HOW TO ORDER REPLACEMENT PARTS

To order replacement parts, contact the ICON Fitness Lifestyle Ltd. office, or write:

ICON Health & Fitness Ltd. Unit 4 **Revie Road Industrial Estate** Revie Road Beeston Leeds, LS118JG UK

Tel: Country Code:

08457-089009

Outside the UK: 0 (044) 113 387 7133 Fax: 0 (044) 113-387 7125

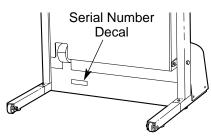

When ordering parts, please be prepared to give the following information:

- The MODEL NUMBER OF THE PRODUCT (PETL52010)
- The NAME OF THE PRODUCT (PROFORM[®] 520 treadmill)
- The SERIAL NUMBER OF THE PRODUCT (see the front cover of this manual)
- The KEY NUMBER AND DESCRIPTION OF THE PART(S) (see the PART LIST and the EXPLODED DRAWING attached in the centre of this manual)

Model No. PETL52010 Serial No.

The serial number is found in the location shown below. Write the serial number in the space above.

QUESTIONS?

As a manufacturer, we are committed to providing complete customer satisfaction. If you have questions, or if there are missing parts, please call:

08457-089009

Or write: ICON Health & Fitness, Ltd. Unit 4 **Revie Road Industrial Estate** Revie Road Beeston Leeds, LS11 8JG UK email: csuk@iconeurope.com

ACAUTION

Read all precautions and instructions in this manual before using this equipment. Save this manual for future reference.

IMPORTANT PRECAUTIONS

AWARNING: To reduce the risk of burns, fire, electric shock, or injury to persons, read the following important precautions and information before operating the treadmill.

- 1. It is the responsibility of the owner to ensure that all users of this treadmill are adequately informed of all warnings and precautions.
- 2. Use the treadmill only as described.
- 3. Place the treadmill on a level surface, with 2 m (8 ft.) of clearance behind it. Do not place the treadmill on a surface that blocks any air openings. To protect the floor or carpet from damage, place a mat under the treadmill.
- 4. Keep the treadmill indoors, away from moisture and dust. Do not put the treadmill in a garage or covered patio, or near water.
- 5. Do not operate the treadmill where aerosol products are used or where oxygen is being administered.
- 6. When choosing a location for the treadmill, make sure that the location and position permit access to a plug.
- 7. Keep children under the age of 12 and pets away from the treadmill at all times.
- 8. The treadmill should be used only by persons weighing 115 kgs (250 lbs.) or less. Never

allow more than one person on the treadmill at a time.

- 9. Wear appropriate exercise clothing when using the treadmill. Do not wear loose clothing that could become caught in the treadmill. Athletic support clothes are recommended for both men and women. Always wear athletic shoes. Never use the treadmill with bare feet. wearing only stockings, or in sandals.
- 10. When connecting the power cord (see page 7), plug the power cord into an earthed circuit. No other appliance should be on the same circuit. When replacing the fuse, an ASTA approved BS1362 type should be fitted to the fuse carrier. A 13 amp fuse should be used.
- 11. If an extension cord is needed, use only a 3conductor, 1mm² (14-gauge) cord that is no longer than 1.5 m (5 ft.).
- 12. Keep the power cord away from heated surfaces.
- 13. Never move the walking belt while the power is turned off. Do not operate the treadmill if the power cord or plug is damaged, or if the treadmill is not working properly. (See

A Cool-down—Finish each workout with 5 to 10 minutes of stretching to cool down. This will increase the flexibility of your muscles and will help to prevent postexercise problems.

EXERCISE FREQUENCY

To maintain or improve your condition, complete three workouts each week, with at least one day of rest be-

SUGGESTED STRETCHES

The correct form for several basic stretches is shown at the right. Move slowly as you stretch-never bounce.

1. Toe Touch Stretch

Stand with your knees bent slightly and slowly bend forward from your hips. Allow your back and shoulders to relax as you reach down toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Hamstrings, back of knees, and back.

2. Hamstring Stretch

Sit with one leg extended. Bring the sole of the opposite foot toward you and rest it against the inner thigh of your extended leg. Reach toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times for each leg. Stretches: Hamstrings, lower back, and groin.

