

Now You Can Reclaim Radiant Health & Celebrate Life Again!

RE-ENERGIZE *YOUR* LIFE WITH THE REVOLUTIONARY
COLD LASER THERAPY THAT IS
CHANGING MILLIONS OF LIVES AROUND THE WORLD

Experience Quantum Healing at its finest.

The Scalar Wave Laser incorporates 5 Healing Energy
Technologies into an Ultra-Portable Healing Device (pg. 3)

In this 23 page report on Cold Laser (Low Level Laser) Therapy Equipment & Technology I will introduce you to a highly unique, therapeutic laser called the Scalar Wave Laser. I will also provide you with extensive, documented research on many of the key points of cold lasers that you should be aware of, along with ANSWERS to many of your questions.

“Cold Laser Therapy (CLT) has experienced dramatic and explosive growth over the last 40 years, becoming a leading non-invasive therapy. This is a highly effective and powerful healing technology used in tens of thousands of clinical settings throughout the world.

Uniquely suited to both clinical and individual usage, handheld lasers are an essential therapeutic mainstay over a broad spectrum of treatment applications. Medical specialties including Sports Medicine, Traumatology, Orthopedics, Dental Medicine, Urology, Gynecology, Physical Therapy, Acupuncture & Veterinary Medicine have all developed highly specialized and unique protocols to utilize cold lasers' unique applications.

Almost all professional sports organizations are now using Low Level Laser Therapy (LLLT), many of them extensively. In the US, at the professional level, every sport across the board has incorporated handheld lasers, both as a tremendously effective tool for reducing severity of injuries and greatly speeding recovery, and in a preventative and performance enhancing capacity.”

Jonathan Mather, ND

Professional Testimonial:

“I have had the opportunity to assist multiple patients with pain management, wound healing and physical recovery... This modality has been the best new technology I have had to offer my patients in the last decade. It is my hope that others will latch onto this technology and bring it forward, for it is a completely non-invasive option that provides so many physiologic advantages with no apparent side effects.”

--Jeffrey Nelson, MD, Medical Director

Burn and Wound Center at St. Mary's Hospital in Tucson, Arizona

INTRODUCING: The Scalar Wave Laser (SWL)

FDA CLEARED!

Cold Laser Therapy is revolutionizing the way individuals and practitioners approach holistic health care, pain management, rehabilitation, anti-aging, skin and wound care, and organ and gland balancing. Cold laser light therapy is at the leading edge of complimentary health care, Chiropractics, Acupuncture, Sports and Veterinary Medicine.

If you are considering investing in a cold laser, soft laser, healing laser or low level laser, but not sure which one to buy, you owe it to yourself to check out the Scalar Wave Laser (aka Quantumwave

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

Laser). I would like to introduce you to this remarkable technology and explain why—after testing dozens of different cold lasers, **this is my favorite hand held laser. (Hint – it’s more than just a laser :)**

Scalar Wave Laser is FDA CLEARED

Scalar Wave Laser (SWL) has OTC (Over The Counter) FDA Clearance for the widest range of conditions including:

- Pain relief
- Inflammation
- Circulation
- Arthritis
- Relaxation of tissue

The SWL is **FDA Cleared** for temporary relief of minor muscle and joint pain, arthritis, muscle spasm, relieving stiffness, promoting relaxation of muscle tissue, and temporarily increasing local blood circulation. Most other lasers have limited clearance and capabilities. Few to no lasers offer violet crystal technology and the SWL is the only therapeutic laser to offer the profound benefits of its patented scalar wave technology for deep unwinding & clearing of cell memory.

The Scalar Wave Laser provides a broad spectrum of features and settings unavailable in other lasers at an outstanding value.

The Scalar Wave Laser combines the most advanced digital cold laser technology with state of the art quantum scalar wave technology to address all facets of health, dis–ease, rejuvenation & addictions. While most lasers have limited, preset or no frequency capabilities, the SWL is fully digital & programmable with various frequency modulation capabilities and preset settings. Most lasers are limited to square wave–forms & analog technology. **The Scalar Wave Laser is fully digital and utilizes multiple wave forms & multiple frequencies including:**

- Sine waves
- Square waves
- Scalar waves
- Red Lasers
- Infrared Lasers
- Super Violet Diodes & More

The Quantum Scalar Wave Laser Main Unit Features 5 Healing Energy Technologies in a Single Handheld Unit:

More options allows for treatment of the widest range of conditions. It features 180mW of power spread over 2.5 inches surface area with 36 diodes: (8 red lasers, 650 nm, 5mW each / 8 infrared lasers, 780 nm, 5mW each / 20 violet, 405 nm, 5mW diodes), Full Frequency Programmability and patented Scalar Waves. The SWL is more than just a laser. This is an ultra–portable, multi–

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

wavelength, programmable, resonating, cluster laser with 3 optional 100mW laser probes in the Red, IR and Violet spectrum.

