8 Channel Digital Video Recorder

User's Manual

Safety Precautions

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of insulated dangerous Voltage within the product's enclosure that may be sufficient magnitude to constitute risk of electrical shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operation and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE UNITS NOT SPECIFICALLY DESIGNED FOR OUTDOOR USE TO RAIN OR MOISTURE.

Attention: installation should be performed by qualified service Personnel only in accordance with the National Electrical Code or applicable local codes.

Power Disconnect. Units with or without ON-OFF switches have power supplied to the unit whenever the power cord is inserted into the power source; however, the unit is operational only when the ON-OFF switch is the ON position. The power cord is the main power disconnect for all unites.

Warranty and Service

There are no serviceable parts for this unit, call for your agent for details.

About this document

Before installing stand alone DVR, be sure to thoroughly review and follow the instructions in this Users Manual. Pay particular attention to the parts that are marked **NOTICE**.

Also, when connecting with external application, first turn the power OFF and follow manual instruction for appropriate installation.

Before reading this document

1. This document is intended for both the administrator and users of stand alone DVR Model.
2. This manual contains information for configuring, managing and using stand alone DVR Model.
3. To prevent fire or electrical shock, do not expose the product to heat or moisture
4. Be sure to read this manual before using stand alone DVR Model.
5. For questions and technical assistance of this product, contact your local dealer.

► Strong recommendation on installation of the DVR unit

1. Check electricity at the place you want to install the DVR unit is stable and meets our electricity requirements.
Unstable electricity will cause malfunction of the unit or give critical damage to the unit.
2. Several chips on the main board of the DVR unit and hard disk drive inside the unit generate heat, and it must be properly discharged.
Do not put any objects just beside exhaust port(fan) on the left side of the unit and do not close up an opening (fresh air in-take) on the right side of the unit..
3. Put the DVR unit at well-ventilated place and do not put heat-generating objects on the unit.
When it is installed inside 19 inch mounting rack together with other devices, please check built-in ventilation fan of the rack is properly running.

FCC Statement:

WARNING

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference. (2) This device must accept any interference received including interference that may cause undesired operation."

*** Federal Communications Commission (FCC) Statement**

WARNING

This Equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

* You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

Unit Description of Front Panel

Alarm in / Relay

DEVICE CONTROLS

1) Camera Connection

Connect camera to the CAMERA INPUT located at rear side of the DVR.

2) Monitor Connection (Composite Connection Method)

Connect monitor to the MONITOR output located at rear side of the DVR.

3) Alarm in and Relay out

Relay output : COM+NC, COM+NO

Alarm input : Short-circuit between Alarm1 ~ 8 and GND is recognized as alarm by default.

Alarm 1 ~ 8 will be corresponding to Camera 1 ~ 8.

NC = Normal Close. NO = Normal Open.

NOTICE: Sensor input is RECOGNIZED as LOW when alarm signal is on a level with GND, and it is recognized as HIGH when alarm signal is FLOATING or 5V. Following is internal circuit.

Internal Circuit

Thus, there is a danger of damage, when the sensor input goes to a Negative level or voltage higher than 5V.

POWER ON / OFF

After the connection of power cord and other devices with this DVR, turn the power on.

- The video signal system (NTSC or PAL) is automatically detected.
- Power Failure Recovery. This DVR automatically reverts back to programmed record parameters upon power restoration.
- If the power key is protected by password, the power on/off cannot be executed before input the correct password.
(Refer to the PASSWORD in the SYSTEM menu)

- Before the power of this DVR is on, check the input power currency in advance and select the indication of power input (230V=180V~265V, 115V=90V~135VAC) at the rear side of DVR
- If there is no video signal, the video signal system is set to NTSC. Do not input the PAL type video signal or it may cause the DVR's malfunction. In this case, turn off and on again.

CHANNEL DISPLAY

Full screen or split screen display

a. Multi display

To change a single camera display to the multi camera, press the MULTI button.

b. Full screen display

Press the desired camera number button to display on the monitor.

Use the **+10 Button** when you select two digit camera numbers.
EX) Camera Number 12 = Press the **+10 Button**, and then press the No. **2 Button**.

CAMERA/NUMBER INPUT buttons are used to input the password in the password lock function.

Auto Sequence Display

- Press the AUTO button, each screen display will be automatically switching according to the AUTO SEQUENCE setup.
- If you set up "ADD AUTO SINGLE: OFF" in the AUTO SEQUENCE setup menu, the single display will be skipped.
- To view the single display, set up "ADD AUTO SINGLE: ON" in the AUTO SEQUENCE setup menu and the single display will be included in the auto sequence display.
- Press the AUTO button again to exit the AUTO mode.

If an event takes place, the AUTO SEQUENCE mode will be cancelled.
Please refer to the AUTO SEQUENCE of MENU setup for more information.

Freeze

MULTI SCREEN MODE

At the Multi display mode, press the FREEZE button and then select the desired camera number. Press the FREEZE button again to release the FREEZE mode.

FUNC + 4 = Audio 4 ON

RECORD TYPE SELECTION

Press the REC button and the following message will be displayed as below;

MANUAL MODE

Press the REC button to begin recording.
To stop recording, press the STOP button again.

SCHEDULE MODE

When Schedule mode is selected, the recording will be automatically executed according to the recording schedule.

The color of record indication () on the screen will be changed according to the type of recording and refer to the following.

- “  (Yellow) ” : Manual recording status.
- “  (Green) ” : Schedule recording status.
- “  (Red) ” : Event recording status. (Motion detection/ Video loss/ Sensor)
- “  (White) ” : Not recording.

All channels will be displayed by red lights even if an event happened just on one channel. Red light will be displayed because this unit enters the event record mode when event happened. If a channel has an event, all channels will be recorded by event recording frame rate to be set in RECORD PROGRAM menu.

DATA SEARCH & PLAYBACK

Press the T-SRH (Time - search) button, the SEARCH menu screen appears.

If you press the PLAY button in the real time screen mode, playback will be executed from the end of the previous time search and press the desired channel select button. To exit the playback mode and see the live screen again, press LV/PB button.

SEARCH & COPY

At the SEARCH menu;

Move the cursor to TIME SEARCH using ▲ or ▼ button.

Press the ENTER button and TIME SEARCH screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to CHANNEL using the ▲ or ▼ button and select the desired channel using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the ▲, ▼, ◀, ▶ buttons, and then set up the desired time using the(-), (+) buttons or turn the JOG DIAL to set the search time.

Press the ENTER button and you can playback.

Move the cursor to START COPY and then press the ENTER button to copy.

Press the ESC button to exit this menu.

TIME SEARCH

At the SEARCH menu;

Move the cursor to TIME SEARCH using ▲ or ▼ button.

Press the ENTER button and TIME SEARCH screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to CHANNEL using the ▲ or ▼ button and select the desired channel using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the ▲, ▼, ◀, ▶ buttons, and then set up the desired time using the(-), (+) buttons or turn the JOG DIAL to set the search time.

Press the ENTER button and you can playback.