3. Calf/Achilles Stretch

With one leg in front of the other, reach forward and place your hands against a wall. Keep your back leg straight and your back foot flat on the floor. Bend your front leg, lean forward and move your hips toward the wall. Hold for 15 counts, then relax. Repeat 3 times for each leg. To cause further stretching of the achilles tendons, bend your back leg as well. Stretches: Calves, achilles tendons, and ankles.

4. Quadriceps Stretch

With one hand against a wall for balance, reach back and grasp one foot with your other hand. Bring your heel as close to your buttocks as possible. Hold for 15 counts, then relax. Repeat 3 times for both legs. Stretches: Quadriceps and hip muscles.

5. Inner Thigh Stretch

Sit with the soles of your feet together and your knees outward. Pull your feet toward your groin area as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Quadriceps and hip muscles.

tween workouts. After a few months, you may complete up to five workouts each week if desired. The key to success is to make exercise a regular and enjoyable part of your everyday life.

2 3

CONDITIONING GUIDELINES

AWARNING: Before beginning this or any exercise program, consult your physician. This is especially important for individuals over the age of 35 or individuals with preexisting health problems.

The pulse sensor is not a medical device. Various factors, including your movement, may affect the accuracy of heart rate readings. The sensor is intended only as an exercise aid in determining heart rate trends in general.

The following guidelines will help you to plan your exercise program. Remember-these are general guidelines only. For more detailed exercise information, obtain a reputable book or consult your physician.

EXERCISE INTENSITY

Whether your goal is to burn fat or to strengthen your cardiovascular system, the key to achieving the desired results is to exercise with the proper intensity. The proper intensity level can be found by using your heart rate as a guide. The chart below shows recommended heart rates for fat burning and aerobic exercise.

	HEART RATE TRAINING ZONE							
(MIN BPM 🛡	🎔 МАХ ВРМ					
(AGE	Fat Burn	Max Burn	Aerobic				
(20	125	145	165				
(30	120	138	155				
(40	115	130	145				
(50	110	125	140				
(60	105	118	130				
(70	95	110	125				
(80	90	103	115				

To find the proper heart rate for you, first find your age on the left side of the chart (ages are rounded off to the nearest ten years). Next, find the three numbers to the right of your age. The three numbers are your "training zone." The lower two numbers are recommended heart rates for fat burning; the higher number is the recommended heart rate for aerobic exercise.

Fat Burning

To burn fat effectively, you must exercise at a relatively low intensity level for a sustained period of time. During the first few minutes of exercise, your body uses easily accessible carbohydrate calories for energy. Only after

the first few minutes does your body begin to use stored fat calories for energy. If your goal is to burn fat, adjust the speed and incline of the treadmill until your heart rate is near one of the lower two numbers in your training zone.

For maximum fat burning, adjust the speed and incline of the treadmill until your heart rate is near the middle number in your training zone.

Aerobic Exercise

If your goal is to strengthen your cardiovascular system, your exercise must be "aerobic." Aerobic exercise is activity that requires large amounts of oxygen for prolonged periods of time. This increases the demand on the heart to pump blood to the muscles, and on the lungs to oxygenate the blood. For aerobic exercise, adjust the speed and incline of the treadmill until your heart rate is near the highest number in your training zone.

WORKOUT GUIDELINES

A well-rounded workout includes the following three important parts:

A Warm-up—Start each workout with 5 to 10 minutes of stretching and light exercise (see SUGGESTED STRETCHES on page 15). A proper warm-up increases your body temperature, heart rate, and circulation in preparation for exercise.

Training Zone Exercise—After warming up, increase the intensity of your exercise until your pulse is in your training zone for 20 to 60 minutes. (During the first few weeks of your exercise program, do not keep your pulse in your training zone for longer than 20 minutes.) Breathe regularly and deeply as you exercise-never hold your breath.

A Cool-down—Finish each workout with 5 to 10 minutes of stretching to cool down. This will increase the flexibility of your muscles and will help to prevent postexercise problems.

EXERCISE FREQUENCY

To maintain or improve your condition, complete three workouts each week, with at least one day of rest between workouts. After a few months, you may complete up to five workouts each week if desired. The key to success is to make exercise a regular and enjoyable part of your everyday life.

