# Introduction

## Product Description

---

---

The IB970 PICMG 1.0 full size CPU Card is based on the latest Intel® BD82B75 chipset. The platform supports 3rd Generation Intel® Core i7/i5 in FCLGA1155 LGA1155 packing and features an integrated dual-channel DDR3 memory controller as well as a graphics core (4000).

Display interfaces of the CPU card include VGA CRT and DVI-D, *while 24-bit dual channel LVDS is supported on IB970F and not IB970*. The edge connectors are for VGA CRT, USB 2.0, USB 3.0 and dual Gigabit LAN RJ45 connectors. One SATA III port and five SATA II ports are available. Expansion slot is provided with a Mini PCIe socket on the component side. Two serial ports and a parallel port are supported.

Dimensions of the board are 338mm x 122mm.

### IB970 FEATURES:

- Supports Intel® 3rd Generation Core i7/i5 DT processors
- Two DDR3 DIMM, 1066/1333/1600MHz, Max. 16GB
- Dual Intel® PCI-Express Gigabit LAN
- Integrated Graphics for CRT, DVI-D, LVDS displays
- 5x SATA 2.0, 1x SATA III, 6x USB 2.0, 3x USB 3.0  
2x COM, parallel port
- Mini PCIe socket, iSMART, Watchdog timer, Digital I/O

## **Checklist**

---

---

Your IB970 package should include the items listed below.

- The IB970 Full-Size CPU Card
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility

## IB970 Specifications

<b>Product Name</b>	<b>IB970F [with LVDS support] IB970 [w/o LVDS , w/oTPM] IB970RF [with LVDS support, Q77 on board]</b>
<b>Form Factor</b>	PICMG 1.0 Full size CPU card
<b>CPU Type</b>	- 3 <sup>rd</sup> Generation Intel <sup>®</sup> Core <sup>™</sup> i7/i5 DT processor - FCLGA1155 package [37.5 mm x 37.5mm] - TDP: QC= 77W/65W/45W/35W
<b>CPU Speed</b>	2.3GHz ~ 3.4GHz (TDP=45W~77W)
<b>BIOS</b>	AMI BIOS, support ACPI Function
<b>CPU Socket</b>	LGA1155
<b>Chipset</b>	Intel <sup>®</sup> BD82B75 PCH [IB970F / IB970] Intel <sup>®</sup> BD82Q77_PCH [IB970RF] 27mm x 27mm, FCBGA942 (TDP=6.7W)
<b>Memory</b>	3 <sup>rd</sup> Generation Intel <sup>®</sup> Core <sup>™</sup> i7/i5 DT processor integrated memory controller DDR3-1600 MHz (Non-ECC) - DIMM x 2, Max. 16GB
<b>Display interface</b>	3 <sup>rd</sup> Generation Intel <sup>®</sup> Core <sup>™</sup> i7/i5 DT processor integrated HD graphics 4000 - VGA - DVI-D (via level-shifter ASM1442, pin-header onboard) - LVDS (Chrontel CH7511 via DP, supports 24-bit dual channel)[IB970F only]
<b>LAN</b>	1. Intel <sup>®</sup> 82579V GbE PHY x1 2. Intel <sup>®</sup> 82583V PCI-e Gigabit LAN controller x1
<b>USB</b>	Intel <sup>®</sup> BD82B75/Q77 PCH integrated USB <b>2.0</b> host controller - 4 ports thru onboard pin-header - 1 port @ rear panel I/O - 1 port via MiniPCIe @ component side Intel <sup>®</sup> BD82B75/Q77 PCH integrated USB <b>3.0</b> host controller - 1 port @ rear panel I/O - 2 ports via onboard box header [2*10 pins box header, Blue color]
<b>Serial ATA Ports</b>	Intel <sup>®</sup> BD82B75/Q77 PCH built-in SATA controller 1 x SATAIII + 5 x SATAII (one SATA II shared with mSATA)[IB970F/IB970] 2 x SATAIII + 4 x SATAII (one SATA II shared with mSATA)[IB970RF]
<b>PCI-to-ISA bridge</b>	ITE IT8888G x1 for high drive ISA bus
<b>Audio</b>	Intel <sup>®</sup> BD82B75/Q77 PCH built-in high definition audio w/ Realtek ALC662 Codec

<b>LPC I/O</b>	Fintek <b>F81866AD-I</b> (128-pin LQFP [14mm x 14 mm]) - COM1 (RS232/422/485), jumperless design (SP339) - COM2/COM3/COM4 (RS232), - Hardware monitoring (2 thermal inputs, 4 voltage monitor inputs & <b>2</b> Fan headers, one PWM fan type = 4-pin for CPU FAN; one DC fan type = 3-pin for SYS FAN) - Support Parallel port (share with one fan control)
<b>Digital IO</b>	4 in & 4 out
<b>Keyboard/ Mouse</b>	Supports PS/2 Keyboard/Mouse thru onboard pin-header
<b>Expansion Slots</b>	Mini PCIe socket x1 @ component side [Full-sized, reserved one mounting for half-sized card also], [Support USB client & mSATA]
<b>Edge Connector</b>	DB15 x1 for VGA RJ45 x 2 for LAN 1 & 2 USB 2.0 x 1 USB 3.0 x 1
<b>Onboard Header/ Connector</b>	DF11-20 pins pin-header x1 for DVI-D <b>DF13-20 pins pin-header x 2 for 24-bit dual channel LVDS (IB970F/RF)</b> <b>1x 4 pins box header x 1 for LCD brightness control (IB970F/RF only)</b> <b>2x13 pins box-header x1 for Printer (IB970 only)</b> DF11-20 pins box-header x1 for COM1/2 DF11-20 pins box-header x1 for COM3/4 2x4 pins pin-header x 2 for USB 2.0 #1-4 2x6 pins pin-header x1 for Audio (Line-Out, Line-In & Mic) 2 x 5 pins pin-header x 1 for Digital I/O 2 x 5 pins pin-header x 1 for PS/2 KB/MS 4 pins pin-header x1 for CPU fan (PWM smart fan) 3 pins pin-header x1 for system fan SATA x 6 (Black connectors for SATA2; Blue connectors for SATA 3) 2X10 pins pin-header x 1 for front panel indicators
<b>Watchdog Timer</b>	Yes (256 segments, 0, 1, 2...255 sec/min)
<b>System Voltage</b>	+5V, +3.3V, +12V, -12V & 5VSB
<b>RoHS</b>	Yes
<b>iSMART</b>	<b>Thru MCU</b> Support Auto-scheduler & Power resume feature
<b>Others</b>	- LAN wake up - <b>Reserved extra mounting hole as IB960</b> - <b>TPM 1.2 supported (IB970F/ RF on board)</b>
<b>Board Size</b>	338mm x 122mm

