Welcome

Thanks for using the MT-4302. With navigation as the major function, it supports audio play, video play, photo browsing, e-book reading.

- ✓ MSTAR 2531 CPU with high performance and low power consumption
- ✓ Friendly user interface for simple operation
- ✓ Power management for longer and more stable operation
- ✓ Data transmission with computers via Mini USB
- ✓ Quality reception for accurate positioning and satisfactory navigation service
- ✓ Leisure partner with audio/video/amusement functions

You may use the GPS navigator anytime anywhere, for example while driving motorcycle or car, walking or cycling. Its navigation and amusement functions will enrich your life and work!

To fully exert the functions of MT-4302 and to understand the operation details, please read the manual carefully.

2. Power supply and charge

2.1 Power supply

There are three types of supplying power: battery, adaptor, USB cable. GPS navigator uses the Li-battery to supply power when it is not connected with adaptor. The mark  on the up right of interface indicate the current electric volume.

◆ GPS navigator uses the external power when it is connected with the motorcycle.

◆ GPS navigator uses the USB cable to supply power when the GPS connects

to the PC.

【Remark】This machine adopt built-in, unchangeable Lithium battery. At normal condition (if the back light is not so bright), the actual supply hour can be different because of the different way using the navigator. Some function (audio playing, video playing, bright back light) will consume a large power, which will reduce the using hour.

【Note】 This machine adopts built-in, unchangeable Lithium battery. In order to avoid fire and burning, please do not poke, bump or take it apart or throw it into fire.

2.2 Use the car charger to supply power

◆ Connect the DC part with the motorcycle, the red line is connected with ignition switch and the black line is connected with the negative pole, when you turn on the motorcycle, the GPS navigator will turn on automatically.

◆ The other part connect to the power socket, it supplies power while charging.

2.3 Power on/off

3.1 Power on

Please check: The battery is enough, or it is connected to external power source;

【Note】 If bring the unit form one place to another place, please boot until it adapts to the environment. Big humidity fluctuation will make the mainframe short circuited.

3.2 Power off

Press the button on the top of the unit to turn off, the unit will enter the power saving mode and maintain the last operation status when boot next time.

1.3 Basic Use

1.3.1 Powering on/off & Sleep

2.3.1.1 Powering on

Press the power key on the top side of the GPS navigator for at least two seconds to power it on.

2.3.1.2. Powering off & Sleep

Long press the power key to power off the GPS navigator. The following interface will be prompted. If **Power Off** is selected, the navigator will automatically resume the state before entering sleep mode when powered on again.

1.3.2 Restarting the System

When the system does not response, press the reset key on the back of the GPS navigator to restart the system.
[Relevant Information] The following situations might lead to no response of the system.

1. Delay or stagnancy in interface switching;
 2. Failure of function activation with overlong execution;
 3. Failure to power on/off the GPS navigator by pressing the power key
- [Note] Restarting the system by pressing the reset key will result in loss of unsaved data. Please backup your data regularly.

1.3.4 Using T-FLASH Card

Copy mapping applications, map data and media files in a T-FLASH card. Insert the card in the corresponding slot.

[Note]

1. Do not take out the T-FLASH card while an navigation program is being run or a media file is being played.
2. To avoid drop or crash of the T-FLASH card, do not exert heavy pressure on it or bend it.
3. Avoid using or storing the T-FLASH card in high temperature, high humidity

or direct sunlight. Keep the card away from liquid or corrosive substance.

4. Mind the direction while inserting the T-FLASH card to avoid damaging the slot or the card.

1.4 System Main Interface and Major Functions

Long press the power key on the top side of the GPS navigator to enter the system main interface shown below.

The main functions are listed as below.

Chapter II GPS

Various navigation mapping applications can be installed in the GPS navigator, such as CARELAND and RITU intelligent navigation systems, which position the navigator via the satellite receiver and display it on the map. Set a destination, and the system will automatically work out the best path to help the user reach the destination safely and quickly.

2.1 Map

Due to transportation development, inconformity between products and real traffic information will occur a period after product release. Please drive according to road condition and abide by traffic regulations.

2.2 Navigation

Navigation paths are for reference only, and the user may decide whether to follow them.

2.3 Reception

High and crowded structures (such as inside of tunnels, space between high buildings, underground car parks and under viaducts), weather change or satellite signals turnoff may influence signal reception, resulting in positioning failure, inaccurate positioning, navigation failure or system function abnormal. With stereoscopic maps, instant animation, voice prompt and text prompt of the navigation system, you will appreciate its unique charm and enjoy a great trip. Different navigation maps may have different operation methods. Please follow instructions of corresponding navigation mapping applications.

[Note] Before using the GPS navigator, please purchase and install mapping applications and appoint file paths. For setting methods please refer to 6.10 Setting Navigation Path.
