CASIO®

# Introduction & Contents

Important!

Your new cash register has been carefully tested before shipment to ensure proper operation. Safety devices eliminate worries about breakdowns resulting from operator errors or improper handling. In order to ensure years of trouble-free operation, however, the following points should be noted when handling the cash register.

Do not locate the cash register where it will be subjected to direct sunlight, high humidity, splashing with water or other liquids, or high temperature (such as near a heater).
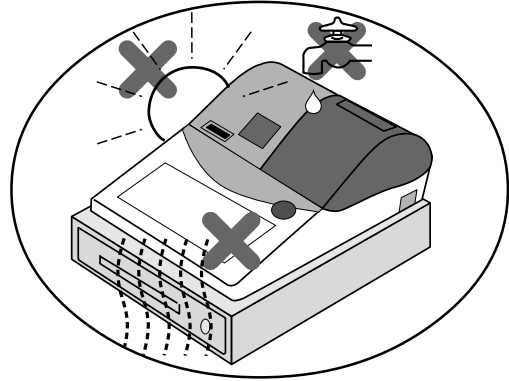

Be sure to check the sticker on the side of the cash register to make sure that its voltage matches that of the power supply in the area.

Never operate the cash register while your hands are wet.
Use a soft, dry cloth to clean the exterior of the cash register. Never use benzene, thinner, or any other volatile agent.

Never try to open the cash register or attempt your own repairs. Take the cash register to your authorized CASIO dealer for repairs.
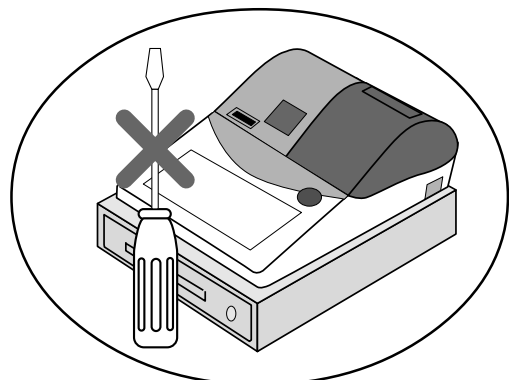

Introduction

Congratulations on your selection of a CASIO TE-2200 electronic cash register. This ECR is the product of the world's most advanced electronic technology, for outstanding versatility and reliability.
Simplified operation is made possible by a specially designed keyboard layout and a wide selection of automated, programmable functions.
A specially designed keyboard layout and a bright, easy-to-read display help to take the fatigue out of long hours operation.

GUIDELINES LAID DOWN BY FCC RULES FOR USE OF THE UNIT IN THE U.S.A.
(Not applicable to other areas)

WARNING: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Please keep all information for future reference.

The main plug on this equipment must be used to disconnect mains power.
Please ensure that the socket outlet is installed near the equipment and shall be easily accessible.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Safety Precautions

- To use this product safely and correctly, read this manual thoroughly and operate as instructed.

  After reading this guide, keep it close at hand for easy reference.

  Please keep all informations for future reference.

- Always observe the warnings and cautions indicated on the product.

About the icons

In this guide various icons are used to highlight safe operation of this product and to prevent injury to the operator and other personnel and also to prevent damage to property and this product. The icons and definitions are given below.

Indicates that there is a risk of severe injury or death if used incorrectly.

Indicates that injury or damage may result if used incorrectly.

Icon examples

To bring attention to risks and possible damage, the following types of icons are used.

The △ symbol indicates that it includes some symbol for attracting attention (including warning). In this triangle the actual type of precautions to be taken (electric shock, in this case) is indicated.

The ⊘ symbol indicates a prohibited action. In this symbol the actual type of prohibited actions (disassembly, in this case) will be indicated.

The ● symbol indicates a restriction. In this symbol the type of actual restriction (removal of the power plug from an outlet, in this case) is indicated.

⚠ Warning!

Handling the register

Should the register malfunction, start to emit smoke or a strange odor, or otherwise behave abnormally, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of fire and electric shock.
- Contact CASIO service representative.

Do not place containers of liquids near the register and do not allow any foreign matter to get into it. Should water or other foreign matter get into the register, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of shorting, fire and electric shock.
- Contact CASIO service representative.

Should you drop the register and damage it, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of shorting, fire and electric shock.
- Attempting to repair the register yourself is extremely dangerous. Contact CASIO service representative.

⚠ **Warning!**

Never try to take the register apart or modify it in any way. High-voltage components inside the register create the danger of fire and electric shock.
• Contact CASIO service representative for all repair and maintenance.

Power plug and AC outlet

Use only a proper AC electric outlet (100V~240V) . Use of an outlet with a different voltage from the rating creates the danger of malfunction, fire, and electric shock. Overloading an electric outlet creates the danger of overheating and fire.

Make sure the power plug is inserted as far as it will go. Loose plugs create the danger of electric shock, overheating, and fire.
• Do not use the register if the plug is damaged. Never connect to a power outlet that is loose.

Use a dry cloth to periodically wipe off any dust built up on the prongs of the plug. Humidity can cause poor insulation and create the danger of electric shock and fire if dust stays on the prongs.

Do not allow the power cord or plug to become damaged, and never try to modify them in any way. Continued use of a damaged power cord can cause deterioration of the insulation, exposure of internal wiring, and shorting, which creates the danger of electric shock and fire.
• Contact CASIO service representative whenever the power cord or plug requires repair or maintenance.

⚠ **Caution!**

Do not place the register on an unstable or uneven surface. Doing so can cause the register — especially when the drawer is open — to fall, creating the danger of malfunction, fire, and electric shock.

Do not place the register in the following areas.
• Areas where the register will be subject to large amounts of humidity or dust, or directly exposed to hot or cold air.
• Areas exposed to direct sunlight, in a close motor vehicle, or any other area subject to very high temperatures.

The above conditions can cause malfunction, which creates the danger of fire.

Do not overlay bend the power cord, do not allow it to be caught between desks or other furniture, and never place heavy objects on top of the power cord. Doing so can cause shorting or breaking of the power cord, creating the danger of fire and electric shock.

Be sure to grasp the plug when unplugging the power cord from the wall outlet. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.

Never touch the plug while your hands are wet. Doing so creates the danger of electric shock. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.

Never touch the printer head and the platen.

Getting Started

This section outlines how to unpack the cash register and get it ready to operate. You should read this part of the manual even if you have used a cash register before. The following is the basic set up procedure, along with page references where you should look for more details.

1. **Remove the cash register from its box.**
Make sure that all of the parts and accessories are included.
2. **Remove the tape holding parts of the cash register in place.**

Also remove the small plastic bag taped to the printer cover. Inside you will find the mode keys.

3. **Install the three memory backup batteries.**

1. Remove the printer cover and open the platen arm.

2. Remove the battery compartment cover. Slide the cover and pull it up.

printer cover
platen arm

battery compartment cover
3. Note the (+) and (–) markings in the battery compartment. Load a set of three new SUM-3 (UM-3) batteries so that their positive (+) and negative (–) ends are facing as indicated by the markings.

4. Replace the battery compartment cover.

5. Close the platen arm and replace the printer cover.

Important!

These batteries protect information stored in your cash register's memory when there is a power failure or when you unplug the cash register. Be sure to install these batteries.

Precaution!

Incorrectly using batteries can cause them to burst or leak, possibly damaging the interior of the cash register. Note the following.

- Be sure that the positive (+) and negative (–) ends of the batteries are facing as marked in the battery compartment when you load them into the unit.
- Never mix batteries of different types.
- Never mix old batteries with new ones.
- Never leave dead batteries in the battery compartment.
- Remove the batteries if you do not plan to use the cash register for long periods.
- Replace the batteries at least once a year, no matter how much the cash register is used during the period.

WARNING!

- Never try to recharge the batteries supplied with the unit.
- Do not expose batteries to direct heat, let them become shorted or try to take them apart.
  Keep batteries out of the reach of small children. If your child should swallow a battery, consult a physician immediately.

4. Install receipt/journal paper.

Platen arm
Platen
Printer

Important!

Take away the head protection sheet from the printer and close the platen arm.

Caution! (in handling the thermal paper)

- Never touch the printer head and the platen.
- Unpack the thermal paper just before your use.
- Avoid heat/direct sunlight.
- Avoid dusty and humid places for storage.
- Do not scratch the paper.
- Do not keep the printed paper under the following circumstances:
  High humidity and temperature/direct sunlight/contact with glue, thinner or a rubber eraser.

To install receipt paper

Step 1

Remove the printer cover.

Step 2

Open the platen arm.

Step 3

Ensuring the paper is being fed from the bottom of the roll, lower the roll into the space behind the printer.

Step 4

Put the leading end of the paper over the printer.

Step 5

Close the platen arm slowly until it locks steadily.

Complete

Replace the printer cover, passing the leading end of the paper through the cutter slot. Tear off the excess paper.

To install journal paper

Step 1

Remove the printer cover.

Step 2

Open the platen arm.

Step 3

Ensuring the paper is being fed from the bottom of the roll, lower the roll into the space behind the printer.

Step 4

Put the leading end of the paper over the printer.

Step 5

Close the platen arm slowly until it locks steadily.

Step 6

Remove the paper guide of the take-up reel.

Step 7

Slide the leading end of the paper into the groove on the spindle of the take-up reel and wind it onto the reel two or three turns.
Step 8

Replace the paper guide of the take-up reel.

Step 9

Place the take-up reel into place behind the printer, above the roll paper.

Step 10

Press the JOURNAL FEED key to take up any slack in the paper.

During machine installation, press the JOURNAL FEED key after power on.

Complete

Replace the printer cover.

5. **Plug the cash register into a wall outlet.**
Be sure to check the sticker (rating plate) on the side of the cash register to make sure that its voltage matches that of the power supply in your area.

6. **Insert the mode key marked "PGM" into the mode switch.**

(24-hour military time)
10. Tax table programming

Important!

