# **PlasmaSync Plasma Monitor**

# PlasmaSync 42MP2

**User's Manual** 

# Important Information

#### **Precautions**

Please read this manual carefully before using your NEC plasma monitor and keep the manual handy for future reference.

# CAUTION

RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER, NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol warns the user that uninsulated voltage within the unit may have sufficient magnitude to cause electric shock. Therefore, it is dangerous to make any kind of contact with any part inside of this unit.

This symbol alerts the user that important literature concerning the operation and maintenance of this unit has been included. Therefore, it should be read carefully in order to avoid any problems.

#### **WARNING**

TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE. ALSO DO NOT USE THIS UNIT'S POLARIZED PLUG WITH AN EXTENSION CORD RECEPTACLE OR OTHER OUTLETS, UNLESS THE PRONGS CAN BE FULLY INSERTED. REFRAIN FROM OPENING THE CABINET AS THERE ARE HIGH-VOLTAGE COMPONENTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PER-SONNEL.

#### **WARNING**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

# **Warnings and Safety Precaution**

The NEC plasma monitor is designed and manufactured to provide long, trouble-free service. No maintenance other than cleaning is required. Use a soft dry cloth to clean the panel. Never use solvents such as alcohol or thinner to clean the panel surface.

The plasma display panel consists of fine picture elements (cells). Although NEC produces the plasma display panels with more than 99.99 percent active cells, there may be some cells that do not produce light or

For operating safety and to avoid damage to the unit, read carefully and observe the following instructions. To avoid shock and fire hazards:

- 1. Provide adequate space for ventilation to avoid internal heat build-up. Do not cover rear vents or install in a closed cabinet or shelves.
  - The unit is equipped with cooling fans. If you install the unit in an enclosure, be sure there is adequate space at the top of the unit to allow hot air to rise and escape. If the monitor becomes too hot, the overheat protector will be activated and the monitor will be turned off. If this happens, turn off the power to the monitor and unplug the power cord. If the room where the monitor is installed is particularly hot, move the monitor to a cooler location, and wait for the monitor to cool for 60 minutes. If the problem persists, contact your NEC dealer for service.
- 2. Do not use the power cord polarized plug with extension cords or outlets unless the prongs can be completely
- 3. Do not expose unit to water or moisture.
- 4. Avoid damage to the power cord, and do not attempt to modify the power cord.
- 5. Unplug unit during electrical storms or if unit will not be used over a long period.
- 6. Do not open the cabinet which has potentially dangerous high voltage components inside. If the unit is damaged in this way the warranty will be void. Moreover, there is a serious risk of electric shock.
- 7. Do not attempt to service or repair the unit. NEC is not liable for any bodily harm or damage caused if unqualified persons attempt service or open the back cover. Refer all service to authorized NEC Service Centers.

#### NOTE:

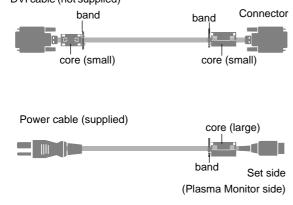

When you connect a computer to this monitor, attach the supplied ferrite cores. If you do not do this, this monitor will not comform to mandatory FCC standards. Attaching the ferrite cores.

Set the ferrite cores on the both ends of the DVI cable (not supplied), and the one end of the power cable (supplied).

Close the lid tightly until the clamps click.

Use the band to secure the ferrite core (supplied).

DVI cable (not supplied)

To avoid damage and prolong operating life:

- 1. Use only with 120V 50/60Hz AC power supply. Continued operation at line voltages greater than 120 Volts AC will shorten the life of the unit, and might even cause a fire hazard.
- 2. Handle the unit carefully when installing it and do not drop.
- 3. Locate set away from heat, excessive dust, and direct sunlight.
- 4. Protect the inside of the unit from liquids and small metal objects. In case of accident, unplug the unit and have it serviced by an authorized NEC Service Center.
- 5. Do not hit or scratch the panel surface as this causes flaws on the surface of the screen.
- 6. For correct installation and mounting it is strongly recommended to use a trained, authorized NEC dealer.
- 7. As is the case with any phosphor-based display (like a CRT monitor, for example) light output will gradually decrease over the life of a Plasma Display Panel.

Recommendations to avoid or minimize phosphor burn-in

Like all phosphor-based display devices and all other gas plasma displays, plasma monitors can be susceptible to phosphor burn under certain circumstances. Certain operating conditions, such as the continuous display of a static image over a prolonged period of time, can result in phosphor burn if proper precautions are not taken. To protect your investment in this NEC plasma monitor, please adhere to the following guidelines and recommendations for minimizing the occurrence of image burn:

- \* Always enable and use your computer's screen saver function during use with a computer input source.
- \* Display a moving image whenever possible.
- \* Always power down the monitor when you are finished using it.

If the plasma monitor is in long term use or continuous operation take the following measures to reduce the likelihood of phosphor burn:

- \* Lower the Brightness and Contrast levels as much as possible without impairing image readability.
- \* Display an image with many colors and color gradations (ie. photographic or photo-realistic images).
- \* Create image content with minimal contrast between light and dark areas, for example white characters on black backgrounds. Use complementary or pastel color whenever possible.
- \* Avoid displaying images with few colors and distinct, sharply defined borders between colors.

Contact NEC Technologies at 1-800-836-0655 for other recommended procedures that will best suit your particular application needs.

#### **Précautions**

Veuillez lire ce manuel avec attention avant d'utiliser votre moniteur PlasmaSync NEC et conserver ce manuel à portée de la main pour une consultation ultérieure.

# **ATTENTION**

RISQUE D'ELECTROCUTION NE PAS OUVRIR

MISE EN GARDE:

AFIN DE REDUIRE LES RISQUES D'ELECTRO-CUTION, NE PAS DEPOSER LE COUVERCLE, IL N'Y A AUCUNE PIECE UTILISABLE A L'INTERIEUR DE CET APPAREIL. NE CONFIER LES TRAVAUX D'ENTRETIEN QU'A UN PERSONNEL QUALIFIE.

Ce symbole a pour but de prévenir l'utilisateur de la présence d'une tension dangereuse, non isolée se trouvant à l'intérieur de l'appareil. Elle est d'une intensité suffisante pour constituer un risque d'électrocution. Eviter le contact avec les pièces à l'intérieur de cet appareil.

Ce symbole a pour but de prévenir l'utilisateur de la présence d'importantes instructions concernant l'entretien et le fonctionnement de cet appareil. Par conséquent, elles doivent être lues attentivement afin d'éviter des problèmes.

# **AVERTISSEMENT**

AFIN DE REDUIRE LES RISQUES D'INCENDIE OU D'ELECTROCUTION, NE PAS EXPOSER CET APPAREIL A LA PLUIE OU A L'HUMIDITE. AUSSI, NE PAS UTILISER LA FICHE POLARISEE AVEC UN PROLONGATEUR OU UNE AUTRE PRISE DE COURANT SAUF SI CES LAMES PEUVENT ETRE INSEREES A FOND. NE PAS OUVRIR LE COFFRET, DES COMPOSANTS HAUTE TENSION SE TROUVENT A L'INTERIEUR. LAISSER A UN PERSONNEL QUALIFIE LE SOIN DE REPARER CET APPAREIL.

#### DOC avis de conformation

Cet appareil numérigue de la classe A respecte toutes les exigences du Réglement sur le Matériel Brouilleur du Canada.

# Mises en garde et précautions de sécurité

Le moniteur PlasmaSync NEC a été conçu et fabriqué pour une utilisation fiable et durable. Il ne nécessite aucun entretien en dehors du nettoyage. Utiliser un chiffon doux et sec pour nettoyer la surface de l'écran. Ne jamais utiliser de solvant comme l'alcool ou le diluant. Le panneau à affichage plasma est constitué de fines particules d'images ou pixels (cellules). Bien que NEC produise des panneaux à affichage plasma avec plus de 99,99 % de cellules actives, il peut y avoir des cellules qui ne produisent pas de lumière ou qui restent allumées.

Pour des raisons de sécurité et pour éviter d'endommager l'appareil, lire attentivement les instructions suivantes.

Pour éviter les risques d'éléctrocution et d'incendie:

- Laisser suffisament d'espace autour de l'appareil pour la ventilation et éviter toute augmentation excessive de la température interne. Ne pas couvrir les évents ou l'installer dans un endroit trop exigu.
  - L'appareil est équipé de ventilateurs de refroidissement. Si vous installez l'appareil dans un espace clos, assurezvous qu'il y ait suffisamment d'espace au dessus pour permettre à l'air chaud de s'élever et de s'évacuer.
  - Si la température du moniteur devient excessive, la protection contre les surchauffes entrera en action et coupera l'alimentation. Dans ce cas, éteindre l'appareil et débrancher le câble d'alimentation. Si la température de la pièce dans laquelle le moniteur est installé est particulièrement excessive, déplacer l'appareil dans un endroit plus frais et le laisser refroidir 60 minutes. Si le problème persiste, prendre contact avec le revendeur NEC pour le service après-vente.
- 2. Ne pas utiliser la fiche polarisée du cordon d'alimentation avec des prolongateurs ou des prises de courant, sauf si les lames peuvent être insérées à fond.
- 3. Ne pas exposer à L'eau ou à l'humidité.
- 4. Eviter d'endommager le cordon d'alimentation, et ne pas modifier le cordon d'alimentation.
- 5. Débrancher l'appareil pendant les tempêtes ou si l'appareil n'est pas utilisé pendant une longue période.
- 6. Ne pas ouvrir le coffret. Des composants de haute tension se trouvent à l'intérieur. Si l'appareil est endommagé de cette manière, la garantie devient caduque. De plus, il y a risque d'électrocution.
- 7. Ne pas essayer de réparer ou entretenir l'appareil soimême. NEC ne saura être tenu pour responsable pour toute blessure ou dommage causé par des personnes non qualifiées qui essayent de réparer ou d'ouvrir le couvercle arrière. Confier toute réparation à un centre de service agréé NEC.

# REMARQUE:

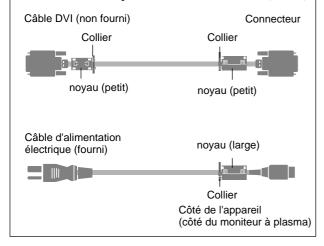

Lorsque vous branchez un micro-ordinateur sur ce moniteur, fixez les noyaux en ferrites fournis. Si vous ne le faîtes, le moniteur ne sera pas en conformité avec les exigences des standards FCC.

Fixation des noyaux en ferrite.

Installez les noyaux en ferrite sur chaque bout du câble DVI (non fourni), ainsi que sur un côté du câble d'alimentation électrique (founi).

Fermez doucement le couvercle jusqu'à ce que les crans se clipsent.