This is quickly becoming the most sought-after cold laser or low level laser system in America & abroad. You can't possibly treat all conditions with one wavelength, but with 3 wavelengths, a large 2.5" diameter cluster of 36 diodes & 3 different probes you can treat the widest range of conditions. Also great for horses, dogs, cats and pets as shown below.

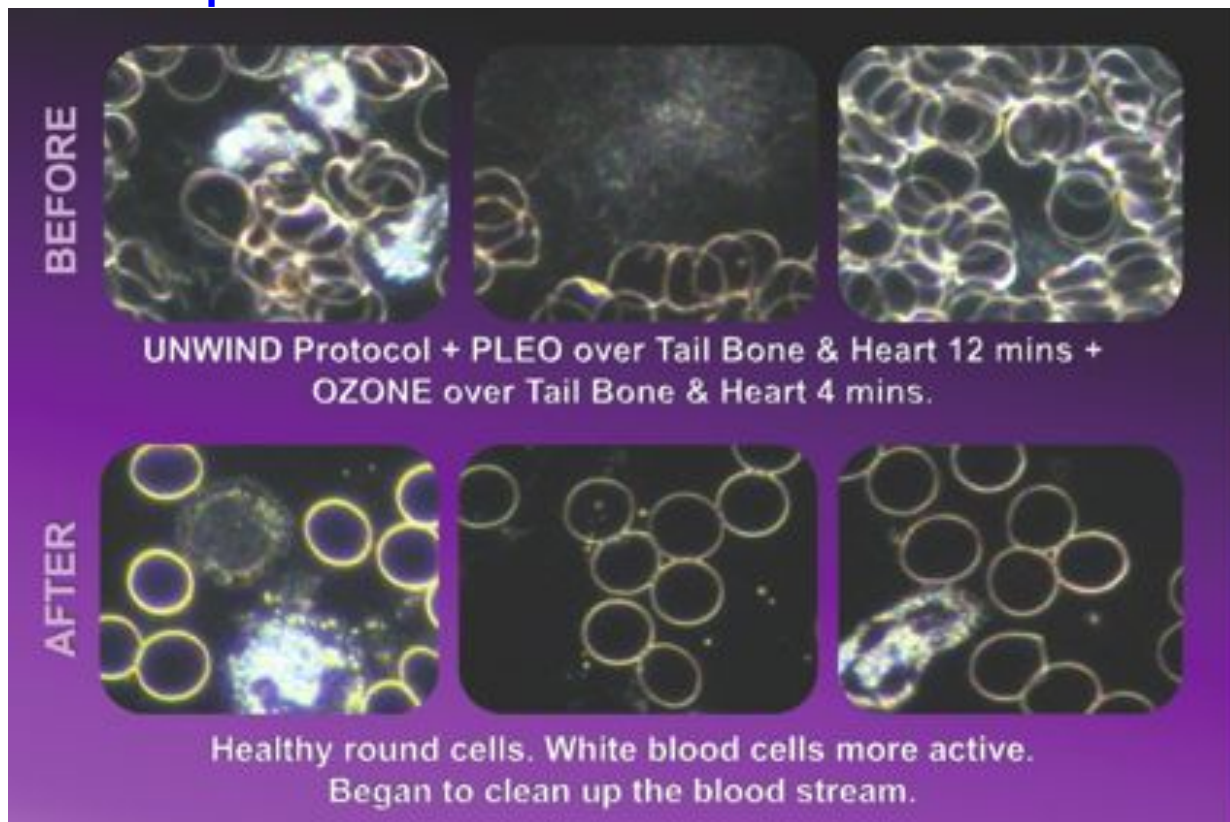

Professional Testimonial:

"The laser treatment speeds up cell repair & stimulates the immune, lymphatic, & vascular systems."

-- Paul Sibert, M.D.

Chief of Neurology at Jersey Shore University Medical Center

A significant effect of Cold Laser Therapy (CLT) with the Scalar Wave Laser can be clearly seen in the following photos of an individual who received treatments. They had their blood photographed with a special high powered microscope before and after.

