Stellar Phoenix

Excel Repair V1.0

Overview

Stellar Phoenix Excel Repair software is designed to help you repair corrupt Microsoft Excel (.XLSX) files. This software will scan all the selected Excel files using an advanced algorithm and then repairs them back to their original state. You can then save them at either their original location or at a location of your choice.

You can preview repaired Excel files before saving them. You can also search for Excel files in your Mac's volumes and folders. You can either save all of the repaired files or a select few of them.

Features of this version

- Repairs user defined charts.
- Repairs chart sheets.
- Repairs chart formatting.
- Repairs cell comments (for binary formats).
- Repairs series treadmill.
- Repairs conditional formatting rules.
- Repairs worksheet properties (like freeze panes, split, grid lines, formula bar).
- Repairs sort and filter settings.
- Repairs groups and subtotals.
- Repairs images, charts and engineering formulas.
- Repairs same height of rows and columns.
- Repairs all Cell Comments.
- Repairs all merge cells.
- Repairs all hidden sheets and columns.
- Repairs all shared formulas.
- Repairs all texts, numbers and tables from original Excel sheet.
- Preserves formatting when repairing files.
- Repairs all embedded functions from the original Excel sheet.
- Supports MS Excel 2008 and 2011.
- Compatible with Mac OS X 10.5 and above.

Order & Register

You can purchase **Stellar Phoenix Excel Repair** software online. For more on pricing details and to place an order, visit [here](#). Alternatively, you can click on **Order Stellar Phoenix** option in **Help** menu to purchase the software electronically. Once the order is confirmed, you will receive a pre-paid registration key through e-mail, using which you can register the software.

Register Stellar Phoenix Excel Repair

You can download the demo version of the software from [Stellar website](#). After you receive the pre-paid registration key through email, you can register your copy of the software.

You can then follow the steps given below to register the product:

1. Select **Register** from **Tools** menu. **Activation** window is displayed.
2. In **Activation** dialog box, type the alphanumeric strings in **First and Last Name** and **Activation code** in corresponding text boxes. Both these values are pre-generated and sent to you through an email, once your purchase is successful.
3. Click **Activate Now** button. If entered information is correct, **Activation Successful** message will be displayed. Click **OK**.

Installation Procedure

Before installing the software, ensure that your system meets the minimum system requirements.

Minimum System Requirements

- **Processor** : Intel (G4 or later)
- **Operating System** : Mac OS X 10.5 and above
- **Memory** : 1 GB RAM

Features

Stellar Phoenix Excel Repair has many features incorporated in it. It has a very interactive user-interface and fast repairing process. It saves repaired Excel files quickly and efficiently. In addition to all these features, you can also preview a repaired file before saving it.

Following features of Stellar Phoenix Excel Repair are discussed further in this section:

- Preview Excel Files
- Log Report

Preview Excel Files

Stellar Phoenix Excel Repair software gives an option to preview the repaired file before saving it.

Tip: *If your software is demo version then also you can only see the preview of the Excel file. You have to register the demo version to save repaired Excel file.*

To know how to preview damaged Excel files, visit [Preview Damaged Excel Files](#) topic of this help manual.

Log Report

Stellar Phoenix Excel Repair saves a log report of the repair process. The log file will help you to examine the time taken in repair process, path of the saved Excel file, and so on.

If another file is repaired then log report of the latest repair process is added to the previous log report. New log is written below the previous log. You can save the log report for future reference. View Log Report section of this user manual describes viewing and saving of log files in detail.

Select File

Stellar Phoenix Excel Repair repairs corrupt and damaged Excel files and allows you to save them at a location of your choice. You can repair individual or multiple files by using **Stellar Phoenix Excel Repair**. Using the '**Select File**' option you can select a single file for repair.

To repair Microsoft Excel files, follow the steps given below:

1. Run **Stellar Phoenix Excel Repair** software.
2. To add individual file from a folder, in **Stellar Phoenix Excel Repair** dialog box, click **Select File**.
3. In **Open Directory** dialog box, locate and select the required **Excel** file. Click **Open**.
4. Click **Repair**. The selected file will be repaired.

