

Notebook Cooler Stand

Introduction

Thank you for choosing Xcellon.

The Xcellon CPS-101/102 Notebook Cooler Stand is a base designed to provide support and ventilation for a notebook or laptop computer with up to a 15.6" screen. The lightweight aluminum "cheeseplate" construction and two movable fans keep your computer cool—ideal for gaming.

Unlike plastic stands, the aluminum Notebook Cooler absorbs heat. The fans are USB-powered—an included pass-through means that you don't lose the use of your port while running the fans. The fans snap into the holes in the cheeseplate construction, allowing you to place them anywhere on the stand to provide the most efficient cooling configuration for each situation. You can also remove the fans entirely when using a computer with an adequate cooling system.

The Notebook Cooler has rubber feet and is angled for ease of use. Since heating and overheating contribute to declining computer performance, using the Notebook Cooler can help extend the useful life of your computer.

Instructions

Moving a fan

1. Unplug the USB power cord.
2. Grip the fan on the side with the power cord and on the opposite side with the release bar.
3. Squeeze the release bar, which releases the fan from the cheeseplate surface. (Figure 1)
4. Reposition the fan in the desired area while still squeezing the release bar.
5. When the fan is correctly positioned with the four feet inserted into the cheeseplate holes, release the bar.