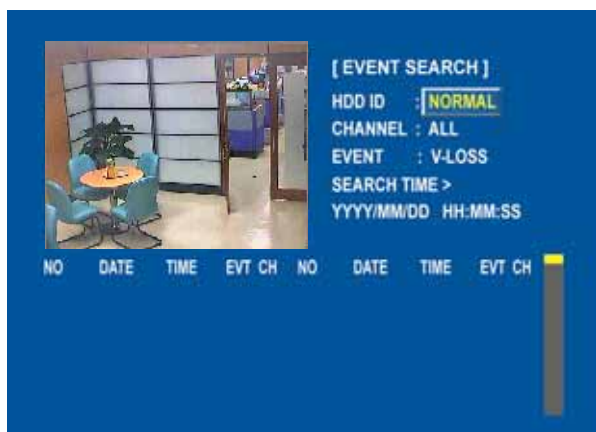

Press the ESC button to exit this menu.

EVENT SEARCH

At the SEARCH menu;

Move the cursor to EVENT SEARCH using ▲ or ▼ button.

Press the ENTER button and the EVENT SEARCH menu screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to CHANNEL using the ▲ or ▼ button and select the desired channel using the (-) or (+) button.

Move the cursor to EVENT using the ▲ or ▼ button and select the event type to search using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the ▲, ▼, ◀, ▶ buttons, and then set up the desired time using the(-), (+) buttons.

Press the ENTER button or turn the JOG DIAL, and the event list searched appears.

When the event list appears on the screen, select the desired list using ▲, ▼ buttons or JOG DIAL and press the ENTER button for the playback.

- When video loss is detected, up to five seconds of **pre-recording** data is stored on the HDD and the details will be listed in the EVENT LIST. The beep sounds and the LED of the ALARM RESET button will flicker. Press the ALARM RESET button to remove this signal.

- When the unit receives a signal from the sensor input, DVR begins to record the input data according to the PRE/POST TIME in the RECORD setup and the details will be listed in the EVENT LIST.

CAUTION

If the internal HDD(s) is initialized, all of the event images will be deleted.

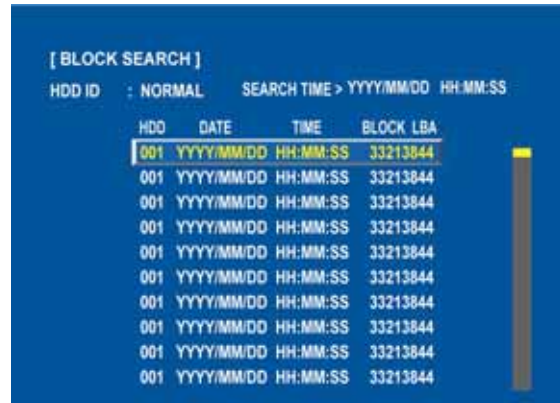

When the unit is in normal recording status, the pre-recording will not be executed.

BLOCK SEARCH

At the SEARCH menu;

Move the cursor to BLOCK SEARCH using **▲** or **▼** button.

Press the ENTER button and the BLOCK SEARCH menu screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the **▲**, **▼**, **◀**, **▶** buttons, and then set up the desired time using the(-), (+) buttons. (Or turn the JOG DIAL to search the block list.)

Press the ENTER or turn the JOG DIAL, and the list searched appears.

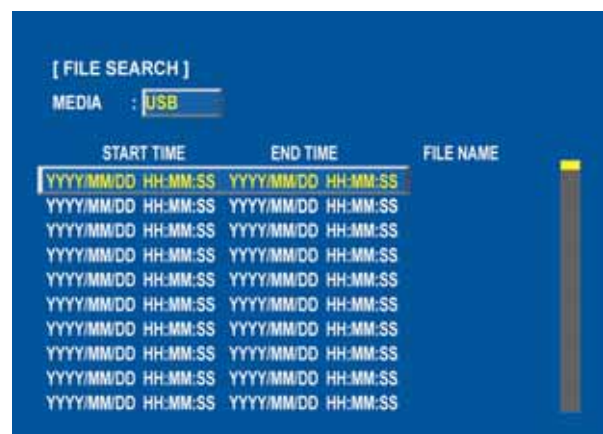

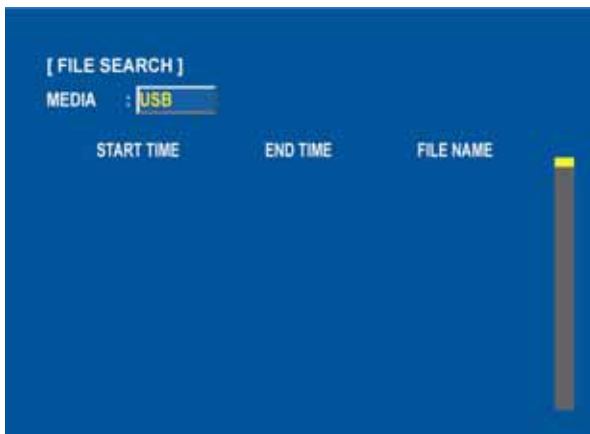

When the list appears on the screen, select the desired list using **▲**, **▼** buttons or JOG DIAL and press the ENTER button for the playback.

FILE SEARCH

At the SEARCH menu;

Move the cursor to FILE SEARCH using **▲** or **▼** button.

Press the ENTER button and the FILE SEARCH screen appears.

Select the desired type of MEDIA using the (-) or (+) button.

Press the ENTER button or turn the JOG DIAL, and the list searched appears.

When the list appears on the screen, select the desired list using **▲**, **▼** buttons or JOG DIAL.

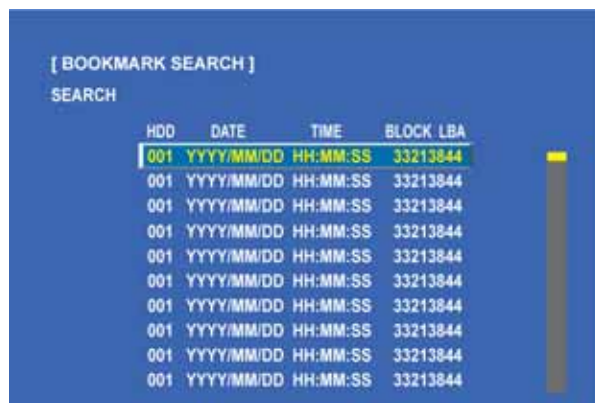

Press the ENTER button for the playback.

BOOKMARK SEARCH

At the SEARCH menu;

Move the cursor to BOOKMARK SEARCH using ▲ or ▼ button.

Press the ENTER button and the BOOKMARK SEARCH screen appears.

Press the ENTER button, and the list searched appears.

When the list appears on the screen, select the desired list using ▲, ▼ buttons or JOG DIAL

Press the ENTER button for the playback.

<How to make Bookmark list>

At the DISPLAY menu, Move the cursor using the ▲, ▼ buttons to select the TITLE DISPLAY.

Use the (-), (+) buttons or jog dial to choose "ON" or "OFF".

* The default is "ON".

ON: Each channel title will be displayed on the screen.

TITLE MODE

At the DISPLAY menu, Move the cursor using the ▲, ▼ buttons to select the TITLE MODE.

Use the (-), (+) buttons or jog dial to choose "TEXT" or "BITMAP".

* The default is "TEXT".

A bitmap is a type of graphics file on a computer.

BORDER COLOR

At the DISPLAY menu,

Move the cursor using the ▲, ▼ buttons to select the BORDER COLOR.

Use the (-), (+) buttons or jog dial to choose "WHITE" or "BLACK".

* The default is "WHITE".

WHITE: The color of the border line will be displayed on the multi-channel screen in white.

BLACK: The color of the border line will be displayed on the multi-channel screen in black.

REMOTE CONTROL ID

At the DISPLAY menu,

Move the cursor using the ▲, ▼ buttons to select the REMOTE CONTROL ID.

