

Quick Start Guide

Congratulations and thank you for purchasing the notebook computer.
This guide provides step-by-step instructions for a quick setup of your computer.

1 Install the battery pack

Install the battery pack if it has not been installed in your computer.

- ▶ Carefully place the computer upside down.
- ▶ Make sure that the battery security lock is in the unlock (🔓) position.
- ▶ Fit the battery pack into its compartment and slide the security lock to the lock (🔒) position.

2 Connect AC power

The first time you use your computer, use the AC adapter. This will allow the battery pack to fully charge.

- ▶ Plug the DC cord of the AC adapter to the power connector on the computer.
- ▶ Plug the female end of the AC power cord to the AC adapter and the male end to an electrical outlet.

The Battery Charge Indicator (🔋) on the computer glows amber to indicate that charging is in progress and lights green when the battery is fully charged.

3 Power up

- ▶ Open the top cover by pulling on the cover latch and lifting up the cover.

- ▶ Press the power button to power up and the AC Power indicator (🔌) lights green. The operating system such as Windows should start.

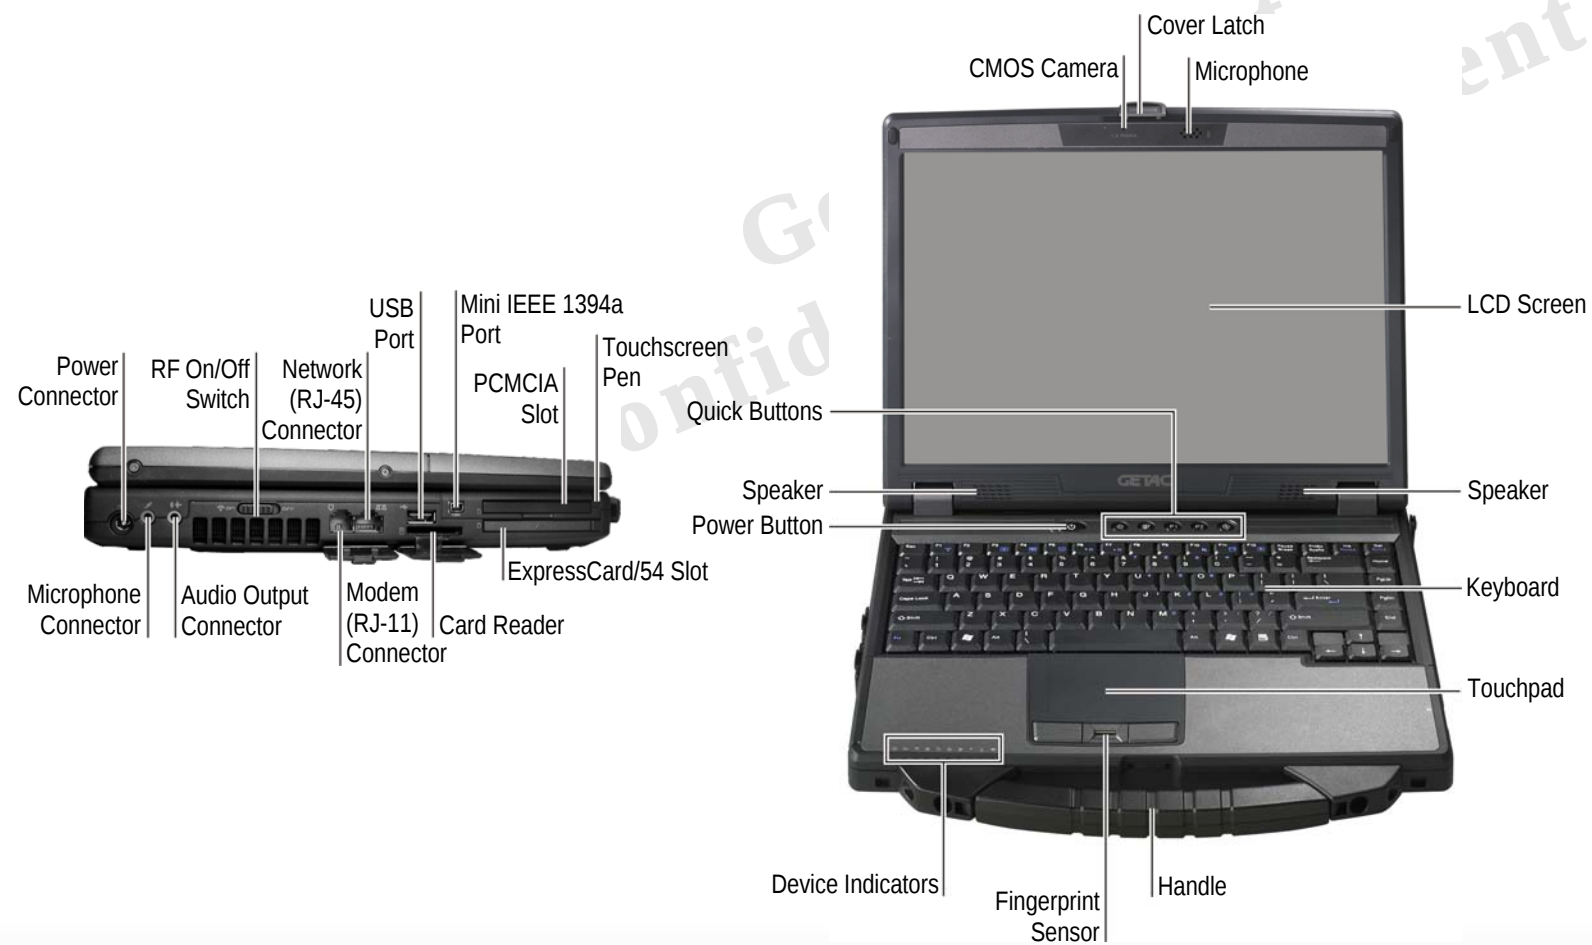

4 Find more information

For complete information, please refer to the User's Manual (in PDF format) supplied on the computer.

- ▶ Double-click on the **User's Manual** icon located on your desktop to view the User's Manual.

* Depending on your model, the optical drive can be a Combo drive, DVD Dual drive, or Super Multi drive.