BEFORE YOU BEGIN on page 4 if the treadmill is not working properly.)

- 14. Never start the treadmill while you are stand-19. When folding or moving the treadmill, make ing on the walking belt. Always hold the sure that the storage latch is fully closed. handrails while using the treadmill.
- 15. The treadmill is capable of high speeds. Adjust the speed in small increments to avoid sudden jumps in speed.
- 16. The pulse sensor is not a medical device. Various factors, including your movement, may affect the accuracy of heart rate readings. The sensor is intended only as an exercise aid in determining heart rate trends in general.
- 17. Never leave the treadmill unattended while it is running. Always remove the key and unplug the power cord when the treadmill is not in use.
- 18. Do not attempt to raise, lower, or move the treadmill until it is properly assembled. (See 23. This treadmill is intended for in-home use ASSEMBLY on pages 5 and 6, and HOW TO only. Do not use this treadmill in any commer-MOVE THE TREADMILL on page 11.) You cial, rental, or institutional setting.

A WARNING: Before beginning this or any exercise program, consult your physician. This is especially important for persons over the age of 35 or persons with pre-existing health problems. Read all instructions before using. ICON assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

SAVE THESE INSTRUCTIONS

The decal shown below has been placed on your treadmill. If the decal is missing, or if it is not legible, please call our Customer Service Department at 08457-089009 to order a free replacement decal (see the back cover of this manual). Apply the decal in the location shown. Note: The decal is shown at 38% of actual size. **AWARNING:** Protect yourself and others from risk of serious injury. Read the user's manual and:

must be able to safely lift 20 kg (45 lbs.) to raise, lower, or move the treadmill.

20. Inspect and tighten all parts of the treadmill every three months.

21. Never drop or insert any object into any opening.

22. **DANGER:** Always unplug the power cord immediately after use, before cleaning the treadmill, and before performing the maintenance and adjustment procedures described in this manual. Never remove the motor hood unless instructed to do so by an authorised service representative. Servicing other than the procedures in this manual should be performed by an authorised service representative only.

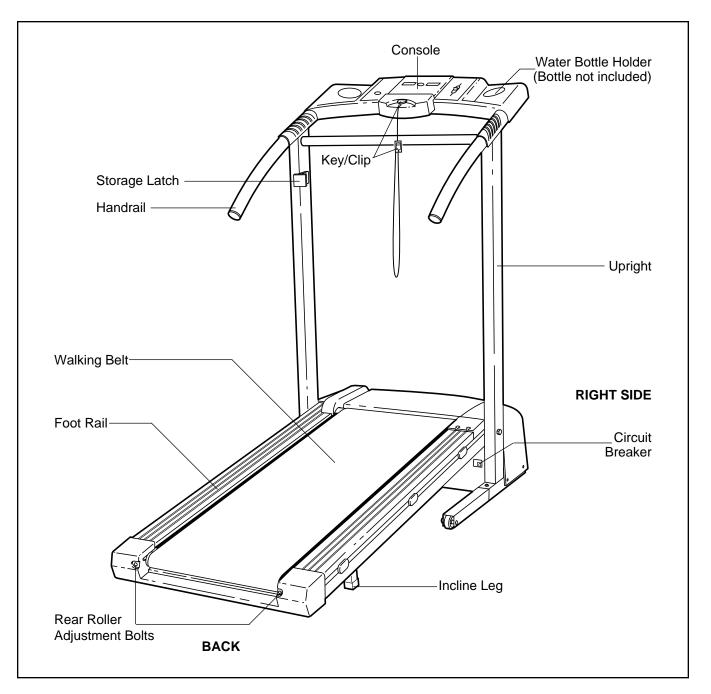

BEFORE YOU BEGIN

Thank you for selecting the new PROFORM[®] 520 treadmill. The 520 treadmill combines advanced technology with innovative design to let you enjoy an excellent form of cardiovascular exercise in the convenience and privacy of your home. And when you're not exercising, the unique 520 can be folded up, requiring less than half the floor space of other treadmills.

