Thank you for purchasing an iO G2 handsfree music streaming device.

iO G2 is the next generation of iO product which introduces significant improvements in functionality to enhance sound quality, driver safety and ease of use. This technology enables you to play music stored from most portable mobile devices as well as make and receive mobile calls safely from within your vehicle.

## iO TALK2 Key Features

Multipoint Pro™ - Connect up to 2 devices at any one time

Removable OLED screen

Automatic Phonebook synchronisation of up to 9,000 contacts

Multi-lingual support

PBAP (Phonebook Access Profile)

80 watts Class-D amplifier technology

Make and receive handsfree mobile phone calls wirelessly

Text to Speech - Phonebook, Menu, Text Messages

Enjoy auto-connect when you enter your vehicle by storing up to 5 devices in iO TALK2's memory

Excellent sound quality, streamed through your vehicles speakers

A2DP (Advanced Audio Distribution Profile) with AVRCP (Audio Video Remote Control Profile)

Easy to use illuminated iO TALK2 controller

Innovative design that will integrate with your existing vehicle audio system\*

\* may require additional parts

Innovative design that will integrate with your existing vehicle audio system\*

Reversing Aid compatible

Specially designed technology for your portable Satellite Navigation voice instructions

Make and receive handsfree mobile phone calls wirelessly

Easy to use illuminated iO PLAY2 controller

Enjoy auto-connect when you enter your vehicle by storing up to 5 devices in iO PLAY2's memory

Excellent sound quality, streamed through your vehicles speakers

High quality audio performance using 180 watts Class-D amplifier technology

\* may require additional parts

## Pairing and Connecting a Phone

(when Bluetooth visibility is turned on in your iO G2 device menu):

Your iO G2 device has the ability to have 5 devices paired to it at any one time. If you wish to pair an additional device you will need to manually delete a device from the paired devices list first. There is also the ability to use Multipoint Pro™ technology to connect up to 2 devices to the kit simultaneously.

To pair a phone to your iO G2 device, if Bluetooth visibility is **NOT** enabled on your iO G2 device you will need to refer to the **'Pair New Device'** menu.

- >> Turn on the vehicle's ignition or start the engine
- >> Enable Bluetooth on your phone and initiate a search for new devices
- >> On your phone locate and select your iO G2 device from the list of discovered devices
- >> Pair to your iO G2 device using the pin code 0000. If Simple Secure Pairing is used, the Authentication Code will be displayed on screen
- >> When prompted connect to your iO G2 device
- >> You should also enable the auto connect feature on your handset to allow automatic re-connection each time.
- >> A message will be displayed on the screen reading **'Pairing Successful'**.
- >> You will then return to the 'Home Screen' displaying the connected handset's information. (Fig.1)
- >> If autosync is enabled, your iO G2 device will automatically start importing your phonebook contacts.

Menu

Bluetooth

Pair New Device

For more information please refer to the full user manual at [www.my-io.com](http://www.my-io.com)

Pairing and connection procedures may differ from phone to phone, please

check your phone's user manual for further information.

*Fig.1 – One phone connected*

## Pairing and Connecting a Second Phone

Your iO G2 device has the ability to connect two phones simultaneously. To accomplish this follow the same procedure as previously mentioned to pair the first phone.

Once complete, both phones' details are displayed on the home screen. (Fig.2) Phone 1 is the first phone listed in the display, and Phone 2 is the second.

*Fig.2 – Two phones connected simultaneously*

## Connecting an iPod or iPhone (PLAY2 ONLY)

via the iPod connection cable.

Your iPod/iPhone will plug in directly to your iO PLAY2 system via the supplied iPod accessory cable. Once connected you will be able to play and control your device by accessing the **'iPod'** menu.

Using  **iO Zoom** Advanced Search you are able to search your iPod in the same manner as you would on the device itself i.e. by artist or album etc. The search will be split into alphabetical segments until you have less than 50 entries left, at which point you will be able to scroll through all entries individually.

Menu

iPod

Playlist

Choose Song

Play

## Connecting an Auxiliary Device (PLAY2 ONLY)

via the 3.5mm stereo jack.

You are able to connect a variety of audio devices to the 3.5mm jack with a suitable lead (not supplied). Once connected you will be able to listen to this device's audio playback through your vehicles speakers. To listen to audio from this device you will need to go to the **'Line In'** menu and select **"Play"**

Menu

Line In

Play / Stop

## Connecting an Audio Device via Bluetooth

For pairing a device such as the optional IO-BTA3-5 3.5mm dongle via Bluetooth please refer to the accessory's user manual.

Once the devices are paired they will connect automatically each time your iO G2 device is powered up.