# Board Dimensions

## Installations

This section provides information on how to use the jumpers and connectors on the IB970 in order to set up a workable system. The topics covered are:

Installing the CPU.....	7
Installing the Memory.....	8
Setting the Jumpers.....	9
Connectors on IB970.....	14

---

## Installing the CPU

---

The IB970 board supports an LGA1155 Socket (shown below) for Intel Sandy Bridge processors.

To install the CPU, unlock first the socket by pressing the lever sideways, then lift it up to a 90-degree. Then, position the CPU above the socket such that the CPU corner aligns with the gold triangle matching the socket corner with a small triangle. Carefully insert the CPU into the socket and push down the lever to secure the CPU. Then, install the heat sink and fan.

**NOTE:** *Ensure that the CPU heat sink and the CPU top surface are in total contact to avoid CPU overheating problem that would cause your system to hang or be unstable.*

## Installing the Memory

---

---

The IB970 board supports two DDR3 memory socket for a maximum total memory of 8GB in DDR3 DIMM memory type.

### Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3 module so that the key of the DDR3 module aligned with that on the memory slot.
2. Gently push the DDR3 module in an upright position until the clips of the slot close to hold the DDR3 module in place when the DDR3 module touches the bottom of the slot.
3. To remove the DDR3 module, press the clips with both hands.

## Setting the Jumpers

---

Jumpers are used on IB970 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on IB970 and their respective functions.

Jumper Locations on IB970 .....	10
JP1: COM1 RS232 RI/+5V/+12V Power Setting.....	11

# BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction.....	24
BIOS Setup .....	24
Advanced Settings .....	26
Chipset Settings.....	37
Boot Settings.....	44
CSM parameters .....	45
Security Settings.....	46
Save & Exit Settings.....	47

## BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

## BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the <Del> key immediately allows you to enter the Setup utility. If you are a little bit late pressing the <Del> key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

```
Press <DEL> to Enter Setup
```

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

**Warning:** *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

	Extended Synch		Disabled		F1: General Help
	Link Training Retry		5		F2: Previous Values
	Link Training Timeout (uS)		100		F3: Optimized Default
	Unpopulated Links		Keep Link ON		F4: Save ESC: Exit

**Relaxed Ordering**

Enables or disables PCI Express Device Relaxed Ordering.

**Extended Tag**

If ENABLED allows device to use 8-bit Tag field as a requester.

**No Snoop**

Enables or disables PCI Express Device No Snoop option.

### **Maximum Payload**

Set Maximum Payload of PCI Express Device or allow System BIOS to select the value.

### **Maximum Read Request**

Set Maximum Read Request Size of PCI Express Device or allow System BIOS to select the value.

### **ASPM Support**

Set the ASPM Level: Force L0s – Force all links to L0s State:  
AUTO – BIOS auto configure : DISABLE – Disables ASPM.

### **Extended Synch**

If ENABLED allows generation of Extended Synchronization patterns.

### **Link Training Retry**

Defines number of Retry Attempts software will take to retrain the link if previous training attempt was unsuccessful.

### **Link Training Timeout (uS)**

Defines number of Microseconds software will wait before polling 'Link Training' bit in Link Status register. Value range from 10 to 1000 uS.

### **Unpopulated Links**

In order to save power, software will disable unpopulated PCI Express links, if this option set to 'Disable Link'.

**ACPI Settings**

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
ACPI Settings					
	Enable Hibernation		Enabled		→ ← Select Screen
	ACPI Sleep State		S3 (Suspend to R...)		↑ ↓ Select Item
	Lock Legacy Resources		Disabled		Enter: Select
	S3 Video Repost		Disabled		+ - Change Field
					F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

**Enable Hibernation**

Enables or Disables System ability to Hibernate (OS/S4 Sleep State). This option may be not effective with some OS.

**ACPI Sleep State**

Select ACPI sleep state the system will enter, when the SUSPEND button is pressed.

**Lock Legacy Resources**

Enabled or Disabled Lock of Legacy Resources.

**S3 Video Repost**

Enable or disable S3 Video Repost.

## Wake up event settings

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
Wake system with Fixed Time			Disabled		→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit
Wake up hour			0		
Wake up minute			0		
Wake up second			0		
Wake on Ring			Disabled		
Wake on PCI PME			Disabled		
Wake on PCIE Wake Event			Disabled		

### Wake system with Fixed Time

Enables or Disables System wake on alarm event. When enabled, System will wake on the hr::min:: sec specified.

### Wake on PCIE PME Wake Event

The options are Disabled and Enabled.

## Trusted Computing

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
TPM Configuration					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit
TPM SUPPORT			Disabled		
Current TPM Status Information					
TPM SUPPORT OFF					

### TPM Support

This configuration is supported only with MB970VF. Enables or Disables TPM support. O.S. will not show TPM. Reset of platform is required.

### Security Device Support

Enables or disables BIOS support for security device. O.S. will not show Security Device. TCG EFI protocol and INT1A interface will not be available.