Anyone can accomplish these kind of results using the SWL.

Cold Laser Uses, Benefits & Validation

Following is a compilation of research and data, gathered from the study of cold lasers worldwide, which reveals the profound value of LLLT in therapeutic applications

Low level laser therapy (LLLT) is the interchangeable name of Cold Laser Therapy (CLT). The application of laser light over injuries, lesions, burns, wounds, pain, inflammation and other disorders to stimulate healing within those tissues and cells. Lasers are best known for their ability to cut, but do not confuse Lasers for Healing, Cold Lasers or Low Level Lasers with cutting or high powered lasers! Low level lasers, under various names such as, cold laser, soft laser, biostimulating laser, photo stimulation diodes and many others, have been used for over 40 years in many countries as therapeutic energy devices to bring about favorable biological effects in both humans and animals.

“In Europe, Canada and Australia, where laser treatment is a well-accepted methodology, it is being used for treatment of traumatic, inflammatory and overuse injuries, pain relief and healing of arthritic lesions, reduction of abscesses and treatment of persistent non-healing wounds such as cold-sores and ulcers. This type of therapy has also been used to . . . reduce pain from surgical and other treatments.”

--Low Level Laser Therapy Provides New Treatment Possibilities,
Dr. Melyni Worth, Ph.D, World Equine Veterinary Review, Vol. 3, No.3, 1998

Rejuvenate your body from the inside out. The Scalar Wave Laser is an ideal anti-aging, pain management and healing laser that works on a cellular level to donate photonic energy, while promoting anti-inflammatory and analgesic effects. It gently and effectively unwinds stress, tension and old holding patterns while clearing cellular memory to support perfect healing.

All natural, pain-free and safe. Cold laser therapy and rejuvenation devices have been used actively in the medical, beauty and anti-aging field around the world for 40 years.

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

Anti-Aging and Facial Rejuvenation

www.discoverlasers.com/scalar-wave-skin-care

Reduce or Eliminate Wrinkles and Acne with Ease. The Scalar Wave Laser and especially the probes are ideal skin care systems, offering superior power, performance, surface area coverage and power in the 3 optimal wavelengths determined to deliver superior results. Promotes the production of collagen, elastin, firms and tones skin, heals scars and essentially allows for a natural “face lift” without drugs, injections or surgery.

Professional Testimonial:

“I have used the Scalar Wave Laser as a virtual drug free medicine cabinet to re-grow bone in my jaw, heal my knee and rejuvenate my face, getting rid of age spots and wrinkles. It’s AMAZING!”

-- Joy Gardner

Author of 10 Books on Health & Wellness

Have Low Level Lasers Been Proven Effective?

Low Level Laser Therapy is being used as a successful treatment option for countless conditions of pain, inflammation, dental, burn, addiction and illness situations all over the world. Low Level Lasers have been used for over 40 years in many countries as therapeutic energy to bring about favorable biological effects in people, plants and animals. Unlike many therapies and drugs that just treat symptoms, Low Level Laser Therapy (LLLT) or Cold Laser Therapy (CLT) has the ability to actually promote and enhance healing.

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

LLLT is the future of medicine and is a modality that is rapidly growing in popularity throughout the world. The first cold laser received FDA clearance in the US in 2002. Since then over 30+ lasers have received some type of clearance from the FDA. In the last few years Laser Therapy in North America has been steadily & exponentially increasing and the FDA has recently cleared multiple laser and LED devices for treatment of a variety of medical conditions including: carpal tunnel syndrome, cervical neck pain, shoulder pain, low back pain, joint pain, generalized muscle pain and acceleration of wound healing.

Use in Sports Medicine Worldwide

Technical light therapy is being used by Governmental agencies such as NASA for treating medical conditions in space applications. The U.S. Olympic training facilities have just released statements of endorsement for Laser Therapy for athletes. Cold lasers are used by almost all major sports teams the world over including in the Olympics, the NBA, NFL, and NHL sports teams.

The U.S. Olympic training facilities are enthusiastic supporters of Cold Laser Therapy (CLT), with over 50 US Olympic Sports teams incorporating Laser treatments into their therapy and training regimens. Cold lasers are extensively used by all teams in the NFL, the vast majority of NBA Teams, Major League Soccer, and the NHL. Trainers and team physicians in collegiate and high school level sports programs across the country are beginning to make use of Low Level Laser Therapy (LLLT).

