Product Features

Aiptek GS 372 makes driving safer. GS 372 is an anti-glare rear-view mirror with built-in dashcam. It continuously records the action on the street. When the external memory card is full, the oldest video is replaced automatically without any data loss between the clips. In case of emergency the embedded bump sensor automatically detects the accident and saves the action on protected memory. The 130 ° wide angle lens records the full action on the road in best Full HD quality. The adjustable lens can be turned left/right and up/down to assure that GS 372 always captures the center of the street. Through the rear-view mirror design GS 372 fits perfectly in your car and is simply clamped over the existing rear view mirror so that the windscreen remains free. This allows the camera to remain permanently in the car and must not be remounted before each trip. Use Aiptek GS 372 as a driving companion for security and rebut false statements in case of accidents.