Use the (-), (+) buttons or jog dial to choose "ON" or "OFF".

* The default is "OFF".

ON: The remote controller ID will be displayed on the screen.

SPOT DISPLAY

At the DISPLAY menu,

Move the cursor using the ▲, ▼ buttons to select the SPOT DISPLAY.

Use the (-), (+) buttons or jog dial to choose "ON" or "OFF".

* The default is "OFF".

ON: Each channel title will be displayed on the spot monitor screen.

TITLE

At the SCREEN menu,

Move the cursor to the TITLE using **▲**, **▼** buttons.

Press the ENTER button when the cursor is on the TITLE and the following 2 pages screen appears.

Use the **◀**, **▶** buttons to see the next page.

Press the ENTER button after selecting desired channel using the **▲**, **▼** buttons and the following screen appears.

Select the character using the **▲**, **▼**, **◀**, **▶** buttons and then press the ENTER button. To exit this CHARACTER TABLE screen, press the ESC button.

CHANNEL TITLE MODE: There are "TEXT" and "BITMAP".

TEXT: Using the CHARACTER TABLE

BITMAP: It is possible to download new characters using the software if you want.

MULTI-SCREEN

You can select the desired channels and make a 4 split screen and a 9 split screen using this menu.

At the SCREEN menu,

Move the cursor to the MULTI SCREEN using **▲**, **▼** buttons.

Select the character using the **▲**, **▼**, **◀**, **▶** buttons and then press the ENTER button.

Press the ENTER button when the cursor is on the MULTI SCREEN and the following screen appears.

To exit this MULTI SCREEN menu, press the ESC button.

LIVE 4E / LIVE 9B

Press the ENTER button after selecting "LIVE 4E" or "LIVE 9B" using the **▲**, **▼** buttons.

[LIVE4E]

[LIVE9B]

Set the desired number of camera in each channel screen using the (-), (+) buttons or jog dial.

Use the **▲**, **▼**, **◀**, **▶** buttons to set the other channel screen.

To exit this screen, press the ESC button.

In the each of LIVE4E and LIVE9B, same camera numbers should not be selected.

COVERT

At the SCREEN menu,

Move the cursor to the COVERT using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the COVERT and the following 2 pages screen appears.

Move the cursor and select the desired item using the ▲, ▼ buttons.

Use the (-), (+) buttons or jog dial to choose "ON" or "OFF".

Use the ◀, ▶ buttons to see the next page.

ON: Selected channel will be displayed in black screen (Hidden camera).

SELECT: It is possible to select among "LIVE&PLAYBACK&NETWORK", "PLAYBACK&NETWORK", "LIVE&NETWORK", "LIVE&PLAYBACK", "NETWORK", "PLAYBACK" and "LIVE".

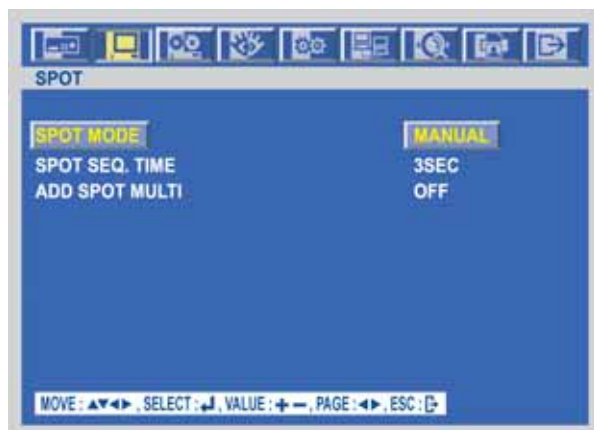

- LIVE: To covert selected channels on live screen
- PLAY: To covert selected channels on playback screen
- NETWORK: To covert selected channels on network viewer screen

SPOT

At the SCREEN menu,

Move the cursor to the SPOT using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the SPOT and the following screen appears.

SPOT MODE

Use the (-), (+) buttons or jog dial to select the SPOT MODE.

- MANUAL: Manually select the channel of spot monitor.
- EVENT: Event channel will be displayed automatically on spot monitor.
- SEQUENCE: Every single channel will be switching and displaying in sequence.

SPOT SEQ. TIME

Use the (-), (+) buttons or jog dial to set the SPOT SEQ. TIME.

The duration of spot sequence can be set from 1SEC to 60SEC.

ADD SPOT MULTI

Use the (-), (+) buttons or jog dial to set the ADD SPOT MULTI.

You can see the multi-channel screen on spot monitor if you set "ON".

It is possible to support OSD and not to roll off because of digital spot.

PTZ

At the SCREEN menu,

Move the cursor to the PTZ using ▲, ▼ buttons.

Press the ENTER button when the cursor is on the PTZ and the following 2 pages screen appears.

Select the desired channel using ▲, ▼ buttons.

Use the (-), (+) buttons or jog dial to select the right model of installed PTZ camera.

Press the ► button to set up a ID of the PTZ camera.

Use the (-), (+) buttons or jog dial to select the desired ID.

Press the ◀ button to see the next page.

To exit this PTZ menu, press the ESC button.

RECORD

To set up the RECORD menu,

Move the cursor to the RECORD icon using the ◀ , ▶ in the MENU screen.

Press the ENTER button when the cursor is on the RECORD icon and the following items appear.

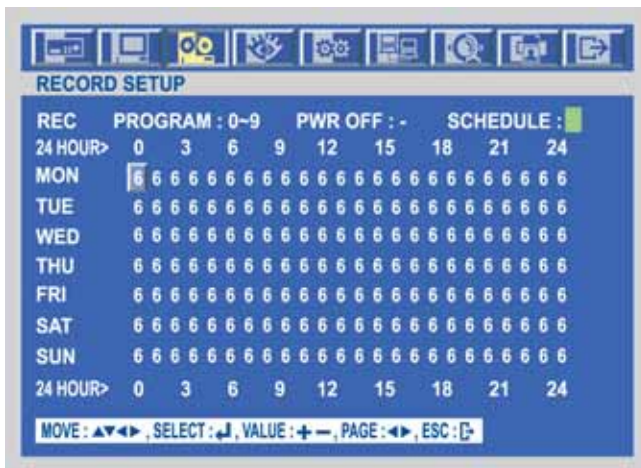

RECORD SETUP

At the RECORD menu,

Move the cursor to the RECORD SETUP using the ▲ , ▼ buttons.

Press the ENTER button when the cursor is on the RECORD SETUP and the following screen appears.

Move the cursor to choose the desired time using the ▲ , ▼ , ◀ , ▶ buttons.

Select the desired program among PROGRAM 0~9 and POWER OFF using the (-), (+) buttons or jog dial.

Turn right the shuttle ring to set up the schedule of programmed time and the program number will be green. Turn the left the shuttle ring to release the schedule mode.

Or move the cursor to the desired position and then click the green square next to "SCHEDULE" using the Mouse.

Press the ESC button to exit this RECORD SETUP menu or press the ENTER button to enter the RECORD PROGRAM menu.

RECORD PROGRAM

At the RECORD menu,

Move the cursor to the RECORD PROGRAM using ▲, ▼ buttons.

Press the ENTER button when the cursor is on the RECORD PROGRAM and the following screen appears.

The screenshot shows a menu titled "RECORD PROGRAM > PROGRAM0" with a "RECORD INTERVAL > 1 SEC" indicator. The "RECORD TYPE" is set to "COMPLEX". Below is a table with columns: CH, IMAGE SIZE, NORMAL RECORD ONLY, EVENT RECORD SINGLE, EVENT RECORD COMPLEX, QUALITY N/E, PRE/POST TIME, and EVENT A/L/M.