Utiliser les colliers pour fixer la tore en ferrite (fourni)

Pour éviter des dommages et prolonger la durée de service de l'appareil:

- 1. N'utiliser qu'une source d'alimentation de 120 V 50/60 Hz CA. Le fait d'utiliser l'appareil en continu à des tensions de ligne supérieures à 120 Volts CA réduit sa durée de vie et risque de provoquer un incendie.
- 2. Manipuler l'appareil avec soin pendant son déplacement et ne pas le faire tomber.
- 3. Eloigner l'appareil des endroits chauds, très poussiéreux et exposés en plein soleil.
- 4. Eviter que des liquides et des petits objets métalliques pénètrent à l'intérieur de l'appareil. En cas d'accident, débrancher l'appareil et le confier à un centre de service agréé NEC.
- Ne pas frapper ou rayer la surface de la écran plasma, car des défauts risquent de se produire sur la surface de la écran plasma.
- 6. Pour effectuer une installation et un montage corrects, il est recommandé de faire appel au concessionnaire NEC autorisé et spécialisé.
- 7. Comme c'est le cas pour tout affichage à base de phosphore (comme un moniteur CRT, par exemple), la puissance de lumière baisse graduellement au cours de la vie du Panneau d'Affichage à Plasma.

Pour éviter le risque de combustion au phosphore, les mesures suivantes sont recommandées :

Comme tous les appareils d'affichage à base de phosphore et tous les autres affichages à gaz plasma, les moniteurs Plasmasync peuvent être sujets à la combustion au phosphore dans certaines circonsatnces. Certaines conditions d'utilisation, telles que l'affichage continu d'une image statique pour une durée prolongée, peuvent causer des brûlures au phophore si aucune précaution n'est prise. Pour protéger votre investissement dans ce moniteur PlasmaSync NEC, veuillez suivre les directives et les recommandations suivantes pour minimiser l'occurence de brûlure d'image :

- Assurez-vous de mettre en marche et d'utliser l'économisateur d'écran chaque fois que c'est possible lorsque vous l'utilisez avec une source d'entrée d'ordinateur.
- Affichez une image en mouvement aussi souvent que possible.
- Coupez toujours l'alimentation lorsque vous avez terminé d'utiliser la moniteur.

Si le moniteur est en usage continu ou longue durée, prenez les mesures suivantes afin d'éviter l'occurence de combustion au phosphore :

- Abaissez le niveau de l'image (contraste, luminosité) autant que possible, sans faire perdre la lisibilité de l'image.
- Affichez une image avec de nombreuses couleurs et graduations de couleur (par ex. des images photographiques ou photo-réalistes).
- Créez un contenu d'image avec un contraste minimal entre les zones sombres et les zones claires, par exemple, des caractères blancs sur un fond noir. Utilisez des couleurs complémentaires ou pastels le plus souvent possible.
- Évitez d'afficher des images avec peu de couleurs et des limites nettes et clairement définies entre les couleurs.

Contactez NEC Technologies au 1-800-836-0655 pour d'autres procédures recommandées qui conviendront le mieux au besoin de votre appareil.

# Limited Warranty Plasma Monitors

NEC Technologies, Inc. (hereinafter NECTECH) warrants this product to be free from defects in material and workmanship under the following terms and, subject to the conditions set forth below, agrees to repair or replace (at NECTECH's sole option) any part of the enclosed unit which proves defective. Replacement parts or products may be new or refurbished and will meet specifications of the original parts or product.

#### **HOW LONG IS THE WARRANTY?**

Parts and labor are warranted for (1) One Year from the date of the first customer purchase.

# WHO IS PROTECTED?

This warranty may be enforced only by the first purchaser.

# WHAT IS COVERED AND WHAT IS NOT COVERED

Except as specified below, this warranty covers all defects in material or workmanship in this product. The following are not covered by the warranty:

- 1. Any product which is not distributed in the U.S.A. or Canada and Mexico by NECTECH or which is not purchased in the U.S.A. or Canada or Mexico from an authorized NECTECH dealer.
- 2. Any product on which the serial number has been defaced, modified or removed.
- 3. Damage, deterioration or malfunction resulting from:
  - a. Accident, misuse, abuse, neglect, fire, water, lightning or other acts of nature, unauthorized product modification, or failure to follow instructions supplied with the product.
  - b. Repair or attempted repair by anyone not authorized by NECTECH.
  - c. Any shipment of the product (claims must be presented to the carrier).
  - d. Removal or installation of the product.
  - e. Any other cause which does not relate to a product defect.
  - f. Burns or residual images upon the phosphor of the
- 4. Cartons, carrying cases, batteries, external cabinets, magnetic tapes, or any accessories used in connection with the product.
- 5. Service outside of the U.S.A. and Canada.

# WHAT WE WILL PAY FOR AND WHAT WE WILL **NOT PAY FOR**

We will pay labor and material expenses for covered items, but we will not pay for the following:

- 1. Removal or installation charges.
- 2. Costs of initial technical adjustments (set-up), including adjustment of user controls. These costs are the responsibility of the NECTECH dealer from whom the product was purchased.
- 3. Payment of shipping charges.

#### **HOW YOU CAN GET WARRANTY SERVICE**

- 1. To obtain service on your product, consult the dealer from whom you purchased the product.
- 2. Whenever warranty service is required, the original dated invoice (or a copy) must be presented as proof of warranty coverage. Please also include in any mailing your name, address and a description of the problem(s).
- 3. For the name of the nearest NECTECH authorized service center, call NECTECH at 800-836-0655.

#### LIMITATIONS OF LIABILITY

Except for the obligations specifically set forth in this warranty statement, we will not be liable for any direct, indirect, special, incidental, consequential, or other types of damages, whether based on contract, tort, or any other legal theory, whether or not we have been advised of the possibility of such damages.

This warranty is in lieu of all other warranties express or implied, including, but not limited to, the implied warranties of merchantability or fitness for a particular purpose.

#### **EXCLUSION OF DAMAGES**

NECTECH's liability for any defective product is limited to the repair or replacement of the product at our option. NECTECH shall not be liable for:

- 1. Damage to other property caused by any defects in this product, damages based upon inconvenience, loss of use of the product, loss of time, commercial loss; or
- 2. Any other damages whether incidental, consequential or otherwise. Some states do not allow limitation on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

# **HOW STATE LAW RELATES TO THE WARRANTY**

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

FOR MORE INFORMATION, TELEPHONE 800-836-

NEC TECHNOLOGIES, INC. 1250 N. Arlington Heights Road, Suite 500 Itasca, Illinois 60143-1248

**Note:** All products returned to NECTECH for service MUST have prior approval. To get approval, call NEC *Technologies at 800-836-0655.*

# How to Attach Options to the Plasma Monitor

You can attach your optional mounts or stand to the plasma monitor in one of the following two ways:

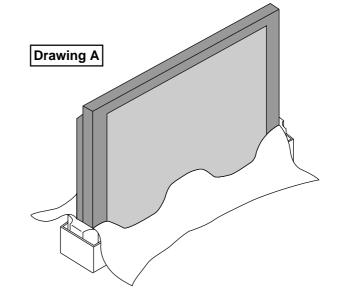

\* While it is upright. (See Drawing A)

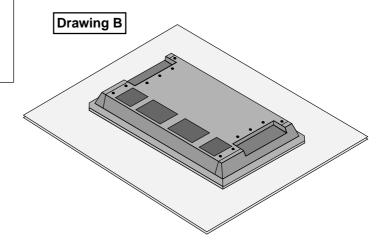

authorized NEC dealer.

- \* As it is laid down with the screen face down (See Drawing B). Lay the protective sheet, which was wrapped around the monitor when it was packaged, beneath the screen surface so as not to scratch the screen face.
  - This device cannot be installed on its own.
     Be sure to use a stand or original mounting unit. (Wall mount unit, Stand, etc)
     \* See page 2.
  - For correct installation and mounting it is strongly recommended to use a trained,

Failure to follow correct mounting procedures could result in damage to the equipment or injury to the installer.

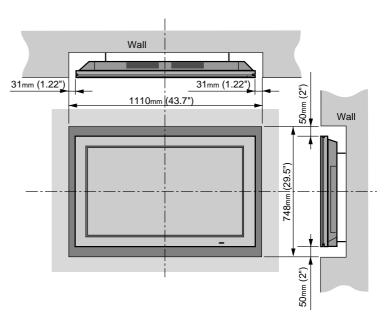

Product warranty does not cover damage caused by improper installation.

# Ventilation Requirements for enclosure mounting

To allow heat to disperse, leave space between surrounding objects as shown on the diagram below when installing.

# Introduction

# Introduction to the PlasmaSync 42MP2 Plasma Monitor

NEC's PlasmaSync™ is a seamless blend of cutting-edge visual technology and sophisticated design. At 42-inches, with a 16:9 aspect ratio, the PlasmaSync 42MP2 certainly makes a big impression. However, at a mere 3.5 inches/89mm thin, the monitor's sleek techno-art lines blend in well with your environment. PlasmaSync's crisp, vivid image quality will transform data from any graphic medium from PCs to DVD players- into art. And weighing only 70.6 lbs/32 kg, it actually can be hung almost anywhere. NEC has made sure that a host of multimedia resources can be easily connected and displayed as brilliantly as intended on the PlasmaSync™ monitor.

# The features you'll enjoy include:

- 42-inch screen
- 16:9 aspect ratio
- Capsulated Color Filter (CCF) and black matrix
- 3.5 inch / 89 mm thin
- 70.6 lbs/ 32 kg light
- High-resolution screen: 853×480 pixels
- 160-degrees of off-axis viewing, horizontally and vertically.
- Flicker and warp free display provides excellent image geometry even in screen corners
- Not affected by magnetic fields, no color drift or edge distortion.
- VGA, SVGA, XGA, SXGA(60Hz), computer signal compatibility
- NTSC, PAL, SECAM, composite and S-Video signal compatibility
- 480P, 1080I, 720P and HDTV signal compatibility
- PCs, VCRs, Laser Disc and DVD player source compatibility
- AccuBlend<sup>TM</sup> scan conversion automatically converts VGA, SVGA and SXGA signals to the panel's native resolution
- RGB input (3\*), Video input (3), DVD/HD input (2\*), Audio input (3), External Control input (1)
- AccuColor control system provides user selectable onscreen color temperature settings
- New Drive Technology
- Component video input terminal for DVD, 15.75kHz (Y, CB, CR)
- NEC's OSM<sup>TM</sup> menu-driven on screen control system that makes image adjustments a snap
- Seven languages (English, German, French, Italian, Spanish, Swedish, and Japanese)
- \* You can select RGB source or Component source for the 5BNC terminal. When selecting an RGB input, the source is switched to the RGB input (3); when selecting a component input, the source is switched to the DVD/ HD input (2).

