Chapter 1. EducompOnline - Overview

Introduction to EducompOnline

EducompOnline is a virtual school for Educomp Smartclass schools. As part of Educomp Smartclass schools, EducompOnline gives schools an institutional online presence to schools where they can perform a dynamic range of activities that empower them to deliver more value to students, parents, teachers, and principals.

With activities like send a message and, send an important announcement, the schools can inform the teachers, parents, and students about the upcoming events or updates. They can customize their website to match the identity of the school with a logo and use several services offered by EducompOnline. From a single access point, the schools can manage the teachers and students accounts by adding them into the system, track their activities, and view content and tests. They can share photos and videos of all the school events by uploading them on the website.

For each school, these activities are performed by a school administrator. As a student, you can perform certain useful activities specific to your needs like, taking test, viewing marks, calendar, attendance, etc.

Best Configuration

The EducompOnline Web application is best used on Internet Explorer versions higher than 7.0 or Firefox versions 4.x or above, with a resolution of 1024 X 768 and colour depth of 16 bit or higher. The browser settings should be set to default for best performance.

These settings ensure optimum user-friendliness of the user interface as well as easy maintenance of the application.

Using this Manual

You can read through the entire manual in sequential order as presented. This method is suggested for first time readers and presents the entire application with logical flow of information enabling easier understanding.

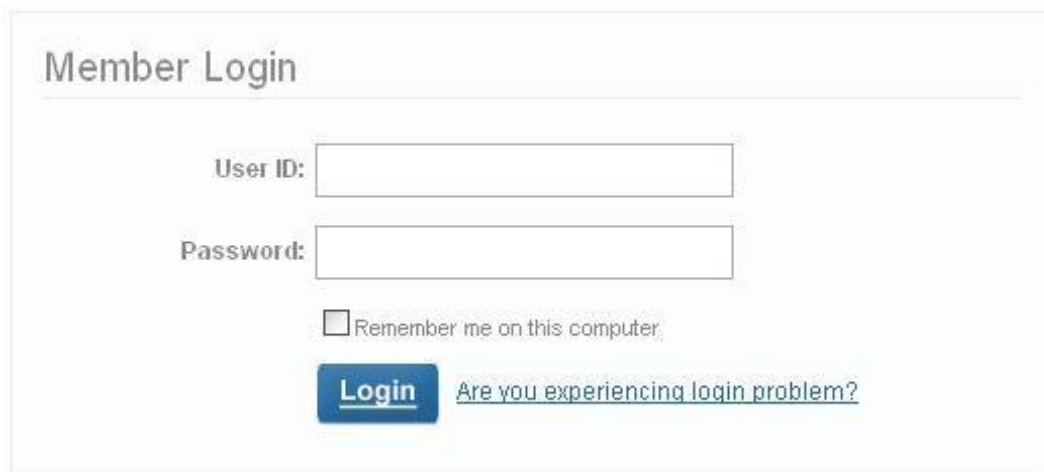

You may also jump to specific sections and subsections for help on that specific feature. This manual presents step-by-step instructions for the workflow in that section. Refer 'Table of Contents' for such selection.

Getting Started

The following information will help you quickly get started with the EducompOnline application.

Logging In

The EducompOnline web application **Login** screen authenticates your identity and lets you in to use the provided functionality. Fill up the User ID and Password provided to you to log into the application.

Member Login

User ID:

Password:

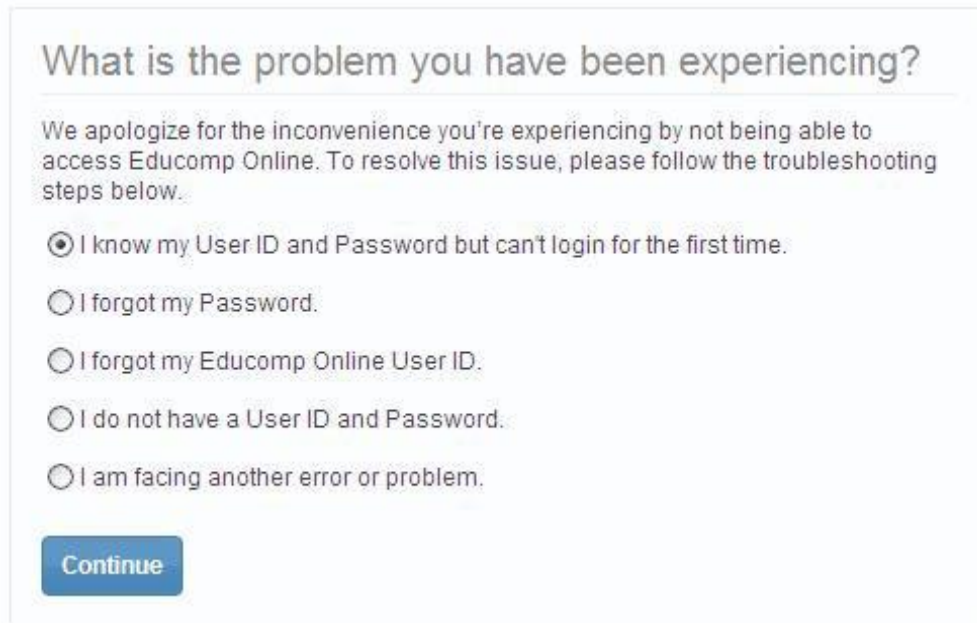

Remember me on this computer

[Login](#) [Are you experiencing login problem?](#)

Image 1.1 Member Login screen

The **Remember me on this computer** option preserves your login credentials into computer cache to make them available to you at your next login.

If you come across any login related problems, such as, forgot password or User ID, or you are facing another error, click the **Are you experiencing login problem?** link to open the following screen. Select the problem you are facing and click Continue to find some suggestion / resolution.

The screenshot shows a web form titled "What is the problem you have been experiencing?". Below the title is a paragraph of text: "We apologize for the inconvenience you're experiencing by not being able to access Educomp Online. To resolve this issue, please follow the troubleshooting steps below." There are five radio button options listed: "I know my User ID and Password but can't login for the first time.", "I forgot my Password.", "I forgot my Educomp Online User ID.", "I do not have a User ID and Password.", and "I am facing another error or problem." At the bottom left of the form is a blue button labeled "Continue".

Image 1.2 Login problems screen

On successfully logging into the Web application, you see the main screen. From here, you can perform all operations specific to the EducompOnline Web Application.

The screenshot displays the main interface of EducompOnline. At the top left is the logo and the text 'EducompOnline'. To its right are two tabs: 'My Home' (active) and 'My School'. Below the logo, the user's name 'Harshita' and class 'Class Class X' are shown, along with a progress bar. A vertical navigation menu on the left lists various features: Updates (selected), Videos, Edutest, Math Guru, EduGames, EduWiki, Quiz, Jokes, Edupress, Q&A, Articles, and Poll of the day. The main content area is titled 'Updates' and includes a filter dropdown set to 'All'. The updates list contains several entries from 'School Admin' and one from 'teacherxa' sharing a video titled 'Acids,Bases and Salts Electrolytic properties of salts'.

Major Features

A Student can use the following major features offered by EducompOnline website:

- Access features provided by EducompOnline: Videos, EduGames, EduWiki, Quiz, Jokes, Q&A, Articles, and Poll of the Day
- Read Announcements
- Read Messages
- Send Messages to Teachers
- Take Available Tests
- View Teacher Notes
- View Picture Gallery
- Check own exam marks
- View own attendance report
- View Calendar

2

Chapter 2. My Home Features

The My Home tab hosts the links to features provided by EducompOnline for students. These features include Updates, Videos, EduGames, EduTests, Math Guru, EduWiki, Quiz, Jokes, Q&A, Articles, and Poll of the Day. Let's have a look at these one by one:

Updates

The first section, which also is the default home screen for your login, is the **Updates** section. This screen displays the notifications about all changes made in the application that affect you, for instance, received messages / announcements, newly uploaded pictures / videos / articles, etc. You can filter these updates using the **Update by** filters towards the top right corner of the screen.