CH	IMAGE SIZE	NORMAL RECORD ONLY	EVENT RECORD SINGLE	EVENT RECORD COMPLEX	QUALITY N/E	PRE/POST TIME	EVENT A/L/M
CH 1	HALF_D1	1		1	S/S	5/10	0/0/0
CH 2		1		1	S/S	5/10	0/0/0
CH 3		1		1	S/S	5/10	0/0/0
CH 4		1		1	S/S	5/10	0/0/0
CH 5		1		1	S/S	5/10	0/0/0
CH 6		1		1	S/S	5/10	0/0/0
CH 7		1		1	S/S	5/10	0/0/0
CH 8		1		1	S/S	5/10	0/0/0

Use the ▲, ▼, ◀, ▶ buttons to move the cursor to the desired item.

Select the desired RECORD TYPE using the (-), (+) buttons or jog dial.

- **SINGLE** : Only one event channel will be recorded by setting event recording frame rate and the other channels will be recorded by rest event recording fps/N(channel number) when an event happened. For example, if you connect 8 cameras and set EVENT RECORD of all channels to "30", one event channel will be recorded by 30 ips and the other channel will be recorded by 90(Max. 120 – 30)/15 = 6 ips.
You can set the more recording frame rate for one channel.
(This type is good for the place where the event is rarely happened.)
- **COMPLEX** : All event channels will be recorded by max. event recording frame rate/N(channel number) when the event happened.
For example, if you connect 8 cameras and set EVENT RECORD of all channels to Max. frame rate, 120, 8 each channel will be recorded by 120/N = 7 ips.
(This type is good for the place where the event is often happened.)

< Result table of total frame rate >

Record Type	Image Size	Normal Record	Event Record		Unit
			Event Channel	Other Channel	
Single	360 x 240	Normal Frame	ES_Frame	RS_Frame	CIF/1 SEC
	720 x 240	Normal Frame	ES_Frame	RS_Frame	CIF/1 SEC
	720 x 480	Normal Frame	ES_Frame	RS_Frame	CIF/1 SEC
Complex	360 x 240	Normal Frame	EC_Frame	EC_Frame	CIF/1 SEC
	720 x 240	Normal Frame	EC_Frame	EC_Frame	CIF/1 SEC
	720 x 480	Normal Frame	EC_Frame	EC_Frame	CIF/1 SEC

- ES_Frame : Event single frame rate.
- EC_Frame : Event complex frame rate.
- RS_Frame : Remain single frame rate = (Max. Frame Rate – ES_Frame) / 15.

Select the desired RECORDING INTERVAL using the (-), (+) buttons or jog dial.
 RECORDING INTERVAL means at what-second intervals you want to record.
 If you set "RECORDING INTERVAL" to "1SEC", each channel will be recorded by setting frame rate per "1SEC".

Set the IMAGE SIZE of each channel using the (-), (+) buttons or jog dial. There are the 3 types of 720x480(D₁), 720x240(Half-D₁) and 360x240(CIF).
 * The default is 720x240.

You can set the frame rate of each channel using the (-), (+) buttons or jog dial.
 - **N** : Frame rate for normal recording
 - **E** : Frame rate for event recording

Set the IMAGE QUALITY for normal recording and for event recording of each channel using the (-), (+) buttons or jog dial.
 There are 3 types, Fine(F)/ Superfine(S)/ Low(L).

Set the PRE TIME and POST TIME using the (-), (+) buttons or jog dial. When the event is detected, the DVR will store pre- and post-recorded data during the selected period.

The value of "PRE TIME" is from 0 to 5 seconds and the value of "POST TIME" is from 0 to 60 seconds.
 The default of pre-recording time is 5 seconds and post-recording is 10 seconds.
 Note: The pre- and post- recording is not valid in normal recording mode.

Choose the type of the EVENT using the (-), (+) buttons or jog dial and , , ,  buttons if you want the event recording(Motion detection/ Video loss/ Alarm) or not. "O" means that the event recording is "ON" and "-" means that the event recording is "OFF".

< PROGRAM DEFAULT >

PROGRAM	0	1	2	3	4	5	6	7	8	9
RECORD TYPE	COMPLEX	SINGLE	SINGLE	COMPLEX	SINGLE	SINGLE	COMPLEX	SINGLE	SINGLE	COMPLEX
RECORDING INTERVAL	1	1	1	1	1	1	1	1	1	1
IMAGE SIZE	720x480 720x240 360x240	360x240	360x240	360x240	720x240	720x240	720x240	720x480	720x480	720x480
NORMAL	Max	4	7	7	2	3	3	1	1	1
EVENT SINGLE	0	15	30	0	15	30	0	15	30	0
EVENT COMPLEX	Max	0	0	7	0	0	3	0	0	1
QUALITY NORMAL	F	L	F	S	L	F	S	L	F	S
QUALITY EVENT	F	L	F	S	L	F	S	L	F	S

POST-ALARM RECORDING	10	10	10	10	10	10	10	10	10	10
EVENT ON/OFF	V-Loss ON	V-Loss ON	V-Loss ON	V-Loss ON	V-Loss ON	V-Loss ON	V-Loss ON	V-Loss ON	V-Loss ON	V-Loss ON

These are 10 kinds of program and you can change the program setting.

IMAGE QUALITY

At the RECORD menu,

Move the cursor to the IMAGE QUALITY using ▲, ▼ buttons.

Press the ENTER button when the cursor is on the IMAGE QUALITY and the following screen appears.

Select the desired RECORD QUALITY using the (-), (+) buttons or jog dial.

And you can see the size of each image quality and how long you can record in the installed HDDs by the image quality.

To exit this IMAGE QUALITY menu, press the ESC button.

NOTE

RECORD TIME: A period how long you can record in free space of installed HDD(s) by setting of Max. frame rate.

TOTAL TIME: A period how long you can record in total installed HDD(s) by setting of Max. frame rate.

** The better the image quality is, the bigger the file size is and the worse the image quality, the smaller the file size is.

AUDIO RECORD

At the RECORD menu,

Move the cursor to the AUDIO RECORD using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the AUDIO RECORD and the following screen appears.

Select the recording channel for each audio channel using the (-), (+) buttons or jog dial.

REPEAT RECORD

At the RECORD menu,

Move the cursor to the REPEAT RECORD using ▲, ▼ buttons.

Press the ENTER button when the cursor is on the REPEAT RECORD and the following screen appears.

Use the (-), (+) buttons or jog dial to set "ON" or "OFF".

It is possible to set a point of time to work the REPEAT RECORD ALARM.

Move the cursor to "REPEAT RECORD ALARM" using ▲, ▼ buttons and then select the desired value using (-), (+) buttons or jog dial.

The value is from 5% to 10%.

To exit this REPEAT RECORD menu, press the ESC button.

ON: The recorded data will be overwritten when it is a point of time to work the REPEAT RECORD. REPEAT RECORD ALARM is the rest capacity of the HDD.

If you set "REPEAT RECORD ALARM" to 5%, alarm will work when the rest capacity of the HDD is 5%.

PLAY MODE

At the RECORD menu,

Move the cursor to the PLAY MODE using ▲, ▼ buttons.

Select the PLAY MODE using the (-), (+) buttons or jog dial.