After you program the tax tables, you also have to individually specify which departments (page 36) and PLUs (page 39) are to be taxed.

For this cash register to be able to automatically register state sales tax, you must program its tax tables with tax calculation data from the tax table for your state. There are three (U.S.)/ four (Canada) tax tables that you can program for automatic calculation of separate sales taxes.

0	2	U.S. tax table with tax rate or add-on tax rate only
0	3	Add-in tax rate
0	4	Canadian tax system (Tax-on-tax)

[1] Rounding/tax table system code
Rounding code specification

D_4	D_3	Rounding
5	0	Rounding off two decimal places
9	0	Rounding up to two decimal places
0	0	Cut off to two decimal places

Canadian tax system
For both add-on and add-in tax systems.
To program Tax-on-tax system, you must use the tax address "0225", "0325" or "0425."

Tax table programming (continued…)
Programming U.S.tax tables

Before you can program a U.S. tax table, you must first calculate the program data.

The partial tax table shown below is for a tax rate of 6%. A tax amount is applied for each price range, which is defined by a low end minimum break point. If you subtract each maximum break point from the next lower maximum break point, you should soon be able to see certain patterns. In a cyclic pattern, the differences in maximum breakpoints form a regularly repeating cycle. A pattern which does not fit the cyclic pattern is called non-cyclic pattern.

Though rate, it is conceivable that you can find that subtracting maximum breakpoints results in an one big non-cyclic pattern. In this case, you won't be able to use automatic tax calculation, and must enter the tax for each transaction manually or use a tax rate.

Example 1, Add-on rate tax:

Programming procedure:

Tax rate (2-digit for integer + 4- digit for decimal)	-----------------	8.25%
Tax table maximum value ("0" means unlimited).	-----------------	0 (no limitation)
Rounding/tax table system code	----------------------------------	5002 (Round off)
Sum of a cyclic pattern	--	0
Number of values in each cyclic pattern	--------------------------	0
Number of values in each non-cyclic pattern	--------------------	0
Actual value of difference of the non-cyclic and cyclic values	-------	0
} No need to enter.

Introducing TE-2200

General guide

This part of the manual introduces you to the cash register and provides a general explanation of its various parts.

- Take-up reel
- Printer
- Platen arm
- Roll paper
- Pop-up display
- Main display
- Mode switch
- Keyboard
- Drawer
- Drawer lock
- Printer cover
Roll paper

You can use the roll paper to print receipts and a journal (pages 12 ~ 13).

Receipt on/off key

Use the receipt on/off key in REG1, REG2 and RF modes to control issuance of receipts. In other modes, receipts or reports are printed regardless the receipt key setting.

A post-finalization receipt can still be issued after finalization when the key is set to off. The cash register can also be programmed to issue a post-finalization receipt even when the key is set to on.
Indicator

When the register issues receipts, this indicator is lit.

Mode key

The following four types of mode keys are provided with the unit.
a. OP (Operator) key
   Switches between OFF and REG1.
b. M (Master) key
   Switches between OFF, REG1, REG2, X1 and RF.
c. OW (Owner) key
   Switches between OFF, REG1, REG2, X1, Z1, X2/Z2 and RF.
d. PGM (Program) key
   Switches to any position.

Mode switch

Use the mode keys to change the position of the mode switch and select the mode you want to use.

| Mode switch	Mode name	Description
OFF	Stand-by	Any of the mode control keys can be inserted and removed from the mode switch in this position.
REG1	Register 1	Used for normal sales transactions. Any of the mode control keys can be inserted and removed from the mode switch in this position.
REG2	Register 2	Used for special operations. Since switching to REG2 requires a special key, such functions as discounts, credit sales, charge sales, check payments, and paid outs can be controlled by programming them as prohibited in REG1 and allowed in REG2.
RF	Refund Reg minus	Used for processing refunds. When the mode switch of the register is in RF position, you can access either the refund mode or the register minus mode.
X1	Daily sales read	Used to obtain daily reports without resetting (clearing) all total data.
Z1	Daily sales reset	Used to obtain daily reports while resetting (clearing) all total data.
X2/Z2	Periodic sale read/ reset	Used to obtain periodic sales reports without resetting total data or while resetting all total data.
PGM	Program	Used when programming functions and preset data such as unit prices and tax rates. Also used when reading program data.

Clerk key

Clerk or cashier assignment can be performed using clerk secret numbers only (clerk buttons are not equipped).

Clerk secret number key
Drawer

The drawer opens automatically whenever you finalize a registration and whenever you issue a read or reset report.

Drawer lock

Use the drawer key to lock and unlock the drawer.

TOTAL CHANGE

**When the cash drawer does not open!**

In case of power failure or the machine is in malfunction, the cash drawer does not open automatically. Even in these cases, you can open the cash drawer by pulling drawer release lever (see below).

Important!

The drawer will not open, if it is locked with a drawer lock key.

Display example

Item registration

Repeat registration

Totalize operation

① **Amount/Quantity**
This part of the display shows monetary amounts. It also can be used to show the current time.

② **Item descriptor**
When you register a department/PLU/scanning PLU, the item descriptor appears here.

③ **Number of repeats**
Anytime you perform a repeat registration (pages 32, 37), the number of repeats appears here.
Note that only one digit is displayed for the number of repeats. This means that a "5" could mean 5, 15 or even 25 repeats.
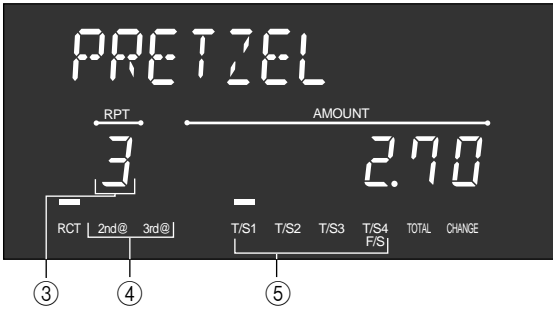

④ **2nd, 3rd menu indicator**
When you press $\boxed{\text{PRICE SHIFT}}$ to designate the 2nd/3rd unit price, the corresponding number is displayed.

⑤ **Taxable / Food stampable sales status indicators**
When you register a taxable / food stampable item, the corresponding indicator is lit.
⑥ **Change descriptor/amount**

⑦ **Total/Change indicators**
When the TOTAL indicator is lit, the displayed value is monetary total or subtotal amount. When the CHANGE indicator is lit, the displayed value is the change due.
⑧ **RCT indicator**
When the register issues receipts, this indicator is lit.

Keyboard
• Register Mode

① **Paper feed key** [RECEIPT FEED], [JOURNAL FEED]

Hold this key down to feed paper from the printer.

② **Receipt on/off key** [RECEIPT ON/OFF]

Use this key twice to change the status "receipt issue" or "no receipt." In case of "receipt issue", the indicator is lit.

③ **Currency exchange key** [CE]

Use this key to convert foreign currency to local currency or vice versa using the exchange rate preset for the key and displays the result.

Use this key for conversions of a home currency subtotal or merchandise subtotal to equivalent of another country's currency.

Use this key for conversions of another country's currency to the equivalent of the home currency.

④ **Post receipt key** [RECEIPT]

Press this key to produce a post-finalization receipt.

⑤ **Non-add/No sale key** [#/NS]

Non-add key: To print reference number (to identify a personal check, credit card, etc.) during a transaction, use this key after some numerical entries.

No sale key: Use this key to open the drawer without registering anything.

⑥ **Discount key** [%−]

Use this key to register discounts.

⑦ **Price key** [PRICE]

Use this key to register an open PLU.

⑧ **Minus key** [−]

Use this key to input values for subtraction.

⑨ **PLU key** [PLU]

Use this key to input PLU numbers.

⑩ **Refund key** [RF]

Use this key to input refund amounts and void certain entries.

⑪ **Error correction/Cancellation key** [ERR CORR CANCEL]

Use this key to correct registration errors and to cancel registration of entire transactions.

⑫ **Clear key** [C]

Use this key to clear an entry that has not yet been registered.

⑬ **Multiplication/For/Date/Time key** [X/FOR DATE TIME]

Use this key to input a quantity for a multiplication operation and registration of split sales of packaged items. Between transactions, this key displays the current time and date.

⑭ **Clerk number key** [CLK#]

Use this key to sign clerk on and off the register.

⑮ **Ten key pad** [0], [1] ~ [9], [00], [·]

Use these keys to input numbers.

⑯ **Tax status shift 1 key** [T/S1]

Use this key to change the Taxable 1 status of the next item.

⑰ **Tax status shift 2 key** [T/S2]

Use this key to change the Taxable 2 status of the next item.

⑱ **Open key** RC

Use this key to temporarily release a limitation on the number of digits that can be input for a unit price.

⑲ **Department keys** 1, 2, 3 ~

Use these keys to register items to departments.

⑳ **Received on account key** RC

Use this key following a numeric entry to register money received for non-sale transactions.

㉑ **Paid out key** PD

Use this key following a numeric entry to register money paid out from the drawer.

㉒ **Help key** HELP

Use this key to look up the procedures to set date/time, tax table etc.

㉓ **Credit key** CR1, CR2

Use this key to register a credit sale.

㉔ **Charge key** CH

Use this key to register a charge sale.

㉕ **Check key** CHK/TEND

Use this key to register a check tender.

㉖ **Subtotal key** SUB TOTAL

Use this key to display and print the current subtotal (includes add-on tax) amount.

㉗ **Cash/Amount tendered key** CA/AMT TEND

Use this key to register a cash tender.

Introducing TE-2200

Allocatable functions

You can tailor a keyboard to suit your particular type of business.

Add check

Use this key in a check tracking system to combine the details of more than one check into a single check.

Arrangement

Use this key to activate an arrangement program programmed in the arrangement file. Any operation that can be performed from the keyboard, as well as mode, can be programmed in an arrangement program, and can be performed merely by pressing this key. In addition, one numeric entry can be included in an arrangement program. In this case, input the number and press this key.
The mode control function of this key can be programmed for all modes except for the OFF and PGM mode.