# **Contents of the Package**

☐ PlasmaSync <sup>TM</sup> 42MP2 plasma monitor
☐ Power cord
☐ RGB cable (Mini D-Sub 15-pin to Mini D-Sub 15-pin connector)
☐ Adapter for Macintosh
☐ Remote control unit with two AAA Batteries
☐ User's manual
☐ Wired Remote cable
☐ Safety metal fitting*
☐ Screw for safety metal fitting*
$\square$ Ferrite core (small $\times$ 2, large $\times$ 1)

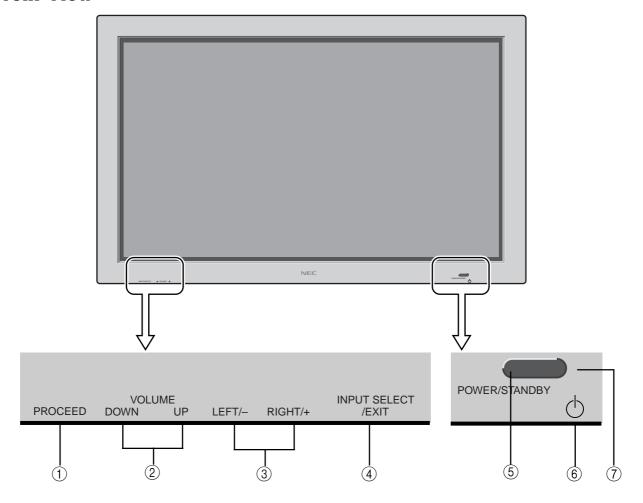

\* These are fittings for fastening the unit to a wall to prevent tipping due to external shock when using the stand (option). Fasten the safety fittings to the holes in the back of the monitor using the safety fitting mount screws.

# **Options**

- · Wall mount unit
- Ceiling mount unit
- Tilt mount unit
- Tabletop stand
- Speakers
- Others

# **Part Names and Function**

# **Front View**

# ① PROCEED

Sets the on-screen display (OSM) mode and displays the main menu.

#### (2) VOLUME Down and Up

Adjust the volume. Functions as the CURSOR ( $\triangle/\nabla$ ) buttons in the On-screen display (OSM) mode.

# ③ LEFT/- and RIGHT/+

Enlarges or reduces the image. Functions as the CURSOR  $(\blacktriangleleft / \blacktriangleright)$  buttons in the On-screen display (OSM) mode.

# **4 INPUT SELECT / EXIT**

Switches the input, in the following order:

$$\begin{array}{c} \begin{array}{c} \text{VIDEO1} \rightarrow \text{VIDEO2} \rightarrow \text{VIDEO3} \rightarrow \text{DVD/HD} - \\ \text{RGB3} \leftarrow \text{RGB2} \leftarrow \text{RGB1} \leftarrow \end{array}$$

Functions as the EXIT buttons in the On-screen display (OSM) mode.

# **5 POWER/STANDBY indicator**

When the power is on ......Lights green. When the power is in the standby mode ... Lights red.

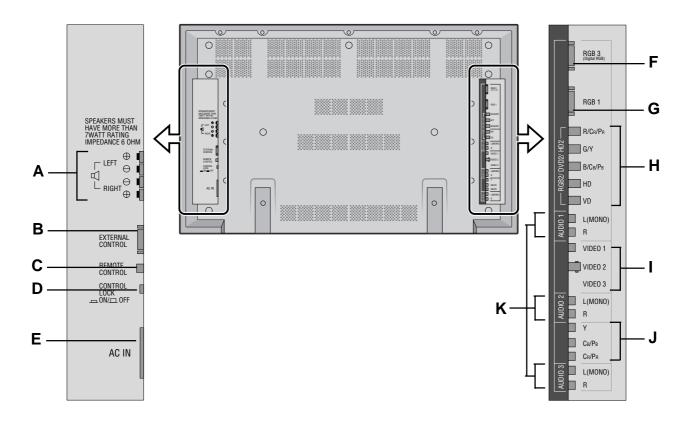

#### 6 Power

Turns the monitor's power on and off.

# **7** Remote sensor window

Receives the signals from the remote control unit.

# **Rear View/ Terminal Board**

# A EXT SPEAKER L and R

Connect speakers here.

### **B** EXTERNAL CONTROL

This terminal is used when power ON/OFF, input selection and AUDIO MUTE and other controls are operated externally (by external control). See also page 36 for external control.

# **C** REMOTE CONTROL

Connect the supplied remote cable here.

# D CONTROL LOCK

When "CONTROL LOCK" is set "ON", the buttons on the set's control panel do not function.

#### **EACIN**

Connect the included power cord here.

# F RGB3 (DVI 29pin)

Inputs a digital RGB signal (TMDS).

#### G RGB1

Inputs the analog RGB signal of personal computer, etc.

# H RGB2/ DVD2/ HD2

RGB2: Inputs the analog RGB signal.

DVD2/ HD2: Connect DVD's, high definition Laser

Discs, etc. here.

#### I VIDEO1, 2, 3

Connect VCR's, DVD's or LaserDiscs, etc. here.

# J DVD1 / HD1

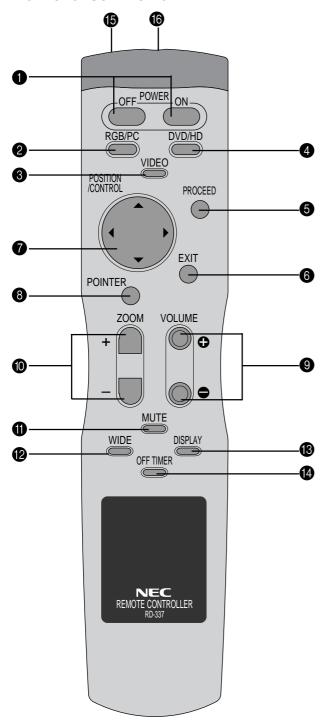

Connect DVD's high definition LaserDiscs, etc. here.

# K AUDIO1, AUDIO2, AUDIO3

These are audio input terminals.

The input is selectable. Set which video image to allot them to on the menu screen.

# **Remote Controller**

#### **1** POWER ON/OFF

Switches power on/off.

(This does not operate when POWER/STAND BY indicator of the main unit is off.

#### 2 RGB/PC

Press this button to select RGB/PC as the source.

$$\rightarrow \mathsf{RGB1} \rightarrow \mathsf{RGB2} \rightarrow \mathsf{RGB3} -$$

RGB/PC can also be selected using the INPUT SELECT button on the monitor. The input switches as follows each time the button is pressed:

$$\begin{array}{c} \rightarrow \text{VIDEO1} \rightarrow \text{VIDEO2} \rightarrow \text{VIDEO3} \rightarrow \text{DVD/HD} - \\ -\text{RGB3} \leftarrow \text{RGB2} \leftarrow \text{RGB1} \leftarrow \end{array}$$

#### **3** VIDEO

Press this button to select VIDEO as the source.

$$\stackrel{\textstyle \longrightarrow}{} \mathsf{VIDEO1} \to \mathsf{VIDEO2} \to \mathsf{VIDEO3} -$$

VIDEO can also be selected using the INPUT SELECT button on the monitor. The input switches as follows each time the button is pressed:

# 4 DVD / HD

Press this button to select DVD/HD as the source.

DVD/HD can also be selected using the INPUT SE-LECT button on the monitor. The input switches as follows each time the button is pressed:

#### 6 PROCEED

Press this button to access the OSM controls. Press this button during the display of the main menu to go to the sub menu.

### 6 EXIT

Press this button to exit the OSM controls in the main menu. Press this button during the display of the sub menu to return to the main menu.

#### **⑦** CURSOR (▲ / ▼ / ◀ / ▶)

Use these buttons to select items or settings and to adjust settings.

### **8** POINTER

Press this button to display the pointer.

#### **9** VOLUME (+ /-)

Adjust the volume.

#### **1 ZOOM** (+ /-)

Enlarges or reduces the image

# **1** MUTE

Mutes the sound.

#### **@** WIDE

The type of broadcast is detected automatically, and the recommended wide screen mode is set.

# **®** DISPLAY

Displays the source settings on the screen.

# **4** OFF TIMER

Activates the off timer for the unit.

# **(B)** Remote Jack

Insert the plug of the supplied remote cable when using the supplied remote control unit in the wired condition.

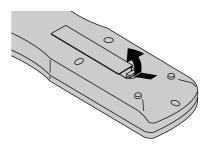

# ${}^{\hbox{\scriptsize \textcircled{\tiny 6}}}$ Remote control signal transmitter

Transmits the remote control signals.

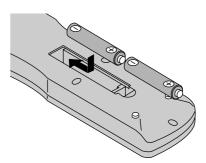

# **Battery Installation and Replacement**

Insert the 2 "AAA" batteries, making sure to set them in with the proper polarity.

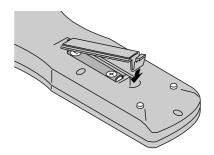

1. Press and open the cover.

2. Align the batteries according to the (+) and (-) indication inside the case.

3. Replace the cover.

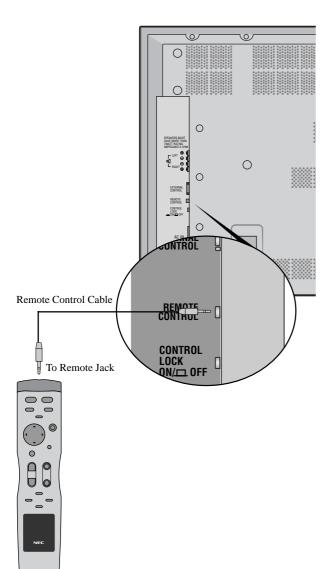

# Using the wired remote control mode

Connect the included remote control cable to the remote control unit's "REMOTE CONTROL" terminal.

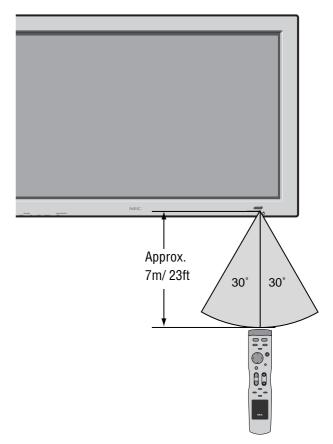

When the cable is connected, the mode automatically switches to wired remote control.

When the wired remote control mode is used, the remote control unit can be operated even if no batteries are loaded.