For your benefit, read this manual carefully before using the treadmill. If you have additional questions, please call our Customer Service Department at

08457-089009. To help us assist you, please note the product model number and serial number before calling. The model number of the treadmill is PETL52010. The serial number can be found on a decal attached to the treadmill (see the front cover of this manual for the location).

Before reading further, please review the drawing below and familiarise yourself with the parts that are labelled.

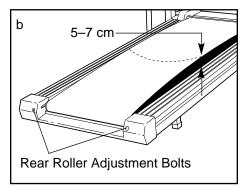

4. SYMPTOM: THE WALKING BELT SLOWS WHEN WALKED ON

- b. If the walking belt is overtightened, treadmill performance may decrease and the walking belt may be permanently damaged. Remove the key and **UNPLUG THE POWER CORD**. Using the allen wrench, turn both rear roller adjustment bolts counterclockwise, 1/4 of a turn. When the walking belt is properly tightened, you should be able to lift each side of the walking belt 5 to 7 cm (2 to 3 in.) off the walking platform. The centre of the walking belt should just touch the walking platform. Be careful to keep the walking belt centred. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is properly tightened.

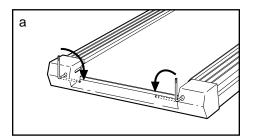

5. SYMPTOM: THE WALKING BELT IS OFF-CENTRE

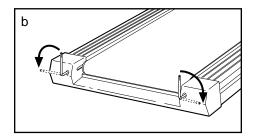

- a. If the walking belt has shifted to the left, first remove the key and **UNPLUG THE POWER CORD**. Using the allen wrench, turn the left rear roller adjustment bolt clockwise, and the right bolt counterclockwise, 1/4 of a turn each. Be careful not to overtighten the walking belt. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is centred.
- b. If the walking belt has shifted to the right, first remove the key and UNPLUG THE POWER CORD. Using the allen wrench, turn the left rear roller adjustment bolt counterclockwise, and the right bolt clockwise, 1/4 of a turn each. Be careful not to overtighten the walking belt. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is centred.
- c. If the walking belt slips when walked on, first remove the key and UNPLUG THE POWER CORD. Using the allen wrench, turn both rear roller adjustment bolts clockwise. 1/4 of a turn. When the walking belt is correctly tightened, you should be able to lift each side of the walking belt 5 to 7 cm (2 to 3 in.) off the walking platform. Be careful to keep the walking belt centred. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is properly tightened.

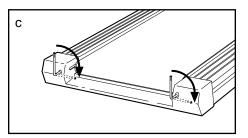

a. If an extension cord is needed, use only a 3-conductor, 1mm² (14-gauge) cord that is no longer than 1.5 m (5 ft.).

c. If the walking belt still slows when walked on, please call our Customer Service Department at 08457-089009.

TROUBLE-SHOOTING

Most treadmill problems can be solved by following the steps below. Find the symptom that applies, and follow the steps listed. If further assistance is needed, please call our Customer Service Department at 08457-089009.

1. SYMPTOM: THE POWER DOES NOT TURN ON

- a. Make sure that the power cord is plugged into a properly earthed outlet. (See HOW TO PLUG IN THE POWER CORD on page 7.) If an extension cord is needed, use only a 3-conductor, 1mm² (14-gauge) cord that is no longer than 1.5 m (5 ft.).
- b. After the power cord has been plugged in, make sure that the key is fully inserted into the console.
- c. Check the circuit breaker located on the treadmill near the power cord. If the switch protrudes as shown, the circuit breaker has tripped. To reset the circuit breaker, wait for five minutes and then press the switch back in.

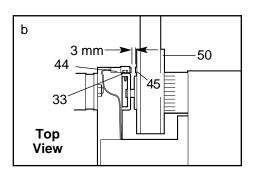

Reset Tripped

2. SYMPTOM: THE POWER TURNS OFF DURING USE

- a. Check the circuit breaker located on the treadmill frame near the power cord (see 1. c. above). If the circuit breaker has tripped, wait for five minutes and then press the switch back in.
- b. Make sure that the power cord is plugged in.
- c. Remove the key from the console. Reinsert the key fully into the console.
- d. If the treadmill still will not run, please call our Customer Service Department at 08457-089009.