Bill copy

Use this key to issue bill copy.

Bottle return

Use this key to specify next item as bottle return.

Cancel

Invalidates all preceding data registered for departments, PLUs and set menus within a transaction. This key must be pressed before the transaction involving the data to be invalidated is finalized. It is also effective even after calculation of subtotal amount.

Check endorsement

Use this key to print a preset check endorsement message using the slip printer.

Check print

Use this key to print the check on the slip printer.

Clock-in/-out

Use this key to register the time when the employees start/finish their job.

Coupon

Use this key for registering coupons.

Coupon 2

Use this key to declare the next item registration as coupon.

Cube

This key provides the same functions as the Square key. In addition, this key also has a cube multiplication function.

Customer number

Use this key to register the number of customers.

Declaration

Use this key to declare in drawer amount for money declaration.

Deposit

Use this key to register deposits.

Eat-in

Use this key to specify if the customer eats in the restaurant. Before closing a transaction press this key.

EBT (electronic benefit transfer)

Use this key to register an EBT amount with a tender amount input.

Food stamp shift

Use this key to change food stamp status.

Food stamp subtotal

Use this key to obtain the food stamp applicable amount.

Food stamp tender

Use this key to register a food stamp payment amount with a tender amount input.

Loan

This key is used to input the amount of money provided for making change. This operation affects media totals, rather than sales totals. Loans are made for all types of money which can be specified by the finalize key.

Manual tax

Use this key to register a tax amount.

Media change

Use this key to change media in drawer amount. Pressing this key enters media change operation.

Merchandise subtotal

Use this key to obtain subtotal excluding the add-on tax amount and the previous balance.

New balance

Use this key for adding the latest registered total amount to the previous balance to obtain a new balance.

New check

Use this key in a check tracking system to input a new check number in order to open a new check under that number.

New/Old check

Use this key in a check tracking system to input check numbers in order to open new checks and to reopen existing checks. When the clerk inputs a check number, the register checks to see if that number already exists in the check tracking memory. If there is no matching number in the memory, a new check is opened under the input number. If the check number input matches a number already stored in the memory, that check is reopened for further registration or finalization.

No sale

Use this key to open the drawer between transaction.

Non add

Use this key to print reference numbers (personal check number, card number, etc.)

OBR (Optical barcode reader)

Use this key to input optical barcodes manually.

Old check

Use this key in a check tracking system to input the number of an existing check (previously created by the New check key) whose details are stored in the check tracking memory. Existing checks are reopened to perform further registration or to finalize them.

One touch NLU

Use this key to register scanning PLU directly from the keyboard. There is one One touch NLU key for one scanning PLU, and multiple one touch NLU keys can be set on the keyboard.

Open 2

Use this key to suspend the compulsory specifications.

Open check

Use this key to issue an open check report of an assigned clerk.

Operator number

Use this key to enter a clerk number during clerk transfer.

Operator X/Z

Use this key to issue a clerk's individual X/Z report.

Pick up

When the amount in drawer exceeds the limit value (sentinel function), the manager performs a pick up operation. This key is used for this function. This operation affects media totals, rather than sales totals. Pick ups are made for all types of money which can be specified by the finalize key.Plus
Use this key for registering surcharge.

Premium

Use this key to apply a preset % or manual input % to obtain the premium amount for the last registered item or subtotal.

Previous balance

Use this key to register the previous negative/positive balance at the beginning of or during a transaction.

Previous balance subtotal

Use this key to obtain subtotal excluding the add-on tax amount and current balance.

Price change

Use this key to change scanning PLU unit price temporarily.

Price inquiry

Use this key to confirm the price and descriptors of PLU without registering.

Price shift

Use this key to shift a scanning PLU to the 1st ~ 3rd unit price.

Rate tax

Use this key to activate the preset tax rate or manually input rate to obtain the tax for the preceding taxable status 1 amount.

Recall

Use this key for recalling the transferred check number by the store key. When this key is pressed, the check number will appear in order of the oldest record.

Red price

Use this key to register a new (discounted) price of an item.

Review

Use this key to examine the current transaction by displaying item descriptor and registered amount. This key is also used for void operation or separate check operation.

Separate check

Use this key in a check tracking system to separate selected items from one check to another check.

Slip feed/release

Use this key to feed slips inserted into the slip printer. This is done by specifying the number of feed lines. This key is also used to release the slip paper holder if numbers are not entered.

Slip back feed/release

Use this key to back feed slips inserted into the slip printer. This is done by specifying the number of feed lines. This key is also used to release the slip paper holder if numbers are not entered.

Slip print

Use this key to execute a slip batch printing on the slip printer. Pressing this key prints the sales details. Actual printing is performed following receipt issuance.

Square

This key provides the same functions as the Multiplication key. In addition, this key also has a square multiplication function.

Stock inquiry

Use this key to check the current stock quantity for a PLU without registering.

Store

Use this key for storing the check number of the registered items. When this key is pressed, registered item data will be stored, and then these data will transfer to the youngest check number.

Table number

Use this key to input table numbers.

Takeout

Use this key to specify if the customer takes out items. Before total a transaction. Press this key for the tax exemption.

Tax exempt

Use this key to change taxable amounts to nontaxable amounts.

Taxable amount subtotal

Use this key to obtain taxable amount subtotal.

Text print

Use this key to enter characters to print.

Text recall

Use this key to print preset characters.

Tip

Use this key to register tips.

Tray total

Use this key to display the total amount for all registrations from the last registration until this key is pressed or registrations between presses of this key.

Validation

Use this key to validate transaction amounts on slip.

VAT

Use this key to print a VAT breakdown.

Void

Use this key to invalidate preceding item data registered.

Basic Operations and Setups

How to read the printouts

- The journal and receipts are records of all transactions and operations.
- The contents printed on receipts and journal are almost identical.
- You can choose the journal skip function.
  If the journal skip function is selected, the cash register will print the total amount of each transaction, and the details of premium, discount and reduction operations only, without printing department and PLU item registrations on the journal.
- The following items can be skipped on receipts and journal.
  - Consecutive number
  - Taxable status
  - Taxable amount
  - Item counter

In the operation examples contained in this manual, the print samples are what would be produced if the roll paper is being used for receipts. They are not actual size. Actual receipts are 58 mm wide. Also, all sample receipts and journals are printout images.

How to use your cash register

The following describes the general procedure you should use in order to get the most out of your cash register.

BEFORE business hours…
- Check to make sure that the cash register is plugged in securely.   Page 14
- Check to make sure there is enough paper left on the roll.   Pages 12, 13
- Read the financial totals to confirm that they are all zero.   Page 95
- Check the date and time.   Page 31

DURING business hours…

- Register transactions.   Page 32
- Periodically read totals.   Page 94
AFTER business hours…
- Reset the daily totals.   Page 49
- Remove the journal.   Page 110
- Empty the cash drawer and leave it open.   Page 22
- Take the cash and journal to the office.

Basic Operations and Setups

Basic Operations and Setups

Assigning a clerk

ALL
Mode switch

Clerk or cashier assignment can be performed using clerk secret numbers only (clerk buttons are not equipped).

Clerk secret number key

When the cash register is programmed to use clerk secret numbers for clerk or cashier assignment, the clerk buttons are not functional.

Clerk sign on

	OPERATION	RECEIPT

Signing clerk 1 on: **1** ➡ CLK#

Signing clerk 2 on: **2** ➡ CLK#
.
.
.
Signing clerk 15 on: **1** **5** ➡ CLK#

Clerk secret number
(1 ~ 15 is set as default.)

```
*  COMMERCIAL MESSAGE  *

REG  03-06-2006 11:58
C01      MC#01      000123  —— Clerk name/machine No./consecutive No.

 1 DEPT01    T1    $1.00
```

• If you do not want the clerk secret number to be shown on the display, press CLK# before entering the number.

Clerk sign off

OPERATION

Signing clerk off: **0** ➡ CLK#
(except PGM mode)

• The current clerk is also signed off whenever you set the mode switch to OFF position.

Important!

• The error code "E008" appears on the display whenever you try to perform a registration, a read/ reset operation without signing on.
• A clerk cannot sign on unless other clerk is signed off.
• The signed on clerk is also identified on the receipt/journal.

Displaying the time and date

```
  REG
— Mode switch —
```
You can show the time or date on the display of the cash register whenever there is no registration being made.