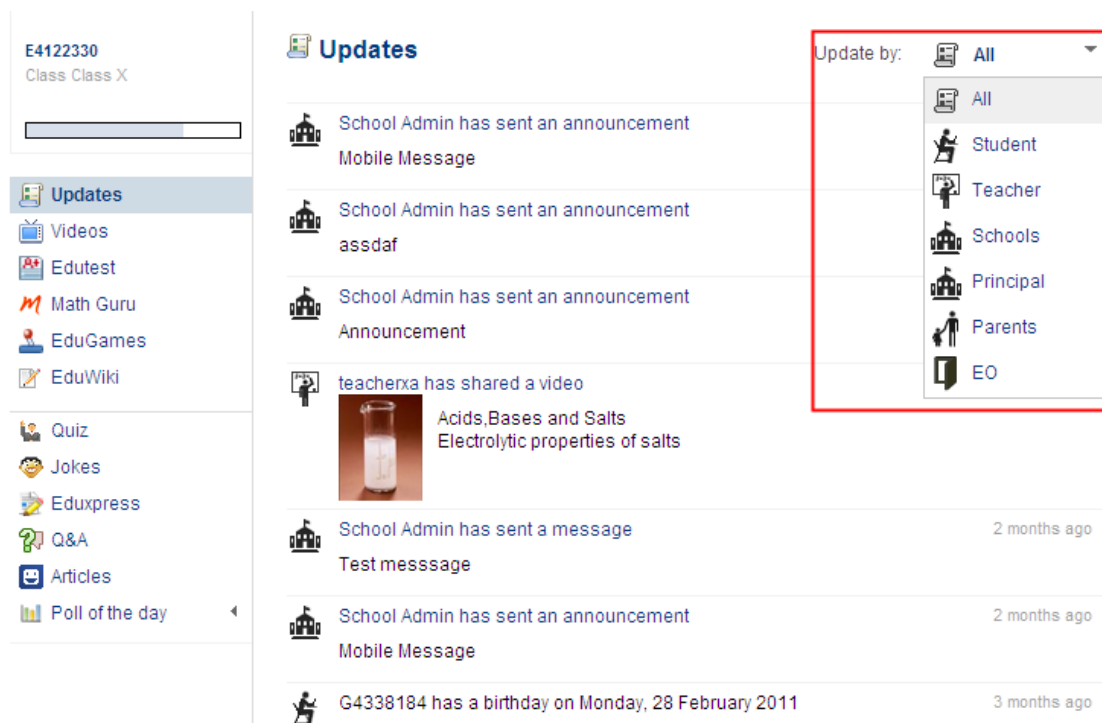

Image 2.1 Updates screen

When you click any notification, the details on that message are displayed on a new screen.

Announcements

EduWiki

EduWiki is a knowledge warehouse populated and maintained by the EducompOnline teachers' fraternity. From this screen, you can search for information on any topic, which yours and other teachers might have added information on. It acts just like a search engine and you need to be smart while keying in the search criteria to get most precise results. You can search better by specifying a teacher's name, subject title, or your school or class name.

EduWiki

Search other teachers and their work:

Quiz

As the name suggests, the **Quiz** section hosts quizzes, posted by Educomp. Just select the option that most closely suits your answer and click **Submit** on each question.

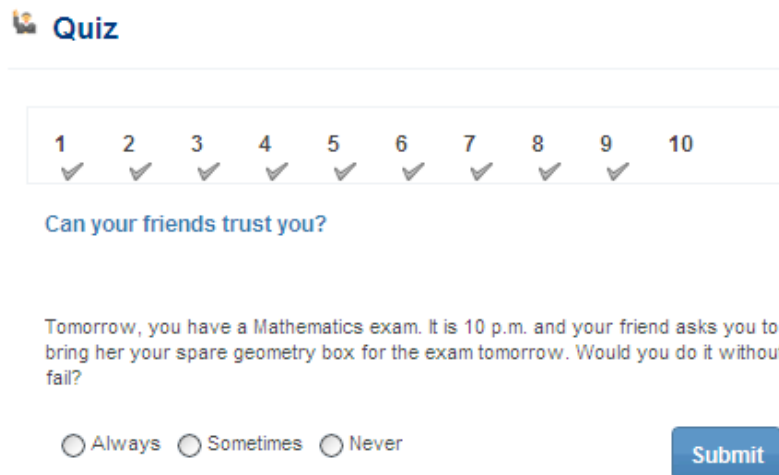

Image 2.13 Quiz screen

When you submit the last answer, an analysis of your personality based on the quiz results is displayed on the screen. Just read it to understand what your answers speak about you.

