Safety Precaution

- Rechargeable Battery Only. Only insert rechargeable batteries of the same type, never use ordinary, non-chargeable batteries.
- Only use the charger plug supplied. Do not use other chargers, as this may damage the battery cells.
- > Do not touch the charger and plug contacts with sharp or metal objects
- > The operation of some medical devices may be affected.
- Do not place the base unit in a damp room or at less than 1.5 meters away from a water source. Keep water away from the handset.
- > Do not use the telephone in an environment where there is a risk of explosions.
- > Dispose of batteries and maintain the telephone in an environment friendly manner.
- Clearing: Clean the telephone with slightly damp cloth or with an antistatic cloth. Never use clearing agent or abrasive solvents.

Chapter 1 Overview

DU-100 is a DECT (Digital Enhance Cordless Telephone) base station that integrates DECT and VoIP communication. User can dial or receive VoIP call without staying in front of PC or laptop.

DU-100 is compatible with all standard DECT handsets. User who has DECT system doesn't need to change original environment, it can accept 6 handsets to register. With selecting different base stations, caller is able to make or receive call through PSTN line (User's original DECT base station) or VoIP network (DU-100).

Except Skype[™], DU-100 can also work with Welltech FreeTalk. User can select to use different VoIP communication software via installing different software.

Suit For

- > Cordless Telephone (DECT) Users
- > SOHO
- Home
- Office

Optional VoIP communication

- Skype[™]: The DU-100 can work with Skype[™] v1.1.1.79 above for free Internet call from Skype Skype[™] -to-Skype[™] and with SkypeOut for calling regular and mobile telephones worldwide at much affordable rates.
- FreeTalk FreeTalk: Except Skype[™], user has another option, the DU-100 can also

work with Welltech FreeTalk for free on-net call from FreeTalk to FreeTalk or calling regular PSTN and mobile phones worldwide at much affordable rates.

Operation Modes

- Free VoIP mode: Making free on-net call through Skype[™] or Welltech FreeTalk
- ➢ Bargain VoIP mode: Making PSTN off-net call through Skype[™] or Welltech FreeTalk via much affordable rates.
- > Regular PSTN mode: Making Call through PSTN line at the original PSTN rates

DU-100 Specifications and Features

- Physical Specification:
 - Dimension: 100mm(W) x 100mm(D) x 33mm(H)
 - 3 LED indicator:
 - Power: When DU-100 connects with PC USB port successfully, indicator will light on.

- Status: When DU-100 software starts up on computer, indicator will light on.
- ♦ Line:
 - a. Flash: After user execute Enable Access function of program; LED indicator will keep flashing for 30 seconds, in this period of time, DU-100 can accept handset registration.
 - b. Light on/off: When DECT phone set is off-hook/on-hook indicator will light on/off.
- > DectForSKYPE (DU-100 Program for Skype) Features:
 - Support speed dial for SkypeTM contact list
- > DECT SipPhone (DU-100 Program for Freetalk) Features:
 - Microsoft Windows 98se/ME/2000/XP Operation System
 - Support RFC 3261
 - Support voice codec G.723 / G.711a / G.711u / G.729
 - DTMF generation and support RFC 2833
 - Authentication by Proxy Server
 - Support Keypad input (number or Enter, Dial, End, Hang up)。
 - User's Account and Password modification and real time registration again
 - Display caller ID
 - Support phone book
 - The last number re-dial
 - CDR enquiry
 - Can be used in the Privacy network environment
 - Easy installation
 - Friendly user interface
 - Supports many ways to connect to Internet : dial up、 ISDN、 lease line、 cable modem、 xDSL or LAN
 - Must work together with DU-100
 - User can speak over phone and listen music in the same time
 - Support EnableAccess / Deregister PP on the DU-100 base

DECT/DCT Specification

- DECT: ETS 301 444 (GAP) Compliance-1880 to 1898 MHz
- > DCT (2G4): 2400 to 2483 MHz
- Registration Capacity: 4 DECT Base Stations
- Expected Range: Indoor up to 50 metros / outdoor up to 300 meters
- Antenna type: PIFA

USB Specification

- USB specification version 1.1 compatible
- USB audio class specification 1.0 compatible
- Integrated USB transceiver
- Supports 12 Mb/s data rate (full speed)
- Supports suspend/resume
- Support USB HID class.
- B type connector

Minimum system requirements

- Windows XP, 2000, Me, 98se
- > 400 MHz processor
- > 128 MB RAM
- > 15 MB free disk space on hard drive
- CD-ROM drive
- Internet connection (broadband type: cable, DSL, etc.)
- Public Switched Telephone Network (PSTN) subscription

Recommended system requirements

- Windows XP, 2000 or 2003 server
- > 1 GHz processor
- 256 MB RAM
- > 30 MB free disk space on hard drive
- CD-ROM drive
- Internet connection (broadband type: cable, DSL, etc.)
- Public Switched Telephone Network (PSTN) subscription

Environmental

- Operating temperature: 0 to 60 °C
- Non-operating storage: -20 to +65°C
- > Operating humidity: 10% to 90% Non-condensing
- Non-operating humidity: 5% to 95% Non-condensing

Certification

CE Class B, FCC Class B

Chapter 2 Installation

2.1 Physical Installation

Please connect DU-100 and computer available USB port with attached USB cable.

DU-100 Application architecture

2.2 Software Installation

User can select to use Skype[™] or Welltech Freetalk.

- 1. Skype[™]: User has to install Skype[™] software v1.1.1.79 above and DU-100 program "DectForSKYPE".
- 2. Freetalk: User has to install program "DECT SipPhone".

Note:

User can only use one communication program at one time, please select Skype or Freetalk before start to use DU-100.

