

# **Mercury TM 1500 Digital Output Encoder Systems** Factory Set Resolution to 0.50µm

**Reflective Linear and Rotary Encoders** 

The Mercury 1500 encoder system includes the sensor, double shielded cable, your choice of connector, and either a linear or rotary glass scale. Mercury's space-saving, integrated configuration gives OEM system designers a breakthrough in performance.

#### Imagine what you can do with this!

Reduce the cost and size of your system, and increase its performance all at once. MicroE Systems' Mercury 1500 kit encoders are available in two styles. The M1500S, an RS-422 compliant 15 pin standard D-sub connector and the M1500H, an RS-422 compatible 5x2 micro-connector for tight spaces. Simply stated, the M1500 is smaller, higher performance, faster to install, and easier to use than any other encoder. The tiny sensor fits into very tight spaces, has broad alignment tolerances for fast and easy setup and works in both linear and rotary applications. The entire Mercury 1500S encoder is EMI shielded for use in the toughest environments. With standard digital A-quad-B output, select the Mercury 1500 encoder with the resolution required by your application.

## Standard features

- Small sensor with ultra-low Z height; flush screw mounting
- Sensor is 8.4mm (H) x 12.7mm (W) x 20.6mm (L) and weighs 1.6g
- Available with 15 pin standard D connector or micro-connector
- A-quad-B output and Index window
- Factory set interpolation x4, x8, x20, x40 for resolutions of 5µm to 0.50µm (linear); 6,600 CPR to 655,000 CPR (rotary)
- Entire system is EMI shielded
- Bi-directional index signal
- Index mark at the center or end of the glass scale (linear)
- Alignment Tool enables fast set up (see pg 2)

# **Table of Contents**

System & Sensor	pg . 2-6
Scales	pg. 7-8
Ordering Information	pg. 9

**Optional Features & Accessories** 

• SmartPrecision Alignment Tool

 Glass scale length or diameter: Linear lengths from 5mm to 2m Rotary diameters from 12mm to 108mm

- Cable length of 0.5m, 1m, 2m or custom
- SmartPrecision Software for set up

# **System Configurations**

**Standard and Optional Equipment** 

## M1500S Encoder System Standard Equipment

# M1500H Encoder System Standard Equipment

Encoder Sensor Same for linear and rotary scales.

Controller Interface Cable

M1500S RS-422 compliant 15 pin standard D-sub connector M1500H RS-422 compatible 5 x 2 header Micro-connector

#### SmartPrecision™ Alignment Tool - SSAT 1500

Provides fast set up; the built-in LED indicators make alignment fast and easy, eliminating the need for an oscilloscope.

The RS232 Interface Adapter provides power to the encoder and connections to a PC. This is included with the Alignment Tool.

# **Optional Software**

#### SmartPrecision<sup>™</sup> Software

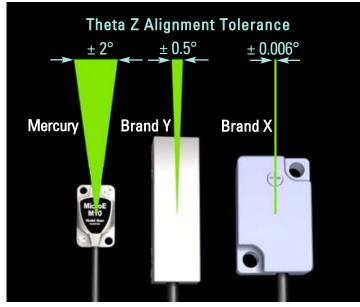

Optional software lets you view signal strength, Lissajous plots, position data and diagnostics.

# Broader Alignment Tolerances, Increased Standoff Clearance, Smallest Sensor and More

Why Mercury Encoders Make It Easier To Design High Performance Into Your Equipment

### Alignment Tolerance Comparison\*\*

# Eliminate the Frustration of Touchy Encoder Alignment

#### Mercury Solves this Problem for Good

Fussy alignment is no longer a concern. With Mercury's patented PurePrecision™ optics, advanced SmartPrecision™ electronics and LED alignment indicators, you can push the sensor against your reference surface, tighten the screws and you're finished. Try that with brand X or Y.

This performance is possible thanks to relaxed alignment tolerances, particularly in the theta Z axis. Mercury offers a  $\pm 2^{\circ}$  sweet spot— that's a 300% improvement over the best competitive encoder. And that will result in dramatic savings in manufacturing costs.

No other commercially available encoder is easier to align, easier to use, or easier to integrate into your designs.