#### **Operating Range**

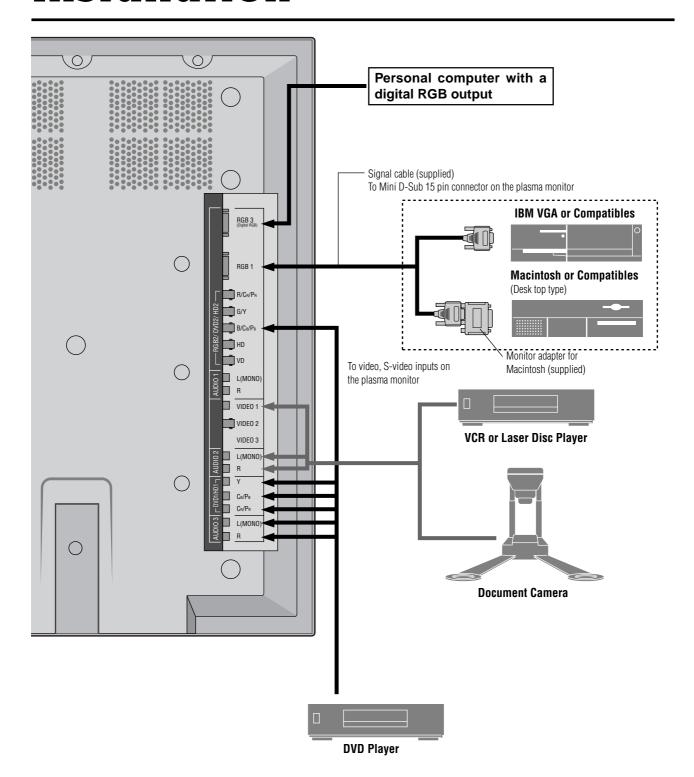

- \* Use the remote controller within a distance of about 7 m / 23ft. from the front of the monitor's remote control sensor and at a horizontal angle of within 30°.
- \* The remote control operation may not function if the monitor's remote control sensor is exposed to direct sunlight or strong artificial light, or if there is an obstacle between the sensor and the remote control unit.

# Handling the remote controller

- Do not drop or mishandle the remote control unit.
- Do not get the remote control unit wet. If the remote gets wet, wipe it dry immediately.
- Avoid heat and humidity.
- When not using the remote control unit for a long period, remove the batteries.
- Do not use new and old batteries together, or use different types together.
- Do not take apart the batteries, heat them, or throw them into a fire.
- When using the remote control unit in the wireless condition, be sure to unplug the remote cable from the RE-MOTE CONTROL terminal on the monitor.

# Installation

# **Connecting Your PC Or Macintosh Computer**

Connecting your PC or Macintosh computer to your plasma monitor will enable you to display your computer's screen image for an impressive presentation. The plasma monitor supports the signals described on page 44.

To connect to a PC, Macintosh or compatible graphics adapter, simply:

- 1. Turn off the power to your plasma monitor and computer.
- If your PC does not support XGA/SVGA/VGA you will need to install an XGA/SVGA/VGA graphics board. Consult your computer's owner's manual for your XGA/SVGA/VGA configuration. If you need to install a new board, see the manual that comes with your new graphics board for installation instructions.
- 3. The plasma monitor provides signal compatibility up to VESA 1280×1024@60Hz (SXGA). However, it is not recommended to use this resolution due to image readability on the monitors 853×480 native pixel resolution panel.
- Use the signal cable that's supplied to connect your PC or Macintosh computer to the plasma monitor. For Macintosh, use the supplied monitor adapter to connect to your computer's video port.
- 5. Turn on the plasma monitor and the computer.
- 6. If the plasma monitor goes blank after a period of inactivity, it may be caused by a screen saver installed on the computer you've connected to the plasma monitor.

When using a Macintosh with the plasma monitor, the following four display standards are supported using the included Macintosh adapter:

13" fixed mode

16" fixed mode

19" fixed mode

21" fixed mode

The 13" fixed mode is recommended for the plasma monitor.

# Connections with Equipment that has a Digital Interface

Connections can be made with equipment that is equipped with a digital interface compliant with the DVI (Digital Visual Interface) standard.

\* Use a DVI 29-pin signal cable (available separately) and the ferrite cores (supplied) when making connections to the RGB3 IN (DVI) connector of the main unit.

Note that the RGB3 IN(DVI) terminal does not support analog RGB input source.

#### Note:

- 1. Input TMDS signals conforming to DVI standards. The TMDS input corresponds to 1 link.
- 2. To maintain display quality, use a cable with a quality prescribed by DVI standards that is within 5 meters in length.

# **Connecting Your Document Camera**

You can connect your plasma monitor to a document camera. To do so, simply:

- Turn off the power to your plasma monitor and document camera.
- 2. Use a standard video cable to connect your document camera to the Video input on your plasma monitor.
- 3. Turn on the plasma monitor and the document camera.

**Note:** Refer to your document camera's owner's manual for more information about your camera's video output requirements.

# Connecting Your VCR Or Laser Disc Player

Use common RCA cables (not provided) to connect your VCR or laser disc player to your plasma monitor. To make these connections, simply:

- Turn off the power to your plasma monitor and VCR or laser disc player.
- 2. Connect one end of your RCA cable to the video output connector on the back of your VCR or laser disc player, connect the other end to the Video input on your plasma monitor. Use standard RCA audio patch cords to connect the audio from your VCR or laser disc player to your plasma monitor (if your VCR or laser disc player has this capability). Be careful to keep your right and left channel connections correct for stereo sound.
- 3. Turn on the plasma monitor and the VCR or laser disc player.

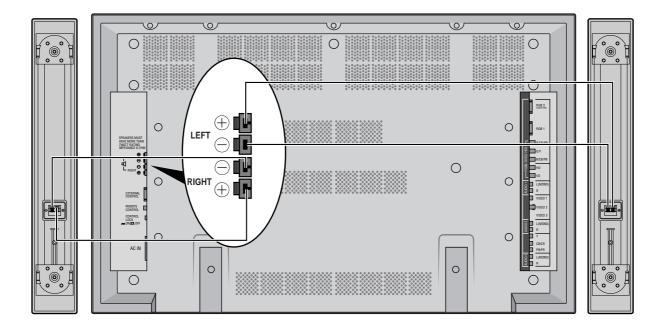

**Note:** Refer to your VCR or laser disc player owner's manual for more information about your equipment's video output requirements.

# **Connecting Your DVD Player**

You can connect your plasma monitor to a DVD player. To do so, simply:

- 1. Turn off the power to your plasma monitor and DVD player.
- Use a standard video cable to connect your DVD player to the Y, Cb, and Cr inputs on your plasma monitor.
   Or use the DVD-player's S-Video output. Use a standard S-Video cable to connect to the S-Video input on the plasma monitor.
- 3. Turn on the plasma monitor and the DVD player.

# **External Speaker Connections**

External speakers may be connected to the plasma monitor to reproduce sound from VIDEO, DVD or RGB signal sources.

External speakers may be connected directly to the SPEAK-ERS terminals or indirectly by connecting a stereo system amplifier to the audio outputs.

**CAUTION:** Unplug the plasma monitor and all connected components before connecting external speakers. Use only speakers with 6-ohm impedance and a power output rating of 7 watts or more.

To connect external speakers directly to the plasma monitor:

- 1. Strip the ends of the speaker wires.
- 2. Press down the tabs below the SPEAKERS terminals, insert the speaker wire and release the tab to secure the speaker wire connection:
  - [a] Connect the right speaker (located at right side of the monitor when viewed from the front) positive (+) wire to RIGHT +.
  - [b] Connect the right speaker negative (-) wire to RIGHT -.
  - [c] Connect the left speaker negative (-) wire to LEFT-.
  - [d] Connect the left speaker positive wire (+) to LEFT+.

# Pin Assignments and Signal Levels for 15 pin RGB (Analog)

Pin No.	Signal (Analog)			
1	Red			
2	Green or sync-on-green			
3	Blue			
4	No connection			
5	Ground			
6	Red ground			
7	Green ground			
8	Blue ground			
9	No connection			
10	Sync signal ground			
11	No connection			
12	Bi-directional DATA (SDA)			
13	Horizontal sync			
14	Vertical sync			
15	SCL			

# Pin Configuration and Signal of the RGB 3 IN Connector (DVI Connector)

The unit is equipped with a type of connector commonly used for both analog and digital.

(Functionally, this cannot be used for analog input.) (TMDS can be used for one link only)

RGB 3

Pin No.         Signal (Digital)           1         T.M.D.S Data 2 -           2         T.M.D.S Data 2 Shield           4         No connection           5         No connection           6         DDC Clock           7         DDC Data           8         No connection           9         T.M.D.S Data 1 -           10         T.M.D.S Data 1 +           11         T.M.D.S Data 1 Shield           12         No connection           13         No connection           14         +5V Power           15         Ground           16         Hot Plug Detect           17         T.M.D.S Data 0 -           18         T.M.D.S Data 0 Shield           20         No connection

# **Basic Operations**

#### **POWER**

#### To turn the unit ON and OFF:

- 1. Plug the power cord into an active AC power outlet.
- Press the POWER ON button (on the remote controller) to turn on.
  - The monitor's POWER/STANDBY indicator will light up(green) when the unit is on.
- 3. Press the POWER OFF button (on the remote controller or the unit) to turn off.

The monitor's POWER/STANDBY indicator turns red and the standby mode is set (only when turning off the unit with the remote control).

# **VOLUME**

# To adjust the volume:

- 1. Press and hold the VOLUME ▲ button (on the remote controller or the unit) to increase to the desired level.
- 2. Press and hold the VOLUME ▼ button (on the remote controller or the unit) to decrease to the desired level.

# **MUTE**

#### To cancel the sound:

Press the MUTE button on the remote controller to cancel sound; press again to restore.

#### **DISPLAY**

### To check the settings:

- 1. The screen changes each time the DISPLAY button is pressed.
- 2. If the button is not pressed for approximately three seconds, the menu turns off.

# **DIGITAL ZOOM**

Digital zoom specifies the picture position and enlarges the picture.

1. Press the pointer button to display the pointer. ( )

# To change the size of the picture:

Press the ZOOM+ button and enlarge the picture. The pointer will change to resemble a magnifying glass. (  $\mathbb{Q}$  )

A press of the ZOOM- button will reduce the picture and return it to its original size.

# To change the picture position:

Select the position with the ▲▼◀▶ buttons.

2. Press the pointer button to delete the pointer.

# **OFF TIMER**

# To set the off timer:

The off timer can be set to turn the power off after 30, 60, 90 or 120 minutes.

- 1. Press the OFF TIMER button to start the timer at 30 minutes.
- 2. Press the OFF TIMER button to the desired time.
- 3. The timer starts when the menu turns off.

$$\longrightarrow 30 \rightarrow 60 \rightarrow 90 \rightarrow 120 \rightarrow 0 -$$

# To check the remaining time:

- 1. Once the off timer has been set, press the OFF TIMER button once.
- 2. The remaining time is displayed, then turns off after a few seconds.
- 3. When five minutes remain the remaining time appears until it reaches zero.

# Canceling the off timer

- 1. Press the OFF TIMER button twice in a row.
- 2. The off timer is canceled.

#### Note:

After the power is turned off with the off timer ...
A slight current is still supplied to the monitor. When you are leaving the room or do not plan to use the system for a long period of time, turn off the power of the monitor.

# **WIDE Operations**

# Watching with a wide screen (manual)

With this function, you can select one of four screen sizes.

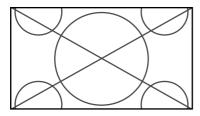

# When watching videos or digital video discs

- 1. Press the "WIDE" button on the remote controller.
- 2. Within 3 seconds ...