AUTO : This DVR will automatically select playback in frame(two fields) or field to avoid moving artifact.(Recommended)

FRAME : It will playback images in frame mode which is useful for recorded images in high frame rate. This may occur moving artifact with recorded images in low frame rate.

FIELD : It will playback images in field mode. This reduces the resolution, but is suitable for recorded images in low frame rate.

BACKUP MODE

At the RECORD menu,

Move the cursor to the "BACKUP MODE" using ▲, ▼ buttons.

Select the "BACKUP MODE" using the (-), (+) buttons or jog dial.

EVENT: Backup only when the event occurs.

MIRROR: Recording the same images in backup HDD.

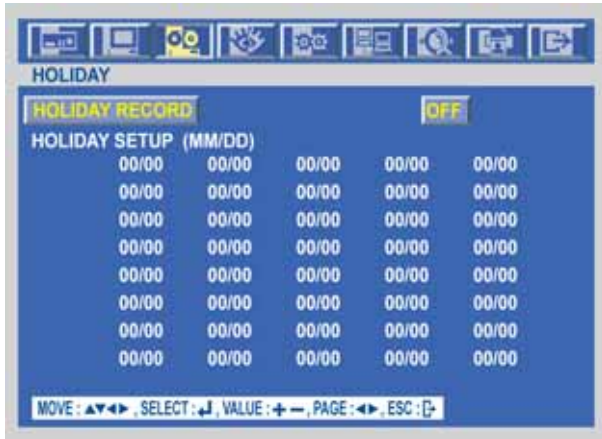

OFF: Not backup.

HOLIDAY

At the RECORD menu,

Move the cursor to the "HOLIDAY" using **▲**, **▼** buttons.

Press the "ENTER" button to set up "HOLIDAY" and the HOLIDAY menu screen appears.

Set up "ON" or "OFF" of HOLIDAY RECORD using the (-), (+) buttons or jog dial.

Move the cursor using **▲**, **▼** buttons and set up the value using the (-), (+) buttons or jog dial.

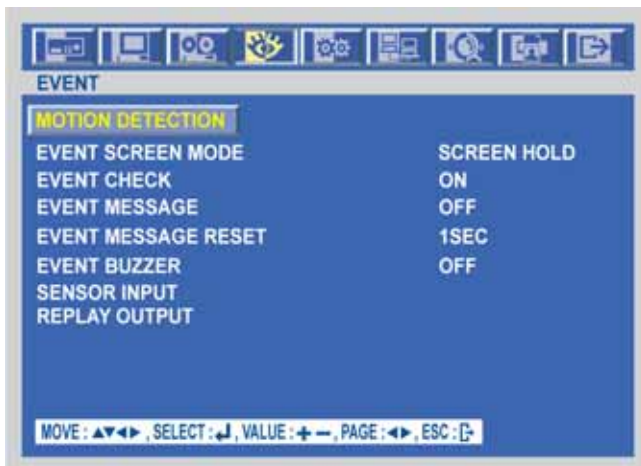

To exit this HOLIDAY menu, press the ESC button.

EVENT

To set up the EVENT menu,

Move the cursor to the EVENT icon using the **◀**, **▶** in the MENU screen.

Press the ENTER button when the cursor is on the EVENT icon and the following items appear.

MOTION DETECTION

At the EVENT menu,

Move the cursor to the MOTION DETECTION using ▲, ▼ buttons.

Press the ENTER button when the cursor is on the MOTION DETECTION and the following screen appears.

CHANNEL

At the MOTION DETECTION menu,

1 Move the cursor to CHANNEL using ▲, ▼ buttons.

Select the desired channel using the (-), (+) buttons or jog dial.

Move the cursor to the EVENT MESSAGE using ▲, ▼ buttons.

Select "ON" or "OFF" using the (-), (+) buttons or jog dial

SENSITIVITY

At the MOTION DETECTION menu,

1 Move the cursor to SENSITIVITY using ▲, ▼ buttons.

Select the sensitivity level using the (-), (+) buttons or jog dial.

SENSITIVITY: The higher the number is, the more sensitive. 1(lowest) ~ 5(highest)

AREA SETUP

At the MOTION DETECTION menu,

Move the cursor to AREA SETUP using ▲, ▼ buttons.

Press the ENTER button to set the motion detection area.

Select the motion detection area using the ▲, ▼, ◀, ▶ buttons and then press the ENTER button to save the area.

Turn the shuttle ring to the right to select all cells for motion detection and turn the shuttle ring to the left to reset all area.

To exit this AREA SETUP, press the ESC button.

Mouse operation: Click the right button of mouse and drag to select the desired cells.
AREA SETUP GRID: 30 x 24

TEST MOTION

At the MOTION DETECTION menu,

Move the cursor to TEST MOTION using the ▲ , ▼ buttons.

Press the ENTER button to test the motion detection.

To exit this TEST MOTION, press the ESC button.

EVENT SCREEN MODE

At the EVENT menu,

Move the cursor to the EVENT SCREEN MODE using ▲ , ▼ buttons.

Select the EVENT SCREEN MODE using the (-), (+) buttons or jog dial.

SCREEN HOLD: Keeping the current screen even if the event occurs.

EVENT FULL : Display the full screen of the channel which the event occurs.

EVENT MULTI : Display the multi-screen when the event occurs.

EVENT CHECK

At the EVENT menu,

Move the cursor to the EVENT CHECK using ▲ , ▼ buttons.

Select "ON" or "OFF" using the (-), (+) buttons or jog dial

EVENT MESSAGE

At the EVENT menu,

Move the cursor to the EVENT MESSAGE using ▲ , ▼ buttons.

Select "ON" or "OFF" using the (-), (+) buttons or jog dial

ON: The warning message will be displayed when the event occurs.

EVENT MESSAGE RESET

At the EVENT menu,

Move the cursor to the EVENT MESSAGE RESET using ▲ , ▼ buttons.

Set the time to reset the event message using the (-), (+) buttons or jog dial.

EVENT BUZZER

At the EVENT menu,

Move the cursor to the EVENT BUZZER using ▲ , ▼ buttons.

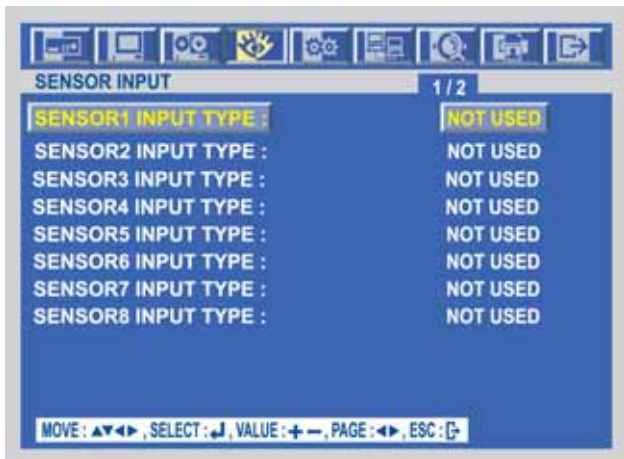

Select "ON" or "OFF" using the (-), (+) buttons or jog dial to set the event buzzer.

SENSOR INPUT

At the EVENT menu,

Move the cursor to the SENSOR INPUT using the **▲**, **▼** buttons.

Press the ENTER button when the cursor is on the SENSOR INPUT and the following 2 pages screen appears.

Select the desired channel using the **▲**, **▼** buttons.

Select the type of sensor which is connected with DVR using the (-), (+) buttons or jog dial.