Tip: You can also preview the file after repairing.

Select Folder

You can add multiple Excel files in the Excel Repair software. In addition, you can specify a folder from which you can add all Excel files.

To add multiple files from a folder:

1. In **Stellar Phoenix Excel Repair** dialog box, click **Select Folder**.
2. In **Browse for Folder** dialog box, browse and select the required folder. Select folder and then click **Choose**.
3. In **Stellar Phoenix Excel Repair** dialog box, all files that are found in the selected folder are listed. Select the check boxes of files that needs to be repaired. Click **Repair**. All files will be listed in the left pane under **Stellar Phoenix Excel Repair** node.

Find File(s)

You can search for Microsoft Excel files in your computer by using **Find File(s)** option of the software. In case, you are unaware of the exact location of required file you can search for the file easily.

To find files in your Mac's volume:

1. Run **Stellar Phoenix Excel Repair**.
2. Select a volume from **Look In** list box. Select **Search Subfolder (s)** check box if you want to search files inside the subfolders also.

Find Files Screen

3. Click **Find File(s)** button. All Excel files that are found in the selected volume are listed in the **Stellar Phoenix Excel Repair** window.

Preview Repaired Excel Files

Stellar Phoenix Excel Repair shows preview of corrupted Excel files, this will help you to evaluate the files before repairing them. If you want to preview a file, click on it in the tree view.

To preview the file:

1. Click on the file in the left tree view pane. Contents of the file is displayed on the right pane of the window.

Preview Damaged Excel files before Repairing

View Log Report

Log window of the software shows the progress of the current process. The log window displays messages indicating the beginning of the process, end of the process, and name of the corrupted Excel file. You can perform three operation on the logs - view, save, and clear log messages.

To save log information

- Click  **Log Report** or select **Tools -> Log Report**. You can view the log report or save the file using the **Save As** dialog box, by specifying the location where you want to save the log file. Click **Save** to save the file.

To clear log information

- On **Log** screen, select **Clear**.

FAQs

1. What is Stellar Phoenix Excel Repair?

Stellar Phoenix Excel Repair is a software for repairing corrupt and damaged Microsoft Excel (.XLSX extension) files. Using this software you can scan Excel files and repair them. This software uses a powerful algorithm to repair damaged Excel files. You can then save the repaired files to their original location on your Mac or to any other location.

2. I have forgotten the path of my Excel file. Can I search an Excel file using the software?

Yes, you can search for damaged Excel files in your Mac using the software. Click '**Find File(s)**' option in the **Stellar Phoenix Excel Repair** software and follow the process.

3. What are the limitations of the demo version of the software?

Demo version of the software shows you the efficiency of the repair process. If you are satisfied with the preview of repaired Excel file, then you can purchase full version of software. You can save repaired files with full version.

4. How to repair multiple Excel files at same time?

There are two ways in which you can repair multiple files at same time. You have to add all the files to the software first before repairing them.

To add multiple files:

- Click **Select Folder** button and choose the desired folder. All the Excel files in the folder will be listed in the window.
Or, alternatively you can,
- Click **Find File(s)** button and all the Excel files of the selected volume will be listed in the window.
- Now you can select, repair and save multiple files.

5. How much time will Stellar Phoenix Excel Repair software take to repair a damaged Excel file?

The repairing time depends upon the corruption level, size, and number of Excel sheets in the file. If the process is running that means that software is still repairing the corrupt Excel file(s) and you have to wait for the repair process to complete. Once it is complete you have to save the repaired file at a destination of your choice.

6. I want to analyze the repair process. Can I see the log report at a later stage?

Yes, the application gives you option to save and view log report at a later stage. To save the log report,

- On **Tools** menu, click **Log Report**.
- Log report is saved at the specified location in text format.
- To view the report, browse to the location and open the file.
