Setting up the phone

1. Check contents of the package for completeness.
2. Connect the long end of the handset cord to the connector on the back of the base unit. Connect the short end of the handset cord to the handset. Place the cord in the cable guide on the right side of the phone's back .

3. Attach the footstand with the bracket and the two screws. Choose between horizontal (55° inclination) or vertical (33° inclination) placement.

4. Plug the other cables into the jacks labelled as follows:

NOTE: Wrong power supplies may cause damage to the phone. Use only the power supply included in the package.

- (a) Ethernet/POE cable to "NET" to connect to your internal network
- (b) Power supply (if PoE is not used) to "5V DC"
- (c) PC to "PC" via second ethernet cable (not included)
- (d) Headset to the headset connector via headset cable (not included)

5. Place the phone on an even, horizontal surface.

The phone is installed and will start the initialization. The initialization process depends on your network environment and configuration. For further information contact your administrator or download the user manual from our web page www.snom.com.