Press the "WIDE" button again.
The screen size switches as follows:

 $\rightarrow \textbf{ZOOM} \rightarrow \textbf{NORMAL} \rightarrow \textbf{FULL} \rightarrow \textbf{STADIUM} -$ 

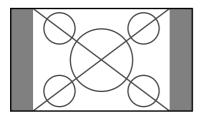

#### ZOOM size screen

The picture is expanded in the horizontal and vertical direction, maintaining the original proportions.

\* Use this for theater size (wide) movies, etc.

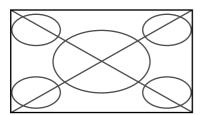

# NORMAL size screen (4:3)

The normal size screen is displayed.

\* The picture has the same size as video pictures with a 4:3 aspect ratio.

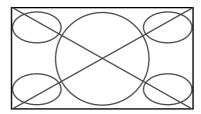

# FULL size screen

The image is expanded in the horizontal direction.

\* Images compressed in the horizontal direction ("squeezed images") are expanded in the horizontal direction and displayed on the entire screen. (Normal images are expanded in the horizontal direction.)

#### STADIUM size screen

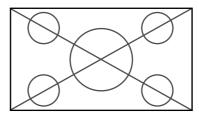

The picture is expanded in the horizontal and vertical directions at different ratios.

\* Use this for watching normal video programs (4:3) with a wide screen.

# When watching high definition video source

1. Press the "WIDE" button on the remote controller.

# FULL size screen (16:9)

The full size screen is displayed.

\* The picture has the same size as video pictures (16:9).

# Watching computer images with a wide screen

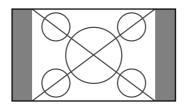

Switch to the wide screen mode to expand the 4 : 3 image to fill the entire screen.

- 1. Press the "WIDE" button on the remote controller.
- 2. Within 3 seconds ...

Press the "WIDE" button again. The screen size switches as follows:

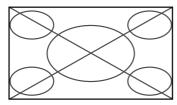

NORMAL size screen (4:3 or SXGA 5:4)

The picture has the same size as the normal computer image.

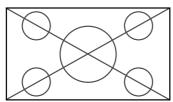

# FULL size screen

The image is expanded in the horizontal direction.

When using a graphic accelerator board that is capable of displaying  $848 \times 480$ .

# FULL size screen

#### Information

# ■ Supported resolution

- See page 44 for details on the display output of the various VESA signal standards supported by the monitor.
- When 852 dot × 480 line wide VGA (\*) signals with a vertical frequency of 60 Hz and horizontal frequency of 31.72 kHz are input, select "WIDE" for the "RGB SELECT" setting. Since selecting an 848 × 480 signal automatically displays the image in correct size, it is not necessary to change the RGB SELECT setting.
- \* "IBM PC/AT" and "VGA" are registered trademarks of IBM, Inc. of the United States.

# OSM(On Screen Menu) Controls

# **Menu Operations**

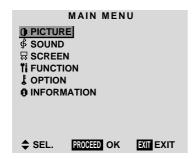

The OSM window is displayed with respect to the screen as shown on the diagram.

Depending on the screen's mode, the OSM may be displayed slightly differently.
 In the explanation, the OSM section is shown close up.

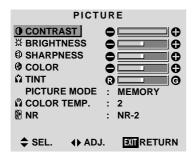

The following describes how to use the menus and the selected items.

1. Press the PROCEED button on the remote controller to display the MAIN MENU.

- 2. Press the cursor buttons ▲ ▼ on the remote controller to highlight the menu you wish to enter.
- 3. Press the PROCEED button on the remote controller to select a submenu or item.

4. Adjust the level or change the setting of the selected item by using the cursor buttons ◀ ▶ on the remote controller.

- 5. The change is stored until you adjust it again.
- 6. Repeat steps 2-5 to adjust an additional item, or press the EXIT button on the remote controller to return to the main menu.

**Note:** The main menu disappears by pressing the EXIT button.

# **Picture Settings Menu**

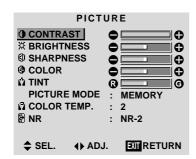

### Adjusting the picture

The contrast, brightness, sharpness, color and tint can be adjusted as desired.

Example: Adjusting the contrast

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "PICTURE", then press the "PROCEED" button.
   The "PICTURE" screen appears.
- 2. Use the  $\triangle$  and  $\nabla$  buttons to select "CONTRAST".

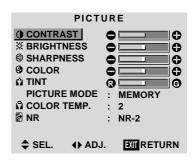

3. Use the  $\triangleleft$  and  $\triangleright$  buttons to adjust the picture.

\* If neither the ◀ or ▶ button is pressed within 5 seconds, the current setting is set and the previous screen reappears.

4. Press the "PROCEED" button. The contrast adjustment is completed.

Once the adjustment is completed ...
Press the "EXIT" button to return to the main menu.
To delete the main menu, press the "EXIT" button once
more.

**Note:** If "CAN NOT ADJUST" appears ... When trying to enter the PICTURE submenu, make sure PICTURE MODE is set to MEMORY.

#### Information

# ■ Picture adjustment screen

CONTRAST ...... Changes the picture's contrast.

BRIGHTNESS .... Changes the picture's brightness.

SHARPNESS ..... Changes the picture's sharpness.

Adjusts picture detail of VIDEO display.

COLOR ...... Changes the color density.

TINT ...... Changes the picture's tint. Adjust for natural colored skin, background, etc.

# ■ Adjusting the computer image

Only the contrast and brightness can be adjusted when a computer signal is connected.

# ■ Restoring the factory default settings

Select "RESET" under the "PICTURE MODE" settings.

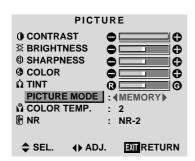

# Setting the picture mode according to the brightness of the room

There are four picture modes that can be used effectively according to the environment in which you are viewing the display.

Example: Setting the "THEATER" mode

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

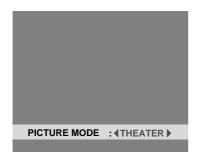

- Use the ▲ and ▼ buttons to select "PICTURE", then press the "PROCEED" button. The "PICTURE" screen appears.
- 2. Use the ▲ and ▼ buttons to select "PICTURE MODE".

3. To set to "THEATER" ...

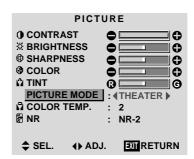

Use the  $\triangleleft$  and  $\triangleright$  buttons to select "THEATER". The mode switches as follows when the  $\triangleleft$  and  $\triangleright$  buttons are pressed:

ightarrow MEMORY  $\leftrightarrow$  THEATER  $\leftrightarrow$  NORMAL  $\leftrightarrow$  RESET  $\leftarrow$ 

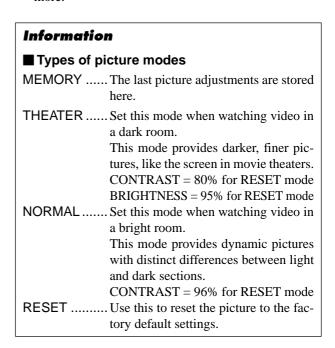

\* If neither the ◀ or ▶ button is pressed within 5 seconds, the current selection is set and the previous screen reappears.

4. Press the "PROCEED" button.
The picture mode is set to "THEATER".

Once the adjustment is completed ...
 Press the "EXIT" button to return to the main menu.
 To delete the main menu, press the "EXIT" button once more.

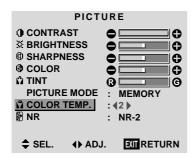

# Setting the color temperature

Use this procedure to set color tone produced by the plasma display.

Example: Setting "1"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

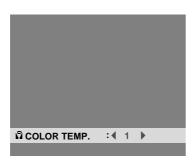

- Use the ▲ and ▼ buttons to select "PICTURE", then press the "PROCEED" button. The "PICTURE" screen appears.
- 2. Use the ▲ and ▼ buttons to select "COLOR TEMP.".

3. Use the ◀ and ▶ buttons to select "1".

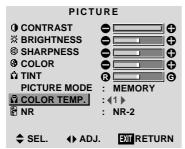

The mode switches as follows when the ◀ and ▶ buttons are pressed:

\* See page 21 to set "PRO".

If neither the  $\triangleleft$  or  $\blacktriangleright$  button is pressed within 5 seconds, the current selection is set and the previous screen reppears.

4. Press the "PROCEED" button. The "COLOR TEMP." is set to "1".

5. Once the setting is completed...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

# **■** Setting the color temperature

1 ...... High (bluer)

2 ..... Middle (Standard)

3 .....Low (redder)

# ■ Restoring the factory default settings

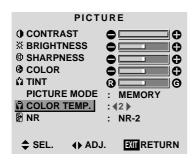

# Adjusting the color to the desired quality

Use this procedure to adjust the white balance for bright pictures and dark pictures to achieve the desired color quality.

Example: Adjusting the "WHITE BALANCE"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

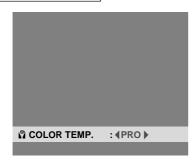

- Use the ▲ and ▼ buttons to select "PICTURE", then press the "PROCEED" button. The "PICTURE" screen appears.
- 2. Use the ▲ and ▼ buttons to select "COLOR TEMP.".

3. Use the ◀ and ▶ buttons to select "PRO".

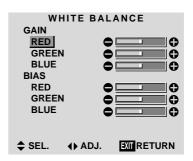

The mode switches as follows when the ◀ and ▶ buttons are pressed:

$$\rightarrow 1 \leftrightarrow 2 \leftrightarrow 3 \leftrightarrow \mathsf{PRO} \leftarrow$$

If neither the  $\triangleleft$  or  $\triangleright$  button is pressed within 5 seconds, the current selection is set and the previous screen reppears.

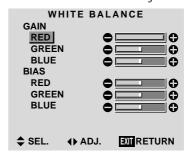

- 4. Press the "PROCEED" button.
  The "WHITE BALANCE" screen appears.
- 5. Use the ▲ and ▼ buttons to select "RED-GAIN".

6. Adjusts the white balance using the ◀ and ▶ buttons.

- \* If neither the ◀ or ▶ button is pressed within 5 seconds, the current setting is set and the previous screen reappears.
- 7. Press the "PROCEED" button.
  The white balance has now been adjusted.

8. Once the adjustment is completed...

Press the "EXIT" button to return to the main menu.

To delete the main menu, press the "EXIT" button once more.

#### Information

# ■ Adjusting the white balance

RGB-GAIN .... White balance adjustment for signal level

RGB-BIAS ..... White balance adjustment for black level

# ■ Restoring the factory default settings

Restoring the factory default settings Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults.

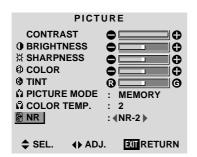

# Reducing noise in the picture

Use these settings if the picture has noise due to poor reception or when playing video tapes on which the picture quality is poor.

Example: Setting "NR-3"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "PICTURE", then press the "PROCEED" button.
   The "PICTURE" screen appears.
- 2. Use the  $\triangle$  and  $\nabla$  buttons to select "NR".

