

OAMS 1.2.05 Release Bulletin

Release Date: June 4, 2014

This release bulletin provides information on the fixes and improvements to OAMS slated for release.

Note

- If you would like to view a history of previous changes and release bulletins, kindly refer to: <https://confluence.id.ubc.ca:8443/display/OAMSH/OAMS+Release+Bulletins>
- In order to ensure you are accessing all the latest updates to OAMS please clear your cache and browsing history in your internet browser (Instructions for how to do this in Chrome and Mozilla are attached).

What's changed?

Bug ID	Category	Description
PROD-1558	Bug fix	Corrects an issue where email PoCs were being created without any student attached if the student did not exist in OAMS.
PROD-1475	Bug fix	Corrects an issue where clicking "Cancel" upon editing a watchlist would bring you to an empty student record, rather than back to the original watchlist entry.
PROD-1479	Bug fix	Users with Template Editor permissions may now attach and save files to email templates.
PROD-1497	Bug fix	Corrects an issue where PoCs that were deleted would still appear in users' dashlets along with blank student names. Deleted PoC records will now no longer display at all.
PROD-1480	Bug fix	Corrects an issue where watchlist notifications for Email events weren't displaying the OAMS user who had created the Email PoC.
PROD-1482	Bug fix	Corrects an issue where dashlets displayed a blank name under the "Created By" column when filtering by Email PoCs.

Known Issues

The following list identifies items that the OAMS team has identified but has not yet resolved. The team appreciates your patience as we continue assessing defects and targeting fixes for future releases.

Bug ID	Category	Description
PROD-1490	Bug fix	Inability to delete attachment(s) from drafted email
PROD-1506	Bug fix	Advanced search does not work after using basic search
PROD-1499	Bug fix	Regular users cannot edit the "Title" and "Department" fields in the user profile
PROD-1493	Bug fix	Extra space in linkable 'Student' column on Watchlist page
PROD-1478	Bug fix	Inconsistency in the bcc-ed emails from SISC to multiple recipients
PROD-1501	Bug fix	Cannot change sort order of "Date Sent" column in Emails
PROD-1494	Bug fix	Wrong unit emails displayed after changing unit in Emails browser
PROD-1505	Bug fix	Watchlist Notification dashlet has a blank column heading which lists the notification message details
PROD-1495	Bug fix	Email address is not validated in Advanced Search
PROD-1503	Bug fix	The edited PoC Status does not appear on the PoC Details screen
PROD-1489	Bug fix	Second Column in Dashlets cannot be found if you delete all your dashlets from the column
PROD-1498	Bug fix	Additional tool bar appears in the PoC Details page
PROD-1484	Bug fix	A blank field is available in the "My Watchlist" dashlet configuration window
PROD-1500	Bug fix	Document names are inconsistent in display panels
PROD-1481	Bug fix	Ordering by the 'Requested Advisor' column on the POC search page does not work
PROD-1515	Bug fix	OAMS scheduled reports failing for 4 advising units
PROD-1488	Bug fix	The change log entries for the Watchlist are not being created

How to send bug/change requests

Please visit <http://support.as.it.ubc.ca/SupportRequest> and complete the ticketing form. SIS Support will review defect reports and change requests, prioritizing and assigning them for resolution, as appropriate.

The most current version of the OAMS online user manual with all the up to date changes is now available at; <https://confluence.id.ubc.ca:8443/display/OAMSH/Online+Advising+Management+System+%28OAMS%29+User+Manual>