Quiz

Quiz Score

2	5	0	=	7
Always	Sometimes	Never		Total

Score

2 points for every answer [**Always**]

1 point for every answer [**Sometimes**]

0 points for every answer [**Never**]

Understanding your score

14-20: You are really trustworthy. Your friends' secrets are safe with you. You keep most of your promises. You keep your word. This makes you a very valuable friend anyone would love to have.

8-13: You are trying to be more trustworthy. But some of your friends are becoming a bit suspicious about you. You may lose a few friends if you repeatedly break your promises. It is time you asked yourself how you can handle friendships in a more meaningful way.

0-7: You are not a trustworthy friend. You don't take your commitments seriously enough. If you do, you will find yourself with many more good friends.

Eduxpress

Eduxpress is a place to view and post articles on specific topics created by EducompOnline.

EducompOnline creates a topic for article posting for a specific date range for various user groups, like teachers, students and parents. These user groups can create and submit an article on the topic active on the current date. EducompOnline reviews it and rejects or publishes it. Once published, the article can be viewed by all EducompOnline users. You can view such list of articles in your Eduxpress window. You can share your liking or disliking for an article, and can also report an article as inappropriate using the available controls. Add to favourite link will create a link to the selected article under **My Favorites** area (explained later). Use the available text box to write your article and click **Submit** to send it to Educomp for review and publishing thereon. Maximum length of the article can be 1000 words.

Q&A

The **Q&A** section hosts many generally discussed topics in question and answer form. There are again many questions that have been archived for your reference.

 **Q&A(5)**

Q&A 1-5 of 5

Q. I get tired speaking loudly in class every day. I know it is part of my job, but is there a way to make it easier? ▾

There are different techniques to ensure silence while teaching. Walking from side to side, maintaining eye contact and varying voice intonation are all useful. Ideally, teachers should not have to raise our voices at all to be heard. If the class is very big, a simple microphone is all that's needed to fix the problem. Everyday teaching can take a toll on the vocal chords and a mike will protect the throat in the long run. It will also help to save energy. An elaborate public address system is not needed. Simple and affordable options are available, which can even be set up with permission without involving the school.

Q. Many students in my class make silly grammatical mistakes. I teach Social Science, and not English. What can I do about it? ▾

If the grammar mistakes are often of the same kind, mentioning it to the English teacher who might teach it in detail could work. But it could be taken as criticism so a lot of tact is called for. Alternately, some word games to teach grammar can be used during a free period. Writing a grammar tip at the bottom of the board each day is another small thing that can be done without consuming too much time.

Q. I give my class tests now and then, but correcting all the papers is becoming very tedious as there are 80 students in my class. How can I make it easier? ▾

Inspire Your Students

A story a day keeps boredom at bay

Why is it that we remember the words of 'Humpty Dumpty' even in our sleep but cannot recall the Pythagoras theorem even at gunpoint? Could the difference lie in the word 'fun'?

Perhaps. There seem to be several studies showing that the recall factor or the understanding of concepts may be easier if related to in a story form.

Even the more difficult subjects can be made simpler and more fun using storytelling in the classroom. All we need to do as teachers is find a tale in a theory. History and geography can be tackled rather easily – who won't remember dates and places when it comes with a story of valour, war and treachery? The geography and topographical details of a tribe become easy to remember when told with a story of a tribal girl, describing her way of life. Everyone is interested in people and what they do, so weaving stories smoothly in will add life to lessons.

Anecdotes and stories of scientists and inventors can be hilarious. Stories like the 'Eureka' one aren't forgotten easily. Several great inventors and artists have had bad or funny experiences before their talent was recognized. These stories can be really inspirational for geniuses in the making.