In the week preceding the 2004 Super Bowl, Boston-based registered nurse Ellen Spicuzza, who usually treats Patriot players' injuries with medical massage, treated more than 10 Patriot players with cold laser therapy for tendon and muscle injuries. A couple of days prior to the Super Bowl weekend, she treated [Patriot wide receiver] David Givens, who had a locked-up hamstring. She rotated the laser over the belly of his hamstring muscle for about five minutes, and "The laser released it." For the big game, she used low level laser therapy on the athletes' most troublesome pain spots.

Chadwick Smith, clinical professor of orthopedics and bioengineering at the University of Southern California Medical School said, "Cold lasers speed the healing process. It used to take at least seven to ten days for a hamstring injury

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

to heal. Cold laser therapy cuts it down to two to three days."

The Sport Horse and Greyhound racing communities have been using LLLT for over 25 years for maintaining winning performance animals and to rehabilitate injured horses and race dogs, and get them back in the game again.

Are Low Level Lasers Safe?

Low Level Laser Therapy has been proven completely safe in over 4000 worldwide studies. When Low Level Lasers are used correctly, they are very safe. The most important safety regulation is to avoid pointing a laser at the eye. Stimulating lasers have a particularly powerful beam and can cause harm to the retina with prolonged exposure. The infrared spectrum is invisible to the eye; consequently it does not initiate an eye reflex response. Do not point lasers directly at an open eye, or over an active cancer or at a fetus during pregnancy. The Scalar Wave Lasers are equipped with a frosted diffuser that helps protect the eyes from harm.

Medical Conditions that Benefit from Cold Laser Therapy (CLT) Include:

- **PAIN** – Low Level Laser Therapy has been cleared by the FDA as an adjunct treatment method for pain related to neck and shoulder injuries.
- **Carpal Tunnel Syndrome** – Low Level Laser Therapy has been cleared by the FDA as an adjunct treatment method for this condition.
- **Epicondylitis (Tennis Elbow)** – Simunovic treated 324 patients . . . complete pain relief and restored functional ability were achieved in 82% of the acute patients and 66% of the chronic cases. J Clin Laser Med & Surg. 1998; 16 (3): 145-151
- **Fibromyalgia** – Longo treated 846 patients with fibromyositic rheumatism during a 15 year period. About 2/3 benefited from the treatment with regard to local pain, hypomobility and phlogosis. J Clin Laser Med Surg. 1997; 15 (5): 217-220
- **Headache/Migraine** – Wong treated 20 patients with migraine or symptoms resembling migraine. The pain disappeared after 1-5 minutes. Proc 9th

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

Congress Soc Laser Surgery and Medicine, Anaheim, CA: 2–6 Nov. 1991

- **Low Back Pain** – Soriano performed a double–blind trial with elderly people suffering from chronic low back pain. Treatment was effective in 71% of the laser group and 36% of the sham group. The pain disappeared completely in 45% of the laser group and 15% of the sham group. Lasers Surg Med. 1998 Suppl 10, p. 6
- **Rheumatism/Osteoarthritis** – Palmgren conducted a controlled double–blind study on 35 patients with rheumatoid arthritis of the hand. In the experimental group, grip strength and movement were improved while swelling, pain and morning stiffness were reduced. Lasers in Medical Science, 1989; 4: 193.
- **Wound Healing** – Palmgren investigated the effect of Low Level Laser Therapy on infected abdominal wounds after surgery. Healing time to half wound size was 6.8 days in the laser group compared to 14 days in the placebo group. Lasers Surg Med 1991; Suppl 3:11
- **Acupuncture** – In addition, laser light can be used to stimulate acupuncture points in a non–invasive, pain–free manner. Low Level Laser Therapy Provides New Treatment Possibilities, Dr. Melyni Worth, Ph.D., World Equine Veterinary Review, Vol. 3, No. 3, 1998
- **Bacterial Infection** – In research led by Michael Hamblin of Mass. Gen. Hospital and Harvard Medical School, mice with surgically induced wounds were dosed with bioluminescent bacteria to create potentially lethal infections. Utilizing a 665 nm laser diode photodynamic therapy (Low Level Laser Therapy) the researchers found that "infected wounds healed significantly faster with the PDT method. PDT shows promise as a topical antimicrobial alternative that may work even faster than antibiotics." The Journal of Infectious Diseases, June 1, 2003, PP 1717–1725.
- **Allergic Rhinitis** – Neuman & Finkelstein studied 50 patients in a double–blind randomized study. Following treatment with a 660 nm red laser, 72% of the treatment group reported improvement of symptoms as compared to 24% of the placebo group. Ann Allergy Asthma Immunol 1997;78:399–406
- **Blood Pressure** – Umeda tested the effects of a Low Level Laser on the control of blood pressure via energy administered via the medulla oblongata. The results from a group of 30 patients suffering from hypertension were positive in 80% of the patients. Laser Therapy. 1990; 2(2): 59

How Does Low Level Laser Therapy (LLLT) also known as Cold Laser Therapy (CLT) Work?