	Mercury*	Brand X	Brand Y	Mercury vs. Best Competitor
Z Standoff	± 0.15mm	± 0.1mm	± 0.1mm	Mercury is 50% better
Υ	± 0.20mm for linear ± 0.10mm for rotary ≥19mm dia.	± 0.1mm	unspecified	Mercury is 100% better
theta X	± 1.0°	unspecified	± 1.0°	
theta Y	± 2.0°	± 0.1°	± 1.0°	Mercury is 100% better
theta Z	± 2.0°	± 0.006°	± 0.5°	Mercury is 300% better

\*Measured at a constant temperature for one axis at a time with all other axes at their ideal positions.

\*\*Based on published specifications

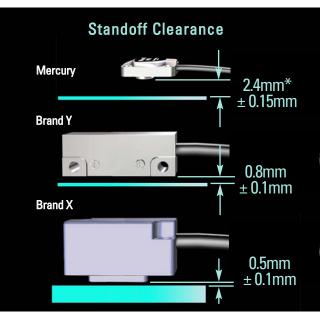

### Mercury Can Reduce System Size and Cost

Mercury's sensor height is 44% shorter than competitive encoders, making it easy to fit into your design. This reduction can also cut total system weight and cost by allowing the use of smaller motors and stages. Safe system operation is also enhanced thanks to Mercury's generous standoff clearance– 200% greater than other encoders. And its standoff tolerance is 50% greater than the best alternative. This significantly relaxes mechanical system tolerances, while reducing system costs.

#### Mechanical Dimension Comparison\*\*

	Mercury	Brand X	Brand Y	Mercury vs. Best Competitor
Sensor Z height	8.4mm	23mm	15mm	44% better
Standoff clearance	2.4mm	0.5mm	0.8mm	200% better
Standoff tolerance	± 0.15mm	±0.1mm	±0.1mm	50% better
System height	11.7mm	28.5mm	15.8mm	26% better

\*\*Based on published specifications

\* Dimensions shown illustrate encoder system standoff clearance; see Mercury Encoder Interface Drawings for correct design reference surfaces.

# System Specifications Resolution and Maximum Speed

Mercury 1500 systems have factory set interpolation: x4, x8, x20, x40. Below is the table of available resolutions.

## Linear - 20µm grating pitch

Interpolation	Resolution	Maximum Speed
x4	5.000µm/count	7200mm/s
x8	2.500µm/count	7200mm/s
x20	1.000µm/count	7200mm/s
x40	0.500µm/count	7200mm/s

# Rotary - 20µm grating pitch

Rotary	Fundamental	Interpolation
Glass Scale	Resolution	Below is a table of the available resolutions.
Diameter		

0.472" [12.00mm]	1650 CPR		x4	x8	x20	x40
		interpolated resolution (CPR)	6,600	13,200	33,000	66,000
		interpolated resolution (arc-sec/count)*	196.4	98.2	39.2	19.64
		interpolated resolution (µrad/count)*	952	476	190.3	95.2
		maximum speed (RPM)	13090	13090	13090	13090
0.750" [19.05mm]	2500 CPR		x4	x8	x20	x40
		interpolated resolution (CPR)	10,000	20,000	50,000	100,000

# Scale Specifications Standard and Customized Scales

MicroE Systems offers a wide array of chrome on glass scales for the highest accuracy and best thermal stability. Easy to install, standard linear and rotary scales meet most application requirements. Customized linear, rotary, and rotary segment scales are available where needed. All scales include an optical index. Mercury's glass scales save time by eliminating motion system calibrations or linearity corrections required by other encoders, and provide better thermal stability than metal tape scales.

#### **Options include:**

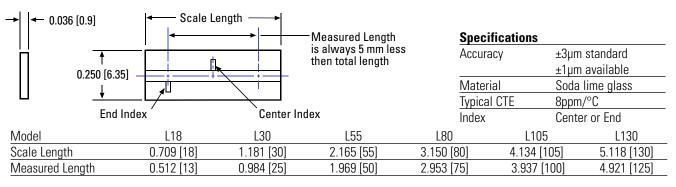

- Standard linear: 18mm 2m
- Standard rotary: 12mm 107.95mm diameter, with or without hubs
- Custom linear\*: special lengths, widths, thickness, index mark locations and special low CTE materials
- Custom rotary\*: special ID's, OD's (up to 304.8mm), index mark outside the main track and special low CTE materials
- Mounting of hubs for rotary scales: MicroE Systems can mount and align standard, custom, or customer-supplied hubs
- Rotary segments\*: any angle range; wide range of radius values

\*Custom scales or rotary segments are available in OEM quantities. Contact your local MicroE Systems sales office.