When it comes to mathematics, it might be a little more difficult to employ storytelling techniques, but it is possible with a little out-of-the-box thinking. For younger students learning counting, for instance, how about creating the idea of inviting people to a birthday party and counting invitations or candles on a cake while telling them the story of a girl at her birthday party?

For older students, we can try to help them apply their theorem in real life situations. Take the Pythagoras theorem, for instance. We know 'the sum of the squares of two sides of a right triangle is equal to the square of the hypotenuse.' But what if we talked to the students about a Mohan wanting to buy a TV 16 inches high and 14 inches wide and trying to figure out the diagonal length of its screen because that's what he needs to mention in his bill? Throws up a whole new perspective to the theorem, doesn't it? Stories don't always have to be long and winding. The length depends on the subject, and the moment. But the best time to tell a story is right at the beginning of the class. Jump right into the story, into Mohan's problem. The students will want to solve it. And that's the time you jump right into the theory. Opening a lesson with a story also helps relax the students.

 - Graph view – Report shows only graph.
 - Mixed view – Report shows the graph at the top followed by data at the bottom.

Marks

Introducing the Marks Feature

The Marks feature is meant for sharing and viewing students' marks' data online.

How does the Marks Feature work?

The Marks feature enables teachers to give away the exam scores to their students online. For doing this, you as the school administrator have to activate this feature for the teachers. You need to activate the class sections, which can use this feature, and all teachers for all subjects of that class section can use this EducompOnline application to provide marks for their subjects against each student entry.

Chapter 13. Calendar

The **Calendar** section lets you view calendar in weekly, monthly, and agenda views. The **View Calendar** link displays calendar events created by principal or school administrator. Use the date dropdown to shuffle across to the calendar for the chosen date.

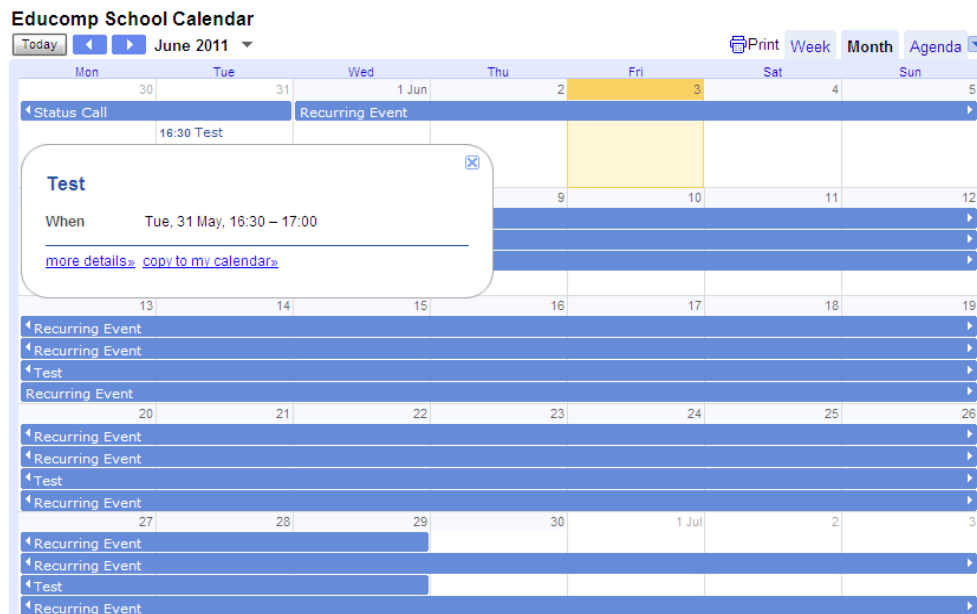

Image 13.1 View Calendar screen

For every task entry, there are links that enable you to view more details and copy the calendar entry to your personal Google calendar (need Google ID for that).

Chapter 14. My Favourite

The **My Favorite** section gives you quick access to the videos, revision notes, attempted tests, and articles. This area preserves links to the tests you appeared for, the revision notes you made while watching videos, and the Edupress articles and videos you added to your favourites.