According to **Low Level Laser Therapy** by Jan Turner & Lars Hode (Prima Books), low level laser therapy --

- Reduces pain by causing the production of natural pain killer endorphins.
- Reduces inflammation by suppressing inflammatory enzymes that create swelling, redness, pain, and heat and enhances the release of anti-inflammatory enzymes.
- Enhances lymphatic drainage, which increases circulation and speeds healing.
- Stimulates the release of helpful healing enzymes.
- Releases tight muscles (both smooth and striated) that create chronic pain, joint problems, and decreased mobility.
- Speeds bone repair by stimulating fibroblastic and osteoblastic proliferation.
- LLLT in the correct frequency appears to be antiviral, antifungal, and antiherpetic.
- Laser irradiation of tissue cultures has shown that units of light energy (photons) are absorbed by enzymes, which react to light within the cell. Visible red light is absorbed within the mitochondria and the infrared light is absorbed at the cell membrane.
- In a mammalian cell, this results in a change in membrane permeability, increased ATP levels and increased DNA production. The photons picked up by the cell membrane result in improved membrane stability and increased activity of the ATP dependent Na/K pump. Because cell metabolism is influenced by Na/K movement across the membrane, increasing the gradient will affect the flow of ions and hence the overall metabolism of the cell.
- On a tissue level, it has been shown that irradiation by laser light results in increased collagen and epithelial production and production of new capillaries and an increase in density of the capillary bed.

- Reduction of pain and inflammation results from this treatment, as does the stimulation of nerve regeneration, muscle relaxation and atonicity (lack of muscle tone). There is also an indication that laser light therapy helps to increase the immune system response.

-- *Low Level Laser Therapy Provides New Treatment Possibilities*,
Dr. Melyni Worth, Ph.D, World Equine Veterinary Review, Vol. 3, No.3, 1998

FACT: Osmosis (transfer of essential nutrients) cannot occur across the cellular membrane of a de-polarized (sick) cell. Consequently, delayed healing, chronic dis-ease, scars, fatigue, and accelerated aging is observed! LLLT reenergizes (re-polarizes) injured cell membranes and increases the mitochondria energy by 150%, which speeds and improves the healing process!

There are 75 Trillion Cells in a human body and they all need electrons to communicate with each other. Laser light delivers required electrons and photons (little energy packets) directly to the cells and enhances both their ability to communicate with each other and their ability to produce ATP (chemical energy), which they require for optimal functioning. Additionally LLLT causes the release of anti-inflammatory enzymes and the production of endorphins, which are natural pain-killers and mood elevators.

- **Red light aids in the production of ATP in cells**, which increases cellular health and energy. The radiation (energy) in normal cells stimulates adjacent cells to divide in the normal process of regeneration and healing. Laser light stimulates abnormal tissue to activate normal inter-cellular radiation, thus stimulating the normal healing process to start again. The photons produced by laser light normalize tissue by activating enzymes within cells. Once activated, enzymes within a cell trigger a chemical reaction in which more enzymes are activated in a domino-type effect. Low Level Laser Therapy has no effect on normal tissue. Photons will only be absorbed by cells that need them.

--Holistic Bird Newsletter

Photobioactivation – Light is the energy of life

Photobioactivation is a term applied to a light stimulus that initiates and/or accelerates a physiological response. Other stimuli used in medicine, for example are temperature, ultrasound, electrical power & electromagnetic fields

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

In 1965 the Russians found that when they used a **pulsed laser light**, tissue would heal rapidly. If they used a **continuous beam**, it sedated the cell and relieved the pain. When a *single frequency pulsed light* hit the cell, it actually stimulated the cell to start producing more protein than it normally does, and as a result, the cell would heal. Even when they removed the light, the cell continued healing. The *continuous beam* had a reverse effect. It actually caused the cell membrane to relax; it killed pain, reduced inflammation and made muscle tissue relax. **The Scalar Wave Laser has settings for both kinds of light. Over the years researchers found that infrared, red, and violet wavelengths were the fastest way to regenerate tissue. Recovery from injuries went from ten days to two days!**