## CPU Configuration

This section shows the CPU configuration parameters.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
CPU Configuration					
Intel® Core™ i7-3770 CPU @ 3.40GHz					
Processor Stepping			306a8		
Microcode Revision			c		
Max CPU Speed			3400 MHz		
Min CPU Speed			1600 MHz		
CPU Speed			3400 MHz		
Processor Cores			4		
Intel HT Technology			Supported		
Intel VT-x Technology			Supported		
Intel SMX Technology			Supported		
64-bit			Supported		
Hyper-threading			Enabled		→ ← Select Screen
Active Processor Cores			All		↑ ↓ Select Item
Limit CPUID Maximum			Disabled		Enter: Select
Execute Disable Bit			Enabled		+ - Change Field
Intel Virtualization Technology			Disabled		F1: General Help
Adjacent Cache Line Prefetch			Enabled		F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

### Hyper-threading

Enabled for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology). When Disabled, only one thread per enabled core is enabled.

### Active Processor Cores

Number of cores to enable in each processor package.

### Limit CPUID Maximum

Disabled for Windows XP.

### Execute Disable Bit

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, Re33dHat Enterprise 3 Update 3.)

### Intel Virtualization Technology

When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

### Adjacent Cache Line Prefetch

To turn on/off prefetching of adjacent cache lines.

### SATA Configuration

SATA Devices Configuration.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
SATA Controller(s)		Enabled			
SATA Mode Selection		RAID			
Aggressive LPM Support		Enabled			
SATA Controller Speed		Gen3			
SATA Port0		Empty		→ ← Select Screen	
Software Preserve		Unknown		↑ ↓ Select Item	
SATA Port1		Empty		Enter: Select	
Software Preserve		Unknown		+- Change Field	
SATA Port2		Empty		F1: General Help	
Software Preserve		Unknown		F2: Previous Values	
SATA Port3		Empty		F3: Optimized Default	
Software Preserve		Unknown		F4: Save ESC: Exit	
SATA Port4		Empty			
Software Preserve		Unknown			
SATA Port5		Empty			
Software Preserve		Unknown			

### SATA Controller(s)

Enable / Disable Serial ATA Controller.

### SATA Mode Selection

- (1) IDE Mode.
- (2) AHCI Mode.

## Shutdown Temperature Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
ACPI Shutdown Temperature			Disabled		→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

### ACPI Shutdown Temperature

The default setting is Disabled.

## iSmart Controller

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
iSmart Controller					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit
Power-On after Power failure		Disable			
Schedule Slot 1		None			
Schedule Slot 2		None			

### iSmart Controller

Setup the power on time for the system.

#### Schedule Slot 1 / 2

Setup the hour/minute for system power on.

## Acoustic Management Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
Acoustic Management Configuration					
Acoustic Management			Disabled		
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

## USB Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
USB Configuration					
USB Devices: 2 Hubs					
Legacy USB Support			Enabled		
USB3.0 Support			Enabled		
XHCI Hand-off			Enabled		
EHCI Hand-off			Enabled		
Port 60/64 Emulation			Enabled		
USB hardware delays and time-outs:					
USB Transfer time-out			20 sec		
Device reset time-out			20 sec		
Device power-up delay			Auto		
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

### Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected.

DISABLE option will keep USB devices available only for EFI applications.

### USB3.0 Support

Enable/Disable USB3.0 (XHCI) Controller support.

### XHCI Hand-off

This is a workaround for OSeS without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

**EHCI Hand-off**

Enabled/Disabled. This is a workaround for OSES without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

**Port 64/60 Emulation**

Enables I/O port 60h/64h emulation support. This should be enabled for the complete USB keyboard legacy support for non-USB aware OSES.

**USB Transfer time-out**

The time-out value for Control, Bulk, and Interrupt transfers.

**Device reset tine-out**

USB mass Storage device start Unit command time-out.

**Device power-up delay**

Maximum time the device will take before it properly reports itself to the Host Controller. ‘Auto’ uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

**F81866 Super IO Configuration**

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
Super IO Configuration					
	F81866 Super IO Chip		F81866		→ ← Select Screen
	▶ Serial Port 0 Configuration				↑ ↓ Select Item
	▶ Serial Port 1 Configuration				Enter: Select
	▶ Serial Port 2 Configuration				+ - Change Field
	▶ Serial Port 3 Configuration				F1: General Help
	▶ Parallel Port Configuration				F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

**Serial Port Configuration**

Set Parameters of Serial Ports. User can Enable/Disable the serial port and Select an optimal settings for the Super IO Device.

**F81866 H/W Monitor**

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
PC Health Status					
	CPU_Fan1 smart fan control		Disabled		
	SYS_Fan1 smart fan control		Disabled		
	CPU temperature		+41 C		
	SYS temperature		+35 C		
	CPU_FAN Speed		2115 RPM		
	SYS_FAN Speed		N/A		
	Vcore		+1.000 V		→ ← Select Screen
	+5V		+5.213 V		↑ ↓ Select Item
	+12V		+12.408 V		Enter: Select
	1.5V		+1.544 V		+ - Change Field
	+3.3V		+3.424 V		F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

**Temperatures/Voltages**

These fields are the parameters of the hardware monitoring function feature of the motherboard. The values are read-only values as monitored by the system and show the PC health status.

**Fan1/Fan2 Smart Fan Control**

This field enables or disables the smart fan feature. At a certain temperature, the fan starts turning. Once the temperature drops to a certain level, it stops turning again.

## CPU PPM Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
CPU PPM Configuration					
EIST			Enabled		
Turbo Mode			Enabled		
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

### EIST

Enable/Disable Intel SpeedStep.