To display and clear the date/time

```

• Before registering an open PLU, it is necessary to preset it as an open PLU.

Shifting the taxable status of an item

By pressing "Tax Shift" key, you can shift the taxable status of an item.

Calculation merchandise subtotal

| | | | | OPERATION | RECEIPT |

Item 1	Dept. 1	$4.00	
	Quantity	1	
	Taxable	(2)_{preset}	
Item 2	Dept. 2	$2.00	
	Quantity	1	
	Taxable	(No)→1	
Item 3	Dept. 3	$6.00	
	Quantity	1	
	Taxable	(1)→1, 2	
Item 4	Dept. 4	$7.00	
	Quantity	1	
	Taxable	(2)→No	
Payment	Cash	$20.00	

OPERATION

4 00 1

T/S1

2 00 2

Pressing T/S1 changes the tax status from Nontaxable to Taxable 1

T/S2

6 00 3

Pressing T/S2 changes the tax status from Taxable 1 to Taxable 1, 2

T/S2

7 00 4

Pressing T/S2 changes the tax status from Taxable 2 to Nontaxable

SUB TOTAL

2 0 00 CA/AMT TEND

RECEIPT

```
1 DEPT01    T2     $4.00
1 DEPT02    T1     $2.00
1 DEPT03    T12    $6.00
1 DEPT04           $7.00
  TA1              $8.00
  TX1              $0.32
  TA2             $10.00
  TX2              $0.50
  TL           $19.82
  CASH            $20.00
  CG               $0.18
```

Important!

- To change the tax status of the next item to be registered, be sure to press T/S1, T/S2.

  If the last item registered is programmed as nontaxable, a discount (%− key) operation on this item is always nontaxable.

  In this case, you cannot manually change the tax status to Taxable 1 or 2 by pressing the T/S1, T/S2 keys.

Basic Operations and Setups

Basic Operations and Setups

Preparing and using discounts

This section describes how to prepare and register discounts.

Programming discounts

To program a rate to the %- key

PGM — Mode switch ➡ **1** [SUB TOTAL] ➡ ☐☐☐☐ (Preset rate) ➡ **%-** ➡ [SUB TOTAL]
Example:

10% ➡ **1 0**

5.5% ➡ **5 · 5**

12.34% ➡ **1 2 · 3 4**

Registering discounts

REG — Mode switch

The following example shows how you can use the %- key in various types of registration.

Discount for items and subtotals

| | OPERATION | RECEIPT |

		Dept. 1	$5.00
Item 1	Quantity	1
	Taxable	(1)$_{preset}$
	PLU 16	($10.00)$_{preset}$
Item 2	Quantity	1
	Taxable	(2)$_{preset}$
Discount	Rate	(5%)$_{preset}$
Subtotal discount	Rate	3.5%
	Taxable	Nontaxable
Payment	Cash	$15.00

OPERATION

5 00 **1**

1 6 PLU

%-

Applies the preset discount rate to the last item registered.

[SUB TOTAL]

3 · 5 **%-**

The input value takes priority of the preset value.

[SUB TOTAL]

1 5 00 [CA/AMT TEND]

RECEIPT

```
1 DEPT01    T1     $5.00
1 PLU0016   T2    $10.00
  5%
%-          T2     -0.50
ST                $14.50
  3.5%
%-                 -0.51
TA1                $5.00
TX1                $0.20
TA2                $9.50
TX2                $0.48
TL              $14.67
CASH              $15.00
CG                 $0.33
```

• You can manually input rates up to 4 digits long (0.01% to 99.99%).

Taxable status of the %- key

• Whenever you perform a discount operation on the last item registered, the tax calculation for discount amount is performed in accordance with the tax status programmed for that item.

• Whenever you perform a discount operation on a subtotal amount, the tax calculation for the subtotal amount is performed in accordance with the tax status programmed for the %- key.

Preparing and using reductions

This section describes how to prepare and register reductions.

Programming for reductions

You can use the $\boxed{-}$ key to reduce single item or subtotal amounts.

To program preset reduction amount

PGM
— Mode switch —

➡ **1** [SUB TOTAL] ➡ ☐☐☐☐☐☐ ➡ [−] ➡ [SUB TOTAL]

Unit price
Registering reductions

REG
— Mode switch —

*2 These items can be skipped by programming.

Basic Operations and Setups

Advanced Operations

This chapter describes more sophisticated operations that you can use to suit the needs of your retail environment.

Stock check

Each PLU has an actual stock totalizer that you can program with a minimum stock quantity. Then the register checks actual stock quantities against the programmed minimum stock quantities. Stock operations are performed only for PLUs programmed with minimum stock quantities.

Stock warnings

The cash register checks for negative values in actual stock quantities during the registration itself. After registration is complete, it checks actual stock quantities against minimum stock quantities. The following warning indicators are used to inform the operator of any problem.
• Negative stock:
This indicates that the actual stock quantity is negative. You can also program the cash register to treat this condition as an error. This warning does not appear when the actual stock quantity is zero.
• Under minimum stock:
This indicates that the actual stock quantity is less than or equal to the minimum stock quantity. The cash register can be programmed so that a buzzer sounds when the actual stock quantity is less than the minimum stock quantity.
Notes
• The stock check operation is also performed for PLUs programmed with minimum stock quantities that make up set menus.
• None of the warning indicators appear unless the cash register is specifically programmed for the stock check operation.
• Stock operations can be performed for registrations in the RF mode or those performed with <REFUND> (the refund key).
• An error correct, void, or cancel operation restores the original of items in stock value.

Clerk interrupt function

There are two types of clerk interrupt function, illustrated by PROCEDURE 1 and PROCEDURE 2 below.
• In PROCEDURE 1, each clerk possesses a unique clerk interrupt buffer, and so the clerk interrupt function gives each individual clerk the ability to perform an independent registration operation. In this case, each clerk is individually linked to a unique clerk interrupt buffer.
• In PROCEDURE 2, multiple clerks use the same clerk interrupt buffer, and so a single clerk interrupt operation (clerk change during registration) can be performed any registration is in progress. In this case, multiple clerks are linked to a single clerk interrupt buffer.
Note the following important points concerning the clerk interrupt function.
• The register must be programmed to allow use of the clerk interrupt function.
• To use the clerk interrupt function, a clerk interrupt buffer must first be allocated with the memory allocation operation. Next the manager control operation (X1 mode) should be used to perform clerk assignment for the clerk interrupt function. The clerk interrupt operation cannot be performed by clerks who are not linked to a clerk interrupt buffer.
• You cannot use the clerk interrupt function on a register set up to function as part of a check tracking system. In the REG1, REG2, and RF modes, clerks can be change while a transaction is in progress, making it possible for multiple clerks to simultaneously perform registrations using a single register.
For example, if clerk 1 is interrupted while registering a transaction, clerk 2 can use the same machine to register a different transaction. Then clerk 1 can continue the original registration from the point where it was interrupted.

PROCEDURE 1

Clerk 1　Sign on　<NEW BALANCE>　　Sign on　<CASH>　Sign on　<RECEIPT>

　　　　　Registration A　　　　Finalization A　　Post receipt A

Clerk 2　Sign on　<NEW BALANCE>　Sign on　<CASH>

　　　　　Registration B　　　Finalization B

PROCEDURE 2

Clerk 1　Sign on　<NEW BALANCE>　　Sign on　<CASH>

　　　　　Registration A　　　　Finalization A + B

Clerk 2　Sign on　<NEW BALANCE>
　　　　　Registration B

NOTES

- A guest receipt can be issued following clerk change, and receipts can be issued separately for each clerk.
- A cancel operation can be performed during registration by either of the clerks. When clerk 1 signs back on (after being interrupt by clerk 2), the cancel operation cancels only the items registered after signing back on (only this receipt) or from the top of the transaction. This is selectable by the key program.

Single item cash sales

A department key or PLU programmed with single item sale status finalizes the transaction as soon as it is registered.

The single item sales function cannot work properly if the keyboard does not include <CASH> (the cash key).

The single item sales function can only be used for cash sales.

Example 1

Item	Dept. 1	$1.00
	Quantity	1
	Status	S.I.S
Payment	Cash	$1.00

OPERATION

1 **00** **1**

The transaction is immediately finalized.

RECEIPT

```
 1 DEPT01          $1.00
   TL            $1.00
   CASH            $1.00
```

Advanced Operations

Tray total

Tray total premium/discount

The buffer memory stores all items that fall into the prescribed range, starting from the first item registered for a transaction up to the point that <TRAY TOTAL> (the tray total key) is pressed to perform a tray total premium/discount operation. Following a premium/discount operation, the buffer is cleared and storage of new data starts from registration of the next item following the first premium/discount operation. The following operations clear the buffer memory.

- Press <TRAY TOTAL> twice.
- Press <TRAY TOTAL> and then perform a premium/discount operation. The contents of the buffer memory are restored if an error correction operation is performed to delete the premium/discount operation.

Example

OPERATION

Group 1	Dept. 1	$1.00
	Dept. 3	$2.00
	Discount	$(5\%)_{preset}$
Group 2	Dept. 3	$3.00
	Dept. 4	$4.00
	Discount	10%
Payment	Cash	$9.15

3 PLU0012          $1.50
TL              $25.30
CASH            $30.00
CG               $4.70
```

Bottle returns

Bottle return key

You can use the linked bottle return key to register a bottle return. A PLU whose programmed unit price represents the contents of the bottle, can be linked with PLU whose programmed unit price represents the deposit on the bottle. In the following example, the bottle return key has been programmed to operate as a linked bottle return key.

The bottle return key must be pressed before input of each new linked bottle return.

Example

OPERATION   **RECEIPT**

	PLU 1	($8.00)
Return Item 1	PLU 11 linked	($0.80)
	Quantity	1
	PLU 2	($5.00)
Return Item 2	PLU 12 linked	($0.50)
	Quantity	3
Payment	Cash	$2.30

`BR` **1** `PLU`

3 `X/FOR DATE TIME`

`BR` **2** `PLU`

`CA/AMT TEND`

```
BR          . . . . . . . . .
1 PLU0011          -0.80
BR          . . . . . . . . .
3 PLU0012          -1.50
TL               -2.30
CASH             -2.30
```

Arrangement key registrations

Key operations can be assigned to an <ARRANGE> (arrangement key). Then, simply pressing <ARRANGE> performs all of the key functions assigned to it.
Key operations can also be assigned to an address code. Then, when you input the address code using <ARRANGE>, all of the key functions assigned to the address code are performed.

Example 1

OPERATION	RECEIPT

Arrangement 1		
Item 1	PLU 1	($8.00)
	Quantity	1
Item 2	PLU 2	($5.00)
	Quantity	1
Payment	Cash	$13.00

OPERATION: `ARR`

RECEIPT:
```
1 PLU0001        $8.00
1 PLU0002        $5.00
  TL           $13.00
  CASH          $13.00
```

Example 2

OPERATION	RECEIPT

Arrangement 5		
Item 1	Dept 1	$1.00
	Quantity	1
Item 2	Dept 2	$2.00
	Quantity	1
Payment	Cash	$3.00

OPERATION: `5` `ARR`

RECEIPT:
```
1 DEPT01         $1.00
1 DEPT02         $2.00
  TL            $3.00
  CASH           $3.00
```

Set menu

When you register a set menu, its total amount is added to the PLU totalizer and counter. The price of each set menu item is also added to each respective PLU totalizer and counter.

