

Technical overview

JURA Standards

Variable brewing unit, from 5 g to 16 g	■
Intelligent Pre-Brew Aroma System (I.P.B.A.S.®)	■
Powder recognition for second ground coffee type	■
Hot water function	■
Cappuccino frother	■
Height-adjustable coffee spout	■
Energy Save Mode (E.S.M.®)	■
Multi-level Aroma* grinder	■
CLEARV.L filter cartridge	■
High-performance pump, 15 bar	■
Thermoblock heating system	■
Integrated rinsing, cleaning and descaling program	■
Adjustable water hardness	■
Zero-Energy Switch	■
Swiss made	■

Specific benefits

Cappuccino at the touch of a button (with rotary function)	■
Powder recognition for additional ground coffee variety	■
Intelligent preheating	■
Integrated storage compartment	■

Settings and programming options

Programmable amount of water	■
Amount of water can be adjusted for each preparation	■
Programmable coffee strength	4 levels
Coffee strength can be adjusted for each preparation	■
Programmable brewing temperature	2 levels
Hot water temperature can be programmed	3 levels
Plain text display	■
Rotary Switch	■
Programmable switch-off time	■
Integrated cappuccino rinsing and cleaning program	■
Maintenance status display	■

Design and materials

Height-adjustable coffee spout	2.6 - 4.4 in.
Height-adjustable cappuccino spout	2.6 - 4.4 in.
Height-adjustable hot water spout	2.6 - 4.4 in.
White cup illumination	■
Amber cup illumination	■
Connector System®	■
Sound design	■

Accessories

Stainless steel vacuum milk container	optional
Cup warmer	optional
Cool Control	optional

In figures

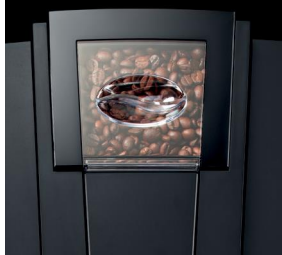

Water tank capacity	64 oz.
Coffee grounds container (servings)	approx. 16
Bean container with aroma preservation cover	10.9 oz.
Cable length	approx. 47 in.
Voltage	120 V~ AC
Power	1450 W
Energy consumption	13 Wh
Energy consumption with E.S.M.®	approx. 6 Wh
Stand-by power	0 W
Weight	21.2 lb
Dimensions (W x H x D)	11.2 x 14 x 17.5 in.
Checks	UL
Article Number	13709 Piano Black

IMPRESSA F7

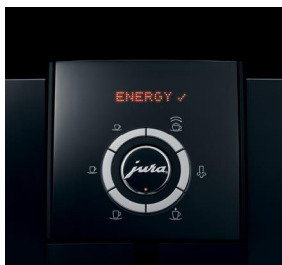

New Aroma⁺ grinder for a wide range of beverages from ristretto, espresso and coffee to cappuccino

Simple operating concept with centrally positioned preparation buttons

Energy-efficient and ready for use in the blink of an eye

Height-adjustable coffee and milk spout (2.6-4.4 in.) with integrated cup illumination

IMPRESSA F7

Fast and versatile

With its clean design, expressive lines and distinct structures, the IMPRESSA F7 has a personality all of its own while still remaining discreet. This design embodies the strength, sophistication and capabilities of the machine, which is a high-quality Swiss product. The IMPRESSA F7 is built around a self-explanatory operating concept. This means that coffee lovers can get the exact speciality they want directly, using an intuitive system. Naturally, you can ask the machine to prepare just one cup or two cups at once.

Wide range of beverages

This machine harnesses the power of state-of-the-art technology to create the perfect cup of coffee, and that is what makes the finest IMPRESSA F line model to date such a smart choice for anyone who loves drinking espresso, coffee or ristretto – and anyone who is partial to a cappuccino of the highest quality. Under optimum brewing conditions, the patented variable brewing unit can achieve the perfect aroma using anywhere between 5 and 16 grams of coffee, meaning that drinks can be perfectly tailored to people's personal taste for maximum enjoyment.

Aroma⁺ grinder now twice as fast

By perfecting the cutting angle inside the grinding cone, the JURA engineers have managed to increase efficiency significantly. As a result, the perfect aroma can now be achieved in all its natural fullness in half the grinding time. So now coffee lovers can enjoy pure and perfect coffee indulgence with less preparation time and less noise. The powder chute for ground coffee can be used for additional coffee varieties such as a decaffeinated blend.

Energy-efficient and ready for use in the blink of an eye

What discerning coffee lovers particularly love about this machine is the way it combines technical perfection with speed. When it comes to coffee preparation, this high-quality automatic machine can go from 0 to 60 in next to no time. And it's all thanks to the modern thermoblock, which offers a high level of energy efficiency. The IMPRESSA F7 is not just setting new standards in terms of speed. Thanks to its excellent approach to energy management, it is also brilliant at saving power.

Height-adjustable coffee and milk spout

This offers a hot water function for tea and a steam portion function so that milk can be heated automatically for hot chocolate topped with foamed milk. These performance features are just as much a part of the high-quality automatic machine as the innovative cappuccino system. So you can prepare trend specialities without even having to move the cup. Simply turn the switch and delicate milk foam that is as light as air and of the finest quality and consistency will flow into your cup before coffee is added to create your classic cappuccino. Both the coffee and milk spout are height-adjustable on a continuous scale, so you can treat yourself to a great-tasting cup of coffee using any standard cup.