In the mid-seventies, at the University of Chicago, researchers discovered that the average wavelength of human cell tissue is between 600 and 720 nm; 660 is the mid-point. The Infrared (IR) wavelengths from 760–905 nm have been found to be the deepest penetrating and have a most favorable effect on hard tissues such as bones, tendons, ligaments, teeth and jaw. The Blue/Violet wavelengths between 405–420 nm have been found to carry way more information than all other wavelengths, and are favored for anti-aging as they increase the length of the Telomerase enzymes and increase DNA sequencing among many other things. **The Scalar Wave Laser uses 3 wavelengths and has probes in 3 wavelengths as well.**

Low Level Lasers with up to 500 milliwatts (mW) power output do not have a thermal effect. This means they provoke no immediate visible skin reactions or sensations during therapy. Cold Laser Therapy is a soft and gentle therapy without side effects. This contrasts with the use of **Hot Lasers** or Surgical application of LASERS, which coagulate, vaporize and carbonize tissue with their high-energy rates (from 3 to 50 Watts). 1 Watt = 1000 mW.

Photochemical Effect

In an effort to understand why the cold laser provides pain relief, reduction of inflammation, increased circulation, tissue relaxation and relief of arthritis, researchers have found various cellular changes that could account for these remarkable healing benefits.

The laser energy is absorbed by metabolically active pigments of the mitochondria in various cutaneous and subcutaneous layers of the skin: this involves two enzymes of the oxidation chain, Cytochrome a/a3 and Flavoprotein.

When the proper wavelengths are applied and absorbed, it is supposed that the changes in the stereochemical conformation induced by an electro magnetic field leads to an increase in activity and improves the concentration of ATP by up to 200%. In addition, an increase in oxygen and glucose metabolism is observed. A significant effect of LLLT is an optimized function of the Na-K pump at the cell membrane, an increased protein synthesis (prostaglandin, enzyme) and a significantly higher rate of mitosis.

Depending on which cells are being stimulated, the following physiological reactions have been observed in various medical studies, and may help to explain why the cold laser is so effective for pain relief, inflammation, increased circulation, tissue relaxation and relaxation of tissue.

Relaxing & Regenerative Effect

- Enhanced fibroblast formation and collagen synthesis with improved tissue strength values
- Neurovascularization of lymphatic and blood vessels as well as vasodilatation, improve microcirculation and lymphatic drainage (resorption of edema)
- Larger quantity of granulation tissue and accelerated epithelization
- Increased activity of osteoblasts promote the formation of callus
- Regulation of muscle tissue including myocardium
- Enhancement of peripheral nerve re-growth
- Prevention of central nerve degeneration and regeneration of peripheral axons after injury

Analgesic (Pain-killing) Effect

- Measurable changes in the potential of nerve cell membranes lead to its hyper-polarization as a good analgesic mechanism
- Improved release reaction of endorphins
- Changes in transmitter concentration at the synapsis
- Accumulation of 5-OH-indoleacetate (serotonin metabolite)
- Relaxation of muscle induced by the neuromuscular unit (ATP increase)
- Effect on the immune system (immune modulation)
- Activation of proliferation of immune cells including macrophages
- Immune suppressive effect by reduced antigen perception of the T-lymphocytes (as in increased acceptance of a transplant)
- Induces B-endorphin release
- Increases the measurable potential on nerve cell membranes
- Relaxation of muscle tension and increase of pressure pain threshold
- Reduction of trigger activity (i.e. Myofacial pain and Fibromyalgia)

Anti-Inflammatory Effect

- Enhances proliferation of immune cells (enhancement of immune response, increase of NK cell activity etc.)
- Enhances lymphatic activity (drainage)
- Improves microcirculation (vasodilation)
- Reduces swelling (edema & hematoma resorption)
- Reduces infarct zone size in heart & brain
- Reduces mucositis after irradiation & chemotherapy
- Postoperative wound healing– Herpes simplex & zoster

Clinical Applications of Low Level Laser Therapy

Arthritis & Wound Healing. “The arthritides (osteo and rheumatoid forms) have been a popular target disorder for researchers in the last decade of cold laser investigations. The results of several well-designed randomized clinical trials have given clinicians good reason to be encouraged with this form of treatment. Cellular research has provided some possible mechanisms of action for these positive results including laser mediated increases in cellular proliferation, enhanced collagen synthesis, conversion of fibroblasts into myofibroblasts, increased osteoelastic activity, reduced inflammatory markers, increased lymphocyte response and stimulation of the electron transport system leading to enhanced ATP production.

