

AktiMate Maxi

Not long after the AktiMate Mini was released, rumour began to spread that a bigger and better version was in the planning stage - not to replace the Mini, but to complement it and offer additional features.

The Maxi has now arrived - not only is it larger but also very much smarter. It includes a Reciva media module which brings the wonders of direct access to internet radio, together with the ability to stream from any Windows or UPnP shared network on your computer. To access the network you either connect via the Ethernet RJ45 on the rear panel, or wirelessly using the AktiMate Maxi's internal Wi-Fi 802.11 b/g.

There is FM radio as well (with a string antenna supplied), and the Maxi has three auxiliary inputs (2 pairs of RCA phonos and a mini-jack) plus audio outputs. The USB host socket on the Maxi allows replay of music files from music sticks or MP3 players. The iPod dock has the elegant cover flap recently introduced on the AktiMate Mini.

The enhanced functionality is easy to use thanks to the addition of an illuminated LCD screen on the front of the more powerful active speaker. The menu itself is clear and easy to navigate, either via the remote or the knob on the front panel. And the options are plentiful - Internet Radio, FM Radio, Media Player, Aux 1 (via RCA Phono 1), Aux 2 (RCA Phono 2) Line in (Mini-jack) ... there is even an alarm clock! In addition, once registered with Reciva (free) you have access to the vast media library which you configure to your very own My Stuff folder for speed of access.

Control is via the remote handset or from the control knob on the front panel of the active speaker. The speakers themselves are available in a choice of three finishes, red and black high gloss plus walnut real wood veneer.

Early reviews indicate the Maxi has achieved every objective - once again at an amazing price.

They take the original AktiMates wow factor and make it large, while adding today's technology to open doors to network streaming and internet radio
Australia

Eye-catching style and unrivalled muscle and scale, this remains the all in one to beat. They are powerful, punchy and engaging