3. SYMPTOM: THE DISPLAYS OF THE CONSOLE DO NOT FUNCTION PROPERLY

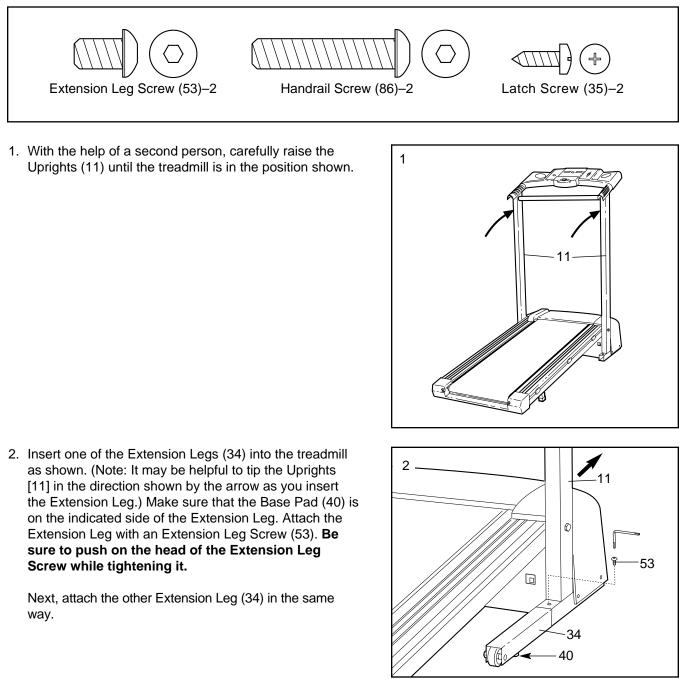

- a. Check the batteries in the console. See BATTERY INSTALLATION on page 8. Most problems are the result of drained batteries.
- b. Remove the key from the console and **UNPLUG THE POWER** CORD. Remove the screws from the hood. Carefully remove the hood. Locate the Reed Switch (44) and the Magnet (45) on the left side of the Pulley (50). Turn the Pulley until the Magnet is aligned with the Reed Switch. Make sure that the gap between the Magnet and the Reed Switch is about 3 mm (1/8 in.). If necessary, loosen the Screw (33) and move the Reed Switch slightly. Retighten the Screw. Re-attach the hood, and run the treadmill for a few minutes to check for a correct speed reading.

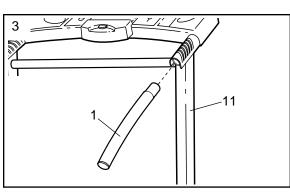

ASSEMBLY

Assembly requires two people. Set the treadmill in a cleared area and remove all packing materials. Do not dispose of the packing materials until assembly is completed. Assembly requires the included allen wrench and your own Phillips screwdriver — []]. If you have additional questions, please call our Customer Service Department at 08457-089009. Note: The underside of the treadmill walking belt is coated with high-performance lubricant. During shipping, a

small amount of lubricant may be transferred to the top of the walking belt or the shipping carton. This is a normal condition and does not affect treadmill performance. If there is lubricant on top of the walking belt, simply wipe off the lubricant with a soft cloth and a mild, non-abrasive cleaner.

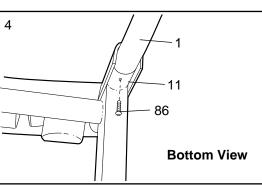

3. Insert one of the Handrails (1) into the tube at the top of the right Upright (11).

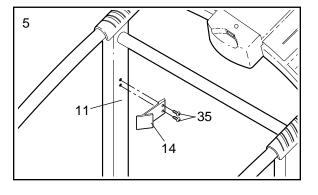

4. Align the hole in the Handrail (1) with the hole in the right Upright (11). Using the included allen wrench, tighten a Handrail Screw (86) into the Upright and the Handrail.

Attach the other Handrail to the left Upright (not shown) as described above.

5. Attach the Storage Latch (14) to the left Upright (11) with two Latch Screws (35). Be careful not to overtighten the Latch Screws.