Note: To enable pairing, your iO G2 device must have Bluetooth visibility turned on.

If the device you are trying to pair does not use one of the standard 'handshake' sequences and 'PIN codes' you may need to enter the device's specific PIN code to allow pairing, which should be in the device's instruction manual.

Please refer to the complete User Manual for more details, available for download at [www.my-io.com](http://www.my-io.com)

## Hands Free (HFP) Functions

The diagram below illustrates the controller functions when connected with your mobile phone on the HFP (Hands Free Profile).

## Music Streaming (A2DP & iPod) Functions

The diagram below illustrates the controller functions when connected with your mobile phone or Bluetooth enabled device on the Music Streaming profile A2DP or playing iPod.

## Your Home Screen

This is the screen that is displayed when your iO G2 device is in idle state with a phone connected. (Fig.3)

*Fig.3 – Home Screen*

The Home Screen shows the information about each phone that is connected to your iO G2 device including charge level, signal strength and network information (if only one handset is connected).

From this screen you are able to activate your phones voice dialling option by holding down the red **[ ]** button for 3 seconds. You can also call your last dialled number by holding down the green **[ ]** button for 3 seconds (these two operations will always activate the feature on phone 1).

To manually dial a number hold down the centre rotary button.

If you are playing music whilst in the home screen from a device which supports AVRCP (Audio Video Remote Control Profile) the display will look slightly different and the buttons will perform different functions. These functions are listed on the previous page.

*Fig.4 – Playing music whilst in the Home Screen*

In addition to the standard information you will also have five icons to mimic the button functions of the music playing device (Fig.4).

To access the menu when a music device is playing just press and hold the centre button which will take you to the main menu screen (**'Car Stereo'**)

## **Making and Receiving a Call**

An outgoing call can be made in one of five ways:

- >> Via the phonebook on your iO G2 device
- >> Via the call history on your iO G2 device
- >> Using your iO G2 device's manual dialling feature
- >> Via voice recognition (dependant on handset)
- >> Using the phone keypad as normal

### **Phonebook Dialling**

To dial using contacts from the phonebook enter the **'Phonebook'** menu and select your chosen name and then push the rotary button. If there is more than one phone number stored for that particular contact then you will be given the option of which number you wish to use. Once the correct number is

highlighted then push the rotary button to dial (Fig.5). If you have two phones connected you will need to select which handset's phonebook you wish to access.

Fig.5 - Phonebook

### Call History Dialling

To dial using call history just enter the '**Call History**' menu and then select the desired number from your recent calls missed, received or dialled and then press the rotary button on the controller (Fig.6).

Fig.6 - Call History

## Manual Dialling

To manually dial from your iO G2 device, enter the **'Phonebook'** menu and use the number entry screen located under the  icon. If two phones are connected you will be given the option to select which phonebook to access or which phone to manually dial from. Alternatively you can manually dial by holding down the rotary button whilst in the Home Screen (this will always dial using phone 1). Once in the **'Manual Dial'** screen turn the rotary button to select the number. Confirm the selection by pressing the rotary button. If you make an error then use the  button to delete the last digit. As you select each number it will be displayed at the top of the screen. Once the number is selected click on the  to dial (Fig.7).

Fig.7 – Manual Dialling

## Voice Dialling

To use the voice dialling feature on compatible phones you need to hold down the red  button for 3 seconds whilst in the home screen. Please note that this will always activate the voice dialling feature of 'Phone 1' (Fig.8).

*Fig.8 – Voice Dialling active*

When prompted you should clearly state the name of the contact that you wish to call. This will then start the dialling process for your chosen contact.

The voice dialling process will be activated in the same way as your handset so if confirmation of the desired contact is required on your handset then this will be the case when using your iO G2 device.

## **Transferring a Call Between Your iO G2 Device and a Handset**

To transfer a call between your iO G2 device and a handset, just hold down the rotary control during a call for 3 seconds. Each 3 second press will alternate between the handset and your iO G2 device. You will be notified of this by the "Handset Transfer" icon (Fig.9). If multiple calls are active then all calls will be transferred to the handset.

*Fig.9 – Handset transfer icon*

## Swapping Between Held or Incoming Calls

iO G2 devices have the ability to handle multiple calls simultaneously but this feature is only available on one handset at a time.

If you have a current active call on either connected handset and a second call is received on the same handset you will be notified by a low “beep” tone and also the display will announce the incoming caller. You are then able to accept the new call and put the first call on hold by pressing the green **[** button, or you can end the current call and automatically answer the second call by pressing the red **]** button.

If you have chosen to accept the second call and place the first call on hold you can then swap between calls by pressing the green **[** button. The red **]** button will always end the currently active call.