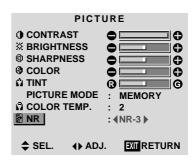

3. Use the ◀ and ▶ buttons to select "NR-3". The mode switches as follows when the ◀ and ▶ buttons are pressed:

$$\rightarrow \mathsf{OFF} \leftrightarrow \mathsf{NR-1} \leftrightarrow \mathsf{NR-2} \leftrightarrow \mathsf{NR-3} \leftarrow$$

\* If neither the ◀ or ▶ button is pressed within 5 seconds, the current selection is set and the previous screen reappears.

4. Press the "PROCEED" button.
The noise reduction mode is set to "NR-3".

5. Once the setting is completed ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

#### ■ NR

- \* "NR" stands for Noise Reduction.
- \* This function reduces noise in the picture.

# ■ Types of noise reduction

There are three types of noise reduction. Each has a different level of noise reduction.

The effect becomes stronger as the number increases (in the order NR-1  $\rightarrow$  NR-2  $\rightarrow$  NR-3).

OFF ...... Turns the noise reduction function off.

# **Sound Settings Menu**

# Adjusting the treble, bass and left/right balance

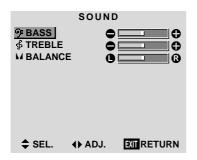

The treble, bass and left/right balance can be adjusted to suit your tastes.

Example: Adjusting the bass

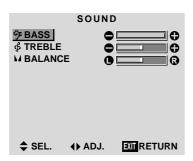

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "SOUND", then press the "PROCEED" button.
   The "SOUND" screen appears.
- $2. \ \textit{To adjust the bass} \dots$

Use the ▲ and ▼ buttons to select "BASS".

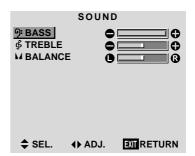

3. Adjust the bass using the  $\triangleleft$  and  $\triangleright$  buttons.

\* If neither the ◀ or ▶ button is pressed within 5 seconds, the current selection is set and the previous screen reappears.

To continue adjusting the sound ... Repeat from step 2.

4. Press the "PROCEED" button. The bass has now been adjusted.

Once the adjustment is completed ...
 Press the "EXIT" button to return to the main menu.
 To delete the main menu, press the "EXIT" button once more.

**NOTE:** If "CAN NOT ADJUST" appears... Set "AUDIO INPUT" on the OPTION menu correctly.

#### Information

# ■ Sound settings menu

BASS ......Changes the level of low frequency sound.

TREBLE ...... Changes the level of high frequency sound.

BALANCE ....... Changes the balance of the left and right channels.

# ■ Restoring the factory default settings

# **Screen Settings Menu**

Adjusting the Position, Size, Fine Picture, Picture Adj

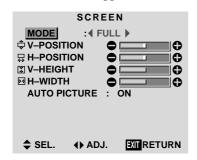

The position of the image can be adjusted and flickering of the image can be corrected.

Example: Adjusting the vertical position in the normal mode

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

1. Use the ▲ and ▼ buttons to select "SCREEN", then press the "PROCEED" button.

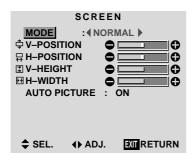

The "SCREEN" menu appears.

2. To adjust the normal mode ...

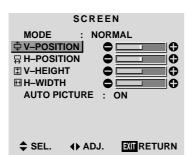

Use the  $\triangleleft$  and  $\triangleright$  buttons to select "NORMAL". The mode switches as follows when the  $\triangleleft$  and  $\triangleright$  buttons are pressed:

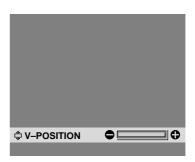

- \* The mode can also be switched by pressing the "WIDE" button on the remote controller.
- 3. To adjust the vertical position ...

Use the ▲ and ▼ buttons to select "V-POSITION".

4. Adjust using the ◀ and ▶ buttons.

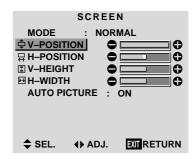

\* If neither the ◀ or ▶ button is pressed within 5 seconds, the current adjustment is set and the previous screen reappears.

To continue making other computer image adjustments ...

Repeat from step 3.

5. Press the "PROCEED" button.

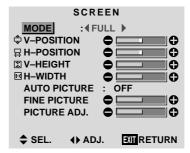

The vertical position of the computer's image has now been adjusted.

Once all adjustments are completed ...
 Press the "EXIT" button to return to the main menu.
 To delete the main menu, press the "EXIT" button once more.

#### Information

■ When "AUTO PICTURE" is "OFF"

When Auto Picture is off, the Fine Picture and the Picture ADJ items are displayed so that you can adjust them.

# Information

# ■ Adjusting the Auto Picture

ON	The Picture ADJ	and Fine Picture
	adjustments are	made automati-
	cally.	
OFF	The Picture ADJ	and Fine Picture

adjustments are made manually.

# ■ Adjusting the position of the image

V-POSITION ...... Adjusts the vertical position of the image.

H-POSITION ..... Adjusts the horizontal position of the image.

V-HEIGHT ...... Adjusts the vertical size of the image. (Except for STADIUM mode)

H-WIDTH..... Adjusts the horizontal size of the image. (Except for STADIUM mode)

FINE PICTURE\* ... Adjusts for flickering.

PICTURE ADJ\* .... Adjusts for striped patterns on the image.

- \* The Picture ADJ and Fine Picture features are available only when the "Auto Picture" is off,.
- \* The AUTO PICTURE, FINE PICTURE and PICTURE ADJ. are not available for VIDEO and HD/DVD source.

### ■ Restoring the factory default settings

Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults also restores other settings to the factory defaults except that the Auto Picture is not reset.

# **Function Settings Menu**

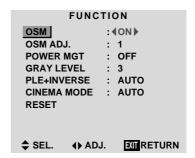

# Setting the on-screen display

When using the monitor for presentations, etc., the monitor can be set so that the input source, screen mode, etc., do not appear.

Example: Turning the on-screen display mode off

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "FUNCTION", then press the "PROCEED" button.
   The "FUNCTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "OSM".

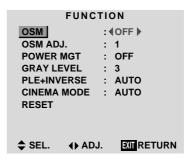

3. To turn the on-screen display mode off ...

Use the ◀ and ▶ buttons to select "OFF".

The mode switches as follows each time the  $\triangleleft$  or  $\blacktriangleright$  button is pressed:

 $ON \leftrightarrow OFF$ 

4. Once the setting is completed ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

# Information

#### **■ OSM modes**

ON ...... The on-screen display appears.

OFF ..... The on-screen display does not appear.

# ■ Restoring the factory default settings

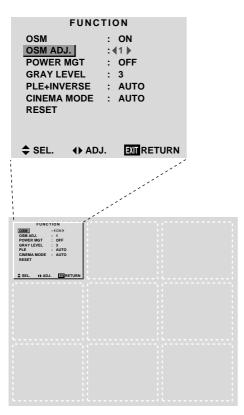

# Adjusting the position of the menu display

Use these operations to adjust the position of the menus that appear on screen.

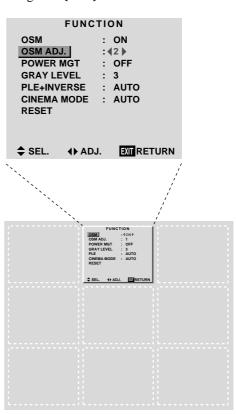

Example: Adjusting the position of the menu display

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "FUNCTION", then press the "PROCEED" button.
   The "FUNCTION" menu appears.
- 2. Use the  $\triangle$  and  $\nabla$  buttons to select "OSM ADJ."

3. *To adjust the position...* Adjust using the ◀ and ▶ buttons.

4. Once all adjustments are completed ...

Press the "EXIT" button to return to the main menu.

To delete the main menu, press the "EXIT" button once more.

# Information

# ■ Adjusting the position of the menu display

The position can be set between 1 and 9.

# ■ Restoring the factory default settings

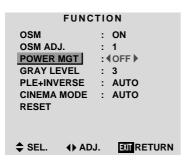

#### Setting the power management for computer images

This energy-saving (power management) function automatically reduces the monitor's power consumption if no operation is performed for a certain amount of time.

Example: Turning the power management function on

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "FUNCTION", then press the "PROCEED" button.
   The "FUNCTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "POWER MGT".

3. To turn the power management function on ...
Use the 

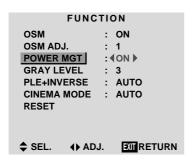

and 

buttons to select "ON".
The mode switches as follows each time the 

or 

button is pressed:

 $\textbf{ON} \leftrightarrow \textbf{OFF}$ 

4. Once the setting is completed ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

# ■ Power management function

- \* The power management function automatically reduces the monitor's power consumption if the computer's keyboard or mouse is not operated for a certain amount of time. This function can be used when using the monitor with a computer conforming to the VESA DPMS format.
- \* If the computer's power is not turned on or if the computer and selector tuner are not properly connected, the system is set to the off state.
- \* For instructions on using the computer's power management function, refer to the computer's operating instructions.

# ■ Power management settings

ON ...... In this mode the power management function is turned on.

OFF .......In this mode the power management function is turned off.

# ■ Power management function and POWER/ STANDBY indicator

The POWER/STANDBY indicator indicates the status of the power management function. See page 28 for indicator status and description.

# ■ Restoring the factory default settings

# POWER/STANDBY indicator

Power management mode	POWER/STANDBY indicator	Power management operating status	Description	Turning the picture back on
On	Green	Not activated.	Horizontal and vertical synchronizing signals are present from the computer.	Picture already on.
Standby	Orange	Activated.	No horizontal synchronizing signals are sent from the computer.	Operate the keyboard or mouse. The picture reappears immediately.
Suspend	Red	Activated.	No vertical synchronizing signals are sent from the computer.	Operate the keyboard or mouse. The picture reappears, but more time is required than from the standby mode.
Off	Red	Activated.	No horizontal or vertical synchronizing signals are sent from the computer.	Operate the keyboard or mouse. The picture reappears, but more time is required than from the standby mode or suspend mode.

#### Setting the gray level for the sides of the screen

Use this procedure to set the gray level for the parts on the screen on which nothing is displayed when the screen is set to the 4:3 size.

Example: Adjusting the "GRAY LEVEL"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- 1. Use the ▲ and ▼ buttons to select "FUNCTION", then press the "PROCEED" button. The "FUNCTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "GRAY LEVEL".

FUNCTION : ON OSM OSM ADJ. : OFF **POWER MGT** GRAY LEVEL : AUTO PI F+INVFRSF **CINEMA MODE** AUTO RESET **EXIT RETURN** SEL. **♦** ADJ.

3. To adjust the "GRAY LEVEL"...

Use the ◀ and ▶ buttons to adjust the GRAY LEVEL.

**FUNCTION** OSM : ON OSM ADJ. : 1 **POWER MGT** : OFF **GRAY LEVEL** PLE+INVERSE : AUTO **CINEMA MODE** AUTO RESET **♦** SEL. **EXIT RETURN ♦** ADJ.