## Chipset Settings

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
<ul style="list-style-type: none"> <li>▶ PCH-IO Configuration</li> <li>▶ System Agent (SA) Configuration</li> </ul>					
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

## PCH-IO Configuration

This section allows you to configure the North Bridge Chipset.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
		Intel PCH RC Version	1.1.0.0		
		Intel PCH SKU Name	B75		
		Intel PCH Rev ID	O4/C1		
		▶ PCI Express Configuration			
		▶ USB Configuration			
		▶ PCH Azalia Configuration			
		PCH LAN Controller	Enabled		
		Wake on LAN	Enabled		
		High Precision Event Timer Configuration			
		High Precision Timer	Enabled		
					→ ← Select Screen
					↑ ↓ Select Item
					Enter: Select
					+ - Change Field
					F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

### PCH LAN Controller

Enable or disable onboard NIC.

### Wake on LAN

Enable or disable integrated LAN to wake the system. (The Wake On LAN cannot be disabled if ME is on at Sx state.)

## PCI Express Configuration

Main	Advanced	Chipset	Boot	Security	Save & Exit
PCI Express Configuration					
PCI Express Clock Gating			Enabled		
DMI Link ASPM Control			Enabled		
DMI Link Extended Synch Control			Disabled		
PCIe-USB Glitch W/A			Disabled		
Subtractive Decode			Disabled		
▶ PCI Express Root Port 1					
▶ PCI Express Root Port 2					
▶ PCI Express Root Port 3					
▶ PCI Express Root Port 4					
▶ PCI Express Root Port 5					
PCI-E Port 6 is assigned to LAN					
▶ PCI Express Root Port 7					
▶ PCI Express Root Port 8					
					→ ← Select Screen
					↑ ↓ Select Item
					Enter: Select
					+ - Change Field
					F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

### PCI Express Clock Gating

Enable or disable PCI Express Clock Gating for each root port.

### DMI Link ASPM Control

The control of Active State Power Management on both NB side and SB side of the DMI link.

### PCIe-USB Glitch W/A

PCIe-USB Glitch W/A for bad USB device(s) connected behind PCIE/PEG port.

## USB Configuration

Main	Advanced	Chipset	Boot	Security	Save & Exit
USB Configuration					
		XHCI Pre-Boot Driver	Disabled		
		xHCI Mode	Auto		
		HS Port #1 Switchable	Enabled		
		HS Port #2 Switchable	Enabled		
		HS Port #3 Switchable	Enabled		
		HS Port #4 Switchable	Enabled		
		xHCI Streams	Enabled		
		EHCI1	Enabled		
		EHCI2	Enabled		
		USB Ports Per-Port Disable Control	Disabled		
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

### HS Port #1/2/3/4 Switchable

Allows for HS port switching between xHCI and EHCI. If disabled, port is routed to EHCI. If HS port is routed to xHCI, the corresponding SS port is enabled.

### xHCI Streams

Enable or disable xHCI Maximum Primary Stream Array Size.

### EHCI1/2

Control the USAB EHCI (USB 2.0) functions. One EHCI controller must always be enabled.

### USB Ports Per-Port Disable Control

Control each of the USB ports (0~13) disabling.

## PCH Azalia Configuration

Main	Advanced	Chipset	Boot	Security	Save & Exit
PCH Azalia Configuration					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit
Azalia			Auto		

### Azalia

Control Detection of the Azalia device.

Disabled = Azalia will unconditionally disabled.

Enabled Azalia will be unconditionally enabled.

Auto = Azalia will enabled if present, disabled otherwise.

## System Agent (SA) Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
System Agent Bridge Name			IvyBridge		→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit
System Agent RC Version			1.1.0.0		
VT-d Capability			Supported		
VT-d			Enabled		
CHAP Device (B0:D7:F0)			Disabled		
Thermal Device (B0:D4:F0)			Disabled		
Enable NB CRID			Disabled		
BDAT ACPI Table Support			Disabled		
C-State Pre-Wake			Enabled		
▶ Graphics Configuration					
▶ Memory Configuration					

### VT-d

Check to enable VT-d function on MCH.

### Enable NB CRID

Enable or disable NB CRID WorkAround.

### C-State Pre-Wake

Controls C-State Pre-Wake feature for ARAT, in SSKPD[57].

**Graphics Configuration**

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
Graphics Configuration					
			IGFX VBIOS Version	2132	
			IGfx Frequency	350 MHz	
			Primary Display	Auto	
			Internal Graphics	Auto	→ ← Select Screen
			GTT Size	2MB	↑ ↓ Select Item
			Aperture Size	256MB	Enter: Select
			DVMT Pre-Allocated	64M	+ - Change Field
			DVMT Total Gfx Mode	Disabled	F1: General Help
			Primary IGFX Boot Display	VBIOS Default	F2: Previous Values
			LVDS Control	Disabled	F3: Optimized Default
					F4: Save ESC: Exit

**Primary Display**

Select which of IGFX/PEG/PCI graphics device should be primary display or select SG for switchable Gfx.

**Internal Graphics**

Keep IGD enabled based on the setup options.

**DVMT Pre-Allocated**

Select DVMT 5.0 Pre-Allocated (Fixed) graphics memory size used by the internal graphics device.

**DVMT Total Gfx Mem**

Select DVMT 5.0 total graphics memory size used by the internal graphics device.

**Primary IGFX Boot Display**

Select the Video Device that will be activated during POST. This has no effect if external graphics present. Secondary boot display selection will appear based on your selection. VGA modes will be supported only on primary display.

## Memory Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
Memory Information					
		Memory Frequency	1333 MHz		
		Total Memory	4096 MB (DDR3)		
		DIMM#A	2048 MB (DDR3)		
		DIMM#B	2048 MB (DDR3)		
		CAS Latency (tCL)	9		→ ← Select Screen
		Minimum delay time			↑ ↓ Select Item
		CAS to RAS (tRCDmin)	9		Enter: Select
		Row Precharge (tRPmin)	9		+ - Change Field
		Active to Precharge (tRASmin)	24		F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save   ESC: Exit

## Boot Settings

This section allows you to configure the boot settings.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
Boot Configuration					
Setup Prompt Timeout			1		
Bootup NumLock State			On		
Quiet Boot			Disabled		
Fast Boot			Disabled		
CSM16 Module Version			07.69		→ ← Select Screen
GateA20 Active			Upon Request		↑ ↓ Select Item
Option ROM Messages			Force BIOS		Enter: Select
INT19 Trap Response			Immediate		+ - Change Field
Boot Option Priorities					F1: General Help
▶ CSM parameters					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

### Setup Prompt Timeout

Number of seconds to wait for setup activation key.