You will be shown which call is active and which one is on hold on the display (Fig.10).

*Fig.10 – Multiple active calls*

If you are on a call from one handset and the other handset receives an incoming call you will again be notified by a low “beep” tone. You then have the option to end all current calls to enable you to answer the second handsets call. Calls cannot be handled simultaneously from two different handsets.

You are able to answer the call from the second handset by pressing the answer button on the second phone. This will route the call through the phone without interrupting the current call on your iO G2 device.

## Call Privacy

To mute the microphone during a call click the green  button. This will then mean that the other party will not be able to hear you although you will still be able to hear them. To un-mute the microphone, click the green  button again. When Call Privacy is active you will see the microphone muted symbol (Fig.11).

Fig.11 – Microphone muted icon

Note: If two calls are active this function is not available.

## Ending a Call

To end the current call click the red  button during the call.

## Streaming Music from an A2DP Compatible Phone

Your iO G2 device has the ability to stream music that you have stored in your A2DP enabled phone through the car speakers.

To listen to music stored on your phone enter the **'A2DP Music'** source menu and select the desired handset from which you wish to stream music. (Fig.12) You will then be reverted to the music playing home screen. Dependant on your handset, music may start playing automatically or you may be required to start playback manually from your phone. Some phones may not require you to

enter the **'A2DP Music'** menu to start playback. In this case you can initiate playback by just pressing play on the phone.

*Fig.12 – Bluetooth source*

Menu

Bluetooth

Select Phone

If your handset supports the AVRCP (Audio Video Remote Control Profile) function then you will also be able to control the play/pause and track up/down functions from your iO G2 device. (Check with your phone manufacturer)

## Swapping Between the Stereo and Your iO G2 Device.

To start listening to music from your iO G2 device when using your vehicles stereo, just enter the menu and select your chosen source. To revert back to the vehicle radio when listening to music from your iO G2 device, then enter the menu by pressing and holding the rotary button for 2 seconds and then select **'Car Stereo'**.

## Warranty

EN

Armour Automotive Ltd. warrants this product to be free from defects in material and workmanship under normal use for a period of 12 months from the date of original purchase. Should service be necessary under this warranty for any reason due to manufacturing defect or malfunction during the warranty period, Armour Automotive will repair or replace (at its discretion) the defective product with an equivalent products. The warranty excludes damage or abuse caused by customer misuse. All warranties are to be handled by the original retailer where the goods were purchased.

This warranty is valid only for the original purchaser and is not extended to owners of the product subsequent to the original purchaser. Any applicable implied warranties are limited in duration to a period of the express warranty as provided herein beginning with the date of the original purchase at retail, and no warranties, whether express or implied, shall apply to this product thereafter.

Armour Automotive Ltd. does not warrant failure of an iO product caused by incorrect installation by a non approved installation centre.

## Trademark

## Correct Disposal of this Product (WEEE)

(Waste Electrical Electronic Equipment – WEEE)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office. Business users should contact their supplier and refer to the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposals.

## iPod/iPhone

## C-Tick

This device complies with the C-Tick EMC Regulatory Arrangement.

Supplier Identification: N15013

The iO brand also encompasses a range of accessories to enhance the use of your iO G2 device e.g. aiding installations, increase functionality, replacement parts and device charging). These accessories are available from any authorised iO retailer.

## Bluetooth Dongles

These are Bluetooth stereo (A2DP) Music Streaming Adaptors for wirelessly streaming your music tracks or Sat Nav voice instructions through your iO G2 device, from any non-Bluetooth portable devices. Available for 3.5mm jack plugs and 30 pin Apple connectors.

## iO Charging Kits

We offer a series of device charging kits to allow you to charge your iPod/iPhone and any USB powered devices while in the car or from mains either at home/office or whilst abroad.

## Replacement Screen

Replacement OLED screens for your iO G2 device are available to replace lost or damaged items (Part Number: iO-OLED1).

## Steering Wheel Control Interface

Optional steering wheel control interfaces are available for most makes/models of vehicles which will allow control of your iO PLAY2 directly from your factory steering wheel controls.

## Vehicle Specific Harnesses (SOT Leads)

A SOT Interface Lead (supplied by Autoleads) allows iO Products to be installed into vehicles with different types of Plug & Play connectors. We have a comprehensive range of interface leads for all types of different automotive original equipment audio systems and applications.

For the full range of vehicle specific harnesses (SOT's) please refer to the Autoleads Product Finder at [www.autoleads.co.uk/productfinder](http://www.autoleads.co.uk/productfinder)

Receive greater benefits by registering your iO product in 3 easy steps.

## Benefits

- >> Instant Access to online product support.
- >> Provides Warranty and after sales service.
