DVP 508

Digital Visual Presenter

The DVP 508 is a digital presenter consisting of a high-resolution color camera on a moveable extendable arm mounted over a stage with a backlight. There are also lights on arms located on each side of the stage for illumination of the subject. This presenter is very easy to use and can be controlled by the built-in controls or via an included credit card size remote control. Operation merely requires plugging into standard power, connection of the computer or video cable to the projector or display monitor, and the push of the power button. After that the user positions the camera arm and pushes the auto tune button. The DVP 508 has a 16X optical and 6X digital zoom range controlled by buttons. The camera which has auto focus can easily view objects at up to 110X magnification. Up to 240 images can be captured by merely pushing the "Capture" button on the remote.

Objects such as transparencies can be illuminated from the backside using the stage lamp or illuminated from above by the side white LED lamps. The presenter is the perfect tool for providing images of objects, evidence, papers, X-rays, or demonstrations in the classroom, conference room, courtroom, at the podium, or for video conferencing. Movie videos can also be obtained using the USB output to a PC or a SD card. A SD card slot provides added memory to 32 GB.

Key features:

- Five Year Warranty and One Year Peace of Mind Service
- High Resolution Color Camera
- SXGA Computer Output
- Auto Focus, 16X Zoom, 720p video recording
- 240 Picture Memory