To exit this SENSOR INPUT menu, press the ESC button.

Select the right sensor type according to the type of installed sensor with the unit.
NORMAL OPEN : The sensor is open in normal times.
NORMAL CLOSE : The sensor is close in normal times.
NOT INSTALLED: No sensors are connected to the DVR unit

RELAY OUTPUT

At the EVENT menu,

Move the cursor to the "RELAY OUTPUT" using the \blacktriangle , \blacktriangledown buttons.

Press the ENTER button when the cursor is on the "RELAY OUTPUT" and the following screen appears.

Move the cursor using the \blacktriangle , \blacktriangledown , \blacktriangleleft , \blacktriangleright buttons and set up the value using the (-), (+) buttons or jog dial.

Press the \blacktriangleleft button to see the next page.

To exit this screen, press the "ESC" button.

NOTE

- It is possible to set the RELAY OUTPUT of each channel in the type of event.
 - Relay output is from 1 to 4 and it is possible to set the period of the relay output.
- <RELAY 4 SELECT>

There are POWER, USER, NOT USED and HDD ERROR.

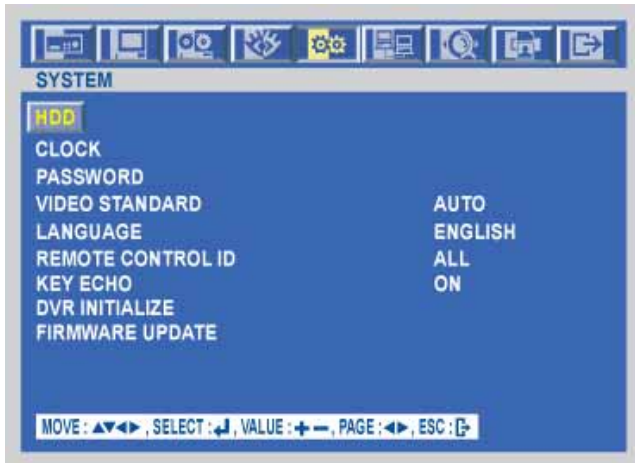

- POWER: The relay is working when power is off.
- USER: User can operate the relay manually.
 - Press the "FUNCTION" button to operate RELAY 4 manually.
 - NC NO: And then press the (+) button.
 - NO→NC: And then press the (-) button.
 - Press the "FUNCTION" button again if you want to exit this mode.

(You can also use this function through network viewer. Please refer to page 87.)

SYSTEM

To set up the SYSTEM menu,

Move the cursor to the SYSTEM icon using the ◀, ▶ in the MENU screen.
Press the ENTER button when the cursor is on the SYSTEM icon and the following items appear.

HDD

At the SYSTEM menu,

Move the cursor to the HDD using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the HDD and the following screen appears.

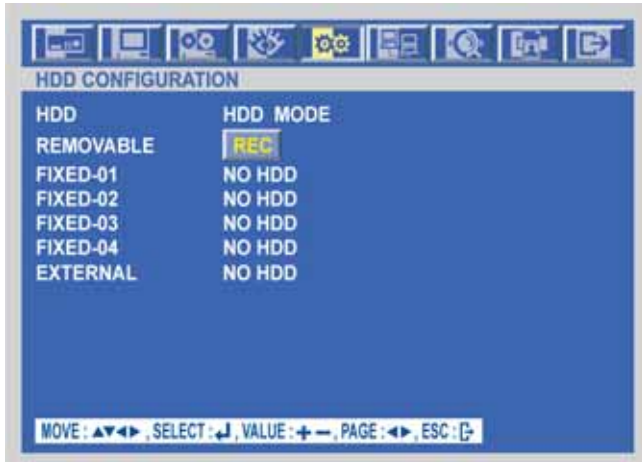

To exit this HDD menu, press the ESC button.

HDD CONFIGURATION

At the HDD menu,

Move the cursor to HDD CONFIGURATION using the **▲**, **▼** buttons.

Press the ENTER button when the cursor is on the HDD CONFIGURATION and the following screen appears.

Use the **▲**, **▼**, **◀**, **▶** buttons to move the cursor and use the (-), (+) buttons or jog dial to change the value.

HDD MODE

- REC: Normal and Event recording
- BACKUP: Only for backup

REC HDD INITIALIZE

At the HDD menu,

Move the cursor to REC HDD INITIALIZE using the **▲**, **▼** buttons.

Press the ENTER button when the cursor is on the REC HDD INITIALIZE and the following screen appears.

If you want to initialize, move the cursor to "YES" and then press the "ENTER" button.

If not, move the cursor to "NO" and then press the "ENTER" button.

To exit this screen, press the ESC button.

To exit this HDD menu, press the "ESC" button again.

BACKUP HDD INITIALIZE

At the HDD menu,

Move the cursor to “BACKUP HDD INITIALIZE” using the **▲**, **▼** buttons.

Press the “ENTER” button when the cursor is on the “BACKUP HDD INITIALIZE” and the following screen appears.

If you want to initialize, move the cursor to “YES” and then press the ENTER button. If not, move the cursor to “NO” and then press the ENTER button.

To exit this screen, press the ESC button.

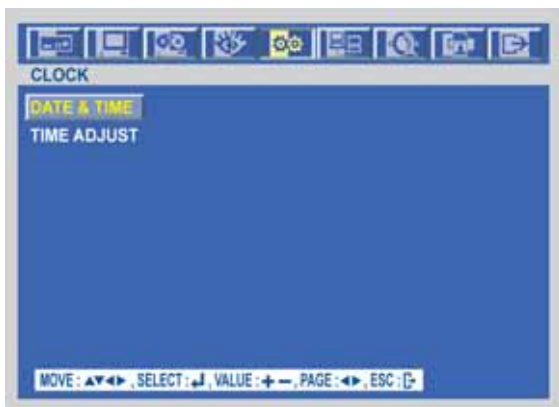

To exit this HDD menu, press the “ESC” button again.

CLOCK

At the SYSTEM menu,

Move the cursor to the CLOCK using the **▲**, **▼** buttons.

Press the ENTER button when the cursor is on the CLOCK and the following screen appears.

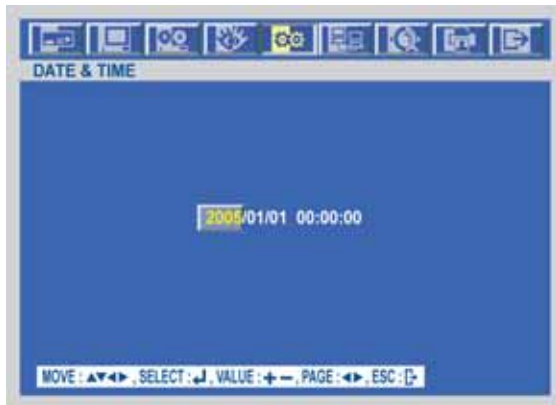

DATE&TIME

At the CLOCK menu,

Move the cursor to the DATE&TIME using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the DATE&TIME and the following screen appears.

Use the ▲, ▼, ◀, ▶ buttons to move the cursor to the desired position of date or time.

Use the (-), (+) buttons or jog dial to modify the current date and time.

- DATE: YYYY/MM/DD YEAR/MONTH/DAY
- TIME : HH:MM:SS HOUR:MINUTE:SECOND

To exit this DATE & TIME screen, press the ESC button.

PASSWORD

At the SYSTEM menu,

Move the cursor to the PASSWORD using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the PASSWORD and the following screen appears.