5. Once the setting is completed ...

Press the "EXIT" button to return to the main menu. The delete the main menu, press the "EXIT" button once more.

#### Information

# **■ GRAY LEVEL**

This adjusts the brightness of the black (the gray level) for the sides of the screen.

The standard is 0 (black). The level can be adjusted from 0 to 15. The factory setting is 3 (dark gray).

# ■ Restoring the factory default settings

Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults.

#### Setting the brightness level to the minimum

Locking this mode allows you to dim the picture.

Example: Setting the "PLE+INVERSE" to "LOCK"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

1. Use the ▲ and ▼ buttons to select "FUNCTION", then press the "PROCEED" button. The "FUNCTION" screen appears.

2. Use the ▲ and ▼ buttons to select "PLE+INVERSE".

FUNCTION OSM : ON OSM ADJ. POWER MGT : OFF **GRAY LEVEL** : 3 PLE+INVERSE : **∢**AUTO

CINEMA MODE : AUTO RESET

\$ SEL. **EXIT RETURN** 

3. To set the PLE+INVERSE to "LOCK" ...

Use the  $\triangleleft$  and  $\triangleright$  buttons to select "LOCK". The mode switches as follows each time the ◀ or ▶

button is pressed:

 $\textbf{AUTO} \leftrightarrow \textbf{LOCK} \leftrightarrow \textbf{LOCK+ON} \leftrightarrow \textbf{AUTO+ON}$ 

**FUNCTION** : ON OSM OSM ADJ. : 1 **POWER MGT** OFF **GRAY LEVEL** : 3 PLE+INVERSE : {LOCK} CINEMA MODE : AUTO RESET **♦** SEL. **♦** ADJ. **EXIT RETURN** 

4. *Once the setting is completed* ...

Press the "EXIT" button to return to the main menu. The delete the main menu, press the "EXIT" button once more.

#### Information

### **■ PLE+INVERSE**

AUTO ...... Normally set to AUTO.

LOCK ...... Sets the brightness level to the mini-

AUTO+ON ..... Turns on the inverse function.

LOCK+ON ..... Turns on the inverse function as well as the lock function.

# ■ Restoring the factory default settings

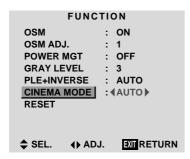

#### Setting the picture to suit the movie

The film image is automatically discriminated and projected in an image mode suited to the picture. [NTSC, PAL60, 480I(60Hz) only]

Example: Setting the "CINEMA MODE" to "ON"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- 1. Use the ▲ and ▼ buttons to select "FUNCTION", then press the "OK" button.
  - The "FUNCTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "CINEMA MODE".

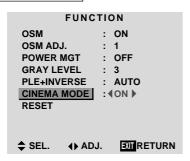

3. To set the CINEMA MODE to "ON" ...

Use the ◀ and ▶ buttons to select "ON".

The mode switches as follows each time the  $\triangleleft$  or  $\triangleright$  button is pressed:

4. Once the setting is completed ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more

#### Information

#### **■ CINEMA MODE**

#### ■ Restoring the factory default settings

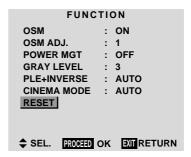

Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults.

#### Resetting to the default values

Use these operations to restore all the picture adjustments, audio settings, to the factory default values. Refer to page 17 for items to be reset.

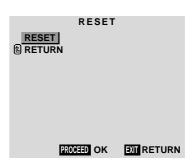

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

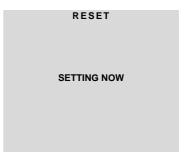

- Use the ▲ and ▼ buttons to select "FUNCTION", then press the "PROCEED" button. The "FUNCTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "RESET", then press the "PROCEED" button.

The "RESET" screen appears.

3. Use the ▲ and ▼ buttons to select "RESET", then press the "PROCEED" button.

When the "SETTING NOW" screen disappears, the screen will be restored to the previous "RESET" mode, then all the settings are restored to the default values.

4. *Once the setting is completed* ...

Press the "EXIT" button.

To delete the main menu, press the "EXIT" button once more.

## **Option Setting Menu**

#### Setting the allocation of the audio connectors

Setting the AUDIO 1, 2, and 3 connectors to the desired input.

Example: Set AUDIO 1 to RGB 2.

Press the "PROCEED" button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "OPTION", then press the "PROCEED" button.
   The "OPTION" screen appears.
- 2. Use the  $\triangle$  and  $\nabla$  buttons to select "AUDIO 1".

3. To set the AUDIO1 to "RGB2"...

Use the ▲ and ▼ buttons to select "AUDIO1".

Use the ◀ and ▶ buttons to select "RGB2".

The mode switches as follows each time the  $\triangleleft$  or  $\triangleright$  button is pressed:

ightarrow video1  $\leftrightarrow$  video2  $\leftrightarrow$  video3  $\leftrightarrow$  HD/DVD1  $\leftrightarrow$  RGB1  $\leftrightarrow$  RGB2  $\leftrightarrow$  RGB3  $\leftarrow$ 

#### OPTION **AUDIO INPUT** AUDIO1 : ◀RGB2▶ AUDIO2 : VIDEO1 AUDIO3 : HD/DVD1 **BNC SELECT** : RGB **RGB SELECT** : RGB **HD SELECT** 1080B RGB3 ADJ. **♦** SEL. **EXIT RETURN ♦** ADJ.

4. Once setting is completed...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

#### **AUDIO INPUT**

A single audio input cannot be selected as the audio channel for more than one input terminal.

## ■ Restoring the factory default settings

Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults.

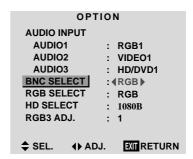

#### **Setting the BNC connectors**

Select whether to set the input of the 5 BNC connectors to RGB or component.

Example: Set the BNC SELECT mode to "COMP."

Press the "PROCEED" button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "OPTION", then press the "PROCEED" button.
   The "OPTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "BNC SELECT".

3. To set the BNC SELECT mode to "COMP"...

Use the  $\triangleleft$  and  $\triangleright$  buttons to select "COMP".

The mode switches as follows each time the ◀ or ▶ button is pressed:

 $\mathsf{RGB} \leftrightarrow \mathsf{COMP}.$ 

4. Once setting is completed...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

#### **■ BNC SELECT**

■ Restoring the factory default settings

Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults.

## Setting a computer image to the correct RGB select screen

On the computer image select the RGB mode, moving image (video) mode, wide mode or digital broadcast.

Example: Setting the RGB SELECT mode to "VIDEO"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "OPTION", then press the "PROCEED" button.
   The "OPTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "RGB SELECT".

3. To set the RGB select mode to "VIDEO" ...

Use the ◀ and ▶ buttons to select "VIDEO".

The mode switches as follows each time the  $\triangleleft$  or  $\blacktriangleright$  button is pressed:

$$ightarrow$$
 RGB  $\leftrightarrow$  VIDEO  $\leftrightarrow$  WIDE  $\leftrightarrow$  DTV  $\leftarrow$ 

4. Once the setting is completed ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

#### ■ RGB SELECT modes

One of these 4 modes must be selected in order to display the following signals correctly.

RGB .......VESA 640×480@60Hz (Use this mode for normal computer images.)

VIDEO ..... To display the video signal that is converted to the RGB signal, set this mode.

WIDE ....... When an 852 dot × 480 line signal with a horizontal frequency of 31.72 KHz is input, the image may be compressed horizontally. To prevent this, set RGB SELECT to WIDE.

DTV ...... Set this model when watching digital broad casting (480P).

#### ■ Restoring the factory default settings

Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults.

## Setting high definition images to the suitable screen size

Use this procedure to set whether the number of vertical lines of the input high definition image is 1035 or 1080.

Example: Setting the "1080B" mode to "1035I"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "OPTION", then press the "PROCEED" button.
   The "OPTION" screen appears.

2. Use the  $\triangle$  and  $\nabla$  buttons to select "HD SELECT".

3. To set the HD SELECT mode to "10351" ...

Use the ◀ and ▶ buttons to select "1035I".

The mode switches as follows each time the ◀ or ▶ button is pressed:

$$-1080A \leftrightarrow 1080B \leftrightarrow 1035I -$$

ОРТ	TION
AUDIO INPUT	
AUDIO1	: RGB1
AUDIO2	: VIDEO1
AUDIO3	: HD/DVD1
BNC SELECT	: RGB
RGB SELECT	: RGB
HD SELECT	: <b>∢</b> 1035I ▶
RGB3 ADJ.	: 1
♦ SEL. ♦ AD	J. EXIT RETURN

4. Once the setting is completed ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

#### **■ HD SELECT modes**

These 3 mode are not displayed in correct image automatically.

1080A ...... Special Digital broadcasts (for example : DTC100)

1080B ...... Standard digital broadcasts

10351...... Japanese "High Vision" signal format

#### Adjusting the display position in the RGB3 input mode

If the image is not stable when in the RGB3 input mode, switch the "RGB3 ADJ." number to 2 or 3.

Example: Setting the "1" mode to "2"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "OPTION", then press the "PROCEED" button.
   The "OPTION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "RGB3 ADJ.".

3. To set RGB3 ADJ. mode to "2"...

Use the ◀ and ▶ buttons to select "2".

The mode switches as follows when the  $\triangleleft$  or  $\blacktriangleright$  buttons are pressed:

4. Once the adjustment is completed ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

#### Information

#### RGB3 ADJ.

The display position will change when the number is changed; when using the unit with "AUTO PICTURE" ON, switch it OFF and then back ON again to return the display position to its original location.

When using the unit with "AUTO PICTURE" OFF, please perform the display position adjustment again.

#### Restoring the factory default settings

Select "RESET" under the function menu. Note that this also restores other settings to the factory defaults.

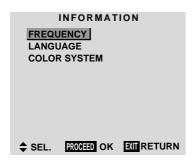

#### **Information Menu**

# Checking the frequencies and polarities of input signals

Use this function to check the frequencies and polarities of the signals currently being inputted from a computer, etc.

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "INFORMATION", then press the "PROCEED" button. The "INFORMATION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "FREQUENCY", then press the "PROCEED" button.

3. The frequency is displayed.

# FREQUENCY H. FREQ : 37.5KHz V. FREQ : 75.0Hz H. POL : NEG. V. POL : NEG.

- \* Press the "EXIT" button to return to the previous screen.
- Once you have checked the frequency ...
   Press the "EXIT" button to return to the main menu.
   To delete the main menu, press the "EXIT" button once more.

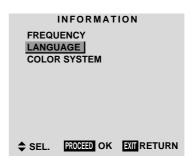

#### Setting the language for the menus

The menu display can be set to one of seven languages: Japanese, English, German, French, Swedish, Italian or Spanish.

Example: Setting the menu display to "DEUTSCH"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "INFORMATION", then press the "PROCEED" button. The "INFORMATION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "LANGUAGE", then press the "PROCEED" button.

The "LANGUAGE" screen appears.