2.2.1 DECTforSKYPE program

2.2.1.1 Installing DECTforSKYPE program

User who wants to use Skype with DU-100 has to install DECTforSKYPE program. To install the DECTforSKYPE program, please follow steps 1~7 as below.

Note: User has to install Skype program ver. 1.1.1.73 above.

Step 1.Unzip the DECTForSKYPE.zip file to a folder. For example C:\DECTForSKYPE

Step 2. Open the [c:\ DECTForSKYPE] folder to begin installation

Step 3. Double-click [Setup.exe] to begin installation.

Step 4. The Welcome Screen will appear, click [Next] to continue.

Step 5. *Choose Destination Location*: select the directory that user want to install, and click [next] to continue.

Chapter 3 Getting Start with Skype

3.1 Launch DECTForSKYPE Program

Double-click **[DECTForSKYPE]** icon on the desktop. The *DECTForSKYPE* program will minimize to the system tray (task bar), and show it's version and DU-100 serial number information by a tool tip.

3.2 First use DECTForSKYPE Program

Skype API will display message as below when it is the first time user uses DECTForSKYPE program. Please click **[OK]** to confirm it.

3.3 Configurations of DECTForSKYPE Program

3.3.1 Enable Access

When first use DECTForSKYPE, user has to register handset (DU-200 extension or other standard DECT handset) to DU-100. Please follow steps as below.

- 1. Right click on the *DECTForSKYPE* icon at the system tray, select the **[Enable Access]** on the menu, and left click.
- 2. DU-100 will enter registration mode and Line LED of DU-100 start flashing.
- 3. Enter handset menu and select register mode and input PIN code of DU-100, the default PIN code is "1234".

For DU-200 Extension, please enter **Menu** \rightarrow **System** \rightarrow **Subscription** \rightarrow **PARK**?: Enter 0000(Default PIN code of DU-200 Extension) \rightarrow Press **Next** display **BS_PIN**?: Enter 1234 (Default PIN code of DU-100) \rightarrow Press **OK** \rightarrow If registration succeeded will display **Name:** Enter any prefer Name for DU-200 Extension \rightarrow Press **OK** will display **Int. No. :** Just press **OK** \rightarrow Press **OK** to finish \rightarrow Now user can press **Esc** several times to return to main screen, on main screen will display the name user input previously.

4. If register successfully, the Line LED will light off.

3.3.2 Modify PIN Code

User can modify or query PIN code on [Modify PIN Code].

- 1. Right click on the *DECTForSKYPE* icon at the system tray, select the **[Modify PIN Code]** on the menu, and left click.
- 2. The screen of Modify PIN Code will pop up. User has to enter current PIN code and enter new PIN code here.

Document Ver.: 1.1

DECT for SKYPE User Manual Guide

Modifing PIN Code	
Current PIN Code	1234
New PIN Code	
Apply	Cancel

3.3.3 Delete PP (Portable Part)

User can delete registered handset on [Delete PP].

- 1. Right click on the *DECTForSKYPE* icon at the system tray, select the [Delete PP] on the menu, and left click.
- 2. Select PP that user want to deregister, left click mouse.

Note:

The online handset, which has registered to DU-100, will be shown as black characters. However, when handset register to another base station, it will remain on this PP list. User has to Delete PP manually.

3.3.4 Exit

Right click on the *DECTForSKYPE* icon at the system tray, select the **[Exit]** on the menu, and left click.

3.4 Make a Call

Most Handsets support two ways to make outgoing call:

- 1. Input the digit numbers then press **Dial out key** to send numbers.
- 2. Press Dial out key then input the digit numbers.

3.4.1 SkypeOUT

Press 00 + Country code + Area code (without 0) + Phone numbers.

For example, if user wants to call Taiwan (886) Taipei (02) 82265699, then user has to press **00886282265699** on handset. If user wants to call Taiwan (886) mobile phone 0916123456, then user have to press **00886916123456** on handset.

3.4.2 Call Skype Contacts

Users must set the **Speed-Dial Key** before dialing user contacts. Please follow steps as below.

1. Select SKYPE Contacts page.

2. Right click on the contact user wants to set.

3. Select Assign Speed-Dial then left click.

4. Input Speed-Dial number then click **OK**.

Skype ^{ss} Set Sp	eed Dial Key	×
Enter new speed 01	d dial key for Echo Test Ch	inese (echo-chines
	ОК	<u>Cancel</u>

When user sets Speed-Dial Key successfully, user can press Speed-Dial Key on handset to call contacts.

Note:

- 1. User can also set Speed-Dial Key on SKYPE OUT contacts.
- 2. For different version of Skype, speed dial key may or may not show on contact list as below.

3.4.3 Make internal Call to another DU-200 Extension

- Step1. Press Dial Up Key.
- Step2. Press Int. soft key.
- Step3. On screen will display **Internal:** Enter internal handset number, and then DU-200 extension will dial out to another internal handset immediately.

Note:

The number of internal extension is according to PP index. User can refer to Delete PP function of DECTForSKYPE Program. For example, if Handset A is PP1, the internal number is 1. User can press **Dial Up Key** \rightarrow Press **Int.** soft key \rightarrow Press 1.

3.5 Receive a Call

When there is Skype incoming call, all of the handsets registered on DU-100 will ring. Press **Pick Up Key** on handset to answer the call. Press **Hang Up Key** on handset to end the call. (For some models of DECT handsets, Pick Up key and Hang Up key is the same.)

Note:

- 1. When user is in communication, other incoming calls will be rejected.
- If handset A and handsets B both register to DU-100, when handset A makes or answers a call, handset B can join them but handset B can not hang up this call.

Chapter 4 Getting Start with Freetalk