“These putative mechanisms help explain the impressive results that laser therapy research has had to date in the area of wound healing. With the use of larger diameter cluster emitting beams of mixed wavelengths, clinicians can efficiently treat large wounds in short periods of time. Brosseau et al conducted a systematic review of the available literature examining the relationship between low level laser and arthritis in 2000. They applied an a priori protocol according to methods recommended by the Cochrane Collaboration. Their conclusions were that low level laser therapy (LLLT) should be considered for short term relief of pain in morning stiffness in rheumatoid arthritis...

“The general consensus among clinicians using LLLT for conditions having an inflammatory component is that significant benefits can be accrued by those patients treated with cold laser. There have been some very promising clinical trials involving cold laser in both knee and cervical spine osteoarthritis as well.”

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

Carpal Tunnel Syndrome. “Although not as studied a clinical condition as other pathologies, this landmark cold laser investigation occurred at the Flint, Michigan GM plant when Anderson et al studied the effects of cold laser on carpal tunnel syndrome (CTS). In this particular study involving 119 subjects, half received sham laser plus physical therapy while the treatment group received real laser plus physical therapy.

“The results of this randomized, controlled and double blinded study were that there was a statistically significant treatment effect shown by the real laser group, furthermore, the authors stated that low level laser therapy (strengthening, ROM etc.) improves functional measures of wrist-hand work performance and results in greater probability of return to work.”

Practical PAIN MANAGEMENT, Sept/Oct 2004

DENTISTRY

Cold laser is highly suited for comfortable and extremely effective use in over 24 dental applications. There are 230 positive studies done by 81 universities from 37 different countries showing from 80 to 95% success using Cold Laser Therapy on over 24 different dental procedures.

Cold lasers using the infrared wavelength (from 775 – 905nm, with power densities of 100 – 200mW) are preferred for dental applications because they are capable of penetrating into hard tissue and killing bacteria and infectious matter. **The Scalar Wave Laser with the IR 780 nm Probe is ideally suited for this application for hard tissues & the Red 650 nm Probe is ideal for the treating the gums & soft tissues.**

Studies have shown that these common dental conditions respond positively to LLLT:

- Aphthae ulcers (canker sores)
- Bleeding – postoperative bleeding control
- Dentitis – pain around the coronal tissue of either primary or permanent teeth
- Endodontics – root canal – used to reduce pain associated with root canal
- Extraction – used before and after to control bleeding, pain, and speed healing
- Gingivitis (bleeding of the gums)

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

- Implantology – reduces inflammation, speeds healing
- Lip wounds
- Mucositis associated with cancer medications
- Nausea – used prior to taking impressions to prevent gagging
- Nerve injury
- Edema (swelling)
- Prosthetics – denture sores
- TMJ/TMD (temporomandibular joint and associated muscle disorders)

Call the Laser Specialist for FREE Consultation: 1-808-870-0348

VETERINARY USES

The Scalar Wave Laser is commonly used on animals as well as humans. It is popular for use on horses, dogs and cats. The main benefits to animals are that the Scalar Wave Laser:

- * **Reduces inflammation**
- * **Relieves pain**
- * **Promotes circulation**
- * **Supports natural, non-invasive, pain-free healing**

As with all therapies, veterinary permission should always be sought before treating any animal.

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

There are hundreds of research papers from academic sources to validate the beneficial therapeutic effects of cold laser therapy for use with animals. **It has been used with competition horse training and recovery for over 30 years.** It has been used extensively for racehorses, show jumpers, show horses, endurance horses, carriage horses, quarter horses, old retired horses, ponies, show dogs and greyhounds.

Using the laser on wounds and muscle tissue speeds up the body's own natural healing process several times over. This helps to prevent unsightly scar tissue and the white hairs you so often see on old scar sites. The treatment only takes a short time, can be done frequently and has no known side effects, allowing your horse, dog or cat to return to health quickly.