Example

OPERATION	RECEIPT

Set menu	PLU 35	$5.00
Item 1	PLU 1	--
Item 2	PLU 2	--
Item 3	PLU 3	--
Item 4	PLU 4	--
Payment	Cash	$5.00

RECEIPT:
```
1 PLU0035        $5.00
  PLU0001
  PLU0002
  PLU0003
  PLU0004
  TL            $5.00
  CASH           $5.00
```

Advanced Operations

Currency exchange function

When <CE> (currency exchange key) is pressed, a current subtotal including tax is converted directly into foreign currency and the result is displayed, and the subsequent finalization is handled using the foreign currency. The currency exchange function is released by finalizing a transaction, partial tender operation, receipt issuance, or by pressing <SUBTOTAL>.

Before using the currency exchange function, it is necessary to program the conversion rate.
Registering foreign currency

Full amount tender in foreign currency

* Pre-programmed exchange rate: ¥ 100 = $0.9524

Important!

Tenders in a foreign currency can be registered using the [CA/AMT TEND] and [CHK/ TEND] only.

Other finalize keys cannot be used.

OPERATION	DISPLAY	RECEIPT

`1` `0` `00` `1` ← Enter the unit price and press the applicable department key.	`10.00`
	(Displays in $)
		1 DEPT01 $10.00
		1 DEPT02 $20.00
		   TL **$30.00**
		   CE
		   CASH ¥5,000
		   CASH $47.62
		   CG $17.62

`2` `0` `00` `2` ← Enter the next unit price and press the applicable department key.	`20.00` (Displays in $)	
`CE` `SUB TOTAL` ← Press `CE` and `SUB TOTAL` without entering a numeric value. This operation converts the subtotal (including tax) dollar value into yen by applying a pre-programmed exchange rate. The result is shown on the display and printed on the receipt/journal by programming.	`3.150` (Displays in ¥: 3,150)	
`5` `0` `00` `CE` (5,000) ← Enter the amount tendered in yen and press `CE`. This operation converts the entered yen amount into dollars by applying a pre-programmed exchange rate. The result is shown on the display.	`5.000`	
`CA/AMT /TEND` ← Press to finalize the transaction. Note that you do not need to reenter the dollar amount. The register automatically calculates the change amount due in dollars and shows it on the display, receipts and journal.	`17.62` (Displays in $)	

Partial tender in a foreign currency

* Pre-programmed exchange rate: ¥ 100 = $0.9524

OPERATION	DISPLAY	RECEIPT

1 0 00 1 ← Enter the unit price and press the applicable department key.

Display: **10.00** (Displays in $)

2 0 00 2 ← Enter the next unit price and press the applicable department key.

Display: **20.00** (Displays in $)

```
1 DEPT01        $10.00
1 DEPT02        $20.00
  TL           $30.00
  CE
  CASH          ¥2,000
  CASH         $19.05
  CHECK        $10.95
```

CE **SUB TOTAL** ← Press CE and SUB TOTAL without entering a numeric value. This operation converts the subtotal (including tax) dollar value into yen by applying a pre-programmed exchange rate. The result is shown on the display and printed on the receipt/journal by programming.

Display: **3.150** (Displays in ¥: 3,150)

2 0 00 CE
(2,000) ← Enter the partial amount tendered in yen and press CE.
This operation converts the entered yen amount into dollars by applying a pre-programmed exchange rate. The result is shown on the display.

Display: **2.000**

CA/AMT TEND ← Press [CA/AMT TEND] to specify cash tender for the yen partial tender. Note that you do not need to reenter the dollar amount.
The register automatically deducts the dollar equivalent of the yen amount tendered from the total amount due and shows the amount on the display.

Display: **10.95** (Displays in $)

CHK/ TEND ← Press to finalize the transaction.

Display: **10.95** (Displays in $)

    FS/ST
5 00 FS/TD
```

```
1 DEPT01    T1 F   $1.00
1 DEPT04           $0.50
  TA1              $2.00
  TX1              $0.08
  TL            $2.58
  FSST             $2.08
  FSTD             $5.00
  FSCG             $2.00
  CG               $0.42
```

When food stamp items are included in a transaction, the amount of change due in cash is applied as a cash amount tendered for cash (nonfood stamp) items. In this example, the $0.50 purchased (department 4) is automatically deducted from the $0.92 cash due in change from the food stamp purchase (department 4).

Example 4

	OPERATION	RECEIPT

Item 1	Dept. 1	$1.00
	Taxable	1, F/S
Item 2	Dept. 2	$2.00
	Taxable	2
Item 3	Dept. 3	$3.00
	Taxable	No
Payment	Food stamp	$5.00
	Cash	$4.14

```
1 00 1
2 00 2
3 00 3
    FS/ST
5 00 FS/TD
   CA/AMT
   /TEND
```

```
1 DEPT01    T1 F   $1.00
1 DEPT02    T2     $2.00
1 DEPT03           $3.00
  TA1              $1.00
  TX1              $0.04
  TA2              $2.00
  TX2              $0.10
  TL            $6.14
  FSST             $1.04
  FSTD             $5.00
  FSCG             $3.00
  CASH             $4.14
```

The following calculation is performed internally to apply the cash change due on the food stamp transaction to the balance due of the cash transaction.

	Food stamp transaction	Cash transaction
Price items:	$1.00	$5.00
Tax:	$0.04	$0.10
Total due:	$1.04	$5.10
Amount tendered:	$5.00 (food stamp)	$4.14 (cash), $0.96 (change from food stamp)
Amount due:	$1.04	
Change amount due:	$3.00 (food stamp), $0.96 (cash)	
Total:		$5.10

Food stamp registration (Illinois rule)

No change due

Example 3

		OPERATION	RECEIPT

Item 1	Dept. 1	$2.00
	Taxable	1, F/S
Item 2	Dept. 2	$3.00
	Taxable	2, F/S
Payment	Food stamp	$1.00
	Cash	$4.19

OPERATION

```
2 00 1
3 00 2
    FS/ST
1 00 FS/TD
    CA/AMT
    /TEND
```

RECEIPT

```
1 DEPT01    T1 F   $2.00
1 DEPT02    T2 F   $3.00
  FSST             $5.00
  FSTD             $1.00
  TA1              $1.00
  TX1              $0.04
  TA2              $3.00
  TX2              $0.15
  CASH             $4.19
```

In this case, the result of the taxable 1 amount is $1.00 (2.00 - 1.00), the taxable 2 amount is $3.00.

Example 4

OPERATION

Item 1	Dept. 1	$1.00
	Taxable	1, F/S
Item 2	Dept. 2	$5.00
	Taxable	2, F/S
Payment	Food stamp	$4.00
	Cash	$2.10

OPERATION

```
1 00 1
5 00 2
    FS/ST
4 00 FS/TD
    CA/AMT
    /TEND
```

RECEIPT

```
1 DEPT01    T1 F   $1.00
1 DEPT02    T2 F   $5.00
  FSST             $6.00
  FSTD             $4.00
  TA2              $2.00
  TX2              $0.10
  CASH             $2.10
```

In this case, the result of the taxable 1 amount is $0.00 (1.00 - 1.00),
the taxable 2 amount is $2.00 (5.00 - (3.00 - 1.00)).

Mixed food stamp/cash change

Example 1

| | OPERATION | RECEIPT |

Item 1	Dept. 1	$1.50
Item 1	Taxable	1, F/S
Item 2	Dept. 1	$2.00
Item 2	Taxable	1, F/S
Item 3	Dept. 4	$3.00
Item 3	Taxable	F/S
Payment	Food stamp	$10.00

OPERATION

1 5 0 `1`
2 00 `1`
3 00 `4`
`FS/ST`

1 0 00 `FS/TD`

RECEIPT

```
1 DEPT01    T1 F    $1.50
1 DEPT01    T1 F    $2.00
1 DEPT04       F    $3.00
  FSST               $6.50
  FSTD              $10.00
  FSCG               $3.00
  CG                 $0.50
```

The change in food stamp transactions is automatically calculated as cash for amount of $1.00 or less, and as food stamps for amounts greater than $1.00. In the above example, the total amount of change due is $3.50 ($3.00 in food stamps and $0.50 in cash).

Example 2

Item	Dept. 1	$2.00
Item	Taxable	1, F/S
Payment	Food stamp	$5.00

OPERATION

2 00 `1`
`FS/ST`

5 00 `FS/TD`

RECEIPT

```
1 DEPT01    T1 F    $2.00
  FSST               $2.00
  FSTD               $5.00
  FSCG               $3.00
```

Advanced Operations

Advanced Operations

Mixed food stamp/cash change (continued…)

Example 3

OPERATION **RECEIPT**

Item 1	Dept. 1	$2.00
	Taxable	1, F/S
Item 2	Dept. 1	$1.20
	Taxable	1, F/S
Item 3	Dept. 3	$0.30
	Taxable	1
Payment	Food stamp	$5.00

```
2 00  1
1 2 0  1
3 0  3
FS/ST

5 00  FS/TD
```

```
1 DEPT01    T1 F    $2.00
1 DEPT01    T1 F    $1.20
1 DEPT03    T1      $0.30
  TA1               $0.30
  TX1               $0.01
  FSST              $3.20
  FSTD              $5.00
  FSCG              $1.00
  CG                $0.49
```

When food stamp items are included in a transaction, the amount of change due in cash is applied as a cash amount tendered for cash (nonfood stamp) items. In this example, the $0.30 purchase is automatically deducted from the $0.80 cash due in change from the food stamp purchase.

Example 4

OPERATION **RECEIPT**

Item 1	Dept. 1	$1.00
	Taxable	1, F/S
Item 2	Dept. 1	$2.50
	Taxable	1, F/S
Item 3	Dept. 3	$5.00
	Taxable	No
Payment	Food stamp	$5.00
	Cash	$4.50