65535(0xFFFF) means indefinite waiting.

### Bootup NumLock State

Select the keyboard NumLock state.

### Quiet Boot

Enables/Disables Quiet Boot option.

### Fast Boot

Enables/Disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

### GateA20 Active

UPON REQUEST – GA20 can be disabled using BIOS services.

ALWAYS – do not allow disabling GA20; this option is useful when any RT code is executed above 1MB.

### Option ROM Messages

Set display mode for Option ROM. Options are Force BIOS and Keep Current.

## INT19 Trap Response

Enable: Allows Option ROMs to trap Int 19.

## Boot Option Priorities

Sets the system boot order.

## CSM parameters

This section allows you to configure the boot settings.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
			Launch CSM	Always	
			Boot option filter	UEFI and Legacy	
			Launch PXE OpROM policy	Do not launch	
			Launch Storage OpROM policy	Legacy only	
			Launch Video OpROM policy	Legacy only	
			Other PCI device ROM priority	Legacy OpROM	
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

### Boot option filter

This option controls what devices system can boot to.

### Launch PXE OpROM policy

Controls the execution of UEFI and Legacy PXE OpROM.

### Launch Storage OpROM policy

Controls the execution of UEFI and Legacy Storage OpROM.

### Launch Video OpROM policy

Controls the execution of UEFI and Legacy Video OpROM.

### Other PCI device ROM priority

For PCI devices other than Network, Mass storage or Video defines which OpROM to launch.

## Security Settings

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
Password Description  If ONLY the Administrator's password is set, then this only limit access to Setup and is only asked for when entering Setup. If ONLY the User's password is set, then this is a power on password and must be entered to boot or enter Setup. In Setup the User will have Administrator rights The password length must be in the following range: Minimum length 3 Maximum length 20  Administrator Password User Password				→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	

### Administrator Password

Set Setup Administrator Password.

### User Password

Set User Password.

## Save & Exit Settings

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
Save Changes and Exit					
Discard Changes and Exit					
Save Changes and Reset					
Discard Changes and Reset					
Save Options					→ ← Select Screen
Save Changes					↑ ↓ Select Item
Discard Changes					Enter: Select
					+ - Change Field
					F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit
Restore Defaults					
Save as User Defaults					
Restore User Defaults					

### Save Changes and Exit

Exit system setup after saving the changes.

### Discard Changes and Exit

Exit system setup without saving any changes.

### Save Changes and Reset

Reset the system after saving the changes.

### Discard Changes and Reset

Reset system setup without saving any changes.

### Save Changes

Save Changes done so far to any of the setup options.

### Discard Changes

Discard Changes done so far to any of the setup options.

### Restore Defaults

Restore/Load Defaults values for all the setup options.

### Save as User Defaults

Save the changes done so far as User Defaults.

### Restore User Defaults

Restore the User Defaults to all the setup options.

This page is intentionally left blank.

## Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility .....	50
VGA Drivers Installation .....	53
Realtek HD Audio Driver Installation .....	56
LAN Drivers Installation.....	58
Intel® Management Engine Interface .....	62
Intel® USB 3.0 Drivers .....	65

### **IMPORTANT NOTE:**

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

## Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) 7 Series Chipset Drivers**.

2. Click **Intel(R) Chipset Software Installation Utility**.

- When the Welcome screen to the Intel® Chipset Device Software appears, click *Next* to continue.

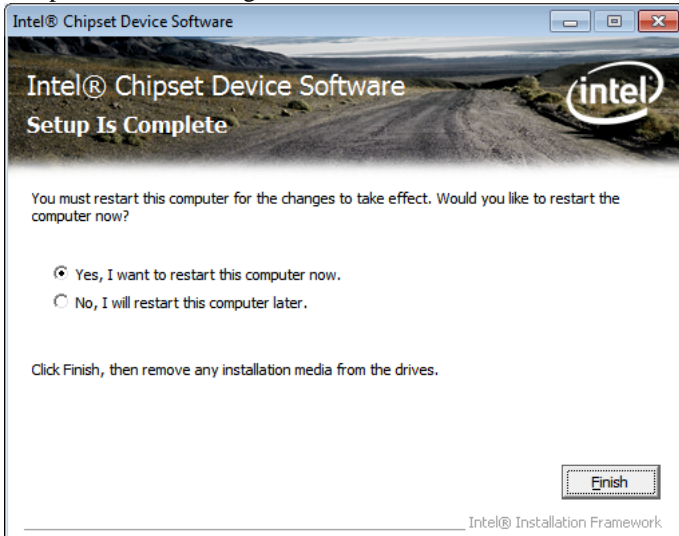

- Click *Yes* to accept the software license agreement and proceed with the installation process.

5. On the Readme File Information screen, click *Next* to continue the installation.

6. The Setup process is now complete. Click *Finish* to restart the computer and for changes to take effect.

## VGA Drivers Installation

**NOTE:** Before installing the *Intel(R) Q77 Chipset Family Graphics Driver*, the Microsoft .NET Framework 3.5 SPI should be first installed.

To install the VGA drivers, follow the steps below.

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) Q7 Series Chipset Drivers*.