3. To select " DEUTSCH " ...

Use the ◀ and ▶ buttons to select "DEUTSCH".

The mode switches as follows when the ◀ and ▶ buttons are pressed:

- 4. Press the "PROCEED" button.
  The display language is switched to Deutsch.
- Once the setting is completed ...
  Press the "EXIT" button to return to the main menu.
  To delete the main menu, press the "EXIT" button once
  more.

# Information ■ Language settings ENGLISH ...... English DEUTSCH ..... German FRANÇAIS ..... French ESPAÑOL .... Spanish ITALIANO .... Italian SVENSKA ... Swedish 日本語 ..... Japanese

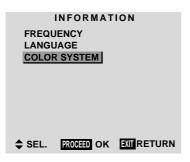

#### Setting the video signal format

Use these operations to set the video signal format.

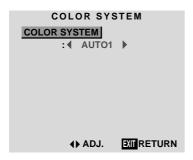

Example: Setting the video signal format to "3.58 NTSC"

Press the PROCEED button on the remote controller to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "INFORMATION", then press the "PROCEED" button. The "INFORMATION" screen appears.
- 2. Use the ▲ and ▼ buttons to select "COLOR SYSTEM", then press the "PROCEED" button.

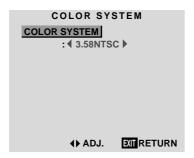

The "COLOR SYSTEM" screen appears.

3. To select "3.58 NTSC" ...

Use the ◀ and ▶ buttons to select "3.58 NTSC". The mode switches as follows when the ◀ and ▶ buttons are pressed:

 $\overset{\rightarrow}{\rightarrow} \mathsf{AUTO1} \leftrightarrow \mathsf{AUTO2} \leftrightarrow 3.58\mathsf{NTSC} \leftrightarrow 4.43\mathsf{NTSC} \leftarrow \\ \overset{\rightarrow}{\rightarrow} \mathsf{SECAM} \leftrightarrow \mathsf{PAL-M} \leftrightarrow \mathsf{PAL-N} \leftrightarrow \mathsf{PAL60} \leftrightarrow \mathsf{PAL} \leftarrow$ 

4. *Once the setting is completed* ...

Press the "EXIT" button to return to the main menu. To delete the main menu, press the "EXIT" button once more.

The color system is set to "3.58 NTSC".

#### Information

#### ■ Video signal formats

Different countries use different formats for video signals. Set to the format used in your current country.

AUTO1/2 ...... The video signals are automatically detected and the format is set accordingly.

AUTO1: 3.58NTSC, 4.43NTSC, PAL, SECAM, PAL60

AUTO2: PAL-M, PAL-N, 3.58NTSC

PAL(B.G) ...... This is the standard format used mainly in the United Kingdom and Germany.

SECAM ...... This is the standard format used mainly

in France and Russia.

4.43 NTSC,

PAL60 ...... This format is used for videos in countries using PAL and SECAM video sig-

nals.

3.58 NTSC .... This is the standard format used mainly in Japan and the United States.

PAL-M......This is the standard format used mainly in Brazil.

PAL-N ...... This is the standard format used mainly in Argentina.

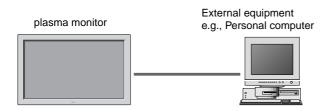

# **External Control**

## **Application**

These specifications cover the communications control of the plasma monitor by external equipment.

#### **Connections**

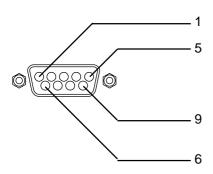

Connections are made as described below.

 Connector on the plasma monitor side: EXTERNAL CONTROL connector.

#### Type of connector: D-Sub 9-pin male

No.	Pin Name
1	No Connection
2	RXD (Receive data)
3	TXD (Transmit data)
4	DTR (DTE side ready)
5	GND
6	DSR (DCE side ready)
7	RTS (Ready to send)
8	CTS (Clear to send)
9	No Connection

2) Connector on the external equipment side: Serial port (RS-232C) connector

See the specifications of the equipment that is to be connected for the type of connector and the pin assignment.

#### 3) Wiring

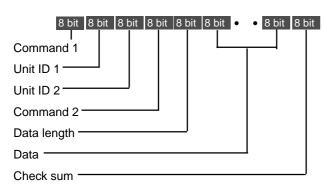

#### Use a crossed (reverse) cable.

Wire the cable so that each pair of data lines cross between the two devices. These data line pairs are RXD (Receive data) and TXD (Transmit data), DTR (DTE side ready) and DSR (DCE side ready), and RTS (Ready to send) and CTS (Clear to send).

## **Communication Parameters**

(1) Communication system	Asynchronous
(2) Interface	RS-232C
(3) Baud rate	9600 bps
(4) Data length	8 bits
(5) Parity	Odd
(6) Stop bit	1 bit
(7) Communication code	Hex

#### **Communication Format**

#### Command 1

Command 1, along with command 2, is a number used to distinguish each command.

In the case of ACK, when the lower order 4 bits is FH (as in 3FH and 7FH), this indicates that the commands and data of the supported equipment have been received. When the lower order 4 bits is BH (as in 3BH and 7BH), this indicates that unsupported commands and data have been received.

#### Unit ID 1 and Unit ID 2

Unit ID 1 and unit ID 2 are numbers used to identify the equipment that is to be connected.

60H is used for the plasma monitor and 80H is used for external control equipment such as a personal computer.

- 1) Unit ID 1: Indicates the equipment sending the signal
- 2) Unit ID 2: Indicates the equipment receiving the signal

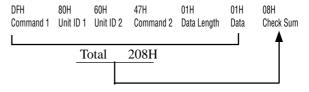

#### Command 2

Command 2, along with command 1, is a number used to distinguish each command.

#### Check Sum (CKS), Error Processing, and ACK

 The check sum described below and RS-232C odd parity are used together for a check of the received data. The check sum is the lower order 8 bits of one frame of sent or received data comprising the sum total of Command 1, Unit ID 1 and 2, Command 2, Data Length, and Data.

#### **Check Sum Example**

- 2) Error Processing
  - When the communication interval is vacant for more than 4 ms, thereafter a received Command 1 will be recognized. If, at this time, meaningful data cannot be recognized, that data will not be recognized (as valid data).
  - An ACK will not be returned unless the receive data error, the check sum error, and the receive data are all taken in.

## **Command Reference List**

		CMD1	CMD2	LEN
01.	Power ON	9FH	4EH	00H
02.	Power OFF	9FH	4FH	00H

# **Troubleshooting**

If the picture quality is poor or there is some other problem, check the adjustments, operations, etc., before requesting service.

Symptom	Checks	Remedy
Picture is disturbed. Sound is noisy. Remote control unit operates erroneously.	Is a connected component set directly in front or at the side of the display?	Leave some space between the display and the connected components.
The remote controller does not work.	Are the remote controller's batteries worn out?	Replace both batteries with new ones.
Monitor's power does not turn on when the remote controller's power button is	Is the monitor's power cord plugged into a power outlet?	Plug the monitor's power cord into a power outlet.
pressed.	Are all the monitor's indicators off?	Press the power button on the monitor to turn on the power.
	Are the remote controller's batteries worn out?	Replace both batteries with new ones.
Monitor does not operate when the remote controller's buttons are pressed.	<ul> <li>Is the remote controller pointed at the monitor, or is there an obstacle between the remote controller and the monitor?</li> </ul>	Point the remote controller at the monitor's remote control sensor when pressing but- tons, or remove the obstacle.
	<ul> <li>Is direct sunlight or strong artificial light shining on the monitor's remote control sensor?</li> </ul>	Eliminate the light by closing curtains, pointing the light in a different direction, etc.
	Are the remote controller's batteries worn out?	Replace both batteries with new ones.
	The remote cable is plugged into the REMOTE IN terminal (Wired)	Unplung the remote cable from the monitor.
	The front panel buttons of the main unit do not function.	The front panel buttons do not function during Control Lock.
No sound or picture is produced.	Is the monitor's power cord plugged into a power outlet?	Plug the monitor's power cord into a power outlet.
Picture appears but no sound is produced.	<ul> <li>Is the volume set at the minimum?</li> <li>Is the mute mode set?</li> <li>Are the speakers properly connected?</li> <li>Is AUDIO INPUT set correctly?</li> </ul>	Increase the volume.     Press the remote controller's mute button.     Connect the speakers properly.     Set AUDIO INPUT on the OPTION menu
	,	correctly.
Poor picture with VIDEO signal input.	Improper control setting.     Local interference.     Cable interconnections.     Input impedance is not correct level.	Adjust picture control as needed.  Try another location for the monitor.  Be sure all connections are secure.
Poor picture with RGB signal input.	Improper control setting.     Incorrect 15 PIN connector pin connections.	Adjust picture controls as needed. Check pin assignments and connections.
Tint is poor or colors are weak.	Are the tint and colors properly adjusted?	Adjust the tint and color (under "PICTURE").
Nothing appears on screen.	Is the computer's power turned on?  Is a power semperted?	<ul><li>Turn on the computer's power.</li><li>Connect source to the monitor.</li></ul>
	<ul><li>Is a source connected?</li><li>Is the power manager function in the standby or off mode?</li></ul>	Operate the computer (move the mouse, etc.).
Part of picture is cut off or picture is not centered.	Is the position adjustment appropriate?	Adjust the "SCREEN" properly.
Image is too large or too small.	Is the screen size adjustment appropriate?	Press the "WIDE" button on the remote controller and adjust properly.
Picture is unstable.	• Is the computer's resolution setting appropriate?	Set to the proper resolution.
POWER/STANDBY indicator is lighted in orange or red.	<ul> <li>Horizontal and / or vertical sync signal is not present when the Intelligent Power Manager control is on.</li> </ul>	Check the input signal.
POWER/STANDBY indicator is blinking in red.	The temperature inside the main unit has become too high and has activated the protector.	Promptly switch off the power of the main unit and wait until the internal temperature drops. See*1.
POWER/STANDBY indicator is blinking in green.		Prompty switch off the power of the main unit. See *2.

<sup>\*1</sup> Overheat protector

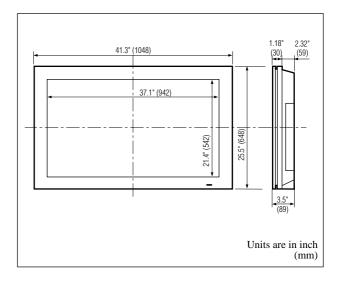

If the monitor becomes too hot, the overheat protector will be activated and the monitor will be turned off. If this happens., turn off the power to the monitor and unplug the power cord. If the room where the monitor is installed is particularly hot, move monitor to a cooler location and wait for the monitor to cool for 60 minutes. If the problem persists, contact your NEC dealer for service.

<sup>\*2</sup> In the following case, power off the monitor immediately and contact your dealer or authorized NEC Center.

The monitor turns off 5 seconds after powering on and then the POWER/STANDBY indicator blinks. It indicators that the power supply circuit or, one more fans have been damaged.