```
1 00  1
2 5 0  1
5 00  3
FS/ST

5 00  FS/TD
CA/AMT
/TEND
```

```
1 DEPT01    T1 F    $1.00
1 DEPT01    T1 F    $2.50
1 DEPT03            $5.00
  FSST              $3.50
  FSTD              $5.00
  FSCG              $1.00
  CASH              $4.50
```

The following calculation is performed internally to apply the cash change due on the food stamp transaction to the balance due of the cash transaction.

	Food stamp transaction	Cash transaction
Price items:	$3.50	$5.00
Tax:	$0.00	$0.00
Total due:	$3.50	$5.00
Amount tendered:	$5.00 (food stamp)	$4.50 (cash), $0.50 (change from food stamp)
Amount due:	$3.50	
Change amount due:	$1.00 (food stamp), $0.50 (cash)	
Total:		$5.00

Electronic benefits transfer

In addition to standard food stamp tender finalizations, this model also allows finalization for tenders electronic benefits transfer (EBT) card.
EBT tenders can be accepted for New Jersey rule or Illinois rule food stamp tenders, as well as for food stamp tenders that do not follow these rules.

About mixed EBT card tenders

When the register is programmed to prohibit an EBT amount tendered that exceeds the food stamp subtotal, nonfood stamp items cannot be paid for using an EBT card. In this case, the following applies:
- ST – (EBT/TEND – FS/ST) = Balance due (the remaining balance due must be finalized using another finalize key.)
  When the register is programmed to allow an EBT amount tendered that exceeds the food stamp subtotal, nonfood stamp items can be paid for using an EBT card. In this case, there are two possible situations:
- ST > EBT/TEND
  ST – (EBT/TEND – FS/ST) = Balance due (the remaining balance due must be finalized using another finalize key.)
- EBT/TEND > or = ST
  EBT/TEND – ST = cash change

No change due

Example 1

Item 1	Dept. 1	$1.00
	Taxable	1, F/S
Item 2	Dept. 2	$2.00
	Taxable	2, F/S

Tips

Example

Item 1	Unit price	$3.00
	Dept.	1
Item 2	Unit price	$5.00
	Dept.	2
Tip	Amount	$0.80
Payment	Cash	$10.00

OPERATION

```
3 00 1
5 00 2
   SUB TOTAL

8 0 TIP
1 0 00 CA/AMT TEND
```

RECEIPT

```
1 DEPT01          $3.00
1 DEPT02          $5.00
  TIP             $0.80
  TL            $8.80
  CASH           $10.00
  CG              $1.20
```

Inputting the number of customers

Example 1

Item 1	Unit price	$15.00
	Dept.	1
Item 2	Unit price	$5.00
	Dept.	2
Customer	Number	2
Payment	Cash	$20.00

OPERATION

2 CST
1 5 00 1
5 00 2
SUB TOTAL
CA/AMT TEND

RECEIPT

```
CT                      2
1 DEPT01          $15.00
1 DEPT02           $5.00
  TL             $20.00
  CASH           $20.00
```

Example 2

You can only use the following operation to re-input the number of customers when <CUSTOMER> (customer number key) is preset to allow re-input. When programming prohibits re-input of the number of customers, this operation causes an error.

OPERATION

3 CST
1 5 00 1
5 00 2
2 CST
SUB TOTAL
CA/AMT TEND

RECEIPT

```
CT                      3
1 DEPT01          $15.00
1 DEPT02           $5.00
CT                      2
  TL             $20.00
  CASH           $20.00
```

You can re-input the number of customers either immediately after the initial input or during later registration.

Example 3

You can use the following operation to add customers to an original number of customers input (when addition to the number of the customer is allowed).

OPERATION

3 CST
1 5 00 1
5 00 2
2 CST
SUB TOTAL
CA/AMT TEND

RECEIPT

```
CT                      3

Text recall

This procedure is used to recall text by inputting the address where the text is stored. The recalled text is printed on the receipt and journal.

Example

Item 1	Unit price	$46.00
	Dept.	1
Item 2	Unit price	$10.00
	Dept.	2
Payment	Cash	$56.00
Text 1	MEDIUM SIZE	
Text 2	SMALL SIZE	

OPERATION

`4` `6` `00` `1`
`1` `TEXT RECALL`
`1` `0` `00` `2`
`2` `TEXT RECALL`
`SUB TOTAL`
`CA/AMT TEND`

RECEIPT

```
   CT              3
 1 DEPT01     $46.00
MEDIUM SIZE
 1 DEPT02     $10.00
SMALL SIZE
   TL        $56.00
   CASH      $56.00
```

Temporarily releasing compulsion

<OPEN 2> (open 2 key) can be programmed to release specific compulsion.

Example 1

Item	Unit price	$10.00
	Dept.	1
Payment	Check	$10.00
Slip validation compulsory		

OPERATION

`1` `0` `00` `1`
`1` `0` `00` `CHK/TEND`

`2` `00` `2`
Validation compulsory

`OPEN 2`

RECEIPT

```
 1 DEPT01     $10.00
   TL        $10.00
   CHECK      $10.00
```

Validation compulsory is temporarily released.

Example 2

Input customer No. compulsory		
Item	Unit price	$10.00
	Dept.	1
Payment	Check	$10.00

OPERATION

`1` `0` `00` `1`
Input customer No. compulsory

`OPEN 2`
Compulsory is temporarily released.

`1` `0` `00` `1`
`1` `0` `00` `CHK/TEND`

RECEIPT

```
 1 DEPT01     $10.00
   TL        $10.00
   CHECK      $10.00
```

Printing slip

To perform batch printing on the slip printer, you must first use the memory allocation operation (see program 5 mode in the dealer's manual) to reserve slip buffer memory. The capacity of the slip buffer memory is determined by the number of units of slip buffer memory reserved by the memory allocation operation.

The register can be programmed to check the status of the registration buffer memory whenever slip batch printing is performed, and sound an alarm when the buffer memory is almost full. The alarm sounds when there are 12 lines or less remaining, and once it starts to sound, the only operation you can perform is the cancel operation or operations using one of the following keys.

- <CA/AMT TEND> (cash/amount tendered key) operation
- <CH> (charge key) operation
- <CHK/TEND> (check tendered key) operation
- <DEPOSIT> (deposit key) operation
- <NEW BALANCE> (new balance key) operation
- <SUBTOTAL> (subtotal key) operation

You must perform one of above operations when the registration buffer alarm sounds. Any other operations results in an error.

Printing slips

The cash register can be connected to the optional SP-1300 slip printer, which features an automatic feed function and automatic back feed function.

• Automatic feed function

This function makes it possible to program the number of line feeds that should be inserted from the normal print start position before starting slip printing of a new slip. Even if line feeds are programmed for this function, they are not inserted for validation printing, check endorsement printing, and check printing performed using the slip printer. Note also that line feeds are not inserted automatically at the beginning of a second slip when the transaction requires printing that extends from one slip to another.

• Automatic back feed function

This function performs automatic back feed following slip printing, validation printing, and endorsement printing on the slip printer. The slip paper is released once the back feed operation is complete.

• Manual feed function

<SLIP FEED/RELEASE> (slip feed/release key: assigned to the register's keyboard using the program 4 mode) can be used for manual feed of the slip paper. You perform manual feed by inputting a value for the number of lines (up to two digits in the range of 1 to 99) and then press <SLIP FEED/RELEASE>.

### • Manual back feed function

<SLIP BACK FEED/RELEASE> (slip back feed/release key: assigned to the register's keyboard using the program 4 mode) can be used for manual back feed of the slip paper. Manual back feed can be performed by inputting a value for the number of lines (up to two digits in the range of 1 to 99) and then press <SLIP BACK FEED/RELEASE>.

You can print slips using automatic or manual batch printing. The slip print operation can be performed in REG1, REG2, and RF modes only.
Finalizing a registration without inserting a slip paper into the slip printer when the register is programmed as "slip paper insertion into slip printer compulsory before finalizing registration" produces an error.

Advanced Operations

Advanced Operations

To perform auto batch printing 1

Registration → Insert a slip paper into the slip printer. → Finalization → Remove slip paper.

Print receipt/journal. Print receipt/journal. Print slip.

To perform auto batch printing 2

Registration/ finalization → Insert a slip paper into the slip printer. → **SLIP PRINT** → Remove slip paper.

Print receipt/journal. Print slip.

About the maximum number of slip lines

You can program the maximum number of lines that can be printed on a slip. Once you do, any attempt to exceed the preset maximum results in an error. When such an error occurs, press <C>, change slip paper and press <SLIP PRINT> to restart printing.

Check tracking systems

Check tracking system

With the check tracking system, the amount, check number, number of slip print lines, store number, date/time and registration detail data are stored in two files (check tracking index file and check tracking detail file).

- Check tracking detail file and index file are cleared by the following timing:
  1. The check is cleared after printing finalized data on slip or guest check receipts, or the check is also cleared when the new or old check operation is made.
  2. The check is cleared after printing finalized data on slip or guest check receipt, or check is also cleared when the same finalized check number is assigned in new check operation.
  You can select one of these options by programming.
- Auto new balance function
  The register can be programmed so that whenever a clerk (by clerk key) signs off while a check is open, a <NEW BALANCE> operation is automatically performed to temporarily finalize the open check.
- You can specify a range of checks that can be opened by each clerk. Once you do, any attempt by a clerk to open a check using a number that is not within his specified range results in an error.
- Either of the following two operations can be used to correct input of a wrong check number.
  <NEW CHECK>
  Re-input the correct check number, or cancel the original check number, issue a receipt, and then re-input the correct check number.
  <OLD CHECK>, <NEW/OLD>
  Temporary finalize the original check number, issue a receipt, and then re-input the correct check number.

