X505- Psych
User Manual

INTRODUCTION

Thank you for purchasing Micromax mobile phone. To obtain the best performance of your phone, please read this user manual carefully.

User manual

Table of Contents

User manual

1.1 Safety Precautions

⚠ Please read through the following briefings carefully, and act in accordance with these rules, so as to prevent causing any danger or violating any law.

Safe driving
1) Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.
2) Please put the phone safely in the phone stand. Do not put it onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.

Turn off during a flight: Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight.

Turn off the phone when within an area where blasting takes place: Be sure to strictly observe the related laws and statutes by turning off the phone when you are within, or in the vicinity of, an area where blasting takes place.

Turn off the phone when any dangerous goods are in vicinity: Please turn off your phone when you are close to a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

In hospital: Please obey the related rules or bylaws of the hospital when using your phone in a hospital. Be sure to turn off your phone when near any medical equipment. Your use of any wireless transmission equipment, inclusive of the phone, will interfere with any medical equipment that is not protected fully, and other electronic equipment items, too. Should you have any question in this regard, please consult a related physician or medical equipment supplier.

Interference: Each and every phone's performance may be affected due to radio interference.

Professional service: The phone must be installed or repaired by no other personnel than professionals. You are likely to suffer a huge risk when you install or repair this phone by yourself, which also goes against the warranty rules.

Fittings and battery: You shall use the fittings and battery acknowledged by the phone manufacturer only. Using unauthorized accessories may tamper the warranty of the device.

Emergency call: You may enter a telephone number (112, etc.) to ask for emergency help after making sure that the phone has been turned on and is in the service status. Press the Send Key to call out.

Disclaimer: Micromax will not bear any responsibility for any incompliance with the above mentioned guidelines or improper usage of the mobile phone. Micromax keeps the right to make modifications to any of the content here in this user guide without public announcement in advance. The content of this manual may vary from the actual content displayed in the mobile phone. In such case, the latter shall govern.

User manual

2.1 Phone and Accessories

Open the packing box of the phone and check that you have the Phone, Standard Charger, Standard Battery, USB Cable, Earphone, Service Guide, Software CD, 2 additional back panels, Silicon cover and Warranty Card.

2.2   Your Phone

2.3 About your Phone

To view the features in your phone press the 'center key'; for your convenience the pages has been divided into 2 pages. Slide on top of the screen to view the 2 pages.

Your phone allows you to customize the screen according to your preference. On the idle screen tap on the arrow on the left side of the phone and choose to display from a list of multiple features on your screen.

2.4 About SIM Card and the Battery

Please store the cards out of childrens reach.
The card and the contacts are vulnerable to damage due to scratching or bending. Therefore, be careful when using, inserting or removing the cards.
Be sure to switch off the phone before you insert or remove the battery or the card, otherwise, the phone may be damaged.

Inserting SIM card and battery

SIM 2

SIM 1
Inserting Charging the battery
Battery

Insert the plug of the charger into the interface of the phone, and insert the charger into the power socket carefully. The battery icon will blink.

Tips:
Please charge the battery before you use the newly purchased phone. We suggest you charge the battery for 4 hours continuously for the first time.
Charging when the phone is in the ON mode will not influence the normal dialing and answering, but this needs to consume power, thus the time of charging will increase.
We suggest you recharge the battery when the power is used up so as to prolong the life of the battery.

Inserting the Memory Card

Memory Card
2.5 To switch ON and OFF

To switch ON: Long press **End key** when the phone is in the OFF mode.
If the phone lock has been activated, you need to enter the 4-digit password to unlock. (The preset unlock code is 0000.)
If the SIM card has been inserted in the phone, and the related PIN code protection is activated, you need to enter the 4-8 digit password to unlock.

Warning: If you enter three wrong PIN codes in a row, the SIM card will be locked and you need to enter the PUK code to unlock. Both the PIN code and PUK code are provided by the network operator.
To switch OFF: In the standby mode, long press **End key**.

2.6 USB Cable Functions

On connecting the USB cable you can view the:
Webcam: Allows you to use your phone as a webcam
Mass storage
COM port

3 *Phonebook*

You can store names and phone numbers in the memory of the phone or SIM card.

Menu > Phonebook

3.1 To Add a Contact

In idle, enter phone numbers.
Options > Save > Select the location for saving
Or: **Menu > Phonebook > Add new contact >** Select the location for saving
You can edit the name, mobile phone number, home phone number, company name, e-mail address, office phone number, fax number, birthday, photo caller ID, ringtone and group of each contact.