6. Make sure that all parts are tightened before you use the treadmill. Keep the included allen wrench in a secure place. The allen wrench is used to adjust the walking belt (see page 13). To protect the floor or carpet, place a mat under the treadmill.

2. Move your right hand to the position shown and hold the treadmill firmly. Raise the treadmill until the storage latch closes over the catch. Make sure that the storage latch is fully engaged over the catch.

To protect the floor or carpet from damage, place a mat under the treadmill. Keep the treadmill out of direct sunlight. Do not leave the treadmill in the storage position in temperatures above 30° C (85° F).

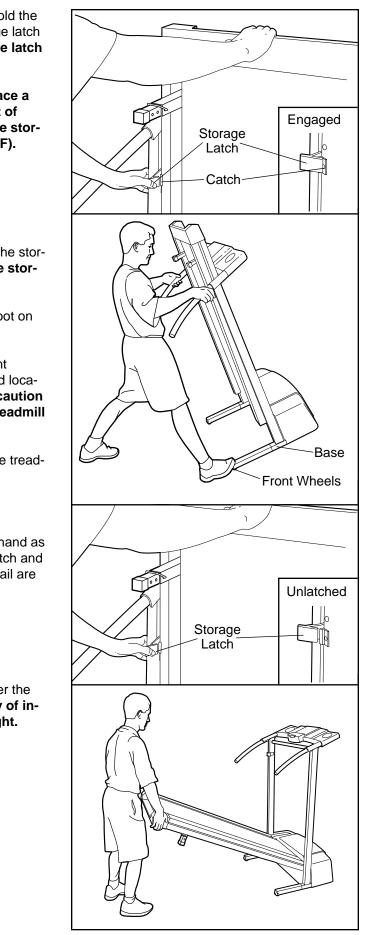

HOW TO MOVE THE TREADMILL

Before moving the treadmill, convert the treadmill to the storage position as described above. Make sure that the storage latch is closed fully over the catch.

- 1. Hold the upper ends of the handrails. Place one foot on the base as shown.
- 2. Tilt the treadmill back until it rolls freely on the front wheels. Carefully move the treadmill to the desired location. To reduce the risk of injury, use extreme caution while moving the treadmill. Do not move the treadmill over an uneven surface.
- 3. Place one foot on the base, and carefully lower the treadmill until it is resting in the storage position.

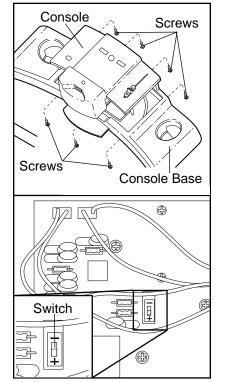

HOW TO LOWER THE TREADMILL FOR USE

- 1. Hold the upper end of the treadmill with your right hand as shown. Using your left thumb, press the storage latch and hold it. Pivot the treadmill until the frame and foot rail are past the storage latch.
- 2. Hold the treadmill firmly with both hands, and lower the treadmill to the floor. To decrease the possibility of injury, bend your legs and keep your back straight.

HOW TO SELECT KILOMETRES AND MILES

The console can display distance and speed in either kilometres or miles. To change the unit of measurement, first UNPLUG THE POWER CORD. Next, remove the screws attaching the console to the console base. Lift the console a few inches, being careful not to pull on the wires, and turn the console over. Locate the small switch on the back of the console. Move the switch upward or downward to select kilo-

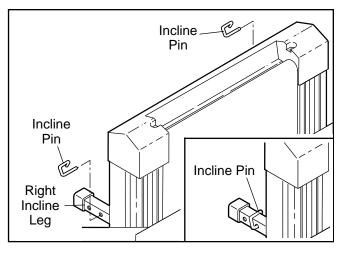

metres or miles. Re-attach the console to the console base. After changing the unit of measurement, remove one of the batteries from the console for about five seconds and then reinsert it. This will reset the console.

HOW TO CHANGE THE INCLINE OF THE TREADMILL

To vary the intensity of your exercise, the incline of the treadmill can be changed. There are three different in-

cline levels. **Before changing the incline, first remove the key and unplug the power cord.** Next, fold the treadmill to the storage position (see HOW TO FOLD THE TREADMILL FOR STORAGE below).