Opening a check

Example

Check#		1234
Table#		33
Item 1	Dept 1	$10.00
	Quantity	2
Item 2	Dept 2	$20.00
	Quantity	2
Item 3	Dept 3	$30.00
	Quantity	1

OPERATION

CHECK No. 1234

  ST             $90.50
1 DEPT01         $30.00
1 DEPT02         $10.00
+                 $0.50
  SRVC TL
              ·131.00
```

- The table number is stored in the check tracking index memory so its input is not required in this operation even if table number input is preset as compulsory. Table number input after inputting the check number may be performed, however, without generating an error.
- Once a check is opened under a number in a certain mode (REG1 or REG2), the same mode must be used to make additions to the check.

  CASH           $40.00
  CG              $0.00
```

Advanced Operations

Price reductions (red price)

You can use the reduced price function to change a price; generally to an amount that is less than the normal price. You can program the register so that it prints the normal price, and the difference between the two prices on the receipt, while on journal, these items are always printed.
The following functions are able to work with red price.

- Department and PLU
- Quantity extension (Preset price is required for both department and PLU.)
- Amount limitation of item program (It effects to new price.)

  Note that you cannot use red price with the following types of item.

  - Department and PLUs programmed with negative unit prices
  - Set menus and link PLUs
  - Multiplication operations that use the format: Amount × Quantity

Example 1

OPERATION   **RECEIPT**

Item	Dept 1	$6.00
	Red price	$4.00
Payment	Cash	$4.00

4 00 [RED PRICE]

Input a reduced price.

6 00 1

[CA/AMT TEND]

```
RED              $6.00    — Old price
RED PRC          -2.00    — Reduced price
1 DEPT01         *4.00    — New price (Difference
TL              $4.00       between two prices)
CASH             $4.00
```

Example 2

OPERATION   **RECEIPT**

Item	PLU 1	$4.00
	Red price	$2.00
Payment	Cash	$6.00

3 [X/FOR DATE TIME]

2 00 [RED PRICE]

Input a reduced price.

1 [PLU]

[CA/AMT TEND]

```
RED             $12.00
RED PRC          -6.00
3 PLU0001        *6.00
TL              $6.00
CASH             $6.00
```

Condiment/preparation PLUs

You can force entering condiment or preparation PLU after the main PLU registration by programming.

Example (condiment PLU)

Main item	PLU 1	$10.00
	PLU 11	$0.10
Condiment	PLU 12	$0.20
	PLU 13	$0.30
Payment	Cash	$10.60

OPERATION

1 **PLU**

Registering main PLU.
No condiment registration
occurs an error condition.

1 **1** **PLU**

1 **2** **PLU**

1 **3** **PLU**

Scanning PLU

Product barcodes are read by scanning with hand-held scanner, and are filed in the scanning PLU file together with the unit price, item descriptor, programming status, link department, totalizer and counter.

When a barcode is entered by scanning, or from the keyboard by using <OBR> (OBR key) or <One touch NLU> (One touch NLU key) and it has been filed in the scanning PLU file, the preset unit price is accumulated to its own totalizer and other appropriate totalizers.

Scanning PLUs include UPC-A/UPC-E/EAN-13/EAN-8, source marking, in-store marking code.

Item registration

By scanner/code input/one touch NLU key

				OPERATION	RECEIPT

Entering characters

In this section, the method to enter descriptors or messages (characters) to the cash register during programming is described.
Characters are specified by character keyboard or by codes. In the first half of this section, the usage of character keyboard is described. In the latter half, inputting method by character code is described.

Using character keyboard

Example:

Input " A p p l e J u i c e ",
enter "DBL""A" "SHIFT""p" "p" "l" "e" "SPACE" "CAP""J" "SHIFT""u" "i" "c" "e" 00 .
① **Shift key**
Press this key to shift the following characters through the uppercase letter, lowercase letter and numerics.

② **Left cursor key**
Press this key to shift the character setting position to the left one by one. This key is used to correct already entered characters.

③ **Right cursor key**
Press this key to shift the character setting position to the right one by one. This key is used to correct already entered characters.

④ **Double size letter key**
Press this key to specify that the next character you input to a double size character.

⑤ **Space key**
Press this key to set a space.

⑥ **Alphabet keys**
Press these keys to input characters.

⑦ **Numeric keys**
Press these keys to enter program codes, memory number and character codes.

⑧ **Character fixed key**
Press this key to enter when the alphabetic entry for a descriptor, name or message has been completed.

⑨ **Backspace/Character code fixed key**
Press this key to register one character with code (2 or 3 digit).
It clears the last input character, much like a back space key. (Does not clear the double size letter key entry.)

⑩ **Program end key**
Press this key to terminate the character programming.

⑪ **Character enter key**
Press this key to register the programmed characters.

⑫ **Insert/Override key**
Press this key to change the status "Insert" between the original characters or "Override" the original characters.

Advanced Operations

Advanced Operations

Entering characters by code

Every time you enter a character, choose character codes by the character code list (below) and press the ▪ key to settle it. After you complete entering characters, press the 00 key to fix them.

Example:

Input " A p p l e J u i c e ",
enter " 255 ▪ 65 ▪ 112 ▪ 112 ▪ 108 ▪ 101 ▪ 32 ▪ 74 ▪ 117 ▪ 105 ▪ 99 ▪ 101 ▪ 00 "

Printing read/reset reports

• Daily sales read report ("X1" mode)

You can print read reports at any time during the business day without affecting the data stored in the cash register's memory.

• Daily sales reset report ("Z1" mode)

You should print reset reports at the end of the business day.

Important!

- The reset operation issues a report and also clears all sales data from the cash register's memory.
- Be sure to perform the reset operations at the end of each business day. Otherwise, you will not be able to distinguish between the sales data for different dates.

To print the individual department, PLU read report

Advanced Operations

Advanced Operations

• Periodic sales read report ("X2" mode)

You can print read reports at any time during the business day without affecting the data stored in the cash register's memory.

• Periodic sales reset report ("Z2" mode)

You should print reset reports at the end of the business day.

To print the periodic 1/2 sales read/reset reports

These reports show sales breakdowns of sales by any two kinds of period you want.

Advanced Operations

Troubleshooting

This section describes what to do when you have problems with operation.

When an error occurs

Errors are indicated by an error codes. When this happens, you can usually find out what the problem is as illustrated below.

Press $\boxed{C}$ and check the appropriate section of this manual for the operation you want to perform.

| Error code	Message	Meaning	Action
E001	WRONG MODE	Mode switch position changed before finalization.	Return the mode switch to its original setting and finalize the operation.
E003	WRONG OPERATOR	Clerk button pressed before finalization of a registration being performed under another clerk button. The signed on clerk differs from the clerk performed the tracking check registration.	Press the original clerk button and finalize the transaction before pressing another clerk button. Input correct check number or assign the proper clerk number.
E004	ERROR INIT/FC	Initialization or unit lock clear operation in progress.	Complete operation.
E005	INSUFFICIENT MEMORY	Memory allocation exceeds total memory capacity.	Reallocate memory or expand memory (if possible).
E008	PLEASE SIGN ON	Registration without entering a clerk number.	Enter a clerk number.
E009	ENTER PASSWORD	Operation without entering the password.	Enter password.
E010	CLOSE THE DRAWER	The drawer is left open longer than the program time (drawer open alarm).	Close the drawer.
E011	CLOSE THE DRAWER	Attempt to register while the cash drawer is open.	Shut the cash drawer.
E016	CHANGE BACK TO REG MODE	Two consecutive transactions attempted in the refund mode.	Switch to another mode and then back to the RF mode for the next transaction.
E017	ENTER CHK/TBL NUMBER	Attempt made to register an item without inputting a check number.	Input a check number.
E018	ENTER TABLE NUMBER	Attempt made to register an item without inputting a table number.	Input a table number.
E019	ENTER NUMBER OF CUSTOMERS	Finalize operation attempted without entering the number of customer.	Enter the number of customer.
E021	NO DEPT LINK	No department linked PLU is registered.	Correct the program.
E023	STOCK SHORTAGE	Actual stock quantity becomes less than the minimum stock quantity.	Perform stock maintenance.
E024	NO STOCK	Actual stock quantity becomes/is negative.	Perform stock maintenance.
E026	ENTER CONDIMENT/ PREPARATION PLU	No condiment/preparation PLU is registered.	Register condiment/preparation PLU.
E029	IN THE TENDER OPERATION	Item registration is prohibited, while partial tender.	Finalize the transaction.
E030	PRESS RATE TAX KEY	Finalization of a transaction attempted without registering rate-tax.	Register <RATE TAX>.
E031	PRESS ST KEY	Finalization of a transaction attempted without confirming the subtotal.	Press <SUBTOTAL>.
E032	PRESS FSST KEY	Finalization of a transaction attempted without confirming of the food stamp subtotal.	Press <FS/ST>.
E033	ENTER TENDERED AMOUNT	Finalize operation attempted without entering amount tender.	Enter the amount tendered.
E035	CHANGE AMOUNT EXCEEDS LIMIT	Change amount exceeds preset limit.	Input amount tendered again.
E036	REMOVE MONEY FROM THE DRAWER	Contents of the drawer exceed programmed limit.	Perform pick up operation.
E037	DIGIT OR AMOUNT LIMITATION OVER	High amount lock out/low digit lock out error	Enter correct amount.
E038	PERFORM MONEY DECLARATION	Read/reset operation without declaring cash in drawer. This error appears only when this function is activated.	Perform money declaration.
E040	ISSUE GUEST RECEIPT	Attempt to register a new transaction without issuing a guest receipt.	Issue a guest receipt.
E041	PRINT VALIDATION	Attempt to register a new transaction without validation.	Perform validation operation.
E042	INSERT VLD PAPER AND RETRY	Validation paper (slip printer) has run out.	Insert new validation paper.
E044	PRINT CHEQUE	Attempt to register a new transaction without printing check.	Perform check print.
E045	PRINT CHECK EN- DORSEMENT	Attempt to register a new transaction without printing check endorsement.	Perform check endorsement.
E046	REG BUFFER FULL	Registration buffer full.	Finalize the transaction.
E047	PRINT BILL	Separate check buffer full.	Allocate sufficient separate check buffer.
E048	INSERT SLIP PAPER	Attempt to register a new transaction without printing slip.	Perform slip printing operation.