2. Click *Intel(R) Q77 Chipset Family Graphics Driver*.

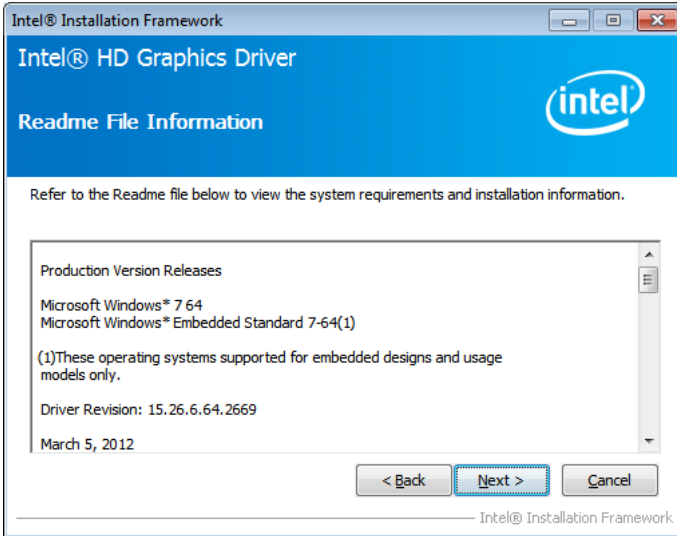

3. When the Welcome screen appears, click *Next* to continue.

4. Click *Yes* to agree with the license agreement and continue the installation.

5. On the Readme File Information screen, click *Next* to continue the installation of the Intel® Graphics Media Accelerator Driver.

6. On Setup Progress screen, click *Next* to continue.

7. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

## Realtek HD Audio Driver Installation

Follow the steps below to install the Realtek HD Audio Drivers.

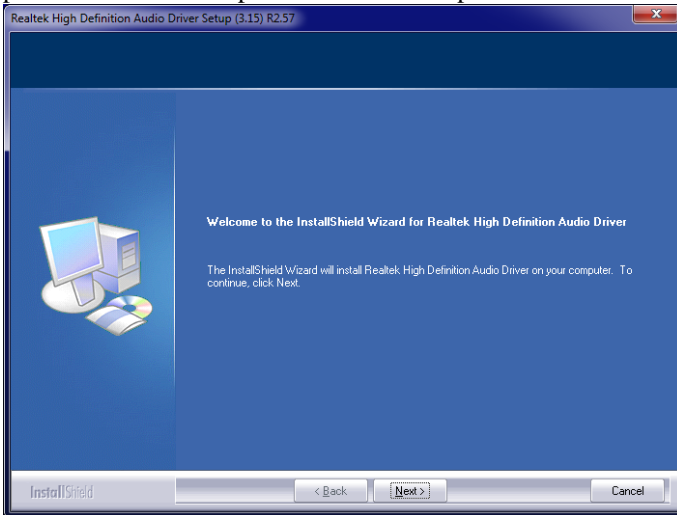

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) O7 Series Chipset Drivers**.

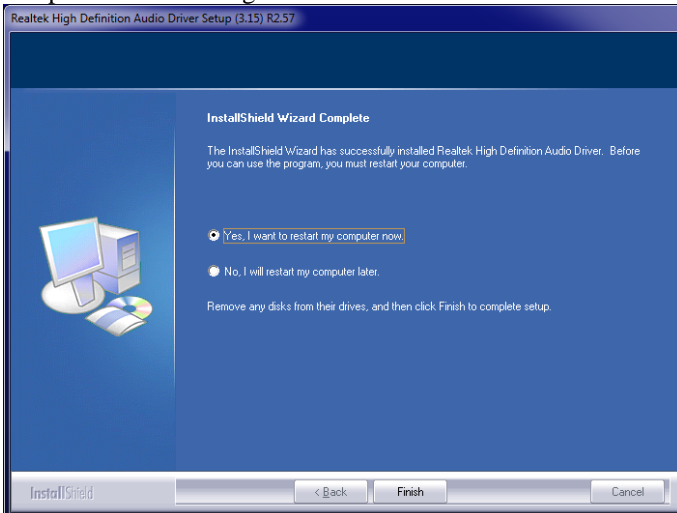

2. Click **Realtek High Definition Audio Driver**.

3. On the Welcome to the InstallShield Wizard screen, click **Next** to proceed with and complete the installation process.

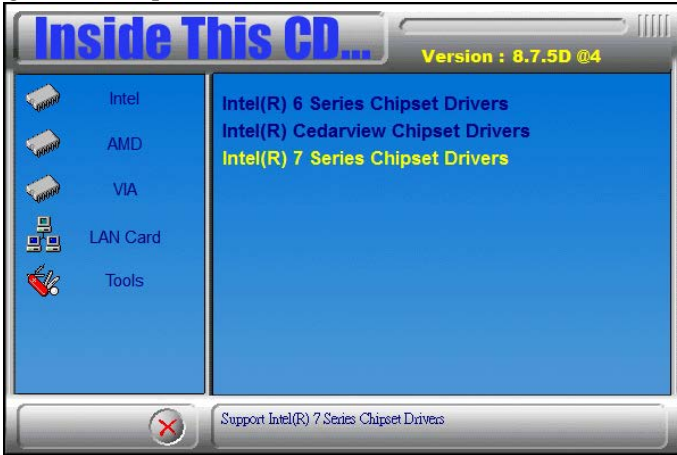

4. The InstallShield Wizard Complete. Click **Finish** to restart the computer and for changes to take effect.

## LAN Drivers Installation

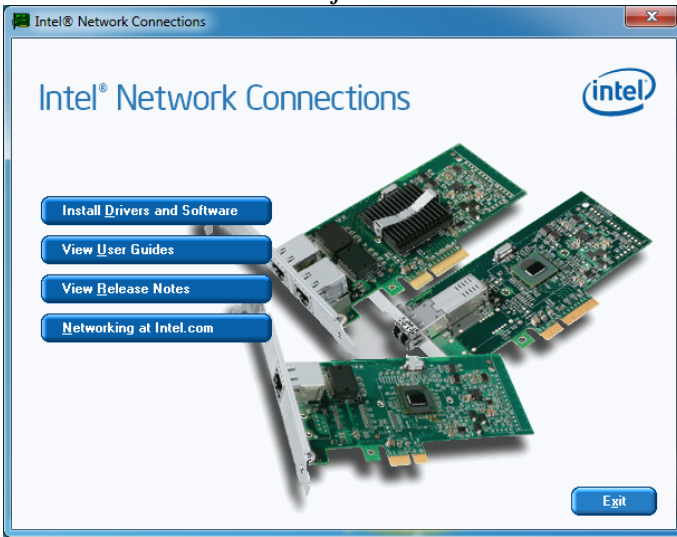

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) O7 Series Chipset Drivers**.