To exit this PASSWORD menu, press the ESC button.

MASTER PASSWORD

At the PASSWORD menu,

Move the cursor to the MASTER PASSWORD using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the MASTER PASSWORD and the following screen appears.

Insert the current password in the eight digits marked ***** beside OLD PASSWORD using the CAMERA/ NUMBER INPUT buttons.

And then insert 8 numbers of NEW PASSWORD using the CAMERA/ NUMBER INPUT buttons.

And you have to insert the same numbers again to verify the password after entering the NEW PASSWORD.

To exit this MASTER PASSWORD menu, press the ESC button.

SUPERVISOR PASSWORD

At the PASSWORD menu,

Move the cursor to the SUPERVISOR PASSWORD using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the SUPERVISOR PASSWORD and the following screen appears.

Insert the current password in the eight digits marked ***** beside OLD PASSWORD using the CAMERA/ NUMBER INPUT buttons.

And then insert 8 numbers of NEW PASSWORD using the CAMERA/ NUMBER INPUT buttons.

And you have to insert the same numbers again to verify the password after entering the NEW PASSWORD.

To exit this SUPERVISOR PASSWORD menu, press the ESC button.

NOTE: Supervisor can't change or setup the MENU
You can use only 0~9 number buttons to setup the PASSWORD.
The default is 11111111.

MENU DISPLAY CHECK

At the PASSWORD menu,

Move the cursor to the MENU DISPLAY CHECK using the ▲, ▼ buttons.

Select "ON" or "OFF" to set up the MENU DISPLAY CHECK using the (-), (+) buttons or jog dial.

If MENU DISPLAY CHECK is "ON", the password will be required when you display or set the MENU.
The default is "OFF".

POWER OFF CHECK

At the PASSWORD menu,

Move the cursor to the POWER OFF CHECK using the ▲, ▼ buttons.

Select "ON" or "OFF" to set up the POWER OFF CHECK using the (-), (+) buttons or jog dial.

If POWER OFF CHECK is "ON", the password will be required when the system power is turned off.
The default is "OFF".

REC/PLAY CHECK

At the PASSWORD menu,

Move the cursor to the REC/PLAY CHECK using the ▲, ▼ buttons.

Select "ON" or "OFF" to set up the REC/PLAY CHECK using the (-), (+) buttons or jog dial.

If REC/PLAY CHECK is "ON", the password will be required when you start to record or playback.
The default is "OFF".

VIDEO STANDARD

At the SYSTEM menu,

Move the cursor to the VIDEO STANDARD using the ▲, ▼ buttons.

Select the desired value using the (-), (+) buttons or jog dial.

If you select "AUTO", this DVR can detect NTSC/PAL automatically.
The default is "AUTO".

LANGUAGE

At the SYSTEM menu,

Move the cursor to the LANGUAGE using the ▲, ▼ buttons.

Select the desired language using the (-), (+) buttons or jog dial.

REMOTE CONTROL ID

At the SYSTEM menu,

Move the cursor to the REMOTE CONTROL ID using the ▲, ▼ buttons.

Set the REMOTE CONTROL ID using the (-), (+) buttons or jog dial.

If you are operating more than one DVR in the same place and wish to use the remote controller, the remote controller ID setup is required. Otherwise, do not change the default set value and "ON" should be selected.

Creates the Remote controller ID

Select one of the numbers from 1 to 255, and then press the same number button on the supplied remote controller before the operation.

KEY ECHO

At the SYSTEM menu,

Move the cursor to the KEY ECHO using the ▲, ▼ buttons.

Set "ON" or "OFF" using the (-), (+) buttons or jog dial.

ON : The beep sounds when you press any buttons on the front panel.
OFF : The beep does not sound.

DVR INITIALIZE

At the SYSTEM menu,

Move the cursor to the DVR INITIALIZE using the **▲**, **▼** buttons.

Press the ENTER button when the cursor is on the DVR INITIALIZE and the following screen appears.

If you want to initialize, move the cursor to “YES” and then press the ENTER button. If not, move the cursor to “NO” and then press the ENTER button. Use the **▲**, **▼** buttons to move the cursor. To exit this DVR INITIALIZE screen, press the ESC button.

FIRMWARE UPDATE

At the SYSTEM menu,

Move the cursor to the FIRMWARE UPGRADE using the **▲**, **▼** buttons.

Press the ENTER button when the cursor is on the FIRMWARE UPDATE and the following screen appears.

If you want to update firmware using the USB port, move the cursor to “YES” and then press the ENTER button. If not, move the cursor to “NO” and then press the ENTER button.

Use the **▲**, **▼** buttons to move the cursor.

To exit this FIRMWARE UPDATE screen, press the ESC button.

LINK

To set up the LINK menu,

Move the cursor to the LINK icon using the ◀, ▶ in the MENU screen.

Press the ENTER button when the cursor is on the LINK icon and the following items appear.

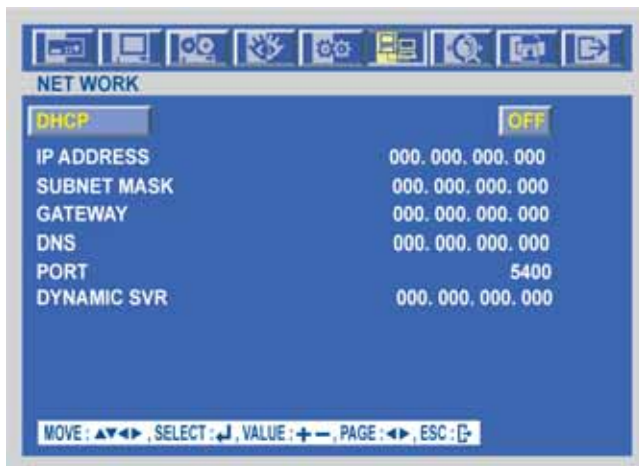

NETWORK

At the LINK menu,

Move the cursor to the NETWORK using the ▲, ▼ buttons.

Press the ENTER button when the cursor is on the NETWORK and the following screen appears.

To exit this NETWORK menu, press the ESC button.

<Fixed IP>

DHCP

At the NETWORK menu,

Move the cursor to the DHCP using the ▲, ▼ buttons.

Select "OFF" using the (-), (+) buttons or jog dial.

IP ADDRESS

At the NETWORK menu,

Move the cursor to the IP ADDRESS using the ▲ , ▼ buttons.

Select the desired position using the ◀ , ▶ buttons and set the data value using the (-), (+) buttons or jog dial.

SUBNET MASK

At the NETWORK menu,

Move the cursor to the SUBNET MASK using the ▲ , ▼ buttons.

Select the desired position using the ◀ , ▶ buttons and set the data value using the (-), (+) buttons or jog dial.

GATEWAY

At the NETWORK menu,

Move the cursor to the GATEWAY using the ▲ , ▼ buttons.

Select the desired position using the ◀ , ▶ buttons and set the data value using the (-), (+) buttons or jog dial.

DNS

At the NETWORK menu,

Move the cursor to the DNS using the ▲ , ▼ buttons.

Select the desired position using the ◀ , ▶ buttons and set the data value using the (-), (+) buttons or jog dial.

PORT

At the NETWORK menu,

Move the cursor to the PORT using the ▲ , ▼ buttons.

Select the desired position using the ◀ , ▶ buttons and set the data value using the (-), (+) buttons or jog dial.

NOTE: Port setting on DVR and client viewer software must be matched.