To change the incline, remove the incline pins from the incline legs as shown above. Adjust the incline legs to the desired height and fully reinsert the incline pins. Make sure that the incline pins are in the "locked" position shown in the inset drawing. Make sure that both incline pins are inserted from the direction shown. CAUTION: Before using the treadmill, make sure that both incline pins are fully inserted at the same height. Do not use the treadmill with the incline pins removed.

After you have adjusted the incline legs, lower the treadmill (see HOW TO LOWER THE TREADMILL FOR USE on page 11).

OPERATION AND ADJUSTMENT

THE PERFORMANT LUBE™ WALKING BELT

Your treadmill features a walking belt coated with PERFORMANT LUBE[™], a high-performance lubricant. **IMPOR-TANT:** Never apply silicone spray or other substances to the walking belt or the walking platform. Such substances will deteriorate the walking belt and cause excessive wear.

HOW TO PLUG IN THE POWER CORD

This product must be earthed. If it should malfunction or break down, earthing provides a path of least resistance for electric current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-earthing conductor and an earthing plug.

Two power cords are included. Select the one that will fit your outlet. Refer to drawing 1. Plug the indicated end of the power cord into the socket on the treadmill. Refer to drawing 2. Plug the power cord into an appropriate outlet that is properly installed and earthed in accordance with all local codes and ordinances. Note: In Italy, an adapter (not included) must be used between the power cord and the outlet. Important: The treadmill is not compatible with GFCI-equipped outlets.

Use only a power cord type H05VV-F with a conductor of at least 1mm², with a country recognised plug and an appliance coupler.

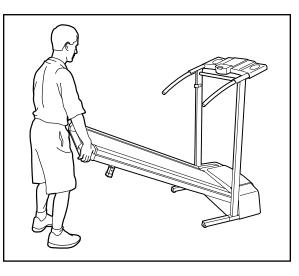

A DANGER: Improper connection of the equipment-earthing conductor can result in an increased risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the product is properly earthed. Do not modify the plug provided with the product—if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

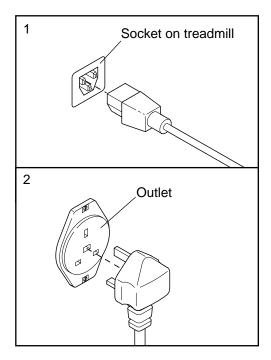

HOW TO FOLD AND MOVE THE TREADMILL

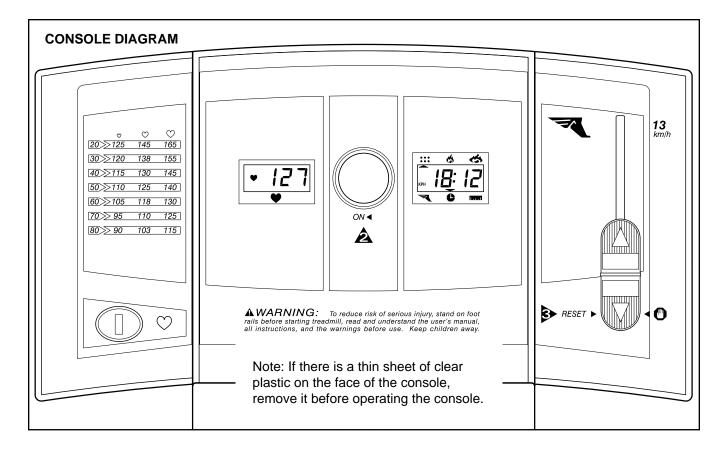

HOW TO FOLD THE TREADMILL FOR STORAGE

Before folding the treadmill, unplug the power cord. CAUTION: You must be able to safely lift 20 kg (45 lbs.) in order to raise, lower, or move the treadmill.

1. Hold the treadmill with your hands in the locations shown at the right. To decrease the possibility of injury, bend your legs and keep your back straight. As you raise the treadmill, make sure to lift with your legs rather than your back. Raise the treadmill about halfway to the vertical position.

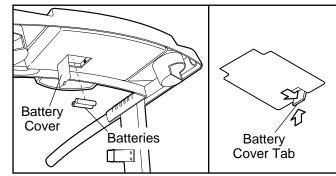

A CAUTION: Before operating the console, read the following precautions.