2. Click **Intel(R) PRO LAN Network Driver**.

3. Click **Install Drivers and Software**.

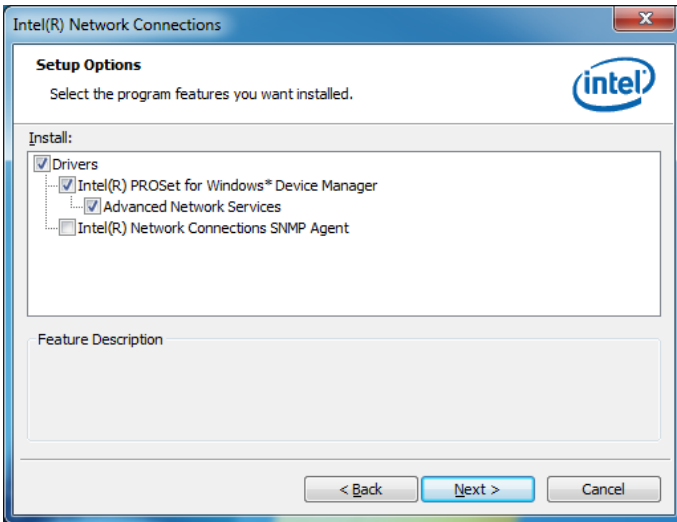

4. When the Welcome screen appears, click **Next**.

5. Click **Next** to to agree with the license agreement.

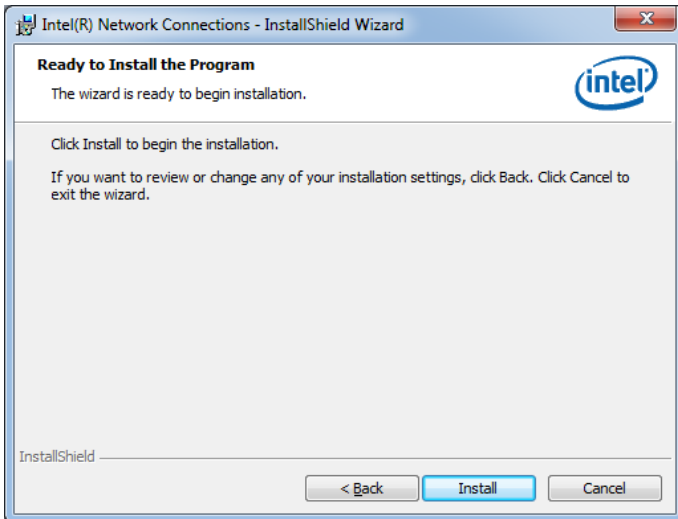

6. Click the checkbox for **Drivers** in the Setup Options screen to select it and click **Next** to continue.

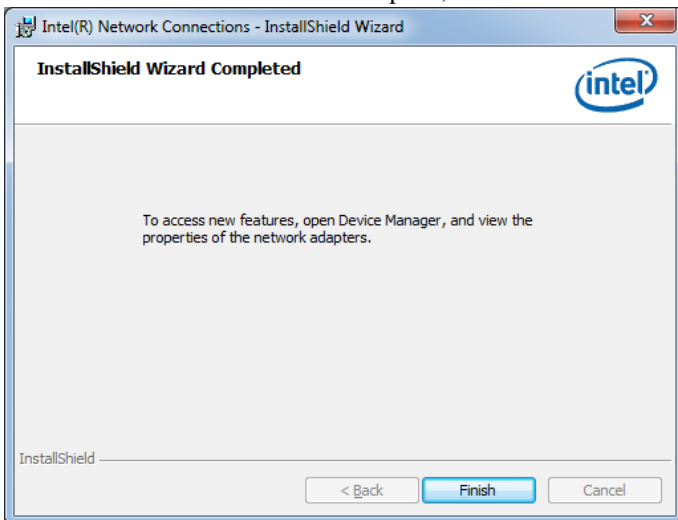

7. The wizard is ready to begin installation. Click **Install** to begin the installation.

8. When InstallShield Wizard is complete, click **Finish**.

## Intel® Management Engine Interface

The following application requires Microsoft .NET Framework 3.5 or later: Intel® Management Engine Components. Please install the latest version of Microsoft .NET Framework from Microsoft Download Center to run this application correctly.

Follow the steps below to install the Intel Management Engine.

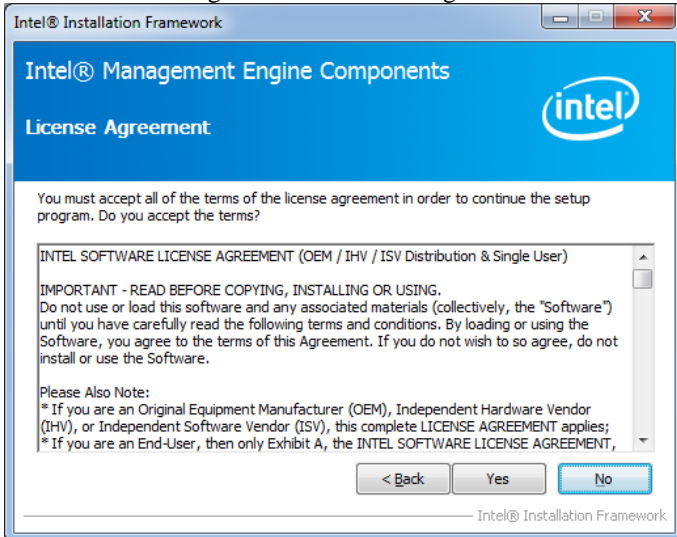

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) AMT 8.0 Drivers**.