<Dynamic IP>

At the NETWORK menu,

Move the cursor to the DHCP using the ▲ , ▼ buttons.

Select "ON" using the (-), (+) buttons or jog dial.

Move the cursor to the DYNAMIC SVR using the ▲ , ▼ buttons.

Input the dynamic server IP using the (-), (+) buttons or jog dial to change the value and the ▲ , ▼ buttons to move the cursor.

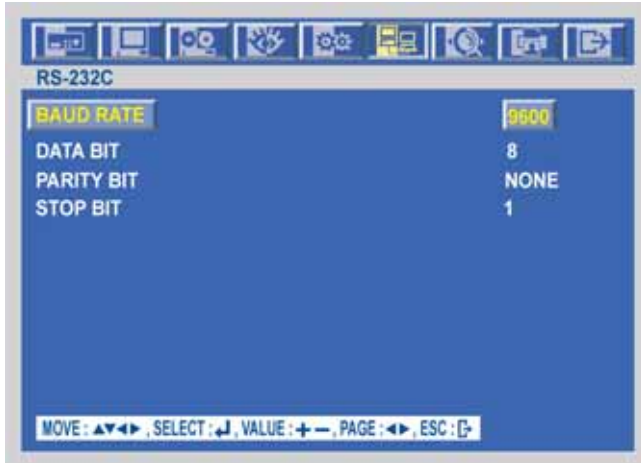

NOTE: DHCP is a protocol for assigning dynamic IP addresses to devices on a network.

RS 232C

At the LINK menu,

Move the cursor to the RS232 using the \blacktriangle , \blacktriangledown buttons.

Press the ENTER button when the cursor is on the RS232 and the following screen appears.

Use the \blacktriangle , \blacktriangledown buttons to choose the item and use the (-), (+) buttons or jog dial to set the data value.

To exit this RS232 menu, press the ESC button.

RS 422 / 485

At the LINK menu,

Move the cursor to the RS422/485 using the \blacktriangle , \blacktriangledown buttons.

Press the ENTER button when the cursor is on the RS422/485 and the following screen appears.

Use the \blacktriangle , \blacktriangledown buttons to choose the item and use the (-), (+) buttons or jog dial to set the data value.

To exit this RS422/485 menu, press the ESC button.

NOTE

BAUD RATE : Data transmission speed per second.

DATA BIT : Data transmission bit.

PARITY BIT : Data transmission error checking.

STOP BIT : Data transmission ending bit

CAUTION:

Turn off the power not to damage this unit when you connect RS-232C connector.

SEARCH

To set up the SEARCH menu,

Move the cursor to the SEARCH icon using the ◀ , ▶ in the MENU screen.

Press the ENTER button when the cursor is on the SEARCH icon and the following items appear.

COPY

To set up the COPY menu,

Move the cursor to the COPY icon using the ◀ , ▶ in the MENU screen.

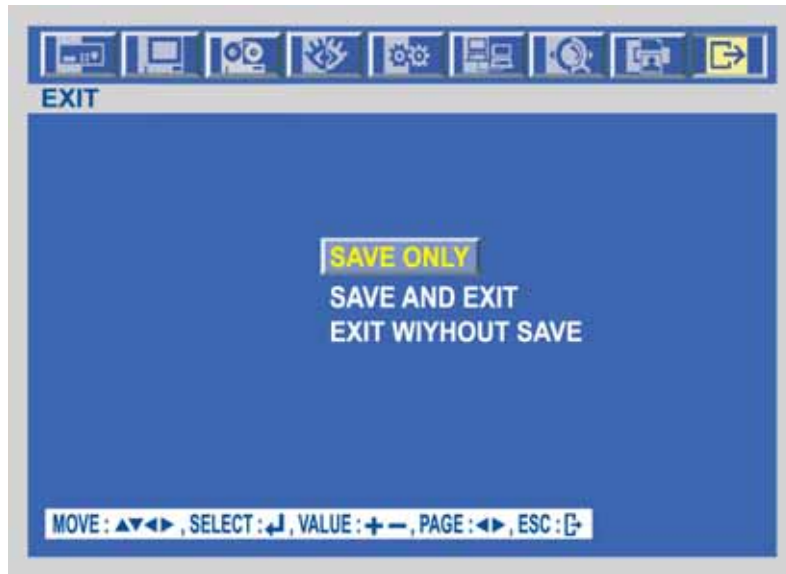

Press the ENTER button when the cursor is on the COPY icon and the following items appear.

EXIT

- EXIT WITHOUT SAVE : Select this item if you want not to save the changed setup before exiting this screen.

< Recording Speed Table >

*Note 1, 2

Unit : fps

Channel		16 ch		8 ch	
Recording Speed	NTSC	360 x 240	120	120	120
		720 x 240	60	60	60
		720 x 480	30	30	30
	PAL	360 x 288	100	100	100
		720 x 288	50	50	50
		720 x 576	25	25	25
Compression Method		MPEG4		MPEG4	

< Recording Time Table >

1. RECORDING CONDITIONS

Based on 120GB of storage with the installation of 1 camera.

2. RECORDING TIME TABLE

RECORD IMAGE	IMAGE QUALITY	IMAGE SIZE	120fps(CIF)	60fps(CIF)	30fps(CIF)	15fps(CIF)
Color Bar	SUPERFINE	8448 Bytes	69 Hours	138 Hours	276 Hours	552 Hours
	FINE	6688 Bytes	85 Hours	170 Hours	340 Hours	680 Hours
	LOW	5344 Bytes	111 Hours	222 Hours	444 Hours	888 Hours

- The figures in the Recording Time Table were estimated under ideal recording conditions and may vary from your actual recording situation.
- In the Recording Time Table, multiply by 2 for recording hours with an 240 GB HDD and 3 for recording hours with a 360 GB HDD.
- The complexity of the image and the amount of motion recorded greatly influences the recording capacity of your hard drive (HDD). The higher the frames per second and the higher the video quality setting, the lower your HDD recording capacity will be. In the same manner, the lower the frames per second setting and the lower the video quality setting, the higher your HDD recording capacity will be.
- Note that the lower frame rate does not mean a lower video quality. The image quality remains the same whether the frames per second setting is set high or low. One frame per second is the same as taking a photo every second.
- There are several factors that influence the recording capacity of your hard drive.
 - (a) The number of cameras used
 - (b) The complexity of the recording image
 - (c) The number of frame recorded per second
 - (d) The image quality setting – Superfine, Fine or Low

Network Viewer

Installation of Network Viewer Software

System requirement

- Pentium III or above recommended
- O/S : Microsoft Windows 2000 / XP
- 128MB RAM or above recommended
- Super VGA 16M or above recommended
- 10/100 base T network card for LAN operation

Network Environment

	Client PC	DVR
Minimum	More than 1Mbps	More than 0.5Mbps
Recommended (16 Frames/Sec)	More than 3Mbps	More than 3Mbps

* Transfer rate of image varies with the number of client accessed to DVR.

NOTE : The software, DVR Viewer is compatible with Microsoft Windows 2000 / XP.

Installation

To start the installation,

- 1 Start Windows 2000 or XP
- 2 Insert DVR Viewer Software CD into the CD-ROM drive
- 3 Install DVR Viewer and locate the DVR Viewer.exe file on your PC screen.
- 4 Simply double-click the icon to start.
- 5 DVR Viewer main menu controller will appear on the screen.

Connecting to DVR

Please double-click the icon of DVR Viewer, and then the following main menu controller will appear on the PC screen.