Troubleshooting

Error code	Message	Meaning	Action
	AND RETRY	No paper is inserted or paper is out in the slip printer.	Insert new slip paper.
E049	CHECK MEMORY FULL	Check tracking index memory full.	Finalize and close the check number currently used.
E050	DETAIL MEMORY FULL	Check tracking detail memory full.	Finalize and close the check number currently used.
E051	CHK/TBL NO. IS OCCU-PIED	Attempt to made use <New Check> to open a new check using a number that is already used for an existing check in check tracking memory.	Finalize and close the check that is currently under the number that you want to use or use a different check number.
E052	CHK/TBL NO. IS BUSY	Attempt to use the same check number whilst the specified number is being used in the other terminal.	Use another check number or close the check at that terminal.
E053	CHK/TBL NO. IS NOT OPENED	Attempt made to use <Old Check> reopen a new check using a number that is not used for an existing check in check tracking memory.	Use the correct check number (if you want to reopen a check that already exists in check tracking memory) or use <New Check> to open a new check.
E054	OUT OF CHK/TBL NO. RANGE	Check number range over.	Enter correct number.
E055	IN THE SEP CHK OPERA-TION	Normal registration is prohibited during separate check operation.	Terminate separate check operation.
E056	CHK RANGE FULL	All check number are occupied in range.	Recall the stored data.
E059	PRESS EAT-IN OR TAKE-OUT KEY	Attempt to finalize a transaction without specifying <EAT-IN> or <TAKE-OUT>.	Press <EAT-IN> or <TAKE-OUT>.
E060	PRINTER OFFLINE	External printer offline	
E061	PRINTER ERROR	External printer went down.	
E062	PRINTER PAPER END	External printer paper end	Replace new paper.
E064	PRINT BUFFER FULL	Printing buffer full	
E066	PRINT FROM THE BEGIN-NING OF THE TRANSAC-TION	Attempt to print the last separated transaction on slip.	Print from the beginning of the transaction
E075	NEGATIVE BALANCE CANNOT BE FINALIZED	Attempt to finalize a transaction when balance is less than or equal to zero.	Register item(s) until the balance becomes positive amount.
E085	DATA EXIST IN CON-SOLIDATION FILE	Data exists in the consolidation file.	Clear the data.
E100	OPERATE AT THE MASTER TERMINAL	Prohibit master operation.	Perform it at master terminal.
E101	PLU MAINTENANCE FILE FULL. PRESS <#2> TO EXIT	Scanning PLU direct maintenance/batch maintenance file becomes full.	Terminate the maintenance.
E103	PLU CODE IS NOT EXIST. INPUT THE PLU CODE	PLU code is not existed in the file.	Enter proper PLU code.
E105	PLU FILE FULL	Scanning PLU/not found PLU file full	Modify the designated item.
E106	ITEM EXISTS IN THE PLU FILE	The designated item has already existed in the scanning PLU file.	
E112	CLOSE THE JOURNAL PLATEN ARM	The journal platen arm is opened.	Close the journal platen arm.
E114	CLOSE THE RECEIPT PLATEN ARM	The receipt platen arm is opened.	Close the receipt platen arm.
E139	NEGATIVE BALANCE IS NOT ALLOWED	Attempt to register <−> or <CPN> when the balance becomes negative.	Enter proper minus/coupon amount.
E146	ARRANGEMENT FILE FULL	Arrangement file is full.	Set the arrangement properly.
E164	EMPLOYEE NO. IS NOT FOUND IN THE EMPLOYEE FILE	Attempt to enter a wrong employee number which is not set to the employee file.	Enter proper employee number.
E165	EMPLOYEE NO. IS NOT CLOCKING-IN.	Attempt to clock out the employee who is not clocked in.	Enter proper employee number.
E166	EMPLOYEE NO. IS OCCUPIED	Attempt to clock in the employee who has clocked in already.	Enter proper employee number.
E176	TIME&ATTENDANCE FILE FULL	Time and attendance file becomes full.	Delete unused employee number or reallocate the time and attendance file.
E200	INSERT CF CARD	No CF card is set.	Set CF card.
E201	ILLEGAL FORMAT	Illegally formatted CF card	Format the CF card.
E202	FILE NOT FOUND	The designated file is not found in the CF card.	Enter proper file name.
E203	INSUFFICIENT MEMORY	Insufficient memory in the CF card.	Use a vacant (formatted) CF card.
E205	FILE ALREADY EXIST.	Can not write, because designated file has already been in the CF card.	Check the operation and retry.

Troubleshooting

Troubleshooting

When the register does not operate at all

Perform the following check whenever the cash register enter an error condition as soon as you switch it on. The results of this check are required by service personnel, so be sure to perform this check before you contact a CASIO representative for servicing.

Start

YES ———
N O ·······

Is register plugged in? ····· Plug in the power cord.

Is power on? ····· Set the mode switch to any position other than OFF.

Do figures appear on the display? — Is the electrical outlet active? ····· Use other outlet.

Contact CASIO service representative.

Do keys function? ····· Is the mode position correct? ····· Set to correct position.

Contact CASIO service representative.

Does paper feed? ····· Is paper loaded correctly? Is the platen arm closed correctly? ····· Load paper. Set platen arm correctly.

Contact CASIO service representative.

Clearing a machine lock up

If you make a mistake in operation, the cash register may lock up to avoid damage to programs and preset data. Should it happens, you can use the following procedure to clear the lock up without losing any data.

1 Power off the register.
2 Insert the PGM key in the mode switch.
3 Press down [RECEIPT FEED], and turn the mode switch to PGM mode.
4 The display shows ten Fs, then release [RECEIPT FEED].
5 Press [SUB TOTAL]. The display shows ten Fs and issue a receipt.

Important!

• If the register does not show ten Fs, never press [SUB TOTAL] and call service representative.

Troubleshooting

In case of power failure

If the power supply to the cash register is cut by a power failure or any other reason, simply wait for power to be restored. The details of any on-going transaction as well as all sales data in memory are protected by the memory backup batteries.

- Power failure during a registration
  The subtotal for items registered up to the power failure is retained in memory. You will be able to continue with the registration when power is restored.
- Power failure during printing a read/reset report
  The data already printed before the power failure is retained in memory. You will be able to issue a report when power is restored.
- Power failure during printing of a receipt and the journal
  Printing will resume after power is restored. A line that was being printed when the power failure occurred is printed in full.
- Other
  The power failure symbol is printed and any item that was being printed when the power failure occurred is reprinted in full.

Notes

```
 L          0.00
```

If this indicator appears when you switch the cash register on, it can mean one of three things:
- No memory backup batteries are loaded in the cash register.
- The power of the batteries loaded in the unit is below a certain level.
- The batteries loaded in the unit are dead.
To clear this sign, press $\boxed{C}$ key.

Important !

Whenever the low battery indicator appears on the display, load a set of three new batteries as soon as possible. If there is a power failure or you unplug the cash register when this indicator appears, you will lose all of your sales data and settings.
**BE SURE TO KEEP THE POWER CORD OF THE CASH REGISTER
PLUGGED IN WHENEVER YOU REPLACE THE BATTERIES.**

Troubleshooting

To replace journal paper

Step 1

Set the mode switch to the REG position and remove the printer cover.

REG2   X1
REG1   Z1
OFF   X2/Z2
RF
PGM

Step 2

Press [JOURNAL FEED] to feed about 20 cm of paper.

Step 3

Cut the journal paper at the point where nothing is printed.

Step 4

Remove the journal take-up reel from its holder.

Step 5

Remove the paper guide from the take-up reel.

Step 6

Slide the printed journal from the take-up reel.

Step 7

Open the platen arm.

Step 8

Remove the old paper roll from the cash register.

Step 9

Load new paper.
Go to the step 3 described on page 13 of this manual.

To replace receipt paper

Step 1

Set the mode switch to the REG position and remove the printer cover.

Step 2

Open the platen arm.

Step 3

Remove the old paper roll from the cash register.

Step 4

Load new paper.
Go to the step 3 described on page 12 of this manual.

Slip printer:	SP-1300
Cable:	PRT-CB-8C
Power supply:	31AD-U or 31AD-E

Consult with your CASIO dealer for details.

User Maintenance and Options

Specifications

Input method

Entry:	10-key system, buffer memory 8 keys (2-key roll over)
Department:	Full key system

Display

Main:	Amount 10 digits (zero suppression); No. of repeats, total, change, receipt on/off, transaction indicator
	Descriptor 8 digits; item descriptor, clerk name
Customer:	Amount 8 digits (zero suppression): total, change indicator

Printer

Receipt:	Thermal alpha-numeric system 24 digits, receipt on/off switch (key)
	Store name or slogan is printed automatically
Journal:	Thermal alpha-numeric system 24 digits
	Automatic take up roll winding
Paper roll:	58 (W) × 80 (D) mm
Paper thickness:	0.06 ~ 0.085 mm
Paper feed:	Separate for receipt and journal
Print speed:	About 14 l/s

Listing capacity

Amount:	99999999
Quantity:	9999.999
Tendered amount:	9999999999
Percent:	99.99
Tax rate:	9999.9999
Numbers:	9999999999999999

Chronological data

Date print:	Automatic date printout on receipt or journal, automatic calendar
Time print:	Automatic time printout on receipt or journal, 24-hour system/12-hour system

Alarm

Key catch tone, error alarm, sentinel alarm

Memory protection battery

The effective service life of the memory protection batteries (three new SUM-3 or UM-3 type batteries) is approximately one year from installation into the machine.

Power supply/power consumption

See the rating plate.

Operation temperature

0˚C ~ 40˚C (32˚F ~ 104˚F)

Humidity

10 ~ 90%