- Do not stand on the walking belt when turning on the power.
- Always wear the clip (see the drawing at the lower right) while using the treadmill. When the key is removed from the console, the walking belt will stop.
- Adjust the speed in small increments.
- To reduce the possibility of electric shock, keep the console dry. Avoid spilling liquids on the console and use only a sealable water bottle.

BATTERY INSTALLATION

The console requires two 1,5V batteries (included). Alkaline batteries are recommended. Open the battery cover as shown in the drawing at the upper right. Insert two batteries into the battery compartment, making sure that the negative (-) ends of the batteries are touching the springs in the battery compartment. Close the battery cover, push up on the battery cover

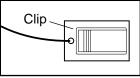

tab, and then push the tab forward as shown in the inset drawing. Be sure that the tab locks into place.

STEP-BY-STEP CONSOLE OPERATION

Before operating the console, make sure that the power cord is properly plugged in. (See HOW TO PLUG IN THE POWER CORD on page 7.)

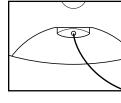

Next, step onto the foot rails of the treadmill. Find the clip attached to the key, and slide the clip onto the waistband of your clothing.

Follow the steps on page 9 to operate the console.

Insert the key into the power switch.

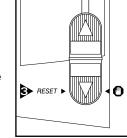

Inserting the key will not turn on the displays. The displays will turn on when the ON/RESET button is pressed or when the walking belt is started. Note: If you just installed batteries,

the displays will already be on.

2 Reset the speed control.

Slide the speed control down to the RESET position. Note: Each time the walking belt is stopped, the speed control must be moved to the **RESET** position before the walking belt can be restarted.

Start the walking belt. 3

After you have moved the speed control to the RESET position, slowly slide it upward until the walking belt begins to move at slow speed. Carefully step onto the walking belt and begin exercising. Change the speed of the walking belt as desired by sliding the speed control.

To stop the walking belt, step onto the foot rails and slide the speed control to the RESET position.

Follow your progress with the monitor modes.

Note: The console can display distance and speed in either kilometres or miles (see HOW TO SELECT **KILOMETRES AND MILES** on page 10). The monitor display offers six modes

that provide instant exercise feedback.

- Speed—This mode shows the speed of the walking belt.
- **D** Time—This mode shows the elapsed time. Note: If you stop exercising for ten seconds or longer, the time mode will pause.
- Distance—This mode shows the total distance you have walked or run since the key was inserted.

Fat Calories—This mode shows the approximate number of fat calories you have burned. (See Fat Burning on page 14.)

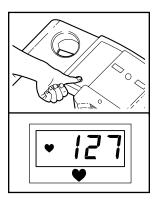

Calories—This mode shows the approximate number of calories you have burned.

Scan—This mode displays the other five modes, for five seconds each, in a repeating cycle.

To reset the displays at any time, press the ON/RESET button.

5 Measure your pulse, if desired.

To use the pulse sensor, stand on the foot rails and place your thumb on the pulse sensor as shown. The pulse sensor is pressure-activated; fully press it down. Do not press too hard, or the circulation in your thumb will be restricted, and vour pulse will not be detected. Next, raise

your thumb slightly until the heart-shaped indicator in the pulse display flashes **steadily**. Hold your thumb at this level. After 5 to 10 seconds, your pulse will be shown. Hold your thumb on the pulse sensor for another 15 seconds for the most accurate reading. If the displayed pulse appears to be too high or too low, or if your pulse is not displayed, lift your thumb off the pulse sensor and allow the display to reset. Press down again on the sensor as described above.

Make sure that your thumb is positioned as shown, and that you are applying the proper amount of pressure to the pulse sensor. Try the pulse sensor several times until you become familiar with it. Remember to stand still whilst measuring your pulse.

When you are finished exercising, stop the 6 When you are minimum a walking belt and remove the key.

Step onto the foot rails, stop the walking belt and remove the key from the console. The displays will turn off about five minutes after the key is removed. Note: Any time that the walking belt is stopped and the ON/RESET button is not pressed for five minutes, the displays will automatically turn off in order to conserve the batteries.