3.2 To Search by Name

Menu > Phonebook > Search name > Enter characters

3.3 To Search by Number

Menu > Phonebook > Search number> Enter characters

3.4 To Dial a number from the Phonebook

Or **Menu > Phonebook > Search contact >** Input characters
Options > Search
The desired contact will be highlighted. Press **Send key** to make a call.
Tip: If the entry contains more than one numbers, the number selection screen will be displayed. You can select one and press **Send key** to dial.

3.5 Send a Message to a contact

Menu>Phonebook> Tap on the desired contact>Send message
Allows you to send a message to the contact

3.6 To Delete a Contact

Menu > Phonebook > Tap on the desired contact >Delete contact

Allows you to delete the contact.

3.7 To Copy a contact

Menu>Phonebook> Tap on the desired contact >Copy

You can copy all entries stored in the SIM card to the phone memory and vice-versa

3.8 To Move a contact

Menu>Phonebook> Tap on the desired contact >Move

Allows you to move a contact from the SIM to the phone memory and vice-versa.

3.9 To Send a contact

Menu>Phonebook> Tap on the desired contact >Send a contact

Allows you to send the contact via text message, mms, email and Bluetooth.

3.10 Add to Blacklist

Menu>Phonebook> Tap on the desired contact >Add to blacklist

Allows you the contact number in Blacklist.

3.11 Caller groups

Menu > Phonebook > Tap on the desired contact >Caller groups
Allows you to add a contact in caller groups under- friends, family, VIP, business, others.

3.12 Phonebook Settings

Extra numbers: View SIM 1-2 owner number/service dialing number/SOS number
Phonebook backup: This feature allows you to Import and Export contacts from your phone to the memory card and vice-vera.
Memory status: View used SIM/Phone memory
Copy contacts: Copy contacts from SIM to phone and vice-versa
Move contacts: Contacts from SIM to phone and vice-versa
Delete all contacts: Delete all the contacts from the phonebook.

User manual

4.1   To Dial from the Phonebook

Enter the **Phonebook**, select an entry from the entry list and press **Send key** to dial.
Tip: If the entry contains more than one numbers, the number selection screen will be displayed. You can select one and press **Send key** to dial.

4.2   To activate 'Mute' during a call

During a call, you can prevent the other party from hearing you:
While on call> Press the Righ Soft Key (RSK)

4.3   DTMF (Dual Tone MultiFrequency) tone

During a call, you can select to turn ON or turn OFF the DTMF tone. When the DTMF tone is turned off, the digits entered will not be regarded as a DTMF signal response.

4.4   Call divert

Menu > Settings > Call settings > SIM1-2 call settings>Call divert
With the Call Divert function (needs network support), you may divert incoming calls to another mobile phone or a direct line telephone, but not to any extensions of a fixed telephone.

4.5   Call waiting

Menu > Settings > Call settings > SIM1-2 call settings>Call Waiting

This function allows you to put the current call on hold and then answer a second one.
If, during a call, a new call comes in, you will hear a special alert sound and the screen will display the number of the new incoming call, which indicates that a third-party call is coming in and waiting for to answer.

4.6   Call Barring

Menu > Settings > Call settings > SIM1-2 call settings>Call Barring
The function is a GSM network service and can restrict outgoing and incoming calls selectively. If you need to change the settings of Restrict Calls, please contact your network operator to obtain the password for opening this service.

4.7   Conference Call

The phone supports Three-party Calling. A Three-party Calling, also called a multiparty call or a conference call, is a service based on call waiting. It is applicable to dual standby with GSM network.

5   Call Logs

5.1   Missed calls/dialed calls/received calls

At the bottom of the phone view the Dialled calls, Received calls, Missed calls, Menu section.
Menu>Call Logs>SIM1-2 call history
View: View the desired entry
Call: Call the desired entry
Send message: to save the number to the Phonebook
Add to blacklist: add a number you wish to avoid/ignore under blacklist
Edit before call: Edit the number before making a call.
Delete: to delete the entry.

5.2   Delete call logs

Call Logs>Menu>SIM1-2 call history>Delete SIM1-2 call logs
You may select to delete **Missed**, **Dialed, Received** or **All** calls.

5.3   SIM1-2 call timers

Call Logs>Menu>SIM1-2 call history>SIM 1-2 call timers
View SIM 1-2 call timers

5.4   SIM1-2 call cost

Call Logs>Menu>SIM1-2 call history>SIM 1-2 call cost
View SIM 1-2 call cost.