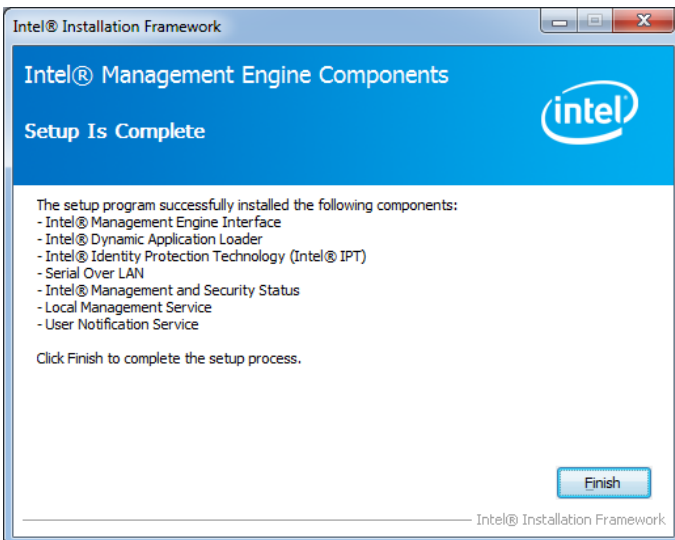

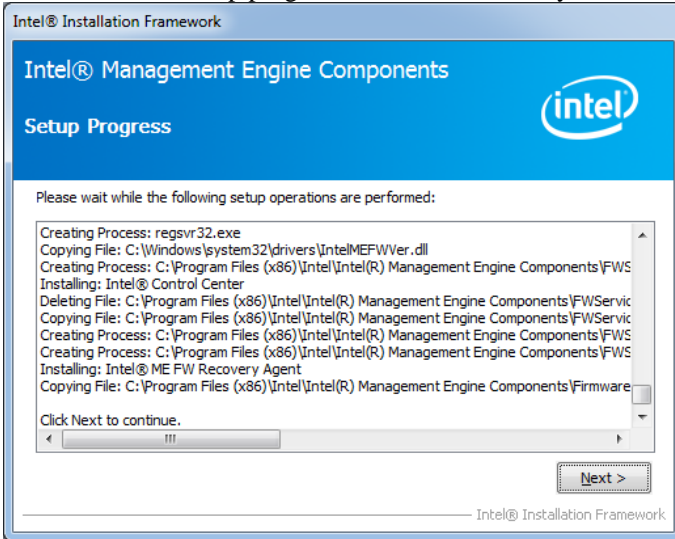

- When the Welcome screen to the InstallShield Wizard for Intel® Management Engine Components, click the checkbox for **Install Intel® Control Center** & click **Next**.

- Click **Yes** to agree with the license agreement.

4. When the Setup Progress screen appears, click *Next*. Then, click *Finish* when the setup progress has been successfully installed.

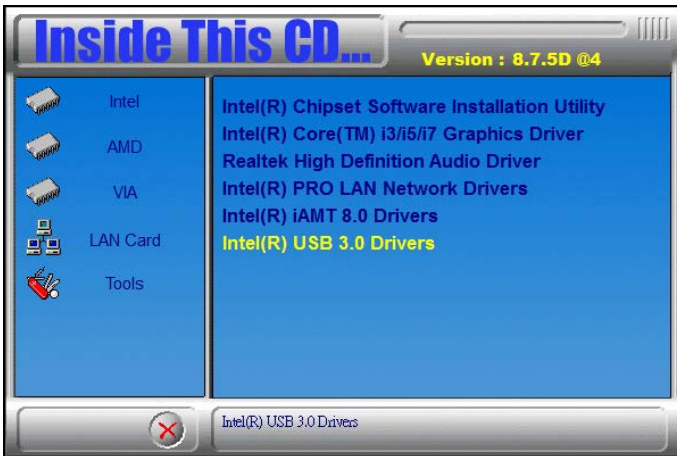

## Intel® USB 3.0 Drivers

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) O7 Series Chipset Drivers*.

2. Click *Intel(R) USB 3.0 Drivers*.

3. When the Welcome screen to the InstallShield Wizard for Intel® USB 3.0 eXtensible Host Controller Driver, click *Next*.

4. Click *Yes* to agree with the license agreement and continue the installation.

5. On the Readme File Information screen, click *Next* to continue the installation of the Intel® USB 3.0 eXtensible Host Controller Driver.

6. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

This page is intentionally left blank.

## Appendix

### A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
000h - 01Fh	DMA Controller #1
020h - 03Fh	Interrupt Controller #1
040h - 05Fh	Timer
060h - 06Fh	Keyboard Controller
070h - 07Fh	Real Time Clock, NMI
080h - 09Fh	DMA Page Register
0A0h - 0BFh	Interrupt Controller #2
0C0h - 0DFh	DMA Controller #2
0F0h	Clear Math Coprocessor Busy Signal
0F1h	Reset Math Coprocessor
1F0h - 1F7h	IDE Interface
2F8h - 2FFh	Serial Port #2(COM2)
2B0h - 2DFh	Graphics adapter Controller
360h - 36Fh	Network Ports
3F8h - 3FFh	Serial Port #1(COM1)

## B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

<b>Level</b>	<b>Function</b>
IRQ0	System Timer Output
IRQ1	Keyboard
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ8	Real Time Clock
IRQ14	Primary IDE
IRQ15	Secondary IDE

## C. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
