Operation instruction for Bluetooth play mode

Match your BSH100 Bluetooth Headset

Note: Prior to use of Bluetooth headset to receive telephone calls, it should be

matched with your mobile phone first.(Match means an established connection between Bluetooth devices, and let mobile phone store the headset unique ID at the same time.) Headset will connect to mobile phone automatically once matched to them.

1. Place the headset and mobile phone together (not more than 1 meter). When headset is in power off state, hold “Play/Pause” button to power on the headset and the orange LED flashes, you can match them then.
2. Choose “TEAC BSH100” on device list; confirm it according to your mobile phone.
3. Input pass code “0000” and confirm it to connect to headset. Headset will enter into stand-by status when finished the match. Orange indicator LED will flash.
4. Now you can use Bluetooth headset to dial number, pick up or hang up mobile phone calls.

Note: for some mobile phone models, when it powers on again after power off, Bluetooth headset will match to mobile phone automatically.

Pick up or hang up phone calls with BSH100 Bluetooth headset

When a call is coming in, you can pick up the call by pressing Bluetooth function button.

1. When finished calling, press Bluetooth button to hang up. If other side hang up already,

there is no need to press bluetooth button

2. Hold Bluetooth multi function button for 2 seconds, the last called mobile phone number will be redialled automatically.
3. If there is a call coming in when the headset is playing music or a FM radio station, the music of FM radio will be paused and enter into stand by status and they will be continued when hang up the call.

IV. LINE IN Operation Instruction

Insert the audio cable into the audio port on headset; you can now listen to music directly from MP3 player, PC, chat online, or any other device with 3.5mm audio out.

Note: If the Headset is in another mode when the line in function is used, then the current mode will be exited, and will power off after red LED flash lasts several seconds. You should take off the audio cable and power it on again if you’d like to enter another mode.

V. Charge operation instruction

1. Prior to use of the headset for the first time, please fully charge the headset
2. Charge from mini USB port located on headset with included USB cable

3. When connected to charger, Red indicator LED will flash, and it will shine constant once fully charged.

Note: The headset can be charged by USB cable enclosed when connected to computer.

VI. BSH100 Bluetooth Headset Troubleshooting:

If the headset cannot be matched with mobile phone, please operate as below:

1. Please ensure that your headset has been matched with mobile phone, and the bluetooth function in mobile phone has been turned on.
2. Please check the distance between headset and your mobile phone, whether it's beyond 10m, and whether there is wall or other electronic devices blockers etc.

If BSH100 MP3/Bluetooth headset can't play music normally:

1. Please connect to PC and check the Micro SD card whether there is music stored into it.
2. Please check the music format which stored into the Micro SD card.
3. Please check the power capacity.

During calling, there is noise or voice breaking up

1. please make sure the distance between your mobile phone and your headset is in valid communicating range (below 10m)

2. to get best timbre during headset calling, we suggest put your mobile phone on right side to ensure best communication effect.

(Note: if System halted occurred to your headset or it can't be turned on, please press "Reset" or charge for it to Reset the electronic circuit.)

VII. BSH100 MP3/Bluetooth headset usage safety rule

1. According to your local law, please keep concentration and ensure safety if use the bluetooth headset when driving
2. Do not let children play with the headset. (Small parts may cause choking hazard)
3. Please note you should power off electronic devices or wireless devices on some specified places which include hospital, exploding range or somewhere that has exploding potential risk.
4. Please turn off the bluetooth headset before boarding plane, and do not use during flight unless advised.
5. To avoid damage to your hearing, we suggest you don't listen to music at maximum volume for a long time.

VII. BSH100 MP3/ Bluetooth Headset maintenance

Please keep the headset dry and do not place headset near rain, humidity and other liquid. These will corrode the headset. If the headset is wet, please do not use it until it's dried completely.

1. Do not clean the headset with strong chemicals, cleaner and detergent etc.
2. Do not use the headset in dusty and dirty place, it may damage the removable parts and electronic components.
3. Do not place the headset in a high temp place, high temperature will shorten the device usage life, damage battery or lead to some plastic distortion and melt.
4. Do not store the headset in low temp place, when earphone temp arise to normal temp, humidity will enter into the inner of the headset, it will lead to pcb board damage.
5. Do not disassemble and modify the headset yourself.
6. if it's not used for a long time, prior to use it, please charge the headset.