6   Messages

6.1   Write SMS

Menu > Messages > Write SMS/MMS
Write the content of the SMS
Send to: Add contact number

SMS Settings
Menu>Messages>Message settings>SMS settings
•Profile settings
•Voicemail server
•Common settings- Set to receive Delivery reports, Reply path, Save Sent message.
•Memory status
•Prefereed storage
•SIM1-2 text message counter

MMS Settings
Menu>Messages>Message settings>MMS settings
•Profiles- Select a profile from the available network profiles.
•Common setting

6.10 EMAIL

E-Mail
Before use, you need to set the e-mail in the "E-mail accounts" menu. Via this menu, you can

receive and send e-mail.
- Send and Receive: You can send/receive the e-mail from the specified mailbox.
- Write Email: You can edit e-mails.
- Inbox: You can see the received e-mails.
- Outbox: You can see the sent e-mails.
- Sent: You can view send e-mails.
- Drafts: You can see the drafts in the specified mailbox.
- Clear mailbox: You can clear the e-mails in the specified mailbox, including inbox, outbox, sent e-mail backup and drafts, or clear all e-mails.
- Delete marked emails: You can change the status of all e-mails to deleting status.
- Email accounts: You can set up you new account.
- Templates: you can pre-edit some common phrases, which is convenient for quick editing.
  - o Incoming Server: You can set the server parameters for the received e-mails, including Incoming server, Incoming port, user name and password etc.
  - o Signature: You can set it On or Off and edit the signature.

The first step in using email on your mobile phone is to define your email account's settings so that your mobile phone knows which server to contact and to login using the correct credentials.

TO CONFIGURE A NEW EMAIL ACCOUNT:

Go to:

- Email >Email accounts> Options >New Account> Start to create account >Email address >Options >Next > Select email protocol ('POP3' or 'IMAP- as per the account settings).

- Next >Select Data account (as per the SIM connection) > Incoming Server (edit email incoming server as per the account standard settings).

- Next > Outgoing Server (edit email outgoing server as per the account standard settings) >User Name > Password > Account Name > Options > Done (email account is created)

- Go to- Created email account >Options > Edit (user can edit email account settings if required)
- Advance Settings > Outgoing Sever > Outgoing Port (Input correct outgoing port according to the email configuration).

- Advance Settings > Incoming Server > Incoming Port (Input correct incoming port according to the email configuration)

- Go to- Configured email account > Options > Activate
  You email account is now created!

6.11 Broadcast Message

Menu > Messages > Broadcast Message

The phone supports Broadcast Message. It is supported by GSM network. Broadcast messages are single-way messages sent to the users of the network operators by the message service center. For the contents and channel setup of broadcast messages, consult your network operator.

User manual

Advance: Show URL info, Bookmark, Save item.
Exit: To exit the browser.

13.2 WAP Setup

WAP settings are required for surfing the web with WAP. Follow the steps below to set up a WAP account:

- Connectivity > Data Account > GPRS > Add account > Add account name/ APN/ Username & password > Save.

Then go to:
- Menu >Connectivity > WAP >Settings > Profiles > Add new > Account Name/ Homepage/ Data Account (select the previously created data account) > Select connection type (HTTP/WAP- Indise HTTP & WAP ener the correct proxy address & port > Done > Save the account >Go to the created account & activate.

Menu > Connectivity> WAP> Settings>Profile
You can set the following:
Account: To select from the GPRS connection list.
Connection type: To set WAP or HTTP connection mode.
Home page: To set the address of the homepage. The phone has a default and you can modify it.

13.3 Java

Menu > Applications>Java
You can install Java applications to enhance the multimedia function. It also allows you to connect to Facebook, Nimbuzz , Operamini and Snaptu as well.
Run JAVA
Menu > JAVA > Run JAVA

14 *Phone Sync*

Menu>Phone sync

The phone sync function helps you to transfer contacts from your phonebook to another mobile device via bluetooth

15 *STK*

15.1 STK Services

If your SIM card supports STK, you may use the corresponding value-added services.
Menu > Connectivity

16 *Inputting Text*

You can enter text in English langauge.

17 *Maintenance*

Use a dry soft cloth to wipe general dirt.
Do not use a hard cloth, benzene or thinner to wipe the phone, otherwise, the surface of the phone will be scratched or could even result in the fading of colour.

18 *Taking Care of your Device*

•Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone:

•Always keep the small parts of the phone away from children.

•Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.

•Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

•Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.

•Do not attempt to open the device other than as instructed in this guide.

•Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

•Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.

•Do not paint the device. Paint can clog the moving parts and prevent proper operation.

•Use chargers indoors