Low level lasers have proven to be beneficial and aid the following conditions in most animals:

- * **General.** Stress/distress, muscle pain, trauma, swellings, joint pain, arthritis, stiffness.
- * **Wounds.** Deep cuts, proud flesh, scars, swellings, bruising, edema.
- * **Operation sites.** Over stitches, staples, pins, pain relief, faster wound healing, less scarring.
- * **Back.** Pain, cold back, sore back, arthritis, bruises, strains, muscle pain.
- * **Hip trouble.** Sacroiliac symptom.
- * **Legs.** Tendon injuries, tendonitis, bowed tendons, ligament injuries, inflammation, adhesions, torn fibers, strains, splints, arthritis, Spavins, ringbone, bruising, sore shins.
- * **Feet.** Navicular, cracks & splits, laminitis, bruised soles, over-reach wounds, abscess, thrush.
- * **Head.** Sinuses, tooth abscess, sore gums and cheeks.

Horses, Dogs and Cats all Love the Scalar Wave Laser. They relax, breath more fully and respond quickly with pain relief, more energy, happiness and playfulness.

AGRICULTURAL USES

Observations show that the laser light will cause seeds to sprout faster. Even wilted flowers find new life.

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

INVEST IN YOURSELF

CHOOSING TO SUPPORT YOUR HEALTH AND WELL-BEING IS THE MOST IMPORTANT INVESTMENT YOU CAN MAKE

The SWL user-friendly design makes it easy to slip into your handbag or briefcase and take with you anywhere, and you won't get poked by sharp corners, even if you fall asleep with it. The built-in battery is readily rechargeable, so you don't need to plug it in while you use it, but you can if you run out of power. The power supply works anywhere in the world. We now have sales clearance in the US, Canada, Mexico, UK, Europe & Australia.

SCALAR WAVE LASER PRICES are listed below -
However, each month Scalar Wave features a new discount or SALE, which can be seen by going to the website: <http://DiscoverLasers.com>

Free Probes are often given to customers who place a package order, so see order page for current specials: <http://www.discoverlasers.com/order>

Kalon Prensky Guarantees you the lowest prices avail.

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

There are 5 Scalar Wave Laser Packages:

The Scalar Wave Laser Package I = Base Unit

Regular Price \$3500. (You choose between Silver or Violet)

It features 180mW of power spread over 2.5 inches surface area with 36 diodes (8 red laser, 650 nm, 5mW diodes, and 8 infrared laser, 780 nm, 5mW diodes and 20, 5mW Violet LEDs). Plus you also get a charger, user manual, exclusive protocols & training manual from Discover Lasers & 1 Year Mfr. Warranty.

Silver or Violet Main Unit

or combine it with a Laser wand

Scalar Wave Laser Package II – Regular Price \$5100.

What you get is the Scalar Wave Laser main unit in your choice of silver or violet, Plus your choice of the 650 nm, 100 mW Red Probe or the 780 nm, 100 mW Infrared Probe as explained below. This great package comes with an operator manual, charger, 1 Year Warranty & Custom Training from Discover Lasers LLC. **Special Price often available so call for details.**

See website for actual bonuses, free probes or possible discounts:

<http://www.discoverlasers.com/order>

Currently there are 3 OPTIONAL Pulsar Laser Probes available:

- **780 nm Infrared 100mW PRICE: \$1600**

For Pain, Musculoskeletal System, Hard Tissue, Bones, Teeth, Tendons, Ligaments, Smoking Cessation and Weight Control

- **650 nm Red 100mW PRICE: \$1600**

For Pain, Inflammation, Gums, Scars, Wounds, Burns, Skin, Wrinkles, Acne, Soft Tissues, and Facial Rejuvenation

See Quantum Scalar Wave Lasers Online: <http://www.DiscoverLasers.com>

● **405 nm Violet 100mW** **PRICE: \$2995**

For Anti-Aging, Pain Relief, Acne, Wrinkles, muscles, and nerves. The 405 nm Violet carries more information than all the other wavelengths and works at most depths. Research shows that violet laser supports pain relief, fighting bacteria & infections and the healing of skin lesions. There is no comparison. This QWL violet probe gives more power, more frequency setting and more value, period!

Each Pulsar Probe is fully programmable with the all digital user interface of the SWL. Each probe contains the proprietary violet crystal technology and is scalar wave enhanced. See extensive testimonials on our website. <http://www.discoverlasers.com/scalar-wave-laser-testimonials>

NOTE: Probes only work together with the main unit.

3 ADDITIONAL SCALAR WAVE LASER PACKAGES BELOW

Scalar Wave Laser Package III is the VioPackage – Regular Price: \$6495. Which Includes:
