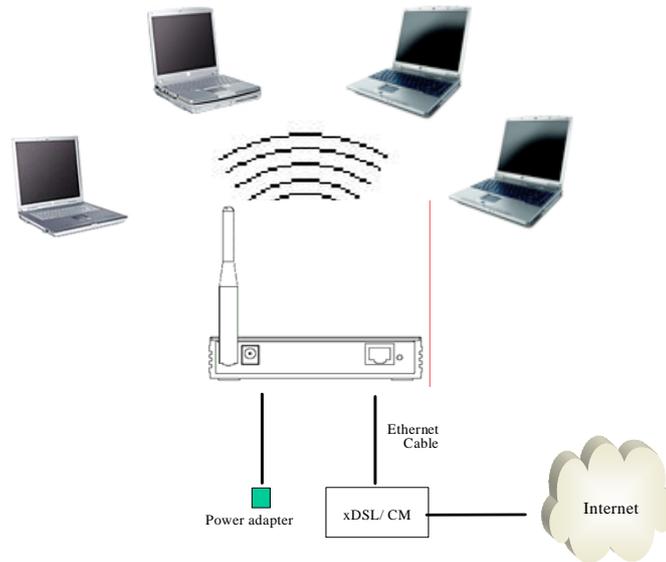

- On your wireless client PC:
1. Move your mouse to the Network icon on the Task bar and right click the mouse button to bring up the pop-up menu.
 2. Click the View Available Wireless Networks on the pop-up menu.

3. Select the specific WLAN network (SSID) from the Available Networks list.
4. Click the Connect button to establish the communication link to the wireless network

Reference

Please consult the user's manual of WLAN Access Point for detailed and complete operation guide.

The equipment has been tested and found to comply with FCC and CE Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received including interference that may cause undesired operation.

Quick Installation Guide of WLAN Access Point

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The WAPR-141 (FCCID: RYK-WAPR141) is limited in CH1~CH11 for 2.4 GHz by specified firmware controlled in U.S.A.

EC Declaration of Conformity

Name applicant:

SparkLAN Communications, Inc.

3F, No. 246, Sec. 1, Neihu Road, Neihu Chiu, Taipei, Taiwan, ROC 114

Hereby declares under sole responsibility that product

Brand name: Sparklan

Product number: WAPR-141

Product description: Wireless 802.11g Multi-mode AP

To which this declaration relates complies with the requirements of the following standards:

EN 300 328

EN 301 489

EN 60950-1 2001

This certifies that the designated product as described above complies with the directives described above and carries the CE marking accordingly.

This declaration has been signed under responsibility of the manufacturer / importer.

Name manufacturer / importer:

Sparklan Communications

Date: July 31, 2006

Mike Chen

CEO

Product article code: WAPR-141

Product description: Wireless 802.11g Multi-mode AP

Product manufacturer / importer: Sparklan Communications, Inc.

Countries in which the product as described above may be used freely:

Austra, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK

Countries where usage of the product as described above is prohibited:

None.

Countries where usage of the product as described below is limited:

France: The use of other channels than the channels 10 through 13 is prohibited by law.
