Login Information -

First you have to Login for use of this software-

For this- you have to enter accurate “User Name” and “Password No” (that you have entered early).

New User:

At first you have to Log In by your user Name or Password.

If you are first time as user then you have to go Administrator → User → A new window → Click New Button → Enter User Name → Enter → Password Reenter Password → Click OK.

[illegible]

Operation: At First users have to enter his/her ID/Name. After that he/she has to enter a new password and Re-Enter the same no. to Confirm Password field (because he/she is the first user so he/she has no need to enter Current Password field).

Change Password Window:

Change Password

User ID:

Current Password:

New Password:

Confirm Password:

Ok Cancel

Operation: If you forget your ID/Name, you have to enter a new password and Re-Enter the same no. to Confirm Password field (because he/she is the first user so he/she, does not need to enter Current Password field).

Common Operations:

View: On left side of the window lists the customer/Product/Product Type/Sales List etc. click any Name to view details info on the right side.

New: click new button then all fields will be blank, and then enter your required value/Name, group serial (for sorting). After entering all data. Click Save button then a confirmation dialogue will appear click yes to save or no to discard. If you want to cancel adding new field value click on cancel button (as new button is changed to cancel).

Edit: click edit button then modify field value/Name information then click Save button then a confirmation dialogue will appear click yes to save or no to discard. If you want to cancel editing Name/Value click on cancel button (as edit button is changed to cancel).

Save: After Clicking Add or Edit Button this button will be enabling and click that button to save. A confirmation dialogue will appear and click “yes” to Save or “Cancel” to discard.

Delete: Click Delete button to delete the selected Name/Value. A confirmation dialogue will appear and click “yes” to Save or “Cancel” to discard.

Close: Click close button to exit from that window.

Note: If the field value has any customer’s Name relation with data then the customer group cannot be deleted.
