User Manual on Text-to-Speech Feature

TABLE OF CONTENT

## FUNCTION ENABLING

The text to speech function or TTS is used to transform the text information into the speech voice.

To enable the text to speech function, do the following:

1. Press and hold on the screen until the context menu will appear.
2. Select *Text-to-Speech* in the context menu;
3. The TTS control menu will be displayed at the bottom of the opened book.
4. Highlight a sentence in the text for playback.
- Press ▶ to start speech reproducing.
- Use the forward or rewind buttons to select further sentences for playback.

everybody. By nature inoffensive, friendly, and obliging, his presentation at St. James's had made him courteous.

Lady Lucas was a very good kind of woman, not too clever to be a valuable neighbour to Mrs. Bennet. They had several children. The eldest of them, a sensible, intelligent young woman, about twenty-seven, was Elizabeth's intimate friend.

That the Miss Lucases and the Miss Bennets should meet to talk over a ball was absolutely necessary; and the morning after the assembly brought

Pride and Prejudice

- Use the volume controls to adjust the playback volume.
- To select the playback language, press the language field on the left side of the TTS control panel.

5. Select the desired playback language from the list of available ones.

INSTALLING AND DELETING THE VOICE PACKAGES
Installation of additional voice packages

To install additional voice packages, download them from the site www.pocketbook-int.com.

To install the packages on the device, do the following:

1. Copy the package file to the device.
2. Open the *File Manager* application.
3. Place the voice package file to internal memory or external SD card.
4. Launch the file and confirm the installation

Deletion of voice packages

- To delete a voice package, go to the *Settings> Applications> Manage Packages* section.
- The section contains all installed packages, including dictionaries and voice packages.
- To delete a package, press and hold it and select *Delete* from the context menu.
- Confirm the deletion.

TTS SETTINGS

To configure TTS function, go to *Settings> Text to Speech* section.

There are the following settings:

- *Always use my settings* — use user settings override default application settings.
- *Speed of speech* — set the playback speed;
- *Language* — select the default language package.
