

Production Introduction

ORICO A3H Series, including A3H4/A3H7/A3H10 five models, is a super speed USB 3.0 independent HUB which adopts VL811 mainstream chipset. You can expand multiple USB 3.0 interface in your PC. It features humanized design, you do not need to worry about the shortage of the USB interface. ORICO A3H Series supports multi-USB3.0 super speed interface using at the same time, allows the operation of multiple USB3.0 and other USB devices. Independent power supply provides stable power, built-in power switch and internal current protection protect the connected devices and HUB when it happened to power on.

Product specifications

Product model	ORICO A3H4/A3H7/A3H10
Product name	ORICO USB3.0 super speed HUB
Interface	USB3.0 B type male port/DC power port/USB A type female port
Product material	Aluminum
Product color	Black/white
Product dimensions	(W)5*(H)5*(L)10/14/18cm
Support system	Windows XP/Vista/7/8 &MAC (support USB)
Safety approval	CE and FCC approval
LED indicator	LED1-LED7 corresponds USB1-USB7 indicator status-blue

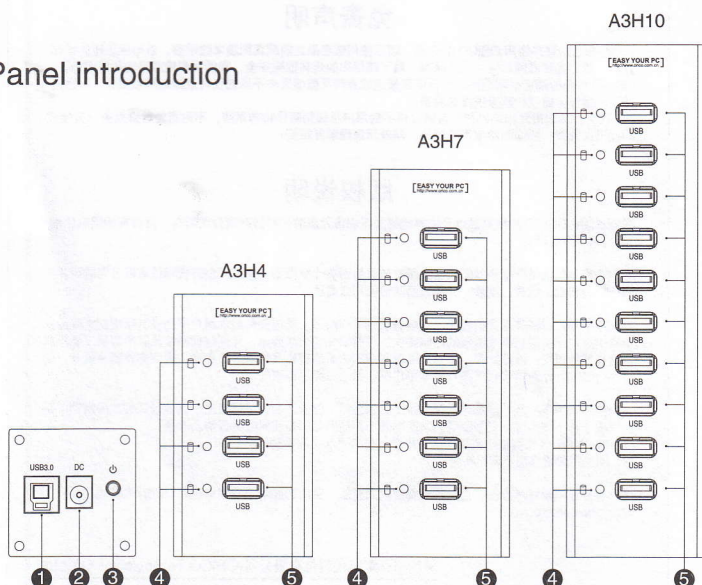

Product features

- Aluminum material, popular and fashionable
- LED indicator for power status and USB working status
- Multiple USB3.0 interface supports plug and play, hot-swap, easy to use and carry
- Support over current and instant current protection, protect the connected devices and HUB itself
- Support USB3.0 super speed (5Gbps) transmission, downward compatible USB2.0/USB1.1
- Drive free, supports Windows XP/Vista/7/8 &MAC supported USB
- Independent power supply provides stable power supply to connected devices

Packing Content

A3H Series USB HUB	1Pcs
DC power adapter	1Pcs
USB3.0 data cable (100CM)	1Pcs
User Manual	1Pcs
Warranty card	1Pcs

Panel introduction

- 1.USB3.0 B type interface
- 2.DC power port
- 3.power switch
- 4.LED indicator
- 5.USB interface

User operation

1、USB HUB connection:

- a). Connect power line with outlet, DC connector with DC interface in HUB
- b). Connect USB-A type cable with computer USB interface ,plug USB-B into USB3.0-B type female interface in HUB
- c). Open DC power supply

2、Devices connection:

- a). Insert to be connected USB device, corresponding LED indicator for USB interface will be lighted (blue), lower right corner of computer will have a mobile hardware prompt, disk management will also have one, shows device in a normal work status (Below)

3、Device exit:

Note: When you need to exit the mobile devices, please stop data R&W first, otherwise unable to exit the mobile device.

- a). Right-click the mobile hardware icon at the right lower corner of computer, select "Eject the USB device", safely remove the hardware.
- b). Exit the USB hardware, USB interface LED goes out, remove the external mobile devices

Application:

A3H Series USB HUB could use in USB3.0 disk drives, high-resolution camera, video surveillance cameras, digital video cameras, as well as multi-channel audio and other broadband peripherals, and supports simultaneous connection of four high-speed USB3.0 interface devices, the speed up to 5Gbps.

Note:

Do not beat this product and put it in damp or direct sunlight high temperature environment.

Improper use , demolition or operation not according to the instructions result any damage of your device or USB3.0 hub, our company will not be liable for any compensation or maintenance responsibility.

FCC and CE Radiation Norm

FCC

This equipment has tested and found to comply with the limits for Class B digital device pursuant to Part 15 of Federal Communications Commission (FCC) rules.

CE

This equipment has tested and found to comply with the limits of the European Council Directive on the approximation of law of the member states relating to electromagnetic compatibility(89/336/EEC) according to EN 55022 Class B.

FCC and CE Compliance Statement

These limits are designed to reasonable protection against frequency interference in residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed or used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in television reception, which can be determined by turning the equipment off and on. The user is encouraged to try and correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna increase the separation between the equipment and the receiver Connect the receiver is connected to.

CAUTION!

The Federal Communication Commission warns the user that changes or modifications to the unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
